American Railroad Journal.

Saturday, November 1, 1873.

Stock Exchange and Money Market.

There has been substantial progress reported during the week in the financial line toward a restoration of strength and confidence. The city banks have been steadily gaining in the line of their legal tender reserve, and are now much better off in this respect than they have been at any time since the September disturbances. Lenders have been more accommodating in their views, and call loans, on satisfactory collatrals, have been of easier negotiation on the basis of the legal rate of 7 per cent to the best class of borrowers, with a fractional commission added in the instances of other advances on railway and miscellaneous securities in a controllable form. The discount market has been rather more active, some improvement having been noted in the demand for the choicest grades of business paper, which have been rated at 12@15 per cent per annum. The Treasury Department has resolved on the disbursement of silver, in qualified amounts, in liquidation of actual claims against it—but not in exchange for currency. The order of the Secretary of the Treasury contemplates the payment of $5 in silver, on each claim liquidated. This measure has again awakened to vigorous activity the political economists of the daily press, who have reviewed with energy, the discussion of the question of specie payments, and the practicability and wisdom of their prompt and full resumption. Meanwhile more than ordinary interest is attached to the Washington reports, relative to the policy and views of the chief director of the national finances.

We observe that Col. Scott, Vice President of the Pennsylvania Railroad Company, has returned from his late European trip. As everybody is already aware, he went over in the interest of the several railroads he is so largely concerned in. His special purpose, we believe, was to raise funds for continuing the construction of some and enlarging the working capacity of one or more of the others. In this he was only partially successful. He negotiated a loan of ten millions for the use of the Pennsylvania Railroad Company but by reason of the money panic occurring here just at the most inopportune time, when Col. Scott was at the turning point in his negotiations, his efforts to realize means to complete his Texas Pacific line were frustrated for the time being. Still, it is said he secured sufficient material aid to continue work thereon right along without any stoppage whatever. The foregoing will indeed be glad tidings to probably 15,000 people who depend upon the labor of their hands, along the lines of those two roads, for their means of subsistence, no less than to those more directly interested.

It is stated in this connection, that there is now very little doing in American railroad securities in the European markets, but it is confidently believed there will very soon be a revival of confidence, and consequently an increasing activity in that direction. The present dormant, stagnant state of things cannot long continue, for capital soon gets tired of lying completely idle, and will seek legitimate employment.

The opinion is pretty freely expressed in railroad circles that the present troubles will, after all, work good to all the real, sound railroad enterprises of the country, by weeding out the unsound and spurious; while still others, that by themselves are weak, will either consolidate, or fall into the hands of older companies, and thus obtain the means of pushing through and planting themselves on a sound basis.

In any event we think good will result, and the lessons of the trying ordeal through which we are passing, that are being at this time so severely taught us, it is hoped may be profitable through all future time.

The cash balances in the Treasury Department on Monday were: Currency, $3,164,530; special deposits of legal tenders for the redemption of certificates of deposit, $11,930,000; coin, $81,868,513. Coin certificates, outstanding, $29,147,400. Outstanding legal tenders, $360,284,888.

The U. S. Sub-Treasury, last week, enlarged its currency balance $432,667, and its coin reserve $1,766,692. Its currency balance at the close of the week was $2,890,664; and its coin reserve $49,777,884.

Gold has been moderately active, opening more firmly, but closing heavily. The speculative inquiry has been fair; while the customs call has been about the usual average. There has been no

export movement of importance. The extremes of the price have been 108@108¾, closing on Wednesday at 108½ as against 108½ on Wednesday of the preceding week. The specie outflow, last week, was only $382,972. The imports of specie last week were $2,745,068, and since Jan. 1, $12,951,438, as against $5,301,492 same time last year.

The past week's imports of specie at this port embraced of: United States Coin—Silver, $17,638; Gold, $67,440; And of Foreign Coin—Silver $7,827; Gold, $1,919,529; Bullion, $733,134.

Government is now disbursing quite freely, without rebate, the November coin interest on the public debt, the aggregate of which is about $15,000,000. There is also $15,000,000 principal of the bonds of 1862 to be paid off in Gold after Nov. 16, and while the larger portion of these bonds may be exchanged in London for the new 5 per cents, it is quite certain that a very considerable amount will be drawn in Gold from the local Treasury Office and the Gold turned into currency or exchange, in the New York market.

The amount of Gold Interest falling due November First on the United States 5 20 Bonds is, at all the Treasury Offices, precisely $12,000,000, or three per cent on $400,000,000 Bonds of 1862, 1864, and 1865, May and November, as they appear on the First of October Schedule of the Public Debt. The amount due, 1¼ per cent, quarterly on the New 5 per cents, is $3,425,000.

The customs demand for Gold last week, averaged $318,000 a day. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $106,028,602, against $127,218,269 during the same time in 1872. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $56,058,673, against $64,700,300 during the same time in 1872. The export drain of specie since January 1, 1873, has been $43,309,445 against $62,775,530 during the same portion of 1872.

Foreign Exchange has been quoted lower, on a freer offering of bills, and a moderate inquiry from all sources. Bankers' sixty day bills on London closed on Wednesday at 106¼@106½; sight bills on London, at 107¼@107¾. The week's exports of Domestic Produce have been to the currency value of nearly 6½ millions.

Government securities have been less active, and toward the close weaker in price, in sympathy with the lower range of Gold, though an improvement realized early in the week was not wholly lost.

U. S. sixes of 1881 closed on Wednesday of this week at 113@113½; U. S. Five-Twenties of 1862, 107@107¼; U. S. Five-Twenties of 1864 at 108@108¼; U. S. Five-Twenties of 1865 108½@108¾; U. S. Five-Twenties of 1865 consolidated 111¼@111¾; U. S. Five-Twenties of 1867, 112¾@113¼; U. S. Five-Twenties of 1868, 112¾@113¼; U. S. Ten-forties at 106½@107; U. S. Fives of 1881 (Funding Loan) 108⅛@108⅜; Six per cent. currency Sixes from 109⅜@109⅝.

Business in Railway and Miscellaneous securities has been moderately active, but much depressed in price during most of the week; though the later dealings indicated a stronger range.

State and Railway bonds have been in rather more request and values have shown more steadiness. Central Pacific first mortgage six per cents closed at from 87½@89.

Messrs. Fisk & Hatch have made very encouraging progress in the satisfactory adjustment of their affairs, a large number of banks, their principal creditors, having quite promptly accepted their proposition. We anticipate the pleasure of being enabled to announce their resumption of business very speedily.

The import entries of foreign merchandise, at at New York, including dry goods amount for the past week to $5,830,093, as compared with $7,459,511 same week last year. The exports of domestic produce are $6,404,434, as against $5,470,104 last year. The exports of Gold and Silver $382,971, as against $1,416,535 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,909,900, comparing with $2,247,800 same week in October 1872.

A fairly active business has been reported in the line of domestic produce. Breadstuffs, Cotton, Wool, Tobacco, and Petroleum have been quoted lower. Provisions and Naval Stores have shown more firmness toward the close. Live Stock have been quoted about steady. Foreign goods have been generally quiet. Copper and sugars have been more sought after, the former at firmer rates, and the latter at a slight reduction. In the Metal trade, there has been universal depression, with cash buyers in especial favor. Lake Ingot Copper has been quoted down to 22½c., cash, with sales reported of 100,000 lbs. Copper Sheathing and Yellow Metal nominally as before. Scotch Pig iron has been offered with more freedom. The demand, however, has been quite limited, and values weak and irregular; 150 tons Glengarnock sold, part at the low rate of $39 50, cash. American Pig-iron is dull and quite heavy, under increased pressure to place supplies, forwarded in part directly on account of producers; no important dealings reported. Wrought Scrap-iron is inactive and nominal. Bar-iron is slow of sale, and somewhat irregular as to values; refined in limited supply. Iron Rails are selling slowly, and are depressed in price. Some inquiry has been noted for Russian Sheet-iron on the basis of 17¾c., gold; the last sale was at this rate. We quote nominally: Eglinton Pig at $39@$41; Glengarnock, $39 50@$42; Coltness, 45@$48; Gartsherrie, $48; No. 1 American Pig at $35@$37; No. 2 do., at $31@$33; Gray Forge, $28; English, Rails at $63@$65, gold; American Rails (nominal) at works, $70@$75; Wrought scrap, $40 from dock. Pig-Lead has been in slack request, with foreign quoted at 7c., gold for ordinary, and domestic at 6⅔c.@6½c., gold; Bar, 9½c.; Sheet and Pipe, 10½c. Spelter is in limited demand at 7½c.@7¾c., gold, for foreign. Pig-Tin has been sparingly sought after, with Straits, quoted at 29c.@29½c.,; English, at 27c., refined do. at 28c.@28¼c.; Banca at 33c.@33½c., gold; Charcoal Plates quoted at $9 50@$10; Charcoal Terne, $9 50@$9 75; Coke, $7 25@$8; Coke Terne, $7@$7 75, gold, per box. Zinc nominal at 9¾c.@10c. per lb. Ocean freights have been quoted stronger, with room on berth and charter offered much less freely, while the demand for accommodation has been good, especially from shippers of Breadstuffs, Cotton, Provisions and Tobacco. The week's exports hence of Domestic Produce and miscellaneous goods have been to the liberal value of $6,404,434—of which the aggregrate to Liverpool was $1,819,308; London, $656,596; Bristol, $249,761, Cork and Queenstown, $667,029; Antwerp, $210,304; Bremen, $289,277; Hamburg, $501,722; Rotterdam, $217,406; Marseilles, $120,859; Cuba, $144,314; Hayti, $119,431; British North American colonies, $120,776, as the most important items.

At the auction sale of Scranton Coal on Wednesday, 75,000 tons were disposed of at a shade easier prices, the range having been from $4 80@$5 45, as against $4 80@$5 47¼ per ton at the September sale.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Toledo, Peoria and Warsaw 1st mort., E. D. 80; do. W. D., 77½; Canada Southern 1st mort., 60; Morris and Essex const. bonds 83; Boston, Hartford and Erie 1st mort., 21½; Ohio and Miss. consol., S. F., 85; Gt. Western 1st mort., 1888, 91; Pacific R. R. 7s, guar. by Mo., 92; Lake Shore div. bonds, 81; Am. Dock and Imp. 7s, 93; Long Dock bonds 90; Delaware, and Hudson Canal reg. 6s, 1891, 100; Central Pacific State-aid bonds, 100; New York and New Haven 6s, 95; Central of New Jersey 1st mort., new, 102; Delaware, Lackawanna and Western 7s, conv., 94; St. Louis and Iron Mt. 1st mort., 90; Michigan Central 7s, 95; New Jersey R. R., 114; Pacific R. R., of Mo., 31; Atlantic and Pacific pref., 13; Western Union Telegraph, 52½; do. 7s, 87¾; Quicksilver pref., 27; Consol. Coal of Md. 42; Pennsylvania Coal, 245; Am. Mer. R., 10@18; George's Creek Coal, 100@135.

Union Pacific Railroad.

Application was made last April before Judge Barrett, by counsel for Samuel L. Treadwell, to compel an accounting of the profits of the contract for building the Central Branch, Union Pacific Railroad. A motion is now before the court for a commission to take important testimony of witnesses residing out of the State. This suit will come off at the December term, and the railroad company have issued a circular to the holders of the first mortgage bonds of the company. The circular is as follows:

The board of directors have determined to ask the holders of the first mortgage bonds to fund the first seven coupons maturing subsequent to the 1st of November. For this purpose a series of bonds, called coupon bonds, have been prepared, numbering from 1 to 1,600, and therefore corresponding in number to the first mortgage bonds. These bonds will be for the following amounts, each:

Seven coupons, gold	$210 00
Interest on said coupons, from date of maturity to Nov. 4, 1876, at six per cent., gold	18 90
Total	$228 90

And from and after Nov. 1, 1876, will bear interest at six per cent., with coupons attached, principal and interest payable in gold.

Wood Preserving.

Those railroad people who have been writing us on the subject are informed that there are several patented plans or processes for rendering wood weather proof, whether the structures be bridges, sleepers, ties or any other structure exposed to all kinds of weather. But we have not as yet been able to find the necessary time for investigating the various claims to superiority in this respect, and hence do not at present feel willing to endorse or recommend either this or that system. We certainly think if any party has a good and well tested thing in this line, something they are willing to stand by, they will do well to make the facts known through the appropriate medium to the various railroad companies of the Country.

Rendering Wood Incombustible.

In reply, once for all, to several inquiries at this office, we would say that we do know of a cheap and reliable method of making wood, or any kind of building, not only incombustible but indestructible, as well. And further, any responsible party requesting it, and giving us the proper data, shall be furnished with estimates of cost and all necessary particulars for the execution of any job, large or small.

Imperishable Metal Coating.

Any person desiring it, will be furnished from this office, with the proper information, and working estimates when required, necessary to render iron and any and every kind of metal perfectly indestructible as against fire, water and weather, and also proof against all action of salt water, from lying in the ground, &c.

☞ Governor Smith, T. W. Park and other magnates of the Central Vermont Railroad, with leading citizens from Barre, met at Montpelier last week and decided to build a railroad to Barre (six miles) immediately. Barre is to give $55,000 toward the road.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending October 18, at 468,975 tons, and for the coal year 16,289,599 tons, against 15,498,537 tons to corresponding time last year, being an increase of 791,062 tons. The bituminous tonnage for the week is 85,909 tons, and for the year 2,625,385 tons, giving a total of all kinds for the week of 554,884 tons, and for the year of 18,914,984 tons, against 17,757,176 to same time last year, being an increase of 1,157,808 tons.

☞ The earnings of the Northern Central Railway for the nine months ending September 30, 1873, were $3,753,605 63, the expenses $2,786,741 27, and the net earnings $966,864 36. For the corresponding period of the previous year the earnings were $3,256,228 29, the expenses $2,567,502 20, and the net earnings $688,726 09—showing an increase in earnings of $497,377 34, in expenses of $219,239 07, and in net earnings of $278,138 27.

☞ The earnings of the Denver and Rio Grande (Narrow Gauge) Railway for the week ending October 14, 1873, were: freight, $4,571 82; passengers, $3,462 00—total, $8,033 82. Same week last year, $7,250 60. Increase, (10.8 per cent) $783 22. For the week ending October 14, 1872, contractor's freight was $663 40; increase of commercial traffic same week 1873, 21.96 per cent.

☞ The gross receipts of the Philadelphia and Reading Railroad for the ten months of the current year ending September 30, ultimo, were $12,022,221, against $9,695,160 in same time the previous year, showing an increase of $2,327,060. The net profits for the same time in 1873 were $4,179,659, against $3,069,929 in the year before, showing an increase of $1,109,729.

☞ The earnings of the Erie Railway Company for the week ending Oct. 15, 1873, were $505,454, and since Oct. 1, $934,935—an increase over the corresponding period of the previous year of $59,907.

☞ The directors of the Des Moines and Minnesota Narrow Gauge Road have ordered the immediate purchase of iron and material for the first ten miles of that road.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending Oct. 15, are: freight, $52,368 72; passengers, $29,957 28—total, $82,326 30.

☞ The building of the Grafton Centre (Mass.) Railroad has been awarded to Albert Spencer of Rhode Island, who has already begun the work of grading said road.

☞ Last week the Baldwin Locomotive Works, of Philadelphia, shipped ten locomotives and tenders complete, valued at $205,000, for the Don Pedro Second Railway, Rio Janeiro, Brazil.

☞ The Montpelier and Wells River Railroad progresses but slowly. It is doubtful whether the cars will run the whole length of the road before spring.

☞ The gauge of the Berlin and Galt branch of the Grand Trunk has been changed to the same gauge as the main line, 4 feet 8½ in.

Northern Pacific Railroad.

TRUSTEES' OFFICE, NORTHERN PACIFIC R.R. Co.
114 South Third Street.
PHILADELPHIA, Oct. 8th, 1878.

Dear Sir.—In reply to your letter of the 4th ult., asking for definite information respecting the present condition of the Northern Pacific Railroad, and the probable effect upon it of the monetary revulsion which has involved the suspension of the company's financial agents, I take pleasure in placing before you, in as condensed form as possible, all the material facts in the possession of this office.

Construction and Surveys.—The company has built and equipped of its road:

	Miles.
The Minnesota Division, extending from Thomson Junction (24 miles west of Duluth), to Moorhead on Red River	228½
The Dakota Division, extending from Moorhead, across the eastern half of Dakota, to Bismarck on the Missouri River	200
The Pacific Division (nearly completed), extending from Kalama on the Columbia River, northward in Washington Territory, to Tacoma on Puget Sound, the principal western terminus of the road	105½
	534
Add the main line of 24 miles, extending from Thomson Junction to Duluth, which is owned and used jointly by the Northern Pacific and the Lake Superior and Mississippi R. R. Companies	24
	558

The Northern Pacific Railroad Company controls by lease the remaining one hundred and thirty-one miles of the Lake Superior and Mississippi Railroad, and thus extends its working line to Minneapolis and St. Paul—the centres of population, manufactures, railroads and commerce northwest of Chicago, besides branches to Minneapolis, Stillwater and Carver. This gives a total of 740 miles of road operated directly by the Northern Pacific Railroad Company—a line equal in length to that from Philadelphia to Fort Wayne, or that from New York City to Toledo.

Work is progressing steadily on the Pacific Division, and it is expected the small unfinished portion will be completed by November 10, as the material is all at hand or on the way. The several divisions named above are in regular daily operation with freight and passenger trains.

The route of the road has been surveyed entirely across the continent, and a line has been obtained which the engineers pronounce remarkably favorable, both as regards economy of construction and operation, and character of country traversed.

The Minnesota Division and sixty-five miles of the Pacific Division have been examined by Government Commissioners, and accepted by the President of the United States as first class in every regard. The Dakota Division is now finished, ready for examination and acceptance, and the Commissioners are appointed for the purpose.

Traffic Connections.—It has been the policy of the company to make each completed section of its road as nearly as possible independent of through connections, so that should the work of construction be delayed for any reason, at any point, the finished portions would, with allied lines, constitute a useful and remunerative transportation system in themselves. Accordingly the Eastern Division of the road, now complete, connects at Duluth with several lines of steamers and the general commerce of the Lakes and at St. Paul and Minneapolis with the general system of railroads extending east and south. At the crossing of the Red River of the North it receives the important trade of the British Provinces, and at Bismarck, the present end of the track, this division connects with a line of steamers on the Upper and Lower Missouri, thus securing the Government transportation and the general business of the Northwest as far as Fort Benton and the Rocky Mountains, a thousand miles beyond the terminus of the road. Thirty miles beyond Bismarck the line strikes inexhaustible coal-beds, to which the track is to be completed as soon as practicable. The importance of these mines as the source of fuel supply to the Northwest, and as a permanent source of business for the road, is evident.

One proof of the value and the need of this shortened route is the fact, given on authority of United States officials, that it saves the Government fifty per cent of former freight charges on the large amount of Indian Department and Army transportation throughout the Northwest. There is little doubt that this saving to the Government equals the annual interest on the cost of the road already built. There is as little doubt that the completion of the line across the continent, by permanently and peaceably settling the Indian question throughout the entire Northwest, by avoiding further costly Indian hostilities, by reducing to a minimum the expense of Government transportation through the region traversed, and by enabling the Government to discontinue most of its Northwestern military posts, withdraw the troops and proportionately reduce the army, will save to the United States treasury each year, an amount greater than the annual interest on the remaining cost of the road.

The Pacific Division has the like advantage of being complete in itself. At Kalama, its southern end, it taps the Columbia river and connects with the boats of the Oregon Steam Navigation Company, a corporation three-fourths of whose share capital is controlled by the Northern Pacific Railroad Company, and which is paying regular dividends on its stock from the lucrative trade it enjoys. In this way connection is made with Portland and the other cities of Oregon, and by the completion of the Pacific Division an outlet to the sea over the Northern Pacific Railroad is furnished for the grain and cattle of the Upper Columbia Valley in Eastern Washington. At Tacoma, its northern terminus, the Pacific Division connects with the steamboats of the North Pacific Steamship Company, and thus secures the trade of Puget Sound and adjacent waters. The traffic already enjoyed by the Pacific Division, before its completion to the Sound, indicates that it will be more than self-sustaining from the outset and profitable at an early day.

The earnings of the several completed sections have equalled the expectations of the company's officers, and have shown a fairly rapid increase from the beginning. It is believed that the time required to develop the business of the road now constructed to such an extent that the net earnings will meet the interest on its cost, will not exceed the period required for the average of new roads. The rolling stock of the road consists of the following: 72 locomotive engines; 22 passenger cars, 6 mail and baggage, 4 immigrant, 25 dump, and 1,525 box and platform freight cars.

The Company's Lands.—Under its charter the company receives 12,800 acres of land per mile through Minnesota, and 25,600 acres per mile through the Territories traversed. Lands accordingly accrue to the railroad company, as follows:

	Acres.
In Minnesota	2,924,800
In Eastern Dakota	5,120,000
In Washington Territory and Oregon	2,688,000
	10,732,800

The title to lands is in no way dependent upon the completion of the road across the continent, nor is it at all affected by routine delay in the issuing of government patents. Six hundred and forty-nine thousand acres have thus far been patented to the company, and other patents are only delayed by the government surveys and the clerical labor of preparation.

Of the company's land thus far earned, about 400,000 acres lie between Thomson and Brainerd, the crossing of the Mississippi. Much of this tract is undesirable for present settlement, being poorly drained and mainly covered with forest. This timber, however, by furnishing fuel, fencing material and lumber, will, I think, prove of greater value to the company, and of greater benefit to the extensive prairie region further west and south, than would an equal area of prairie farm land. It is part of the much needed and rapidly disappearing Timber Preserve of the Northwest which is annually furnishing several hundred million feet of pine logs to the lumber trade.

About two million acres are in Western Central Minnesota, between the Mississippi and the Red River. This tract embraces woodland, high rolling prairie, interspersed with numerous groves and lakes, natural meadow and wide alluvial bottoms. Probably four fifths of the whole is prairie, and a very large proportion, including the Park region and the valleys of the Buffalo and the Red, is not excelled by any agricultural land in America. Almost without exception the portion not suited to cultivation furnishes excellent grazing. It is to this section of Western Minnesota that settlement at present mainly tends.

Some five million acres lie in Eastern Central Dakota, between the Red River and the Missouri. This is wholly a prairie region, except that there are fringes of timber along the streams and about the lakes. The average quality of the land is very similar to that of the rolling prairies of Iowa. The valleys are very fertile, the table lands are less so but still good, while the occasional elevations or knobs are gravelly with little or no soil. Gen. Cass, President of the company, regards the Dakota lands as averaging better than even those of Western Minnesota. It is a moderate and prudent statement (I speak from what I have seen, not from what I have heard) to say that, for the growth of wheat, the other small grains, the staple vegetables and grass, the company's lands extending from near the Mississippi River to the Missouri, 350 miles, equal in average productiveness any like area in any part of the West.

The remaining lands of the company (nearly three million acres), are in Western Washington and Oregon, in the Columbia valley and Puget Sound basin. They are mainly timbered, and embrace some of the best portions of the well known forests of fir or Oregon pine, which are supplying three hundred million feet of lumber annually to the markets of Asia, America and Europe. Properly husbanded and brought into market these valuable forest lands will bring a larger revenue to the treasury of the company than any other equal portion of its grant.

The number of acres sold up to the present time, fifteen months after the date of the first conveyance, is 59,353—equivalent to 94 square miles. This is exclusive of several tracts aggregating some 200,000 acres, selected by colonies and reserved for them under more or less definite stipulations of gradual purchase. The average price per acre realized is $5 48, and the total proceeds are $325,653 96. Of this amount $172,582 59 has been received in cash and bonds, and the remainder is due in yearly payments from purchasers, with a lien on the land sold. At the average price above named the company's lands already earned would produce about $55,000,000 or nearly double the cost of the finished portion of the road. On the one hand it is true that the first sales are naturally from the company's best lands; on the other it is to be remembered that the company has several millions acres quite as good as those already sold, that sales are made at the outset in competition with the cheap adjoining public lands, and that as the country settles up and the alternate Government sections are absorbed under the Homestead Act, the remaining lands will advance in value. Thus, as has been the case with other land grants, the average selling price will be more likely to increase than diminish. Sales have thus far been chiefly made to actual settlers who begin cultivation at once.

The progress of settlement and the success of settlers in raising crops are fairly illustrated by the fact that the Northern Pacific Railroad will carry to market of this year's product from one to two thousand car loads of wheat from counties in Western Minnesota, whose residents twenty-four months ago imported their breadstuffs,

A letter received at this office from a resident of Philadelphia, who writes from Fargo on the line of the road, under date of October 1, contains the following passages:

* * * I have yet to meet a settler who is not satisfied. The people are here and they are going to stay here; it is their home. They are prosperous beyond their own expectations and in view of the assaults upon the road, they rally to its defense with hearty unanimity. * * * Wheat has been pouring into the depots in really surprising quantities. At one station we counted 23 loaded wagons, 16 at another, 40 at another, and so on, the largest procession (at Perham) numbering 68. The grain is nine-tenths number 1, much of it over weight. The farmers have received, cash in hand, from eighty-five cents to one dollar per bushel at the railroad station. This settles for them all questions. * * * As to the character of the road itself, I think there is none better in the Northwest. Of the six roads I have passed over west of Chicago, not one is in so good condition. We came in from Bismarck to Fargo yesterday (200 miles) in six hours and forty minutes, including, stops, and a smoother, pleasanter ride I never had. * * * The service of the road is excellent, and conducted with a degree of economy that cannot well be improved upon.

The Company's Bonds.—All the company's property, including its road, rolling stock and lands, and its franchise as a corporation, is mortgaged to the two trustees who represent the holders of its bonds and no portion can be alienated or divested of the lien except by payment in full. You are already aware that the company receives its 7-30 bonds at 1.10 and accrued interest in exchange for its lands at market rates. Matured coupons, detached from the bonds, are also convertible into lands. At the low price the company has fixed upon its lands, such exchanges should prove remunerative. The lands will of course produce no income unless tilled, but they must steadily increase in value with the settlement of the adjacent country, and should be marketable at an advanced price within reasonable time. Quite a number of judicious investors, familiar with western lands and western growth, have during the past few months purchased bonds of the company and exchanged them for lands simply as a promising and secure investment. Any holder can make the exchange at any time by visiting or corresponding with the Land Department of the company at 23 Fifth Avenue, New York, or St. Paul, Minnesota, or the office of the Trustees, 114 South Third Steet, Philadelphia. Prices range from $2 50 to $9 00 per acre, according to quality and distance from stations.

There is no occasion for holders of Northern Pacifics sacrificing their investment, and the most unwise course possible would be to attempt to force these bonds, or any other railroad securities, on the market during the present period of depression and alarm. The intrinsic worth and ultimate security of Northern Pacific bonds have not been impaired by the panic. All the property pledged for their redemption still exists. The railroad company loses no money by the suspension of its financial agents; it has paid its interest promptly and met its engagements with the public; no interest falls due for three months to come, and this gives time for making new financial arrangements. Among the directors and stockholders are many of the strongest capitalists and most successful railroad managers in the country, who have several million dollars of their own means invested in the work. A resolute effort will be made to overcome whatever embarrassments may result from the prevailing financial stringency, meet every obligation to bondholders and others, and carry forward the work of construction the coming season.

In any event Northern Pacific bonds are secured by the road and its growing traffic, and by about 20,000 acres of land per mile of track, while other railroad bonds are secured by road and growing traffic without any land. In other words, while the financial storm affects all new roads alike, and their securities will for a time be depressed, I know of none that have so much of real value and actual property behind them to sustain their credit and insure their redemption as have Northern Pacifics.

The character of these various issues of new railroad bonds recently marketed will of course be temporarily decried by speculators who may wish to buy them in at their own prices, and who deem it enterprising and honorable to spread unnecessary alarm and anxiety among thousands of investors—the only persons really affected by their unreasoning denunciation.

To your several minor questions I answer briefly: (1) No stockholder can derive one penny of revenue or profit from his shares until the bondholders are first provided for. The bonds are a first lien upon all the company's assets. The trustees have thus far cancelled and retired $133,900 of the company's bonds received in payment for land. Not an acre of the grant can be conveyed or alienated without the consent and co-operation of the trustees. (2) It is my emphatic belief that every department of the company's service is managed with clean hands, with rigid economy, and with good judgment. Every mile of the road has been built under contracts let to the lowest responsible bidder after public advertisement and competitive bidding. (3) The Northern Pacific Railroad is not more "premature" than were nine-tenths of all western roads when built. To some extent it precedes settlement; so did they. If no railroad is "premature" which opens to the landless and rapidly settles a fertile region otherwise permanently inaccessible and useless, which will annually save to the nation in reduced Army, Indian and Transportation expenses, a sum equal to the yearly interest on its cost, and which has a profitable business certainly awaiting its completion—then the Northern Pacific Railroad was not begun in advance of need and demand.

Believing the future of the road, and of the noble country it developes and peoples, will more than justify the expectations of the company, and assuring you that under any and all circumstances the interests of bondholders shall be guarded with watchfulness and fidelity, I am,

Very truly yours,
A. B. NETTLETON,
Trustees' Agent.

Iron Manufacture in Rhode Island.

Rhode Island is said to have probably more iron in proportion to her population than any other State in the Union, and yet, with some unimportant exceptions, she has never produced any, although ore of superior quality, both magnetic and hematite iron, is found in unlimited quantities. A correspondent of the New York *Tribune*, writing from Providence, says:

Recently George F. Wilson of the Rumford chemical works has made some excellent cast-steel from the native ores, and he purposes, it is said, to extend the business and to erect furnaces for cast iron. Samples of the steel have just been sent to market. The process is an invention of Mr. Wilson's, whose exertions in this direction may arouse the people to the importance of the subject, though Rhode Island seems exclusively devoted to the manufacture of cotton and woollen goods. Three miles from the well-known and thriving town of Woonsocket is "Cumberland Iron Mountain," so called, one of the wonders almost of the State. The mine is three miles east of the line of the Providence and Worcester Railroad and about the same distance from the Boston and Erie road. A charter has been obtained and the route surveyed for an independent road to pass the mine, though a branch road can be readily built, or a tram road can be laid. Cumberland Iron Mountain is nearly the highest land in the State, being 550 feet above tide-water at Providence. On clear days Wachusett Mountain and Mount Tom can be distinctly seen from the top of the mine. The rock rises to the very vortex, and can be blasted in almost any direction at a very trifling expense. The whole hill is one vast bed of ore.

There have been many analyses made of the ore; this made by Dr. Clinton of New York is below:—

Per and protoxides of iron	58.55 per cent
Silicic acid	26.33 per cent.
Titanic acid	3.66 per cent.
Lime	65 per cent.
Magnesia	6.80 per cent.
Manganese	2.10 per cent.
Water and loss	1.91 per cent.
Total	100.= per cent.

This gives a rather larger percentage of iron than some others; but all the assays have been made from surface rock, and it seems to be a universal rule that all mines grow richer in mineral as they descend. The titanic acid has been considered an objection; but later experience proves it not to be so; and now we learn that English steel makers have even imported titanic sand from Australia to improve the quality of their steel. The mine has its history also. During the French war, as early as 1755, the inhabitants of this colony made from the ore from this very mine, mixed with a hematite ore from Cranston, R. I., cannon which were used in the service against the French and Indians, and thus it has aided in carrying out the far-reaching policy of the great Pitt. In 1800, also, the cannon were again cast from these ores at Hope, a small village on the Pautuxet River in this State, for John Brown of Providence, who had a contract with government at this date to furnish its guns; and, what is singular, the guns were cast hollow—a supposed modern invention.

Though Rhode Island people have not appeared to recognize the importance of this possession, still many places, such as Easton, in Massachusetts, which early entered into the production of iron, have regularly carted from this mine their supply, and a large firm in Philadelphia takes thousands of tons annually of this ore.

☞ The cotton trade is not so brisk this year as it was last. The crop is much later, and the yield not so great. Between September 1st and October 24th, 1872, there were 528,214 bales of cotton sent from the interior to the Southern ports on the Atlantic and Gulf coasts, but between those dates this year the number has only been 361,751 bales. Last week the receipts were 100,452 bales, whilst during the corresponding week of 1372 they were 113,148 bales. A proportionate decrease is also shown in the exports of cotton to Europe, for, whilst at this time in the last cotton year they had reached 189,281 bales, this year they are thus far but 103,505 bales.

☞ The Calumet and Hecla Mining Company will pay a dividend of five dollars per share on the 15th of November at the office of the company, No. 114 State street, Boston, to Stockholders of record at the close of business Oct. 29, 1873.

☞ It is stated that nearly all the wire is constructed and the contracts out for a new cable between England and some point on Long Island. The capital is ten millions of dollars, and the directory embraces prominent English and American capitalists.

☞ The progress in Hoosac Tunnel during the week ending Oct. 22 was 213 feet, and there remains 839 feet to be cut through.

☞ Rutland Railroad Company coupons of 7 per cent equipment and 8 per cent first mortgage bonds, due Nov. 1, 1873, will be paid at the company's office, 18 Kirby St., Boston.

Philadelphia and Reading Railroad.

Messrs. McCalmont Bros. & Co., of London, on behalf of the Philadelphia and Reading Railroad Company, have issued a prospectus inviting subscriptions to a ten million dollars gold 6 per cent coupon mortgage loan, interest and principal payable in gold, dollars or sterling, in Philadelphia or London, at holders' option, bonds dated October 1, 1873, for 24 years, protected by a cumulative sinking fund of 2 per cent per annum by yearly drawings in London. The objects of the loan and the position of the company are explained in a letter of F. B. Gowen, president, to Messrs. McCalmont Bros. & Co., which accompanies the prospectus, some points of which we gather and condense:

The roadway is 708 miles in length, with tracks and sidings equal to an aggregate of 1385 miles of single track. The Philadelphia and Reading Coal and Iron Company, the entire capital of which is held by the Reading Railroad Company, owns 90,000 acres of coal lands, on which there are ninety collieries, producing annually four millions of tons of coal, and may be increased double or treble that amount. The gross receipts for the current year from railroad traffic alone will be $15 000,000, against $12,125,000 in 1872, and the entire gross receipts of the year from the two companies will be over $22,000,000. The following shows the tonnage receipts from railway traffic and working expenses of the road for the last thirteen years, of course estimating the last quarter of the current year:

Year.	Tons of 2000 lbs.	Receipts.	Expenses.
1861.....	2,348,209	$2,905,838	$1,282,134
1862.....	3,260,953	3,911,830	1,536,583
1863.....	4,391,877	6,252,902	2,546,001
1864.....	4,606,286	9,269,340	4,584,848
1865.....	4,712,016	11,142,519	5,905,864
1866.....	5,574,907	10,902,819	6,221,500
1867.....	5,421,538	9,106,496	5,567,858
1868.....	5,488,558	8,791,937	5,641,100
1869.....	6,667,190	11,208,881	6 272,833
1870.....	7,449,925	9,671,367	5,931,467
1871.....	8,548,964	12,562,843	6,859,967
1872.....	10,981,657	12,125,038	7,301,738
1873.....	12,000,000	15,000,000	8,500,000

This constantly increasing traffic not only requires increased facilities for carrying, but the opening of new mines for the supply of coal. In addition, the scarcity of vessels has created a necessity for an addition to the company's fleet of iron screw colliers for the shipping trade at Port Richmond, which already amounts to 2½ millions of tons per annum. For these several purposes it is estimated ten millions of dollars will be required. The present net revenue of the company is equal to the interest and sinking fund upon the loan herein announced and on the existing debt, whilst continuing the usual annual dividend of ten per cent. A balance sheet of the condition of the company, November 30, 1872, shows assets in detail of the value of $69,314,983, against which there is in capital and other liabilities, $67,356,979, showing an excess of assets of $1,958,003. As nearly all the property enumerated in the assets has greatly increased in value since its acquisition, a further detailed analyzation of present values is given, which shows an aggregate value of the property of the railroad company of $75,604,462, and of the Coal and Iron Company an aggregate value of $51,000,000, making a total of $126,604,462. The amount of mortgage and other liens on the railroad is $26,869,668, of which $5,890,000 is reserved unissued to pay several small loans maturing at intervals between now and 1893. The mortgage bonds and mortgages on lands of the Coal and Iron Company (which is a charge on that company's property only) amount to $14,464,193, giving a total of mortgage liens of both companies of $41,333,862. Thus showing a surplus value of property, in excess of all liabilities which are liens upon it, of $85,270,599. The proceeds of loans made by the railroad company since 1869, amounting in the aggregate to $21,973,773, have been expended as follows:

Advances to Coal and Iron Company for purchase of coal lands of.....	$20,000,000
Expended by railroad company in purchase of real estate.....	2,006,702
Engines and cars	3,052,654
New railroads.....	1,922,482
Stocks, bonds in other companies.....	326,387
Steam colliers and coal barges.....	578,162
Wharves	117,828
Workshops.....	200,813
Payment of loans matured 1871-72...	212,000
Stores and materials, excess quantity in hand over that in 1869.....	1,012,018
Loans to branch railroad companies..	787,719
Total.....	$30,216,766

This frank exhibit of the manner in which the company have expended the proceeds of their loans will, as it should, do much to command the confidence of the public as to the integrity of its management and the substantial credit of its securities. These figures show that every cent of the loans has been expended in the legitimate business of the company.

Debt of South Carolina.

The special session of the Legislature of South Carolina convened at Columbia on the 21st ult., to take action in reference to the decision of the Supreme Court of the State ordering the Comptroller to levy a special tax for the payment of the interest on a portion of the State bonded debt. The following is a detailed statement of the debt of the State as given in the message of the Governor:

Interest on bonded debt to Oct. 31, 1873..	$2,342,293
Debt funded under acts Sept. and Dec..	116,751
Pay certificates and bills payable sessions of 1870-'71, 1871-'72.....	500,000
Pay certificates sessions of 1872 '78....	100,000
Debt due Blue Ridge Railroad.....	1,797,352
Miscellaneous floating debt.....	450,000
Total.....	$5,306,297
Funding debt	15,027,503
Floating debt	5,306,397
Aggregate floating and funded debt...	$20,333,901

On a portion of this debt, amounting to an aggregate of $3,549,000, the Comptroller is required by a mandamus of the Supreme Court of the State to levy forthwith a sufficient amount of taxes to pay the coupons already matured and about to mature. The real object of the extra session is to prevent the Comptroller from levying the tax in accordance with the orders of the court.

☞ The directors of the Hannibal and Naples Railroad Company elected on the 9th ult., are: A. Boody, A. B. Baylis, Alex. M. White and George Cecil, of New York; C. M. Smith, Springfield; C. L. Higbee, Pittsfield; John D. Doling and Josiah Hunt, Hannibal, and J. N. Drummond, Toledo. The officers are: C. M. Smith, of Springfield, President, and W. B. Corneau, of Toledo, Secretary and Treasurer.

☞ The earnings of the Pennsylvania Railroad Company for September, 1873, were $2,468,076; same month, 1872, $2,070,425—increase, $397,651. From January 1, to October 1, 1873, $18,720,807; same period in 1872, $16,219,050—increase, $2,501,757.

Debt of North Carolina.

The following is a statement of the debt of North Carolina for the fiscal year ending 30th September, 1873, as prepared by the State Treasurer. It will be observed that the principal has been reduced $353,000 during the previous year. Under the second class of bonds in the table below will be found a decrease from last year of $287,000. The decrease was occasioned by the return of bonds to the Treasury issued to aid the construction of the Chatham Railroad. The third class is decreased $10,000. The fourth class is decreased $56,000 by the return of that amount of bonds issued for the purpose of buying a site for the penitentiary.

	Issued Jan. & July.	Issued Apl. & Oct.
1. "Old" or ante war bonds.	$4,738,800	$3,639,400
2. Bonds issued for internal improvement purposes since close of the war, not "special tax".....	2,383,000	1,695,000
3. Bonds issued for funding under acts of 1866 and 1868	2,417,400	1,711,400
4. Bonds and registered certificates since close of war for other purposes..	382,045	44,000
5. Special tax bonds.....	.....	11,407,000
Total.....	$9,922,245	$18,496,800
6. Bonds issued after May 20, 1861, and prior to May, 1865, for internal improvements, not marketable	708,000	420,000
	$10,630,245	$18,916,800
Total.....		$29,547,045

INTEREST.

Interest on first class of bonds.....	$2,513,460 00
Interest on second class of bonds...	1,214,400 00
Interest on third class of bonds....	1,241,041 00
Interest on fourth class of bonds...	1,139,604 85
Interest on fifth class of bonds.....	2,844,510 00
Interest on sixth class of bonds....	518,910 00
Total interest due on entire debt...	$8,471,924 85

Railroads in Mexico.

The *Trait d' Union* of Mexico, under date of October 1st, says:

One of the most important questions before the Mexican Congress is that of the railroads. The contract made between the Executive and Mr. Edward Lee Plumb, representing the International Company of Texas, was submitted to Congress at the last session, and it is believed that now it will receive serious attention and will be promptly ratified. Such, indeed, would be the best course to pursue. Mr. Sullivan, who has succeeded General Rosecrans as representative of the Union Contract Company, has made new propositions entirely different from the old ones, which we have carefully examined. They seem to us to be based on those of Mr. Plumb, over which it is claimed that they are an improvement. Certain of these conditions, however, do not appear to us to offer all the desired guarantees of franchise. The project, moreover, is presented under so many different aspects that one is excusable in losing faith in its realization. Lastly, also, there has been talk of organizing a purely Mexican company, but this is merely a patriotic dream, a scheme resting on no solid basis. In any event, however, it is certain that the government anxiously desires the construction of railroad lines, and will do its utmost that such an advantage may promptly accrue to the country.

☞ Fifty car loads of tea passed through Omaha on the 24th ult., from China, via San Francisco, for the East.

☞ The Wasatch and Jordon Valley track is laid to Fairfield's Flat, 12 miles from the junction with the Utah Southern at Sandy, and 5½ miles beyond the late terminus at Granite. On the line between Granite and Fairfield's Flat the ascent is very rapid, there being one short grade of 287 feet to the mile, and about three miles with a grade of 250 feet to the mile. About half way between the two places a back switch 1,400 feet long had to put in to obtain the required elevation. No more work will be done beyond Fairfield's Flat until next season. The road is of three-feet gauge.

☞ A letter from Cumberland, Md., to the Baltimore *Sun*, of date Oct. 25, says that the shipment of Cumberland coal for the week ending October 18 amounted to 68,493 tons 7cwt., an increase of 12,359 tons 15 cwt. over the corresponding week of last year. For the year to that date 2,069,196 tons 11 cwt., showing an increase over the same period in 1872 of 250,894 tons 15 cwt.; increase in railroad shipments 328,601 tons 14 cwt.; decrease in canal shipments 72,706 tons 19 cwt.

☞ The extention of the Colorado Central Road from Golden northward is open to Longmont, 41 miles from Golden, and trains are run to that point. This leaves the line from Denver to Golden at Golden Junction, two miles east of Golden. A branch of the narrow-gauge line (Golden to Black Hawk) has been built from Fork's Creek, 14 miles west of Golden, to Floyd Hill. This branch is four miles long. The total length of road now in operation is 81 miles.

☞ Recently, for want of ready money to pay taxes, the original promoters of the New Jersey West Line Railroad were forced to sell out, and in most instances Mr. Asa Packer of the Lehigh Valley Railroad has been the buyer. It is believed that as soon as Mr. Packer can secure the absolute right of way he will speedily complete the road, as it would give him a continuous line from the coal fields of Carbon county, Penn., to New York.

☞ The Bangor *Commercial* says that there will be no consolidation of the European and North American Railway with the Eastern and Maine Central Railroad line till spring. The company has stopped making either broad or narrow gauge freight cars, one reason for the discontinuation of work being probably the uncertain state of affairs as regards consolidation.

☞ The Arkansas Valley Railway, a branch of the Kansas Pacific Railway, has just been completed from Kit Carson to Los Animas on the Arkansas river, a distance of fifty-six miles. Los Animas is on the south bank of the Arkansas river, just outside the military reservation of Fort Lyle.

☞ The exportation of gold from Australia this year, up to the 31st of August, amounted in value to $31,078,245, an increase of more than one-third over the value of the exports in 1872.

☞ Since June 30th, 2,417 miles of new railroad postal service have been put in operation in this country, making the total now in operation 65,876 miles.

☞ The whole line of the Southern Maryland Railroad, from the junction with the Baltimore and Potomac Railroad, is now graded, with the exception of about twenty-two miles, which are under contract. When this shall be completed the track will be laid along the whole line, which will give the people of Southern Maryland direct communication with Baltimore, via the Baltimore and Potomac Railroad, which is now running to the Potomac river. Southern Maryland has long felt the need of railroad communication to transport her large crops, including millions of bushels of oysters.

☞ A table in course of preparation for the annual report of the Postmaster General shows, by their recent readjustment of pay on the railroad rates for the year ending September 30, 1873, the amount of annual compensation to all railroad companies, it being increased $223,828, being now $1,015,508 per annum. The readjustment is made on fifty-seven railroad routes. Six hundred different railroad companies receive pay for carrying the mails, the aggregate length of railroad service in the United States being now nearly 65,000 miles and increasing at the rate of over 5000 miles per annum.

☞ At the annual meeting of the stockholders of the Camden and Atlantic Railroad Company, on the 23d ult., the following named persons were elected directors: Andrew K. Hay, Anthony J. Antelo, Samuel Richards, Walter D. Bell, John Lucas, James B. Dayton, Charles Cambios, Jr., Enoch A. Doughty, John S. Newbold, Thomas H. Dudley, William Massey, Charles R. Colwell and Samuel C. Coeper. Andrew K. Hay was subsequently elected president, and D. M. Zimmerman secretary and treasurer.

☞ Arrangements are completed for the consolidation of the Milwaukee and Northern Illinois, and the Varna, Peru, Mendota and State Line Railroad Companies, under the title of the Milwaukee and St. Louis Air Line. The new company is to build a line from Milwaukee southwest to a junction with the Western Division of the Chicago and Alton. The partially graded roadbed of the old Milwaukee and Beloit Road is to be used.

☞ At a meeting of the stockholders of the Chatham Branch Railroad Company, held in Chatham. N. B., on the 6th ult., the following gentlemen were elected Directors:—Hon. Wm. Kelly, Alex. Morrison, F. E. Winslow, F. J. Letson and J. B. Snowball; and at a meeting of the Directors, Alex. Morrison was chosen President; and A. D. Shirreff, Secretary.

THE WHARTON

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
O. BOX, 2353, Phila.

DELAFIELD & BAXTER
CEMENT COMPANY,
MANUFACTURERS OF HIGH FALLS
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at our office, **54 Pine Street, New York.**

The above CEMENT is used in most of the fortifications building by government.

HUDSON RIVER
CEMENT WORKS,
Manufactory at Kingston, N. Y.
(LATELY IN JERSEY CITY, N. J.,)

MANUFACTURERS OF ROSENDALE HYDRAULIC CEMENT, having facilities for manufacturing 600 barrels daily, are now prepared to furnish, on the most reasonable terms, Rosendale Hydraulic [Diamond A] Cement of a fine and superior quality, all of which is by ourselves manufactured at the works, located on the West bank of the Hudson River, near Rondout, N. Y., from a superior selected quality Cement Stone, quarried exclusively from our (lately Hudson River Cement Co., Jersey City, N. J.) celebrated and extensive quarries, situated at Creek Locks, town of Rosendale, Ulster County, N. Y. Our Cement having been extensively used the last twenty years, and meeting the approval of the most eminent Builders, U. S. and other Engineers, we have authority for declaring our brand, (Diamond A) Cement, the American Standard Hydraulic Cement, all of which is put up in good shipping order, in new, tight, well-made (at the Manufactory) and papered barrels. The largest class vessels can come to our works without extra towing or delay. Cement deliverable at the Works or in New York City. Our barrels will be branded, "Hudson River Cement Works, Rosendale (Diamond A) Cement, Office, No. 95 Liberty Street, New York."

THE LOCK-NUT & BOLT COMPANY OF NEW YORK,
No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.

IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

Scott's Wrought Iron Clamp Truss Joint
FOR RAILROAD RAILS.

LENGTH 9 TO 12 INCHES, WEIGHT 20 TO 30 LBS.
THICKNESS ⅝ OF AN INCH. COST FROM $1.30 TO $1.50.

Has been tested to *24,000* lbs., between 24 inch bearings, (a 40 ton engine will not test it more than 10,000 lbs.) it is a *TRUSS*, supporting fully the ends of rails while suspended itself. This principle gives it a power that no chair has. Forty per cent. of rails now destroyed, will be saved by its use.

It is *SIMPLE*, can be put on broken or sound rails at once; will not stir from its position, and requires no renewal.

SECTION. VIEW.

VIEW AND SECTION show position in place. A.—Is CLAMP-TRUSS. B.—Are two ¾ inch Bolts. C.—An Iron Collar, (a prepared wood block can be used in its place if parties prefer it.) D.—Is the Nut. S.—The LOCK of the NUT, which prevents its jarring loose.

The patentee is prepared to fill orders sufficient for four miles of track per day.

Provision has been made to prevent sliding of the rails.

For particulars, address

JOHN H. OSBORNE, Morrisville, Bucks Co., Penn. And BENJ. SCOTT, Eden Mills, Vt.

A. W. LADD,
NO. 5 DEY STREET, NEW YORK,

Will cut to order for Bridge and Railroad Builders, WHITE PINE, GEORGIA and FLORIDA PINE, HEMLOCK and OAK TIMBER.

Agent for ROBERT BROWN, Telegraph Contractor.

Telegraph Lines of any length built with Brooks' Patent Paraffine or Glass Insulation and American Compound or English Galvanized Wire at the lowest rates and shortest notice. Also, Wire Fence for Railroads.

Carbolizing Wood—Perpetual Durability.

A paragraph in our last issue, designed merely as an answer to several communications sent us respecting the best known method of preserving wood from decay, has elicited information on that subject of no ordinary importance.

Believing we cannot in any way confer a greater benefit on the community, we proceed to lay before the public the results of our investigations, and the information gained, as fully as our columns will admit.

There have been a number of contrivances or processes patented for preserving wood; but being based upon wrong principles, they were impracticable, and hence short lived. So far as we have been able to learn the Seely-Pelton method of preserving wood from decay under all circumstances, is the only one in active operation possessing an established reputation, founded upon merits of no common order. Patents have been secured for the Seely-Pelton process and method, and an organization effected under the name of "THE AMERICAN WOOD CARBOLIZING COMPANY," and which is at this time in most successful operation, taking and executing contracts and granting licenses to operate, in all parts of the United States.

The process consists in taking blocks or sticks of timber of any form, size or condition, and by a certain method of immersion first in a bath of hot creosote or dead oil, at about 250° Fah. to expel, or drive out from the pores of the wood every vestige of sap, and all other destructive elements inherent therein. Then, by a rapid cooling process, the vacuum or spaces thus formed between the fibres, are by the operation of natural laws, effectually filled with the creosote, or rather the oil it contains. In this way the whole mass of fibrous material becomes thoroughly saturated, through and through, with the only real antiseptic substance known to science.

Thenceforth, timber thus treated is wholly insensible to weather and water, and is in all respects rendered perfectly indestructible except as against fire and the axe.

For street paving, this system is invaluable; for where blocks thus treated are laid on suitable foundations, it will wear away even under heavy traffic, less rapidly, and last longer than stone. We have seen specimens of this sort, that have been in use in Europe for a period of 27 years, and the blocks were still as sound and capable of wear as on the day they were laid down.

When the pores are once impregnated with this acid neither water now any other distructive agent can evermore penetrate or damage the timber; not even that terrible marine pest, the dreaded teredo, or salt-water worm, will have anything to do with carbolized wood. He lets it severely alone. Indeed we have been shown specimens of treated and untreated wood which had lain in the waters of Charleston harbor, nailed together, for a period of nearly two years; and while the natural wood was completely-honey combed and ruined by the sea worm, the other was wholly untouched and perfectly sound. As carbolized wood bids defiance to both salt and fresh water, this system becomes of the first importance in the construction of piers, wharves and the like.

The great value of this process is most strikingly seen, however, in its various applications to railroad purposes—the building of depot platforms, of cattle cars, for ties, and especially in the construction of bridges and elevated roadways. These structures being held together by spikes, bolts, nails, &c., can never weaken nor get loose from corrosion, or vibration, for iron does not rust when imbedded in creosoted wood. While ordinary ties last on an average but 6 or 7 years, carbolized ties are guaranteed to do good service for at least 30 years; in fact we have in mind at this moment not less than three railroads using ties prepared in this manner, that have already done duty, respectively, 27, 30 and 32 years, and how much longer they will last cannot be told, for they are as sound to-day as when laid down.

Thus, any railroad man will quickly figure out, that the renewals on a thousand miles of road, of the ordinary ties at 50 cts. each, would amount in 25 years to over six millions of dollars—all of which might be saved by carbolizing the wood at first. What an enormous sum could thus be saved on the 60,000 miles of railroad to-day running in the United States. There are a thousand other uses besides the above, to which the Seely-Pelton process may be applied; for instance ship planking and timber, fence and telegraph posts, and stable material.

From what information we have already gathered respecting this antiseptic process, it is quite apparent to us that any kind of wood, properly treated by this method will at least endure wear, and last during an ordinary lifetime. What an immense saving there is here, not only in first cost but in time, labor and material.

It would appear that creosote not only hardens and renders wood far more durable in the actual wear, but it also protects it from all destructive or corroding elements without, and expels all those within. We should not omit to state that the process we are considering, together with the appliances for utilizing it, are the joint discoveries of Prof. Charles A. Seely, the eminent chemist, and Wm. T. Pelton, Esq., of this city; and in point of solid importance and real utility, well deserves to rank among the most important inventions of the day. It may properly be styled an

art both preservative and industrial; and we deem it particularly fortunate that it has been developed, and is achieving such wide success at this time, when the rapid and wanton destruction of the forests of the country is beginning to cause serious apprehension in regard to our future timber supply. Experience of more than 30 years in Europe, by the crude, imperfect methods in use there, has effectually demonstrated the fact, that no other substance known to chemistry will enable wood to resist perfectly, all action of weather, salt or fresh water, and all attacks of marine or land worms or insects, and utterly defy decay, and at the same time add at least 25 years to its durability under severe strain and constant attrition.

The United States Government has adopted this system into its public works as well as numerous private establishments throughout the country. The strong professional and official endorsements given are almost without number, for a few of which only, can we to-day find room. Gen. Mc Clellan, Gen. Humphreys, U. S. A., Gen Meigs, U. S. A., Gen. Burnside, Gen. Belknap, U. S. A., Gen. Gillmore, U. S. A., Gen. Newton, U. S. A., Gen. Cass, N. Pacific R. R., Professors Doremus, Chandler, Silliman, Delaney, Worth and others, all of whom give the most unqualified assurance that the above method of Messrs. Seely and Pelton, is based on correct principles in Chemistry, and in its practical application as well.

We believe no better service can be done the railroads of the country, than in bringing to their knowledge, this most valuable improvement. For their sake we urge them one and all, to give the matter their early attention.

The gentlemen forming the above named company, are well known citizens of responsibility and position, whose names, as well as those of the officers in charge, are a sufficient guarantee that any statements made, or contracts entered into, will be most scrupulously fulfilled.

Their offices are located at No. 59 Liberty St., N. Y. City.

From the Pottsville Miners' Journal.

Cast Iron Rails.

WE ARE INDEBTED to a friend for the following item, copied from Vol. 11 No. 6, of THE NEW YORKER, bearing date April 24, 1841, and published by H. Greeley & Co., No. 30 Ann street, New York city:

CAST IRON RAILS.—The MINERS' (Pa.) JOURNAL says that the experiment tried in their immediate neighborhood of laying Cast Iron Anthracite Rails, instead of wood faced with iron, has proved completely successful. They have sustained none of the injury which was apprehended from the frost. The Schuylkill Valley Railroad Company have ordered a great quantity of these rails, which are afforded at $40 to $50 per ton. But a short time will probably elapse before these rails will come into general use. The first cost of laying a road constructed of this material is but a trifle more than one made of wood and faced with wrought iron. The wooden road requires to be repaired or renewed every three years, whereas the cast iron road is expected to last a great number of years.

The Schuylkill Valley Railroad, to which the above extract refers, was the second piece of railroad of any special account in the country, the first one having been laid down in the Lehigh Valley at Mauch Chunk. This road in the Schuylkill Valley was commenced about 1829 or 1830, the chief promoters of which were Mr. Wm. Lawton, now residing at New Rochelle, N. Y., and the late Burd Patterson, of this place, with some others whose names we do not now recall. The road ran from Port Carbon for some miles up the valley, and was built, be believe, by contribution of ties and other timbers from the land owners principally. At the time of experimenting with cast-iron rails, it will we borne in mind, there was as yet no mill erected in the United States for rolling rails, and hence the peculiar interest attaching to the successful use of cast iron.

Connecticut and Passumpsic Rivers R. R.

The earnings of this road for the years ending June 30, 1872 and 1873, were as follows:

	1872.	1873.
From passengers	$260,721 09	$287,110 53
" freights	524,488 34	484,046 43
" mails	13,345 08	13,780 95

Add balance of income per last report		34,921 21
Total		$297,196 48
Disbursed as follows:		
Paid trustees of sinking fund		$36 347 95
Coupons on bonds and notes		68,466 00
Coupons on Massawippi Railroad b'ds		27,424 69
Dividends, February and August, 1873		130,056 00
Dividends on Massawippi shares		24,000 00
Interest on borrowed money		10,783 30
Balance of income		118 54
Total, as above		$297,196 48

The equipment of the road consists of 23 locomotives, 15 passenger, 7 baggage, 330 platform, 10 ore, 10 horse, 55 hay, 93 rack, 170 box, 8 saloon, 20 gravel, 3 crane, 34 push, 25 wood and 40 hand cars, and 1 snow plow. Number of miles run, 508,839. Number of passengers carried, 182,280; do. carried one mile, 6,153,567. Tons of merchandise carried, 158,428; do. carried one mile, 11,209,527. The report says:

The business of the road for the year has not been as favorable as the year preceding, the gross receipts having fallen off $9,928 50, and the expenses of operating have increased $36,698 15, making a decrease in net earnings of $46,626 65. This falling off in the business of the road is to be attributed to the very severe winter and deep snows, which prevented the usual teaming being done, and a large reduction in the amount of freight received from the West during the winter, together with the dull state of the lumber market. These causes have passed and we confidently hope for a better result for the coming year. The completion of the Missisquoi and Clyde Rivers Railroad connecting with us at Newport, thus giving us a direct line to Montreal over the South-Eastern Railway of Canada, will, we think, add largely to our business the next year. This line was opened on the 10th of July and is now in successful operation, bringing considerable business to our road already. One cause of the increase in operating expenses, was a collision between a passenger and freight train in September last near St. Johnsbury Centre, which cost some $15,000, and several other accidents to freight trains during the winter, causing a large amount of repairs; another for repairs on Massawippi Road, caused by a local freshet in August last, which carried away two large culverts and otherwise damaged the road to a considerable extent. These culverts have been much enlarged and rebuilt in the most thorough and substantial manner; and the road, wherever it is exposed to the action of the water of the lake has been protected by rubble, and the entire road-bed very much improved; it is now in a very satisfactory condition. The road-bed for the entire length of the Passumpsic Road, although not as good as we intend to have it, is in good condition, and much better than it has ever been before; 1,443 tons of new rails have been laid during the year, and 7,649 rails have been taken up, repaired and relaid in track, 107,219 new sleepers have been laid during the year which is more than twice the number ever laid in one year before, since the completion of the road (the largest number being 46,691 in 1871). We are expending liberally for the improvement of the road-bed and track, believing it to be good economy and that it will meet your approval. Experience has taught us that the most important part of a railroad is the track, and that money judiciously expended in improving that, is well invested.

The furniture of the road has been kept in good repair and the condition of the cars and engines is now better than a year ago. There has been added to the equipment of the road and charged to current expenses, 10 new platform cars, 10 push cars, 1 snow-plough. Rebuilt—8 platform cars, 5 box cars, 1 wood car, 5 hand cars. Thoroughly repaired—20 box cars, 7 platform cars, 4 passenger cars, 1 drovers' saloon car, 1 freight saloon car, and about ten thousand dollars expended in extra repairs on engines.

The equipment of the road is the same as last year, with the addition of 1 new engine, 10 new platform cars, 1 freight saloon, 10 push cars, 2 hand cars, 1 wood car, and 1 snow plough, and is sufficient for the present business.

There has been built on the company's land at Lyndonville during the year and rented to employes, six dwelling-houses at a cost of	$7,500 00
Expended in adding to water-works at Lyndonville	3,000 00
For new car-house and other expenditures for the accommodation of the South-Eastern Railroad at Newport.	10,000 00
One new engine	13,500 00
There has been expended upon the road in turning river at Lyndon, raising track, and other permanent improvements, in addition to the ordinary expenses of maintaining the road and which properly belong to construction, and have been thus charged.	42,040 69
Making a total charged to construction of	$76,040 69

It will be noticed that the cost for wood is much in excess of any former year. This is to be attributed in a large degree to the quality of the wood we have had to burn. Our wood agent winter before last made large contracts, and the winter being extremely favorable for getting it in, every contract was filled, giving us a large amount of wood to carry through the wet season of last year, and not having proper wood sheds to store it in it suffered great deterioration in quality, and consequently the consumption of a much larger amount to get the same steam than it would with first quality wood.

We are now erecting cheap wood-sheds at different points along the line of road, intending at all times to have a good supply of dry wood under cover. We hope thereby to make a material saving in the cost of operating the road.

We stated in our last report that about $90 000 of the notes authorized for the purpose of assisting by loan the construction of the Missisquoi and Clyde Rivers Railroad, had been negotiated. Since then the balance has been disposed of, and the whole amount of three hundred and fifty thousand dollars has been paid over to that road. We hold for this loan the first mortgage bonds of that road, amounting to $350,000, and also an equal amount of collateral. We have also made a temporary loan to the South Eastern Railway (the lessees of the Missisquoi and Clyde Rivers Road) of $60,000, to enable them to open the road at a much earlier day than they could have done without it. This loan is secured by ample collateral. We have had built two engines to be leased to the Montpelier and Wells River Road. That road it is expected will be in operation by October next, connecting with us at Wells River, and will, we think, bring considerable additional business to this road.

In pursuance of a vote of the stockholders passed at the special meeting held at White River Junction, March 14th, 1873, a mortgage for $1,500,000 has been executed to B. F. Stevens, F. M. Weld and T. P. Redfield, Trustees, on the road, its franchise and entire rolling stock, payable in twenty years from April 1st, 1873. Bonds to that amount have been prepared bearing 7 per cent. interest, with coupons payable semi-annually on the first days of April and October. These are intended to take up the different classes of notes and bonds now outstanding, so that there will be but this one class of indebtedness of the corporation. These bonds are now ready to be exchanged for the notes and bonds outstanding, about $140,000 having already been exchanged. Any one holding the notes or bonds of the company can exchange them on application at the Treasurer's Office, No. 7 Merchants' Exchange, Boston.

President.—EMMONS RAYMOND.

Vice President.—JOSIAH STICKNEY.

Directors.—Emmons Raymond, Josiah Stickney, Elijah Cleveland, B. P. Cheney, Albert Knight, Henry Chase, Benjamin Pomroy, Gardner C. Brown, T. P. Redfield, F. M. Weld, Horace Fairbanks, Amos Barnes, S. S. Thompson.

Treasurer.—N. P. LOVERING.

Secretary.—ELIJAH CLEVELAND.

Superintendent.—WILLIAM M. PARKER.

Chesapeake and Ohio Railroad.

The directors of this company, after a careful investigation of its affairs, and an earnest effort to devise the best mode of re establishing its credit on a permanent and substantial basis, have decided that this result can only be secured by funding the entire floating debt of the company, which amounts to more than eight millions of dollars, and a portion of the interest on its mortgage debt, in income bonds, to be paid out of the net earnings of the road.

They have, therefore, authorized the issue of 7 per cent twenty-year income bonds, to the amount of twelve millions of dollars, to be used in retiring the floating debt, and in funding the interest that will accure on its 6 per cent bonds, to and including May 1, 1875; and also the interest that will accure on its 7 per cent bonds, to and including July 1, 1876.

The said income bonds, principal and interest, are payable out of the net earnings of the road, interest semi-annually, and are dated October 1, 1873.

The proposition of the company to the holders of its bonds is therefore as follows:

All holders of 6 per cent bonds, having coupons attached, to surrender to the company all coupons due on or before May 1, 1875, and to receive therefor the face value thereof, less interest to October 1, 1873, in income bonds as above described, at the rate of eighty-five cents on the dollar. All holders of registered 6 per cent bonds having coupons detached, to assign to the said railroad company all interest that will accrue thereon to and including May 1, 1875, and to receive the value or amount thereof, less interest to October 1, 1873, in income bonds as above set forth. All holders of 7 per cent bonds having coupons attached, to surrender to the company all coupons due on or before July 1, 1876, and to receive therefor the face value thereof, less interest to October 1, 1873, in income bonds as above set forth. All holders of 7 per cent registered bonds having coupons detached, to assign to the said railroad company all interest that will accure thereon to and including July 1, 1876, and to receive the value or amount thereof, less interest to October 1, 1873, in income bonds as above set forth.

These propositions are put forth with a request for their acceptance, as the directors believe there is no other way in which the affairs of the company can be placed on a basis of enduring safety and prosperity.

If the bondholders assent promptly, the company will be in a position to proceed without delay in completing its original plan of extending its road from Richmond to deep water, and establishing connections by rail with the important cities and towns of the West and South-west.

If the plan is adopted, the officers of the company are confident that its future is full of encouragement, and that the earnings of the road will insure the prompt payment of all its obligations.

☞ At Trenton, N. J., articles of association have been filed in the office of the Secretary of State, for the construction of a railroad from Prattsville to Flemington, in Hunterdon county. This will make another connection with New York, starting from the Doylestown branch of the North Pennsylvania Railroad to Prattsville. From Flemington the route will be by the South Branch Railroad, and thence by the Central Railroad to New York.

Chicago Manufactures.

Mr. Everett Chamberlain, a member of the press of Chicago, is about to issue a volume containing a large number of statistics concerning the commerce and industries of that city, from which the following statements and figures are taken:

The following table presents a summary view of the number of establishments in each of the classes into which we have divided the manufactories of Chicago, together with the development since 1860, and the present production per year:

	Number established 1873.	Number up to 1860.	Present annual product.
Iron works	127	26	$32,103,000
Wood works	143	26	18,607,000
Iron and wood (additional to foregoing)	58	26	17,419,500
Silver smelting and works in brass, type metal, and terra cotta	24	5	7,250,000
Brick and stone	57	6	7,570,009
Leather (including boots and shoes)	34	13	3,001,000
Malt and spirituous liquors	22	5	9,140 000
Chemical varnish, &c.	61	14	9,122,500
Miscellaneous	124	28	18,268,000
Total	660	149	$122,481,000
Number concerns established since 1870			182
Total number of employes			48,429
Total capital invested			50 017,500
Total wages per annum			27,700,828
Total yearly product			122,481,000

From other figures given it is estimated that Chicago has 70,999 persons engaged in manufactures, that an aggregate of $179,831,000 is the yearly product of their labors, and that upward of one-half the entire population of the city is already supported by the manufactures of what most people are still disposed to regard as "an exclusively commercial city."

☞ The Pennsylvania Railroad Company give notice that the fourth instalment of 25 per cent on the allotment of new stock of 1872 will be due and payable at the office of the company, between November 1st and 28th, 1873. An instalment of 25 per cent on the allotment of new stock for 1873 will be due and payable at the same time and place. The remaining instalment of 25 per cent will also be received from such stockholders as may desire to pay in full for their shares.

☞ Blast furnaces are already in operation or are about to be established at the following points on the Chesapeake and Ohio Railroad: One at Richmond, one at Tolersville, one at Silberton, one at Elizabeth, one near Belts Valley, one at Langdale, one at Clifton Forge, one at Laurel, and four at points not yet decided upon, a total of twelve.

☞ Messrs. Fairbanks of St. Johnsbury, Vermont, have during the last six weeks made twenty-five hundred and sixty-two scales, all for orders. Last week they shipped eleven car loads of scales from the factory, drawing partly from stock on hand—the orders exceeding their production for the week.

☞ The board of directors of the Concord and Claremont Railroad met on the 3d inst., and organized as follows: President, Onslow Stearns of Concord; Clerk, John Y. Mugridge of Concord; Treasurer, Joseph Minot of Concord.

American Railroad Journal.

Saturday, November 8, 1873.

Stock Exchange and Money Market.

Money has been working rather more steadily through the past week, despite the reports of serious mercantile embarrassments and disturbances. The city banks have been liberal gainers in the line of their reserves, especially of legal tender notes; and, having been pursuing a very conservative policy in the loan and discount line, are now in a much stronger and more encouraging position than they have been for many weeks. The Wall Street Stock and Gold speculations have been less favored by lenders of all classes, and advances have been made, in a temporary form, with extreme caution. To the more prominent Street firms the rates on call loans have varied from 7@8 per cent, with, in instances, a fractional commission for accommodation from day to day. In the way of discounts, there has been some increase of business, with rates quoted at from 10@18 per cent per annum, with 12@15 per cent as the governing figures in most negotiations of even prime commercial paper. The financial troubles of certain leading manufacturing and commission houses have tended to impede the sale of even the choicest grades of mercantile paper. It is believed, however, that the worst has been seen. The New England reports are more cheering. The advices from Pennsylvania are more promising. The cities of Chicago, St. Louis, and Cincinnati led the way to the restoration of financial order, and New Orleans is now sensibly improving in the matter of currency and exchange. The November interest and dividend disbursements have been progressing quite favorably, as a whole. Some defaults have been announced, a few of them of old standing. The only new postponement, of importance, is in the case of the Chesapeake and Ohio Railroad Loan. The directors, although wealthy people, could not in the present Money crises find it convenient to advance the required interest on the $15,000,000 mortgage. Mr. J. J. Tracy, Treasurer of the Chesapeake and Ohio Co., has issued a circular to the bondholders in regard to the pecuniary condition of the company, in which it is stated that the board of directors have decided that in their judgment, the only way to re establish the credit of the company is to fund its entire floating debt in income bonds to be paid out of the net earnings of the road; and they have determined on the submission of a proposition, to this effect, to the creditors of the company. The various municipal loans, here and elsewhere, bearing May and November interest, are provided for with customary promptness. The city and county of New York pays out over $3,000,000 interest. The State of New York pays a considerable sum for quarterly interest and $1,980,000 maturing principal of the canal debt. The very latest dealings in the Money line on Wednesday indicated some renewal of uneasiness and distrust because of reported defaults of a number of corporations, on their November interest, confirmation of which reports were momentarily expected.

The U. S. Sub-Treasury, last week, enlarged its currency balance $1,234,005, and reduced its coin reserve $359,598. Its currency balance at the close of the week was $4,124,669; and its coin reserve $49,138,286. The aggregate receipts of the office, in October, were $52,199 925, including $8,146,522 from customs; and the aggregate payments, $56,101,036, including $3,237,834 of coin interest.

Gold has been much depressed and lower, with a less confident and speculative inquiry noted, despite the reported advance of the Bank of England discount rate to 8 per cent, an advance which was deemed decidedly favorable to the bull interest at the Gold Boards. The customs demand has been unusually light, and the export drain unimportant. The extremes of the price have been 106⅞@108¼, closing on Wednesday at 107⅛ as against 108½ on Wednesday of the preceding week. The specie outflow, last week, was only $426,738. The imports of specie since Jan. 1, have been $12,951,438, as against $5,301,492 same time last year.

The customs demand for Gold last week, averaged $310,500 a day. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $107,432,358, against $129,755,269 during the same time in 1872. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $58,833,199, against $66,933,177 during the same time in 1872. The export drain of specie since January

1, 1873, has been $48,904,520 against $63,948,087 during the same portion of 1872.

Foreign Exchange has been unusually heavy, and quoted lower, with a more liberal offering noted of prime bills, while the demand has been quite moderate. Bankers' sixty day bills on London closed on Wednesday at 106¾@106¼; sight bills on London, at 107⅛@107¾. The week's exports of Domestic Produce have been to the currency value of nearly six millions.

Influenced by the extreme stringency in the Money line, and the depression in Gold, Government securities have been quoted easier in price, on a moderate business; offerings, rather heavier.

U. S. sixes of 1881 closed on Wednesday of this week at 113@113⅛; U. S. Five-Twenties of 1862, 106¼@107; U. S. Five-Twenties of 1864 at 106¼@107; U. S. Five-Twenties of 1865 107⅛@108; U. S. Five-Twenties of 1865 consolidated 109¾@110⅛; U. S. Five-Twenties of 1867, 112@112¼; U. S. Five-Twenties of 1868, 112¾@112⅛; U. S. Ten-forties at 106⅛@106¾; U. S. Fives of 1881 (Funding Loan) 107⅜@108; Six per cent. currency Sixes from 108¾@109¼.

The last public debt statement, to Nov. 1, indicated an increase of $3,039,578, chiefly owing to the financial panic and its effect on the Government revenues.

Business in Railway and Miscellaneous securities has been more firmly dealt in, but the fluctuations in values have been frequent and wide. Towards the close, the market exhibited more firmness, with some indications of buoyancy.

State and Railway bonds have been in very limited request as a rule and values have been depressed and irregular. Central Pacific first mortgage six per cents closed at from 84@84⅛.

The import entries of foreign merchandise, at at New York, including the dry goods return in our last paper, amount for the past week to $4,522,092, as compared with $6,487,625 same week last year. The exports of domestic produce are $5,952,385. The exports of Gold and Silver, $426,737, as against $1,172,556 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,403,756, comparing with $2,537,000 same week in October 1872.

General business has been moderately active. Breadstuffs have been quite freely purchased, in good part, for export. Wheat has been quoted higher. Corn, about steady. Provisions have been in fair request, closing stronger. Cotton has been in brisk demand, but, under the large receipts, and the more urgent offerings, values have declined. Groceries, Tobacco, and Wool, have been in less request. Trade in nearly all kinds of Metals has been very dull. Ingot Copper has been dull and weak; sales 50,000 lbs. Lake at 21c., cash. Scotch Pig iron has been very much unsettled, with a quiet market; Glengarnock quoted at $38@$40; English Rails, $62 50, gold; American Rails, $70@$72 50; American Pig has been inactive at $35@$38 for No. 1. Mosselman Sheet Zinc—10 casks were sold at 8⅝c., gold. Tin Plates have been quiet and weak; sales 259 bales Charcoal at $9 75, gold; 150 bales Charcoal Terne, $9 50, gold. Other articles nominal. Freights have been less active, owing, in part, to the limited supply of room available, and the very firm views of shipowners.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Louisville and Nashville 7s, consol., 1898, 86; Chicago and Milwaukee 1st mort., 90; Toledo, Peoria and Warsaw 1st mort., E. D. 80; Lake Shore div. bonds, 82; Delaware, Lackawanna and Western 7s, conv., 93; Milwaukee and St. Paul 1st mort. LaC. div., 81; do. Iowa div., 73; Central R. R. of New Jersey 1st mort., new, 101; Ohio and Miss. 7s, consol., S. F., 84½; Boston, Hartford and Erie 1st mort., 20; North Missouri 1st mort., 75; Long Dock bonds, 91; Burlington, Cedar Rapids and Minnesota 1st, mort., 20½; Detroit, Monroe and Taledo 1st mort., 94½; St. Louis and Iron Mt. 1st mort., 87; Gt. Western 1st mort., 1888, 90; Pacific R. R. 7s, guar. by Mo., 92½; Canada Southern 1st mort., 60; Pittsburg, Ft. Wayne and Chicago equip. 8s, 97½; Rensselaer and Saratoga R. R., 10@19; George's Creek Coal, 100@136.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending October 25, at 365,255 tons, and for the coal year 16,690,983 tons, against 15,949,018 tons to corresponding time last year, being an increase of 741,965 tons. The bituminous tonnage for the week is 86,480 tons, and for the year 2,711,564 tons, giving a total of all kinds for the week of 451,735 tons, and for the year of 19,402,547 tons, against 18,281,299 to same time last year, being an increase of 1,121,248 tons.

Causes & Prevention of Railroad Accidents.

We Americans are undoubtedly a very fast people, more so indeed than any other nation on the Globe. We live fast, eat fast, spend money fast (when we can get it); we are impatient to get rich fast; we cannot possibly travel fast enough. Indeed we are in such mortal haste to do everything, that we never stop to enquire the cause, consequences, or remedy for anything. Hence, we can never expect to arrive so near immunity from accident in railroad traveling as our English friends. Let us see for a moment what their experience is on this subject.

Capt. Tyler, in his official report to the Government, says that the proportion of fatal accidents in 1872 throughout Great Britain was 1 to 3,330,000 of passengers and employees. That the whole number killed the same year was 1,145; and of those injured, 3,038. Among the best means of prevention, Capt. Tyler cites the common sense plans of judicious selection, training and supervision of both officers and servants of the railroad companies, as well as good design and construction of material and appliances, with the adoption of every known improvement in railroad contrivances.

Even under the above very small per centage of casualties, the British public are now most clamorous for further measures of safety upon their railroads. What would they say and do, indeed, if accidents on those thoroughfares were as frequent and fatal as in our own country?

It is stated, on grounds of strong probability, that their Parliament, at its forthcoming session, in obedience to the popular demands, will undoubtedly enact still more stringent measures for the protection of life on the railroads. In such an event there will undoubtedly be a great diminution of casualties, for the year 1874.

Capt. Tyler conclusively refutes the silly, though popular, error that increased safety contrivances, beget carelessness in the employees, and consequently increased casualties are the result. On the contrary it is clearly shown that the greater the danger and risk incurred by the operatives the more careless and neglectful they naturally become, and the greater the consequent number of mistakes and accidents. For our own part, we believe a principal underlies this, firmly inherent in human nature, and which is developed in the prosecution of many other kinds of business besides railroading.

It is further stated as a fact, found from close observation, that high rates of speed and heavy traffic, does not necessarily increase the ratio of casualties.

The conclusion then one naturally arrives at is, that if the British Government finds it expedient on the above state of facts, to legislate still further in the interest of human life, how much more does our railroad system need improvement and revision—a system admittedly far inferior to the English in point of speed, safety, and general regard for the welfare of passengers.

☞ The earnings of the Denver and Rio Grande (Narrow Gauge) Railway for the week ending October 21, 1873, were: freight, $4,277 72; passengers, $4,124 80—total, $8,402 52. Same week last year, $6,488 67. Increase, (29.5 per cent) $1,913 85.

An Open Canal in Winter.

In a recent issue of the JOURNAL we made some little reference to the plan which had been broached for keeping open to traffic the canals of this State throughout the winter, by the use, not of hot water, dribbled along their surface, as some seem to assume, but by means of a small degree of heat radiated from hot water through pipes laid along the whole length of the canals, near the surface.

To Mr. R. A. Cheesebrough, we believe, is due the credit of originating the idea. Mr. Cheesbrough, we learn, is a most respectable civil engineer of this city, and his plan, supported, as it is, by most plausible arguments and an undeniable array of figures, certainly merits something more than transient notice. The vast importance of the subject, taken in connection with the apparent feasibility of the scheme, should secure for it at least candid consideration, and immunity from severe or at least unfair criticism. And in this connection we would remark that some two or three of our exchanges make desperate efforts to be facetious over the proposition, going as far as to suggest that Mr. C., be employed to lay a line of piping up about the North Pole, melt down the icebergs, etc., there, and so solve the long mooted question as to the whereabouts of that mythical, or rather mystical point of the Earth's surface. Now, it may be owing to our confirmed obtuseness, but we quite fail to see the wit or point in such kind of talk.

It is claimed, and with a strong show of argument, that a very small amount of heat properly distributed, even to the extent of keeping the temperature of the water just one degree above the freezing point, will suffice. Now we believe even a less amount of warmth will suffice, for surely much may be counted upon in that respect from the continual agitation of the water by passing boats. Has Mr. C. taken this fact into his account?

We are heartily in favor of giving the theory of Mr. Cheesebrough a practical test; and inasmuch as the State has already entered upon a system of experiment for enlarging the capacity of our canals, by a liberal appropriation, we suggest that the forthcoming Legislature make a further one for the purpose of practically testing the above plan on a section say of 25 miles, of the Erie Canal. The cost would be merely nominal, and would settle an important question in the great transportation problem; and there are many good reasons to believe the plan would prove a complete success.

☞ At a meeting of the stockholders of the Hannibal and St. Joseph Railroad on the 3d inst., at Hannibal, Mo., John B. Drake of Chicago, Charles C. Low and J. Packer were elected directors.

☞ The earnings of the Erie Railway Company for the week ending Oct. 23, 1873, were $483,247, and since Oct. 1, $1,418,182—an increase over the corresponding period of the previous year of $76,154.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending Oct. 22, are: freight, $49,870 25; passengers, $30,725 27—total, $80,095 52.

Canada Southern Railway.

The Detroit *Free Press*, after stating that no order had been issued for the suspension of operations, says:

On construction so far, nearly nine millions has been expended. The bed is completed, the bridges up, the rails down, and the ferry boat across the Detroit making regular trips from Grosse Isle to the Canada terminus. About one and a half millions more is required to thoroughly equip the road and put it in condition for business. Work will not be suspended for lack of this sum, inasmuch as several of the Directors, Messrs. Courtright, W. L. Scott, Casement, Tracy and others, are individually worth from one to five millions. The iron is laid from Detroit to Toledo, and there is nothing lacking but rolling stock. The only gangs discharged are two that have completed their work on this division. From Trenton to Fayette, Ind., 65 miles, the road is also ironed and construction trains running.

☞ The earnings of the Union Pacific Railroad for September, 1873, were $1,068,936 66, the expenses $501,838 54, and the net earnings $567,098 12. In September, 1872, the earnings were $863,754 57, the expenses, $444,019 77, and the net earnings $419,734 80—showing an increase in earnings of $205,182 09, with an increase in expenses of $57,818 77, making the increase in net earnings $147,363 32. From January 1 to September 30, 1873, the earnings were $7,866,024 61, the expenses $3,692,882 75, and the net earnings $3,673,141 86—showing an increase in gross earnings compared with 1872 of $1,127,703 34, and an increase in net earnings of $982,843 46.

☞ The Commissioner of the General Land Office, in his forthcoming annual report, will show that, during the last fiscal year, 13,080,606 acres of the public lands were disposed of, or 1,165,631 acres more than were disposed of the preceding fiscal year. Of the whole amount, 6,083,856 acres were certified to railroads; 3,793,612 were taken for homesteads; 1,626,266 were sold for cash, and 653,446 were located with agricultural college scrip. The total area of the lands in the States and Territories is 1,834,990,400 acres, and 1,218,443,605 acres are yet to be surveyed.

☞ The grading of the new railroad from Philadelphia to Newtown is nearly done as far as the Fox Chase, six miles from the connecting road at Erie Avenue. It is stated that arrangments have been made for the purchase of iron for that distance, and that the road will be put in running order to the Fox Chase by the 1st of January. The grading between Newtown and Neshamioy will soon be finished.

☞ The Iron Works at Phœnixville are still going on full time. It employs 1,300 men, and seven or eight hundred in the mines. The slight reduction of wages has been cheerfully submitted to by the men, and work will be furnished all winter. At the Pencoyd Iron Works a slight reduction in men and wages has been made.

☞ The new international bridge at Fort Erie, Ca., was formally opened for traffic on the 3d inst., and was crossed by several passenger and freight trains.

☞ The president has appointed Isaac H. Sturgeon, of St. Louis, commissioner to examine the completed portion of the Texas and Pacific Railway, some 300 miles in length.

The Pascal Iron Works.

The origin of the Pascal Iron Works must be traced to the year 1821, in which year Stephen P. Morris commenced the business of manufacturing stoves, grates, etc. In 1835, Messrs Stephen P. Morris, Henry Morris, and Thomas T. Tasker, Sr., were associated together, having their establishment where are now located the central offices of the present company, and business is now carried on by the sons of Thomas T. Tasker, Sr. In the same year, which happened also to be the date of the introduction of gas into the city, the firm entered into the manufacture of gas-pipe, a branch of manufacture hitherto confined to England, whence it had, up to this time, been exclusively imported to meet the growing demand for it in this country, where the introduction of gas works was rapidly making its way.

Thus was inaugurated an industry which, dating its origin with the infancy of gas-lighting in the country, has expanded with its growth, until it has matured with the great house whose workshops cover acres of ground and give employment to thousands of hands, whose products may yearly be valued by millions, and which, in its vast proportions, the completeness of its appointments, the system of its management, and the variety of its manufactures, is a noble monument to its founders, and a model among many model establishments in Philadelphia. These works now comprise an area of twelve acres. Two-thirds of this space is entirely covered by buildings. The New York office of Morris Tasker & Co. is at No. 15 Gold street.

To the manufacture of gas pipe was added the production of gas fittings and gas-fitters' tools. From this there followed the construction of the machinery for generating, washing, purifying, and storing illuminating gas. Then followed the manufacture of pipes for other purposes, tubes for conveying water, lap-welded boiler tubes, and boilers themselves, water fittings, hot-water apparatus of various kinds for dwellings, public and private, and for the most varied uses, together with the tools necessary for the erection of the same, apparatus for effecting the ventilation of buildings, etc. In fact, the establishment at present manufactures every variety of apparatus required to light, heat, ventilate, or supply with water buildings of any description.

There are in constant operation in the works twelve boilers and seven steam-engines, representing a total aggregate of one thousand horse power. The engines in distant parts of the shops are supplied with steam by pipes which, in several instances, are over 600 feet from the boilers. A great number of furnaces for heating the bent pipe, preparatory to welding them, are to be seen in the pipe mills, while in the smith's shop are others. In the several machine shops are in operation a variety of machine tools for special purposes, representing the best makers in Philadelphia and elsewhere. All the machinery in the establishment is present in duplicate, to meet any exigency which might arise from breakage or other cause; so that it is scarcely probable that any disaster could occur which would cause the suspension of any of the operations of the establishment for more than twenty-four hours.

The establishment affords employment to about 1,600 workmen, though the number is subject to slight variations, according to the variations in the press of work at different seasons. Two thirds of these are at work during the day, and they are relieved by fresh relays at evening—the pipe-mills being kept in constant operation day and night. Here are arrayed on one side of the large stone building a row of reverberatory furnaces; in front of each are placed the bending or welding tables. Each of these is provided with a peculiarly constructed tool having movable jaws, which can be set to any suitable width, to accommodate itself to the size of pipe required. Before the jaws is seen a species of carriage, which can be made to traverse the whole length of the bending or welding table by being thrown into gear with an endless chain placed immediately beneath its surface, and which is operated directly from the main line of shafting which passes beneath the flooring. To this carriage can be attached a pair of tongs, by which the end of the bent pipe emerging through the jaws can be firmly grasped, and the carriage with it travels the length of the table. It would be clearly impossible to force a flat sheet of heated metal immediately through a circular opening; and recognizing this difficulty, the jaws are so constructed as to gradually adapt the flat sheet to its circular form. The apparatus for welding the bent sheet is almost identical with that employed in the bending process, except that the form of the jaws is of somewhat different shape, to adapt them to their somewhat modified function. The half formed tube is placed in the welding furnace until properly heated, and is then similarly forced through the aperature in the jaws, which are so designed as to exert a great pressure upon all sides of the tubes. Thus the open edges are brought together with great force, and firmly united. The form of the joint or seam thus made is called the "but-weld," the edges being simply united by contact under great pressure, and no lapping involved. This is the nature of the weld universally employed for pipes which are designed for service where but little strain will be exercised upon them, such as pipes for conveying gas, water, etc. In other forms of pipe, designed for boiler tubes, steam conveyers, etc., which will be called upon to withstand unusual strains, a joint of extraordinary strength, known as the "lap weld," is given, rendering them as homogeneous in structure as though no joint had been effected, and no more liable to break at the joint than at some other part of their structure. After the welding the pipes are subjected to a simple rolling process, to render them perfectly straight and round, and after cooling, are taken to the finishing rooms to be cut to proper lengths, supplied with screw-threads and sockets for connection, tested, and if approved, assorted into bundles convenient for transportation.

The screw-cutting machines, of which there are twenty or more in this department, are models of machines for special work, and are designed to combine, under the management of one skilled workman, a number of separate functions. The same machine that cuts off the end of the pipe squarely, cuts the screw-thread upon it; and the motion being reversed to remove the freshly-cut thread from the dies, the other end of the pipe, previously furnished with a thread, is, by the reversed motion, screwed into the socket. With the screw-cutting machines in this department, it is possible to turn out over 6,000 finished pipes per day; each of them requiring but the attendance of one workman.

Other machines are employed upon the work of finishing the gas and steam fittings required to join the ends of pipes.

There are some half-dozen testing machines in the finishing department in constant operation. The strain applied to various pipes is greater or less, according to the character of the work they are destined to perform. For gas, water, and steam pipes, they are all proved to a pressure of 300 pounds per square inch; for pipes destined for oil or artesian wells, or similar use, under circumstances where they will be subjected to unusual pressures, the strain which they are required to withstand in the testing machine is raised to 1,000 pounds.

From the foregoing it will be evident that the manufacture of a pipe is highly complex, involving a number of distinct stages, each of them demanding, in its turn, a new process and special machinery, and that the utmost care and the most refined appliances are called into requisition to insure its quality before it is ready to perform its allotted services.

With the machinery at present in operation the factory is enabled to manufacture tubes of all sizes up to 8⅝ inches, and which can not be accomplished by any other establishment in the country; and machinery is now being erected by which tubes of 12 inches in diameter can be manufactured. The establishment possesses the most ample facilities for erecting gas-works complete from the very beginning.

The most recent improvement is the manufacture of rubber-coated iron pipe, which is far superior to galvanized pipe, as it is absolutely impervious to acids or alkalies, and as it stands also heat, it is the most desirable medium to convey water. It is exclusively made by this firm, and its price is the same as that of galvanized iron.

At present a branch of this concern is in operation at Newcastle, Delaware Co., Pa., where it is probably that ultimately the whole establishment will be transferred.—*Manufacturer and Builder.*

Postal Money Orders.

The Postal Money Order system which was adopted by the government during the war has become a popular institution, and the business of the Post Office Department in this direction is yearly expanding. The report of the sixth auditor of the Treasury sets forth the wonderful growth of the money order business during the fiscal year which ended June 30, 1873. The number of domestic money orders issued was 3,355,686, against 2,573,349 for the fiscal year which ended June 30, 1872, involving the sum of $57,516,214 69, against $48,515,532 72 in 1872; showing the large increase in the short period of a year of $9,000,681 97. The increase in the number of British international money orders issued was also very large. These orders amounted to $1,354,476 32, against $747,426 08 in 1872; an increase of $617,050 24. The Swiss orders amounted to $78,313 53, against $85,579 92; a decrease for some reason of $7,265 99. The German international exchange of money orders began on the 1st of October, 1872, and from that time up to June 30th last orders amounting to $420,722 12 were issued. The total amount of domestic money orders paid during the year was $56,900,351 28, against $48,042,405 88 in 1872; or an increase of $8,857,945 35. The British money orders paid amounted to $215,087 61, against $133,810 83; an increase of $81,276 78.

Bay State Iron Company.

A correspondent of the New York *Times*, writing from Lake Champlain, gives an account of the blast furnaces of the Bay State Iron Company, which are located on the lake shores, at the extreme northern end of the village, in close proximity to the steamboat landing and the line, not yet finished, of the New York and Canada Railroad. The company has two remarkably fine furnaces, though they have been in blast some years. When first constructed they must have been among the finest furnaces in the country. The Bay State Iron Company is composed entirely of Boston capitalists, numbering among its members such men as Samuel Hooper, William T. Andrews, John H. Reed and W. T. Foote. Mr. Foote is the resident director at Port Henry, and superintendent and manager of the furnaces. Twenty years ago this company was organized and purchased the property, including two small blast furnaces. In 1854, one year later, they erected a third furnace of much larger capacity, and into which all the latest improvements in blast furnaces were introduced. It is one of the two now in blast. In 1855 the old No. 2 furnace went out of blast, and in 1861 the company built another furnace, precisely similar to the one built in 1854, on its site. Three years afterward the old No. 1 furnace went out of blast and was pulled down, leaving the company the two splendid furnaces which they had built for themselves. These two furnaces make on an average 200 tons each of the highest grades of anthracite pig-iron per week. They can make and have made as much as 300 tons each per week. A large portion of the ore used comes from the Cheever bed, in which, as I have before said some members of the company are stockhold-

ers, and in which the general company has a mining right to a portion of the ore on payment of a royalty of fifty cents per ton, in addition to the cost of mining. All the arrangements in and around the furnaces are most excellent. The boshes are 16 feet in diameter and the stacks 60 feet high, and the works give employment to some 250 men and boys. All the ore and coal is dumped from trestle-work close by the furnaces, and a small branch track carries the pig-metal to the wharf, for loading for water transportation or to the railroad, by means of which it reaches the East, via Ticonderoga and Rutland. Nearly all the pig iron made at these furnaces is shipped to the Eastern States. The company also have a small foundry, in which they make their own castings and help their neighbors when necessary. They have lately made some castings for the new Cedar Point furnaces, at Port Henry. But they do not go generally into the foundry business. They regard their foundry as a mere accessory to their blast furnaces.

Statement of the Public Debt of the United States November 1, 1873.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.

Western Pacific bonds, 1862-4	1,970,560 00	39,411 20
Sioux City and Pacific bonds, 1862-64	1,628,320 00	32,566 40
Totals	$64,623,612 00	$1,292,470 24

Interest paid by United States, $20,447,936 26; interest repaid by transportation of mails, &c., $4,538,813 71; balance of interest paid by United States, $15,909,172 55.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, October 31, 1873.

WILLIAM A. RICHARDSON,
Secretary of the Treasury.

Galveston, Harrisburg and San Antonio Railroad.

Bexar County, Texas, in which San Antonio is situated, has voted to issue $500,000 in bonds in aid of the Galveston, Harrisburg and San Antonio Railroad Company. The conditions, which it is said have been accepted by the company, are:

The road is to be completed to San Antonio and equipped within 20 months. An additional sum of $50,000 in bonds is to be paid the company for every month less than the 20 months provided the road is completed in less than that time, and provided that the whole issue of bonds shall not exceed $800,000. Of the bonds $250,000 are to be issued when the road shall reach the Guadalupe river and the balance is under construction. The company is to give bonds in $100,000 to be forfeited in case the road is not completed.

☞ The Perkiomen Railroad was opened October 6th from Green Lane to Pennsburg. The whole distance now run is 23 miles. The work of grading the remainder of the line, from Pennsburg to Emmaus, is progressing.

☞ Ottawa (Ca.) has voted a bonus of $100,000 to the Montreal and Ottawa Junction Railway. It is asserted that the work will go forward at once.

The First Railroad.

The first railroad in the United States was built in the year 1827, from the granite quarries of Quincy, Mass., to the Neponset river, a distance of three miles. During the same year, a road was commenced from Mauch Chunk, Pa., to the Lehigh river, about nine miles distant. In 1828, the Baltimore and Ohio Railroad was commenced, with the intention, originally, of using horses: but the success of locomotives was such as to secure their substitution on this in common with other similar roads for horse power. The Hudson and Mohawk Railroad, from Albany to Schenectady, was commenced in 1830, being the first section built of what is now the New York Central. Within three or four years from that date, numerous enterprises of this kind were undertaken in various parts of New England and the Middle States, most of which were successful, some of the mbeing the germs of railroads which are at the present day among the wealthiest and most powerful corporations in the land.

Milwaukee and St. Louis Air-line Railroad.

The directors of the Milwaukee and St. Lewis Air Line Railway met at the Newhall Thursday afternoon, and proceeded to the election of officers, with the following result:

President—Joshua Stark, of Milwaukee.
Vice-President—T. B. Brewster, of Peru Ill.
Secretary—William G. Parsons, of Milwaukee.
Treasurer—John Black, of Milwaukee.
Executive Committee—Joshua Stark, of Milwaukee; T. D. Brewster, of Peru, Ill.; J. H. Johnson, of Woodstock, Ill.; George Burnham and R. W. Pierce, of Milwaukee.

This board of officers is elected for the balance of this year simply. In January another meeting will be held, at which officers for the year 1874 will be elected.

The board will now take active measures for the construction of the road. The fact that four-fifths of the way from here to the State line is already graded, will prove a valuable and important aid.

The gentlemen in whose hands the enterprise is placed, are of well-known business activity and success, and our citizens can count upon the early completion of the valuable line, which will directly connect the two great cities and open a new and broad field for Milwaukee.—*Milwaukee Wis., Oct.* 29.

The First Locomotive.

The first locomotive built in the United States was the Ironsides, made, in 1831, by M. W. Baldwin for the Germantown Railroad. The American locomotives are generally conceded to be the most perfect railroad engines made in the world. One, built at the Grant Locomotive Works, Paterson, N. J., was exhibited at the Paris Exposition, and was awarded the first premium over all European competition. The same establishment in Philadelphia which occupied six months in building the first American locomotive, in 1831 now turns out an average of forty per month.

☞ The cars of the Pittsburg, Virginia and Charleston Railroad are now running to Monongahela City, 30 miles up the Monongahela. We believe there is no grading done beyond that point.

☞ The surveys for the Brownsville and Youghiogheny Railroad have been completed. The Mt. Braddock route has been chosen, and it is said that grading will be commenced in a short time.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of October, were :

ENTERED FOR CONSUMPTION.

☞ The decree of the United States circuit court, ordering the sale of the Des Moines Valley Railroad has been modified so as to require the road from Des Moines to Fort Dodge (88 miles) to be sold for the benefit of the second mortgage bondholders, and the road from Keokuk to Des Moines (161 miles) for the benefit of the first mortgage bondholders, The second mortgage bonds were a first lien on the line from Des Moines to Fort Dodge.

Call for the Redemption of Five Twenty Bonds.

The Treasury has just issued the seventh call for the redemption of five-twenty bonds of 1862, as follows :

TREASURY DEPARTMENT, Nov. 1, 1873.

By virtue of authority given by act of Congress, approved July 14, 1870, entitled ' An act to authorize the refunding of the national debt," I hereby give notice that the principal and accrued interest of the bonds herein below designated, known as five-twenty bonds, will be paid at the Treasury of the United States, in the City of Washington, on and after the 1st day of February, 1874, and that the interest on said bonds will cease on that day ; that is to say, coupon bonds, known as the third series, act of Feb. 25, 1862, dated May 1, 1862, as follows : Coupon bonds, fifty dollar, Nos. 10,201 to 10,600, both inclusive ; one hundred dollar, Nos 20,751 to 34,000, both inclusive ; five hundred dollar, Nos. 15,801 to 17,600, inclusive ; one thousand dollar, Nos. 36,001, to 41,000, inclusive ; total, $4,500,000 ; registered bonds, fifty dollar, Nos. 1,376 to 1,410, inclusive ; one hundred dollar, Nos, 10,301 to 10,560, inclusive ; five hundred dollar, Nos. 6,101 to 6,300 inclusive ; one thousand dollar, Nos. 25,001 to 25,650, inclusive ; five thousand dollar, Nos. 7,901 to 8,100, inclusive ; ten thousand dollar, Nos. 10,101 to 10,320, inclusive ; total, $500,000 ; total, $5,000,000.

Of the amount outstanding, (embraced in the numbers as above,) four and a half million dollars ($4,500,000) are coupon bonds, and five hundred thousand dollars ($500,000) are registered bonds. United States securities forwarded for redemption should be addressed to the Loan Division, Secretary's Office, and all registered bonds should be assigned to the Secretary of the Treasury for redemption.

WILLIAM A. RICHARDSON, Secretary.

Credit Valley Railway.

At the second annual meeting of this company held in Toronto, on the 23rd ult., the annual report was read by the President, Mr. George Laidlaw. The report mentions that $2,000 a mile was granted by the Provincial Parliament, for the whole line of railway as chartered, excepting the short piece from the forks of the Credit River to Elora or Salem. Aid will be asked from the government for this section also. The county of Peel by-law granting a bonus of $70,000 had been confirmed by the Legislature. Work had been commenced under the direct management of Mr. Thomas Inglis, C. E., Resident Engineer, upon the plan of the company itself employing and paying for the labor and all accounts direct. From 200 to 350 men have been constantly employed during last season and the system adopted has resulted most satisfactorily to the men and to the Directors. The line has been surveyed from the Union station to the village of Campbellville, and from Streetsville to the village of Alton, the steepest grade being one in 100. Twenty-six miles of the line have been made ready for the iron in a style unsurpassed in Canada. Materials for the construction of sixty miles of fencing have been purchased, paid for, and delivered. Tenders have been invited for the balance of the fencing, and timber for bridges, ties, etc., and negotiations opened for stone and the materials for stations. The Directors have not asked nor have they received as yet any money from the Trustees of the Municipal Trust Account. Since the last amendments to the charter were granted, a section of the county of Oxford including the towns of Woodstock and Ingersoll has voted the sum of $200,000, and a section of the county of Waterloo including the town of Galt, has voted $11,000 by way of bonus in aid of the company. A section of the county of Wellington refused to grant a bonus upon the terms proposed by the Directors. An effort will be made in combination with the Provincial Government to secure 1,000 able bodied laborers for next season's operations on the Line. The Directors strongly recommend that arrangements be made with the Grand Trunk Railway Company for terminal passenger accommodation in the Union Depot Toronto, and that this company should join with any other railway company or companies in guaranteeing the debentures or stock of a company which would build an elevator of such dimensions and freight accommodation on the water front, near the centre of the city as would satisfy the requirements of this and any other companies which may join in such guarantee. Failing any other companies joining in such arrangements, it is deemed expedient for this company to make such arrangements as will secure the construction of an elevator and freight house so located. The Directors in the event of the construction of the Hamilton and North Western Railway to Milton, suggest that in conjunction with the Hamilton and Lake Erie and Grand Trunk or Canada Southern Railways, a new through route to Buffalo and New York would be made available to the city of Toronto, and also a large accession of American traffic secured from the Canada Southern and other lines to the city for shipment by the G. T. R. and St. Lawrence route to Dominion ocean ports. The report was unanimously adopted, after which a ballot was taken, and the following gentlemen were elected Directors of the company : Messrs. G. Laidlaw, C. J. Campbell, Angus Morrison, R. W. Elliott, John Gorden, James L. Morrison, Wm. Arthurs, Robt. Hay, and John Macnab. The meeting then adjourned.

Columbus and Hocking Valley Railroad.

The receipts of this road for October were $114,000, making total for the ten months of this year, $938,000. Should there be an average business during November and December, the grand total will be nearly $1,200,000 for the year 1873. Should there be a partial stoppage of manufacturing demand for coal from Chicago, Cleveland and other points, it will be equalized by the necessary increase of fuel demand during the winter months. Should the manufacturing demand not decrease, the business for 1873 will far exceed the largest estimates of the managers and owners of the road. During the past summer, the capacity of the road has been largely increased, many miles of steel rails have been laid, side tracks extended, nearly all the wooden bridges replaced by iron, depots, shops and transfer grounds enlarged, and motive power and cars increased, so that the road is now in splendid condition for a full winter's work.

United States Mint.

The annual Report of the Director of the Mint for the fiscal year ending June 30, 1873, shows that the amount of gold and silver deposits and purchases, coins struck and stamped, and bars manufactured during the year was as follows :

Deposits—Gold, $59,937,429 45 ; silver, $12,807,389 43. Total amount received and acted upon, $72,244,818 98. Deducting re-deposits made and issued by one institution and deposited with another, the deposits were :—Gold, $57,704,885 88 ; silver, $9,145,828 43. Total, $66,849,714 31.

Gold pieces coined, 1,824,420 ; value, $35,249,337 50. Silver pieces coined, 11,774,250 ; value, $2,945,795 50. Minor coinage pieces 18,925,000 ; value, $494,050. Total, 31,523,670 ; $38,689,183.

Bars manufactured—Fine gold, $7,554,956 86 ; imported gold, $12,940,659 25. Total, $20,495,616 11. Fine silver, $3,084,259 56 ; imported silver, $3,287,654 94. Total, $27,517,530 61.

Kanawha Coal.

The following report of some of the information given at a meeting recently held in Charleston, West Va., of persons interested in the development of the resources of the country along the Kanawha River is given by the *West Virginia Journal*:

The committee from the United States Senate, composed of Messrs. Conkling of New York, Sherman of Ohio, Davis of West Virginia, Norwood of Georgia, and Windom of Minnesota, and others interested in the Virginia water line, requested such persons as had made the mineral resources of this country a matter of study and practical investigation to assist them (the committee) in obtaining the necessary information. They were fortunate in having Prof. Ansted, of England, whose authority on these subjects is acknowledged everywhere, to give them information, which he did in answer to pointed and practical questions. W. H. Edwards, Dr. J. P. Hale, M. F. Maury, and others, appeared also before the committee and furnished much valuable data relative to the coal, salt, iron, and other minerals on and along the proposed water line from the Ohio River to the Chesapeake Bay. Prof. Ansted stated that the Great Kanawha coal field was the most remarkable in the world for the variety, richness and extent of its coal deposits; that at Hawk's Nest, in Fayette County, about forty-five miles east from Charleston, he had this month made an examination and found fourteen workable veins of coal in the same mountain, lying horizontally, and all above the bed of New River. He further stated that the iron deposits east of the Alleghanies and on the head waters of James River, were as extensive as the coal on New River and the Great Kanawha, and that iron could be manufactured along the Chesapeake and Ohio Railroad at half the cost that it could now be in England. He further stated that water transportation is necessary to utilize fully these vast coal and iron deposits. Hence the importance of slack water navigation on our river. The report of the Senate Committee, when printed, will contain much useful information on these subjects.

The Illinois Railroad Tariff.

A Springfield dispatch to the Chicago *Tribune* gives the following statement of the classification of the Illinois railroads by the State Commissioners as respects rates of freight and fare:

The first group of railroads are those which are denominated "standard," and to which the schedule of rates fixed for the Toledo, Wabash and Western Railroad, and published in the *Tribune*, are applied. They are: Columbus, Chicago and Indiana Central, Chicago and Alton; Illinois Central; Chicago, Burlington and Quincy; Chicago and Northwestern; Indianapolis and St. Louis; Chicago, Rock Island and Pacific; Toledo, Wabash and Western, and the Ohio and Mississippi Railroads. The passenger tariff of these roads is fixed at three cents per mile.

The second group or those which are placed at 10 per cent below the "standard" rates, are the Michigan Central, Lake Shore and Michigan Southern, and the Pittsburg, Fort Wayne and Chicago Railroads. The passenger tariff of these roads is fixed at two and a half cents per mile.

The third group, or those which are placed at 5 per cent above the "standard" rates, are the Western Union; Chicago, Danville and Vincennes; Toledo, Peoria and Warsaw; St. Louis, Alton and Terre Haute; and the Illinois and St. Louis Railroads. The passenger tariff of this group is fixed at 3¼ cents per mile.

The fourth group, or those which are placed at 10 per cent above the "standard" rates, are the Peoria, Pekin and Jacksonville; Peoria and Rock Island, and the Rockford, Rock Island and St. Louis Railroads. Their passenger tariff is fixed at 2½ cents per mile.

The fifth group, or those which are placed at 15 per cent above the "standard" rates, are the Gilman, Clinton and Springfield, Chicago and Iowa; Hannibal and Naples; Peoria, Lincoln and Decatur; St. Louis and Southeastern; Springfield and Illinois Southeastern, and the Cairo and Vincennes, and all other organized roads in the State. The passenger tariff is fixed at 4 cents per mile.

Values of Gold and Silver.

A recent number of the Denver (Col.) *News* contained the following:

We have secured the following from the superintendent of the branch mint in this city. The fineness of Colorado gold and the calculation of values on gold and silver are also given.

One ton (2 000 pounds avoirdupois) of gold or silver contains 29,163 troy ounces, and, therefore, the value of a ton of pure gold is $602,799 21, and of a ton of silver is $37,704 84.

A cubic foot of pure gold weighs 1,218.75 pounds avoirdupois; a cubic foot of pure silver weighs 656.25 pounds avoirdupois.

One million dollars gold coin weighs 3,685.8 pounds avoirdupois; one million dollars silver coin weighs 58,929.9 pounds avoirdupois.

If there is one per cent of gold or silver in one ton of ore, it contains 291.63 ounces, troy, of either of these metals.

The average fineness of the Colorado gold is 781 in 1,000, and the natural alloy; gold, 781; silver, 209; copper, 10; total, 1,000.

The calculations at the mint are made on the basis that 43 ounces of standard gold, or 900 fine (coin), is worth $800, and 11 ounces of silver, 900 fine (coin), is worth $12 80.

Pennsylvania and Western Railroad.

A new railroad company, (the Pennsylvania and Western,) has been organized for the purpose of constructing a railroad from Cleveland to New York. It is asserted that the projectors, after expending large sums in preliminary surveys, have ascertained that an air line road can be constructed between those points, which shall be shorter, have lighter grades, easier curves, and be more economically constructed than any line now in existence. This line runs on, or along and near, the line of the 41st parallel of North latitude, and is claimed to be 67 miles shorter than any of the existing routes. The company propose a rapid completion of their line, and from estimates of contractors this can be accomplished by the fall of next year. When completed it will open new coal fields and a new lumber country.—*Railway Chronicle.*

☞ The English engineers have completed the survey of the first fifty miles of the Persian Railways—viz., from Teheran to Kasvin—of the proposed line of railway from Teheran to Resht, on the Caspian. Part of them have left for Resht, to commence surveying thence towards Kasvin.

☞ A dividend of 8½ per cent has been declared on the common and guaranteed stock of the Richmond, Fredericksburg and Potomac Railroad Company, payable on and after Nov. 1.

☞ The New Castle and Franklin Railroad is completed between the former city and Mercer.

THE WHARTON

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

DELAFIELD & BAXTER
CEMENT COMPANY.
MANUFACTURERS OF HIGH FALLS
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at our office, **54 Pine Street, New York.**

The above CEMENT is used in most of the fortifications building by government.

HUDSON RIVER
CEMENT WORKS,
Manufactory at Kingston, N. Y.
(LATELY IN JERSEY CITY, N. J.)

MANUFACTURERS OF ROSENDALE HYDRAULIC CEMENT, having facilities for manufacturing 600 barrels daily, are now prepared to furnish, on the most reasonable terms, Rosendale Hydraulic [Diamond A] Cement of a fine and superior quality, all of which is by ourselves manufactured at the works, located on the West bank of the Hudson River, near Rondout, N. Y., from a superior selected quality Cement Stone, quarried exclusively from our (lately Hudson River Cement Co., Jersey City, N. J.) celebrated and extensive quarries, situated at Creek Locks, town of Rosendale, Ulster County, N. Y. Our Cement having been extensively used the last twenty years, and meeting the approval of the most eminent Builders, U. S. and other Engineers, we have authority for declaring our brand, (Diamond A) Cement, the American Standard Hydraulic Cement, all of which is put up in good shipping order, in new, tight, well-made (at the Manufactory) and papered barrels. The largest class vessels can come to our works without extra towing or delay. Cement deliverable at the Works or in New York City. Our barrels will be branded, "Hudson River Cement Works, Rosendale (Diamond A) Cement, Office, No. 95 Liberty Street, New York."

THE LOCK-NUT & BOLT COMPANY OF NEW YORK,
No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.

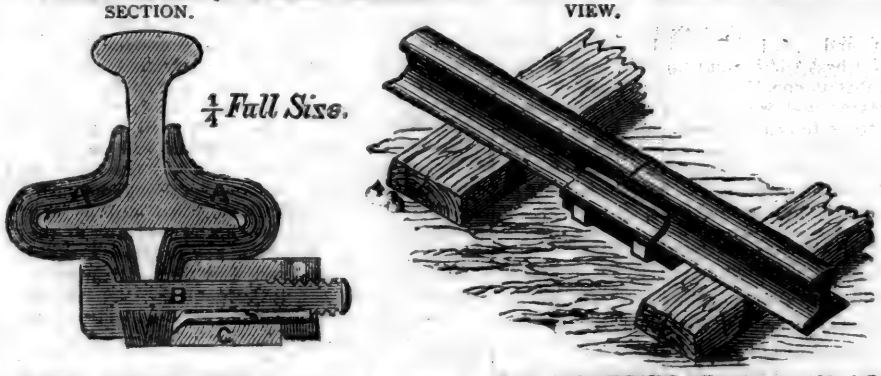
IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.



Scott's Wrought Iron Clamp Truss Joint
FOR RAILROAD RAILS.

LENGTH 9 TO 12 INCHES, THICKNESS ⅝ OF AN INCH.
WEIGHT 20 TO 30 LBS. COST FROM $1.30 TO $1.50.

Has been tested to *94,000* lbs., between 24 inch bearings, (a 40 ton engine will not test it more than 10,000 lbs.) it is a *TRUSS*, supporting fully the ends of rails while suspended itself. This principle gives it a power that no chair has. Forty per cent. of rails now destroyed, will be saved by its use.

It is *SIMPLE*, can be put on broken or sound rails at once; will not stir from its position, and requires no renewal.

SECTION. VIEW.

VIEW AND SECTION show position in place. A.—Is CLAMP-TRUSS. B.—Are two ¾ inch Bolts. C.—An Iron Collar, (a prepared wood block can be used in its place if parties prefer it.) D.—Is the Nut. S.—The LOCK of the NUT, which prevents its jarring loose.

The patentee is prepared to fill orders sufficient for four miles of track per day.

Provision has been made to prevent sliding of the rails.

For particulars, address

Pennsylvania Railroad.

A meeting of the directors of this company was held in Philadelphia on the 7th inst., the main purpose of which was to consider the feasibility of a semi-annual dividend. To this end the Finance Committee of the Board submitted a report giving the receipts and expenses of the company for the six months ending October 31. From the statement of the Controller it appears that the gross earnings of the Pennsylvania Railroad and branches (estimating the month of October) were $13,202,701 82; expenses for the same period, $8,071,393 60; leaving net earnings of $5,131,308 22. To which must be added balance of income from interest on sundry bonds and stocks of other companies, after payment of interest on the floating debt of the company, $918,294 78. Total profits, $6,049,603. It also appears from the statement of the controller that the gross earnings of the United Railroads and Canal of New Jersey for the time were $5,625,267 77; expenses for same period, $3,940,986 76; leaving net earnings of $1,684 281 01. To this is to be added rents, interest and dividends received by the treasurer from property of United Railroads and Canal Company, $76,632 28, giving a total of $1,760,913 89. The amount paid as interest and dividend under the lease of the United Railroads and Canal is $1,820,249 28, leaving a deficit in operating the United Railroads and Canal for six months of $59,335 89. These figures leave net profits of Pennsylvania Railroad and United New Jersey Railroads and Canal, $5,990,267 11. The treasurer's statement shows that the amount required to pay the interest on the mortgage bonds of this company is $880,511 70; premium on gold to pay interest on bonds, $71,092 75; State tax on coupons and capital stock, $215,751 18; semi-annual amount due on purchase of State works, $230,000; rent of Harrisburg and Lancaster Railroad, $65,128 29; interest on bonds and mortgages on real estate, $23,351 75; dividend of 6 per cent on capital stock of the Pennsylvania Railroad Co., $3,368,419 37; making a total of $4,849,250 04, and leaving a balance to credit of income account, after payment of a November dividend of five per cent, of $1,141,017 07, which is over 1⅔ per cent upon the whole capital of the company. Notwithstanding this flattering statement of net earnings, the company is compelled, in consequence of the prevailing financial panic during the past fifty days, to recommend the payment of the dividend in scrip, the money out of which it was proposed to pay it having all been absorbed in meeting payments for lateral lines, for additional rolling stock, station and warehouses, third track, sidings, &c., necessary to meet the increased business, which, during the past two years, has been augmented over forty per cent. The capacity of the main line had reached its maximum without such improvements, which, when fully completed, will meet, it is believed, the demands of the increased traffic for several years to come. On this exhibit of the financial situation of the company the Finance Committee recommend to the Board to declare a semi-annual dividend of 5 per cent out of the net earnings, clear of State tax, payable to the stockholders on and after the 6th of December, 1873, in scrip of the company, which will be payable on the 6th day of March, 1875 (fifteen months), or sooner, at the option of the company, and bearing interest at the rate of six per cent per annum. In this connection the treasurer of the company was directed to receive up to the first day of May, 1874, at par, the scrip issued by the company for the dividend declared in payment of instalments due and to become due this company on unpaid capital stock.

It is thus seen, says the Philadelphia *Ledger*, from which we have obtained the above, that a 5 per cent dividend in scrip is to be paid. This scrip, at 6 per cent, is to be payable at the option of the company at any time before the expiration of fifteen months—March 6, 1875—but is absolutely payable at that time. This scrip will no doubt come at once on the market as soon as issued, and will probably sell at about 90 per cent. This, for a scrip loan so soon redeemable, is a good investment, as it will pay the purchaser at the price named 16 per cent per annum—10 per cent on the face of the scrip and 6 per cent interest. The receipts of the scrip at par in payment of instalments on the capital is a judicious provision, and will probably insure the prompt payment of most if not all of the outstanding instalments, some $1,300,000.

New York Steam Engine Company.

The New York Steam Engine Company, which has now been established 25 years, makes at its works in Passaic, N. J., all descriptions of machinists' tools, including engine lathes, planers, bolt cutters, upright drills, &c. It has a capacity for turning out $1,000,000 worth of goods a year, which are sold mainly to railroad and locomotive works, car shops, and large machine shops. It occupies a shop 400 feet long by 125 feet wide, two stories high, a foundry, 100x50 feet, and a blacksmiths' shop, 100x50 feet. The machinery is run by water power, furnished by the Dundee Manufacturing Company. The articles made by this company have an excellent standing, and are used extensively in many of the best shops in the country. Besides the articles mentioned, it also makes a specialty of Scott's Gear Moulding Machine. Geo. Place is president, Geo. G. Dow is secretary and Chas. A. Cheever treasurer. Their office and salesroom is at 98 Chambers street, New York.

☞ Messrs. Greenleaf, Norris & Co. have notified the Stock Exchange that they are prepared to pay in full. They will soon resume their seats at the Board.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING JULY 31, 1873.

The receipts on capital account during the half-year amounted to £775,988, arising as follows:—

Deposit of £25 on new issue of £1,209,000 perpetual Five per cent debenture stock	£302,250
On account of 1st July instalment	288,300
In anticipation of future instalments	185,240
	£775,790
Shares issued on conversion of preference stock during the half-year at the rate of 5 shares for every £100 of preference stock:—£7,980 stock converted into 899 shares of £20 10s. each, £8,180, less £1 difference on 24 shares transferred from Canada to London office	£8,180
Less preference stock cancelled on conversion	£7,980
Less difference in exchange on 24 shares transferred from Canada	1
	7,981
	198
	£775,998

The total receipts on capital account on amounted July 31, 1873, to £7,672,682. The charges to capital account during the half-year amounted to £458,048 of this sum the engineer's report shows an expenpiture for roadway, sidings, station buildings, &c., and a proportion of the cost of 4,621 tons rails and 367 tons fastenings laid in the track, amounting altogether to £61,344

There has been further expended on capital account for—

Double track between Windsor & Glencoe	15,963
Detroit river bridge surveys, &c.	689
Third car ferry boat Saginaw	3,434
Fourth car ferry boat, to carry 16 cars	16,326
Locomotives	68,839
Cars	131,708
Gencoe loop line	154,775
For discount, &c	4,969
	£458,048

The total expenditure to July 31, 1873, amounted to £7,246,383, leaving a balance at credit of capital account of £426,299. The receipts and expenditure on revenue account for the half-year have been as follows:—

Gross receipts	£619,839
Working expenses, including renewals, taxes, rents, and all charges	417,099
	£202,740
From which is deducted—	
Interest on bonds, &c	£48,195
Discount and charges on conversion of American currency	39,546
Amount set aside for renewal of ferry steamers	2,000
Alteration of gauge account	9,100
	98,841
	£103,899
Add profit on working leased lines	£3,770
Add surplus from last half-year	3,382
	7,152
Amount available for dividend	£111,051

The dividend for the half-year on the 5 per cent preference stock amounts to £5,692; and from the balance the directors recommend a dividend on the ordinary shares at the rate of 4½ per cent per annum, payable in London on the 4th November, which will absorb £100,335, leaving £5,024 to be carried forward to the next half-year. The aggregate traffic receipts (exclusive of those of the Galt and Guelph, the Wellington, Grey, and Bruce, and the London and Port Stanley railways) exhibit a gross increase of £69,011, which consists of—

Increase in way passenger traffic	£3,548
" way freight and live stock traffic	21,293
" through freight and live stock traffic	43,675
" mails and express freight	1,048
	£69,564
Decrease in through passenger traffic and emigrants	554
	£69,011

The way or local business amounted to 39.22 per cent of the whole earnings of the line as compared with 39.43 per cent in the corresponding half-year, and the through business represented 60.78 per cent, against 60.57 per cent. The passenger rates were about equal to those of the corresponding half-year; but way freight rates yielded .20 cent, and through rates .11 cent less per ton per mile than in the corresponding period. The following table exhibits the receipts and expenses for seven corresponding half-years:—

RECEIPTS.

Half-year ending July 31.	Passengers, mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £
1867	165,367	199,221	116	365,704
1868	155,082	200,619	948	356,649
1869	157,930	226,200	937	385,068
1870	158,863	254,230	807	408,900
1871	158,084	300,059	747	458,891
1872	193,951	356,014	769	550,735
1873	197,994	420,902	868	619,839

EXPENSES.

Half-year	Including renewals & all charges. £	Per cent of gross receipts.
Ending July 31, 1867	182,768	49.98
" 1868	208,462	58.45
" 1869	232,768	60.45
" 1870	251,824	61.58
" 1871	268,276	58.46
" 1872	329,437	59.82
" 1873	417,099	67.29

The discount and charges on the conversion of American currency for the half-year amounted to £39,546, as compared with £34,703 in the corresponding half year. The conversion was made at an average of 115 15-16, the average price of gold for the half-year being 116⅛. In this account there is included £1,436 for discount on the amount of American currency on hand unconverted at the close of the half year. The ferry steamers' renewal fund has been credited with the usual amount and accrued interest for the half-year. The balance at the credit of this fund at 31st July, 1873, amounted to £18,788. The iron car ferry-boat the Great Western, after seven years of uninterrupted service, by night and day, has been taken into dock for two months and thoroughly overhauled, and resumed traffic early in September. The usual sum of £9,100, has been charged to revenue on change of gauge account, making a total sum of £45,500 charged against this account to 31st July, 1873. Thus about one half of the estimated expenditure for the renewal and replacement of the broad guage rolling stock has been charged to revenue. The balance will be debited in the same half-yearly accounts, until the whole sum is completely extinguished. Since the issue of the last report, the outer line of rail between London and Hamilton has been removed. The entire system is therefore now of the uniform American 4 feet 8½ in. gauge. At the close of the half-year there remained only thirty miles of iron rails in the permanent way of the main line, which at the date of this report has been replaced by steel, so that the whole main line as well as the Glencoe loop line, is now laid with steel rails. Following the system adopted for the renewal of rolling stock, it is proposed that an annual reserve fund should be created, to meet the renewal of the permanent way. The directors will be prepared next half-year to report upon this subject. The plan of charging a fixed rate for repairs and renewals of rolling stock has been found to work well. The balance at credit of locomotive renewal fund, at 31st July, 1873, amounted to £30,237. The amount standing to the credit of car renewal fund has been absorbed during the half-year in the purchase of new passenger cars. An exceptionally heavy item of £9,181 is charged in the present half years's accounts under abstract E for foreign terminal charges, and consists of the balance of account against this company for proportion of charges paid by the Michigan Central Railroad since July, 1871, and now finally adjusted. The cost of operating the Wellington, Grey, and Bruce Railway was less by £127 than the 70 per cent of its gross earnings allowed to the Great Western for working it. The additional earnings received by the Great Western on its own line by the traffic interchanged with the Wellington, Grey, and Bruce Railway, amounted to £17,184; of which according to the agreement, the Great Western lays aside 20 per cent, or £3,437, to acquire the bonds of that company. During the past winter some relief was expected to have been afforded to the encumbered main line by diverting a portion of the freight traffic over the unfinished loop line. For a few days in February last this was attempted, but was almost immediately discontinued, owing to the difficulty of safely working traffic over an unballasted road, the embankments and cuttings on which were not consolidated. The government inspector went over the line as far as completed to the Welland Junction, 128 miles, on May 27th, and reported favorably of its construction. An irregular local traffic was then commenced, but the object for which the loop line was built, cannot be attained until the Buffalo International Bridge is opened and a direct connection made with Suspension Bridge. Up to the end of the past half-year the interest upon the money raised for the loop line has been charged to capital as heretofore, less the value of the local traffic earned upon it, together with interest on the unexpended portion of the funds. The total interest on the expenditure for the loop line to Welland Junction will be a charge against revenue from the commencement of the current half-year. In order to permit the immediate use of the Loop line for the through freight business via Suspension bridge, and at the same time to utilize that bridge for traffic interchanged with the New York Central and the Erie Railways, a short branch of eight miles is under construction from the main line terminus at Suspension bridge, to the town of Allanburgh on the Welland Railway, the estimated cost of which is under £40,000. By this branch a through connection will be formed from the Glencoe loop line with the Suspension bridge, making the distance to Detroit as short as from the International bridge, and five miles shorter than the present main line between these points. The easier gradients of the Loop line and the saving in the tolls to be levied on the International bridge will greatly conduce to the economical transport of freight. The route by the International bridge will still be useful for local and cattle traffic coming from the main and loop lines destined for the city of Buffalo. The advantages to this company of the Allanburg branch cannot be too highly appreciated. The receipts and working expenses per train mile for seven corresponding half-years, compare as follows:—

Half year ending	Gross earnings per train mile. s. d.	Ordinary working expenses per train mile. s. d.
July 31, 1867	8 10¼	4 2¾
" 1868	8 5	4 8¾
" 1869	8 0	4 8
" 1870	7 8½	4 7
" 1871	7 9½	4 5
" 1872	7 9¼	4 6
" 1873	7 6½	4 11½

The unsatisfactory results of the working of the half-year ending January 31, 1873, were fairly attributed to the extraordinary inclemency of the

past winter, aggravated by insufficient siding and station yard accommodation, and the want of an adequate supply of rolling stock and also to the higher rates paid for fuel and wages, but as, notwithstanding the steady increase in the gross traffic, the monthly returns continued to exhibit diminished net results, the board determined to proceed to Canada in August last for the purpose of investigating the causes of the increased working expenses, and to strengthen and reorganise, where necessary, the local management of the railway. The president having just returned from Canada confirms the correctness of the reasons given for the disappointing results of the last twelve months' working. The incomplete condition of the extensions of the line and other works in progress, combined with a deficiency in rolling stock, totally crippled the efforts of the working staff to control the rush of traffic during a winter of unexampled severity and of unusual duration. To these must be added the failure in a proper supply of seasoned fuel for locomotives. To avoid the recurrence of a similar default, the management of the wood department has been placed in other hands, and a monthly report of the stock of fuel will be laid before the board, the general manager being at the same time held responsible for its sufficiency. The staff in Canada has been re-modelled. Mr. Price, the late treasurer, has been appointed general manager, and the board have reason to believe that his experience and ability will justify the appointment. To Mr. Muir, as general superintendent, has been committed the duty of working the traffic, and Mr. Woodford appointed assistant superintendent, to whom is specially entrusted the despatching of trains, the distribution of freight cars, and the care of the telegraphs. The local management of the main line and branches has been divided into five sections, to each of which a superintendent has been appointed, the whole acting under the instructions of the general superintendent. Other departments have also been reorganized so as to attach individual responsibility to each branch of management. During his visit, the president carefully examined in detail the working of the railway and its accessories, as well as the relations of the company with connecting railways in Canada and in the States. He reports, after an extended survey, that the entire main line, now practically doubled and relaid, is in first rate condition, that the gradients of the loop line are most favorable for the economical working of the through business; that the sidings and station ground are now ample for present requirements, and the equipment generally such as to prevent a recurrence of those difficulties which have lately so much interfered with successful results. With the staff remodelled so as to ensure the vigorous and economical working of the line, and with the promise of abundant traffic, the directors have reason to anticipate the restored and increasing prosperity of the company. The system of the Great Western Railway being now complete and in connection with lines of railway constructed by independent parties, extending into the most fertile districts of the country, the board consider that no further extensions involving capital outlay on the part of this company, will be either desirable or necessary. The harvest in the Western States has been most abundant, and the opinion of railway authorities in Chicago is that the amount of traffic from this source will tax to the utmost the carrying power of the company. Under the authority conferred by the shareholders at the special meeting on April 9th, 1873, the directors have issued 5 per cent perpetual debenture stock to the amount of £1,209,000; and under the same authority they intend to pay off the 6 per cent terminable bonds of the company due in 1878 by the issue of a further amount of the same description of stock. The financial position of the Detroit and Milwaukee Company, and especially with reference to their bonds maturing this year and in 1875, has received the anxious attention of the board. The large money interest held by the Great Western in that company, together with the material advantage derived from the traffic connections, render some arrangement necessary by which the Detroit and Milwaukee Company may be adequately equipped, and the control of it retained by the Great Western. The consideration of a plan to accomplish this will be the subject of discussion at the special meeting of shareholders, which it is proposed to adjourn till Wednesday, November 5th. Pending any arrangement that may be determined upon by the Shareholders, a temporary advance of $100,000, American currency, has been made to the Detroit and Milwaukee Company, on the security of interest-paying bonds. In the meantime the directors are desirous that it should be clearly understood that no arrangement has been concluded, nor has the Great Western Company been committed in any way. The whole matter forms the subject of a special report to the shareholders, sent herewith, and will be left to their decision at the above adjourned meeting. The directors who go out of office by rotation are—Mr. George Smith, Mr. William Weir, Hon. William Macmaster, and Mr. Donald McInnes. These gentlemen are all eligible, but Mr. George Smith, Mr. William Weir, and Mr. Donald McInnes do not offer themselves for re election. The following gentlemen will be proposed at the general meeting to fill the vacancies on the direction, and the proxies received by the board will be used in their favor. Lieut. Col. Francis Douglas Grey, of Ludgrove, New Barnet; Sir Keith Jackson, Bart., Kingston, Ontario; Hon. William Macmaster, Toronto, Ontario; and Thomas Barkworth, Esq., 16, Austin Friars, London. The auditors also go out of office, but offer themselves for re-election, viz.:—Mr. John Young, of Messrs. Turquand, Youngs, & Co., Mr. Sidney Smith and Mr. Samuel Spreull, in Canada.

Directors.—Alderman Sir Thomas Dakin, Cree Church-lane, London, president. Gilson Homan, Esq., Sanford-house, Kirkstall, near Leeds, vice president. Hon. John Carling, M P., London, Ontario, Canada; John Cleghorn, Esq., 3, Spring Gardens, S. W.; Thomas Faulconer, Esq., 66, New Finchley road, N. W.; Edward H. Green, Esq., 22, Old Broad street, London; Donald MacInnes, Esq., Hamilton, Ontario, Canada; Hon. William Macmaster, Senator, Toronto, Ontario, Canada; Paul Margetson, Esq., Clapham common; George Smith, Esq., 28, Albemarle street, W.; William Weir, Esq., 10, Princes terrace, Dowanhill gardens, Glasgow.

Dangerous Railway Crossings.

In the Supreme Court of the State of Pennsylvania Judge Sharswood has recently made an important decision as to the amount of care to be exercised by the driver of a wagon in crossing a railway track. It arose from a suit for damages brought against the Pennsylvania Railroad. The judge said that the evidence showed that the railroad company was guilty of negligence. The accident occurred on a dark, foggy morning, when there was snow on the track, which deadened the usual rumbling sound of the train. The cars were passing through Allegheny City at a much greater rate of speed than was permitted by the city ordinances; no whistle was sounded, and it is not very clear whether a bell was rung. The view of the track at the crossing was obstructed by cars on a siding. The driver of the wagon, whose horses were killed, testified that he stopped and listened, but heard nothing; and it was contended that he ought to have got out and looked for the train. This he did not do; if he had in all probability he would have been killed also. The court held that the fact that the track could not be seen from the road was no reason why the traveler should not stop and listen, approach at a slow walk, and, if he could not trust his horses, get out and lead them. It was negligence in the railroad to have the crossing obstructed, but this did not dispense with the necessity for extreme caution by the traveler. On the other hand, the court was of opinion that there should be a legislative regulation requiring that the usual notice on country roads, "Look out for the locomotive," should be at a point were the approaching train on the track can be seen in either direction, and that there should be a flagman at every street crossing in a city. The judgment of the court below against the railroad was affirmed, it being held in substance that a person in crossing a railroad track is bound only to do what an ordinarily prudent and cautious man would do. In addition to stopping his wagon and listening he is not obliged to get out of the wagon and go on the crossing to see if a train is coming.

Prizes for Self-Acting Couplings.

The Union of German Railroad Administrations has determined to award prizes—one of 3,000 thalers ($2,250), another of 1,000 thalers ($750)—for the invention of a contrivance by means of of which the coupling of railroad cars can be effected without the necessity of stepping between the cars. The inventions submitted for competition must have been tried practically by one of the railroads belonging to the Union previous to the sending in of the papers, and the proposition for the award of the prize must emanate and be supported by one of the said railroads. The premium does not debar the inventor from patenting the invention and enjoying the benefit of the patent. The papers must so explain the invention by illustrations, drawings, models, etc., that an opinion can be easily formed of its quality, practicability and working; and must be sent in, carriage paid, to the head office of the confederation, Berlin, Prussia, before the 1st of July, 1874. The examination of the competing plans, as well as the decision, whether general or in the form of an award of prizes, will be undertaken and decided by an examining committee, consisting of twelve members, appointed by the confederation.

☞ The income of the St. Andrews (N. B.) Railway for the six months ending July 31, 1873, was £2,444, being £113 less than the corresponding period of last year; the expenditure amounts to £1,981, being an increase of £481 over the corresponding period. The directors recommend a dividend at the rate of 5 per cent per annum, free of income tax, upon the ordinary stock of the company.

☞ The new steam canal boat City of New York, of Baxter's invention, arrived at New York from Buffalo in six days and one hour. She brought seven thousand bushels of wheat at a cost of seven cents a bushel, against ten cents as the cost by horse canal boats and twelve cents by railroads. But five tons of coal were consumed on the trip.

☞ Fifteen locomotives, six extra tenders and two snow plows, belonging to the Boston and Albany Railroad Company were recently destroyed by the burning of the company's round house at Springfield, Mass. The loss is about $130,000.

☞ The tonnage of coal over the Chesapeake and Ohio canal during the month of October was 116,482, and the revenue from the same about $70,000.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that case, in "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *"Italics."* States & Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 15, 1873

Stock Exchange and Money Market.

Money has been accumulating at the banks and in the hands of private lenders since our last, and the loan and discount market has been working much more satisfactorily for responsible borrowers, especially in the line of temporary loans, which, toward the close, were quoted down to 5@7 per cent, and, in exceptional instances, even lower—as low, in fact, as 3@4 per cent. In the way of discounts there was more activity, the demand for commercial paper having been more liberal and rates having been quoted at from 8@15 per cent per annum on the very choicest to very good grades; few names, however, passing at less then 10@12 per cent per annum. The banks have made encouraging headway in strengthening their reserves, and towards the close held about 24 millions of legal tender notes, as against about 6 millions as the lowest of recent figures. An informal report, made up on Saturday, showed that the deposit line of the banks then stood at about 151 millions, as against 208¼ millions on September 12, indicating a liquidation in eight weeks of over 57 millions. It was also said that the specie reserve was about 20 millions, and the circulation about 28¾ millions. It seems doubtful when the regular weekly report of averages at the Clearing-house will be resumed. The relief certificates will not be out of the way before the New Year. The time for publishing these reports again is not important. They are extra-official, at best, as the National Banking Law only requires five reports a year. The new rules of banking presented to the Clearing House Association on Tuesday, on a unanimous report from one of the ablest committees that could have been selected for the reform of the recent practices of allowing interest to Country Banks and certifying for brokers, absolutely necessitates the adoption of something like the London system in the future conduct of the speculative or time business on the Stock Exchange. The Associated Banks can no longer be used for clearing the immense transactions of the Exchange. The sales and purchases other than for cash on the same day must be settled through some other than the long-used and long-abused system of Bank certifications, involving daily clearings, at the risk of the Banks, of $40,000,000 to $60,000,000 per day. The new rules cannot be circumvented.

The U. S. Sub-Treasury, last week, enlarged its currency balance $1,542,520, and reduced its coin reserve $192,530. Its currency balance at the close of the week was $5,667,188; and its coin reserve $49,225,756.

The cash balances under the control of the Treasury Department at Washington, on Tuesday were: Currency, $3,392 614; special deposits of legal tenders for the redemption of certificates of deposit, $10,710,000; coin, $78,600,925. Coin certificates, outstanding, $28,040,580. Outstanding legal tenders, $361,837,271.

Gold has been more active and, at the close, much firmer. The speculative demand has been brisker, while the customs and export drain has been quite moderate. The recent advance in the Bank of England discount rate helped the operators for a rise. The extremes of the price have been 106⅛@107¾, closing on Wednesday at 107⅜ as against 107⅛ on Wednesday of the preceding week. The specie outflow, last week, was only $299,360. The imports of specie at this port last week, were $1,021,840 and since Jan. 1, have been $15,102,494, as against $7,829,402 same time last year.

The customs demand for Gold last week, averaged $226,000 a day. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $108,788,358, against $131,530,269 during the same time in 1872. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $60,314,199, against $69,406,177 during the same time in 1872. The export drain of specie since January 1, 1873, has been $44,208,880 against $64,382,019 during the same portion of 1872.

Foreign Exchange has been quoted irregular, but toward the close higher, with rather more demand noted for prime bills, which have been offered with less urgency. Bankers' sixty day bills on London closed on Wednesday at 106¾@106¼; sight bills on London, at 108¼@108½. The week's exports of Domestic Produce have been to the currency value of about 7¼ millions.

Government securities have varied more or less in sympathy with Gold, and have been moderately dealt in at the ruling figures. The offerings have been on a rather more liberal scale, owing partly to the recent severity of the Money pressure.

U. S. sixes of 1881 closed on Wednesday of this week at 112½@112⅞; U. S. Five-Twenties of 1862, 106¼@106¾; U. S. Five-Twenties of 1864 at 107¼@107¾; U.S. Five-Twenties of 1865 107½@108; U. S. Five-Twenties of 1865 consolidated 109¾@110¼; U. S. Five-Twenties of 1867, 110⅞@111½; U. S. Five-Twenties of 1868, 110¾@111½; U. S. Ten-forties at 105@106; U. S. Fives of 1881 (Funding Loan) 106¼@106¾; Six per cent. currency Sixes from 109¼@109⅝.

A more active movement has been noted in Railway and Miscellaneous securities, with prices generally quoted stronger toward the close.

State and Railway bonds have been in very moderate demand as a rule and prices have been weak and unsettled. Central Pacific first mortgage six per cents closed at from 83½@84.

The import entries of dry goods at New York, amount for the week ending Novembet 8, 1873, to $8,697,583, as compared with $5,022,754 same week last year. The exports of domestic produce are $7,229,773, as against $5,272,000 same time last year. The exports of Gold and Silver, $299,360, as against $433,932 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,356,000, comparing with $1,775,000 same week last November.

General business has been fairly active, at the Produce and Cotton Exchanges, but quite tame in most other lines. Flour, Wheat, Corn, Oats, Pork, Lard, Bacon, and Cotton, closed more firmly. The export demand was active, particularly for Spring Wheat, mixed corn, shipping brands of Flour, and Lard. Groceries, Wool, and Tobacco, Petroleum, Naval Stores, Hides, Leather and East India Goods were depressed on a slow trade. The Metal Trade was very quiet. Ingot Copper has been more active at firmer prices; sales have been 400,000 lbs. at 22c.@22½c. for Lake. Scotch Pig-iron has been inactive and depressed; sales have been 50 tons Glengarnock at $39. American Pig has been quiet and nominal. Of old Rails, 150 tons were sold at $32 50. We quote nominally: Eglinton Pig at $38@$39; Glengarnock, $38 50@$40; Coltness, $43@$45; Gartsherrie, $48; No. 1 American Pig at $35@$37; No. 2 do. at $30@$32; Gray Forge, at $25@$27; English Rails, $62@$63, gold; American Rails, (nominal) at works, $70@$72 50; Old Rails, $32 50@$35; Wrought Scrap, $32@$38. Pig-Lead has been in light demand, with foreign quoted at 7c., gold, for ordinary, and domestic at 8⅜c.@6¼c., gold; Bar, 9¼c.; Sheet and Pipe, 10½c. Spelter has been dull, and quoted nominal at 7½c., gold, for foreign. Pig tin has been dull and depressed, with Straits quoted at 28½c.@29c.; English at 27c.; refined do. at 28c.; Banca at 33c., gold. Of Tin Plates, 50 bxs. Coke Terne brought $7 50, gold, and 200 bxs. Charcoal Terne, at $9 50, gold. Charcoal Plates quoted at $9 75@10 25; Charcoal Terne, $9 50@$9 75; Coke, $8 @8 25; Coke Terne, $7 @$8, gold, per box. Zinc nominal. At the Live Sock Markets, business was somewhat brisker, but at an easier range of values. Ocean freights, fairly active and quoted stronger.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ A. W. Lamb of Hannibal, Mo., has been chosen President, and John P. Acker of New York, Vice President of the Hannibal and St. Joseph Railroad Company.

☞ The lease of the Harlem Extension Railroad to the Central Vermont Railroad Company has been fully executed.

Panama Railroad Company.

The following is a comparative statement of the receipts and disbursements for the seven months, from January 1st to August 1st, of the years 1872 and 1873:

	1872.	1873.
Receipts of road per income book, gross	$990,675 19	$1,034,800 05
Receipts from inter'st, premium on gold, rents, &c.	44,430 14	106,408 62
	$1,032,105 33	$1,141,208 67
Disbursem'ts—Working expenses, proportion interest on bonds and subsidy to U.S. of Colombia for seven months, office expenses, &c., &c.	594,014 39	656,277 15
	$437,190 94	$484,931 52
Net increase, 1873 over 1872		$47,740 58
Gross earnings for July		$171,618 27
" August		115,140 97
" September		119,595 72
		$406,354 96
Gross earnings for the corresponding months of 1872		405,157 19
Increase		$1,197 77

The cash assets of the company this date, are as follows, viz:

Cash in Bank, currency	$2,290 01
" " gold	595 81
	$2,885 82
Loans on call (amply secured) and investments	699,616 26
In hands company's Bankers, London	52,946 90
	$755,448 98

Balance due on a call loan, now in suit, amounting with interest to about $48,500, not included in above statement.

The assets of the sinking fund, this date:

Investment cost as per ledger, and loans on call	$590,719 34
Present market value	$584,972 96

The outstanding bonds of the company are as follows, viz:

1st mortgage, due in 1875 £19,350@4.85	$93,847 50
General mortgage due in 1897 £597,800@$4.85	2,899,330 00
	$2,993,177 50

The sinking fund, with its accumulations, is pledged for the liquidation of the bonds; it is estimated that it will not only be sufficient to retire the bonds at maturity, but leave a considerable surplus to the credit of the company.

The company has no floating debt.

Executive Committee,

John Keeler, Secretary.

New York; Sept. 6, 1873.

☞ The Indianapolis, Cincinnati and Lafayette Railroad, and the Short Line from Lafayette to Chicago via Kankakee, have agreed to consolidate January 1. The Indianapolis *Sentinel* says it is in contemplation to build a branch across the State of Illinois to Clinton, Iowa, and that "its purpose is to draw the great trade of the northwest to the Cincinati and Baltimore markets."

Staten Island Iron Mines.

It has long been known that iron existed in considerable quantities upon Staten Island, and within the past few years large deposits of very superior ore have been opened. The Richmond Iron Mining Co., at Castleton, have been at work for six years, and are taking out fifty tons of ore per day. The ore consists of both hematite and magnetic in combination, and is found in strata and pockets, at an average depth of seven feet, and extends from this point to the serpentine rock, at a depth varying from twelve to thirty feet. The company since the commencement of operations have taken out 150,000 tons of ore, which has yielded about sixty per cent of superior iron, and entirely free from phosphorus. The iron is largely used in the manufacture of steel.

Illinois Central Railroad.

The statement of this Company for the month of October, 1873, is a follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,134.28 for	$16,738 41
Acres Interest Fund Lands Sold	40.00 for	600 00
Acres Free Lands Sold	174.40 for	2,684 80
Total sales during the m'th of October, 1873	2,348.68 for	$20,023 21
To which add Town Lot Sales	for	210 00
Total of all	2,348.68 for	$20,233 21
Cash collected in Oct., 1873		$40,921 04

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$372,842 00	$121,341 00	$494,183 00
Passengers	130,809 30	44,641 10	175,450 40
Mails	6,375 00	3,059 24	9,434 24
Other sources	82,125 00	2,480 76	84,605 76
Tot'l Oct. '73	$592,151 30	$171,522 10	$763,678 40
Total actual earn'gs, Oct., 1872	$684,370 72	$197,321 72	$881,692 44

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending November 1, at 419,149 tons, and for the coal year 17,110,281 tons, against 16,478,230 tons to corresponding time last year, being an increase of 632,051 tons. The bituminous tonnage for the week is 85,266 tons, and for the year 2,796,106 tons, giving a total of all kinds for the week of 504,415 tons, and for the year of 19,906,387 tons, against 18,867,997 to same time last year, being an increase of 1,038,390 tons.

☞ The earnings of the Erie Railway Company for the week ending Oct. 31, 1873, were $475,341, and since Oct. 1, $1,817,369—an increase over the corresponding period of the previous year of $95,052.

☞ The Utah Southern Railroad has been completed within two miles of Provo. The Utah Northern narrow gauge is being extended from Brigham City, its former terminus, to Ogden, and will probably be completed in one month.

☞ The earnings of the Denver and Rio Grande (Narrow Gauge) Railway for the week ending October 31, 1873, were: freight, $5,366 61; passengers, $4,433 42—total, $9,800 03. Same week last year, $10,506 05.

☞ The earnings of the Scioto and Hocking Valley Railroad in October, 1873, were $113,925 35, against $89,995 19 in October, 1872, an increase of $23,930 16. For the ten months ending October 31, 1873, the earnings were $947,825 53, against $681,273 79 in the corresponding period of the previous year, an increase of $266,551 74. In 1872, the months of November and December footed up respectively $98,974 and $84,644; making the total for 1872, $854,892—being about $100,000 less than for the ten months of 1873.

☞ The earnings of the Central Pacific Railroad for the month of October, 1873, were $1,423,875, against $1,285,567 in October, 1872, and $981,005 in October, 1871. For the first ten months of 1873 the earnings have been $11,606,804 against $10,593,011 for the first ten months of 1872, and $7,897,480 for the first ten months of 1871—an increase this year over 1872 of $1,013,793, and over 1871 of $3,709,324.

☞ The Corrugated Iron Company of Springfield, Mass., is full of orders, and running nine hours only because of the early darkness. The National Needle Company is more than busy. Work at the United States Armory is also increasing, and hands are being hired instead of discharged. The Wason Car Company runs eight hours, and has discharged a few men, but expects to go on without further retrenchment.

☞ A letter from Cumberland, Md., to the Baltimore *Sun*, says that the shipments of Cumberland coal for the year to November 1 were 2,199,990 tons 4 cwts., showing an increase over the same period in 1872 of 275,883 tons 1 cwt. Increase in railroad shipments, 345,594 tons 7 cwt.; decrease in canal shipments, 69,771 tons 1 cwt.

☞ The Manchester, N. H., locomotive works have begun to run on twelve hours time, they having received orders from three different parties for locomotives to be made this month. A number of the old hands, discharged last month, have returned.

☞ The annual report of the Connecticut River Railroad shows the receipts of the past year to have been $761,303, which is an increase of $17,965 over 1872. The expenditures were $749,879, an excess over 1872 of $9,432. The surplus fund amounts to $228,409.

☞ The earnings of the Baltimore and Ohio Railroad and branches, including the Ohio Divisions, for the fiscal year ended 30th September, 1873, were $15,644,508 83, against $13,626,677 31 for the previous year, an increase of $2,017,831 52.

☞ The rolling mills of the Baltimore and Ohio Railroad Company in Cumberland, Md., are now being run on the "double turn" again, constant day and night work, excepting Sundays.

☞ The trains of the Cumberland Valley Railroad now all run through to Martinsburg, West Virginia, and Hagerstown has ceased to be its western terminus.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending Oct. 31, are: freight, $76,747 95; passengers, $37,027 82—total, $113,775 77.

Journal of Railroad Law.

PASSENGER RAILROAD COMPANIES NOT LIABLE FOR WANTON AND WILFUL ACTS OF DRIVER—LAW OF NEGLIGENCE.

The facts in the recent case of Pittsburg, Allegheny and Manchester Passenger Railway Company *vs.* Donahue, (70 Penn. St., 119), are fully and clearly stated in the following opinion by—

THOMPSON, C. J.—On the argument at bar, it seemed to me there was a want of definiteness in the instructions of the learned judge in answer of the points of the defendant, in order to exclude as an element of damages the manifest trespass of the driver of the car; but on further reflection this impression yielded to a different conclusion. It is true the learned judge refused to charge as requested by defendant's counsel, that the railway company was not liable for the willful trespass of the driver of the car, but he charged that it was responsible for the results of his conduct, if within the scope of his authority. It might have been more satisfactory if he had explained to the jury what was not within the scope of his authority, as disclosed by the testimony; but in regard to the blow with the iron bar, by which the plaintiff was knocked from the platform of the car and fell under the wheels, he instructed the jury that the driver had no authority to do such an act. This, of course, withdrew it as an element of damages.

We do not say that in no case a blow may not be given by a conductor or a driver and be within the scope of his authority. It certainly may, when by resistance to proper authority it become necessary to execute that authority to beat even trespassers, on their cars. But with the authority to remove them it is implied, if necessary, and the facts must show the necessity; if not, and injury occurs that would be entitled to be compensated, a company might be answerable to the injured party. In this case the blow knocked the plaintiff off the car, and then by culpable negligence the car was driven over his feet, and he was badly injured. The driving of the car was within the scope of the driver's employment, and for this the company was answerable. It was for this that the damages were given.

This subject has received some consideration in the case of Bagley *vs.* The Manchester, Sheffield and Lincolnshire Railway Co., Eng., L. Rep. vol. 6, 415, Com. Bench. The substance of the decision is, that "a person who puts another in his place to do a class of acts in his absence, necessarily leaves him to determine, according to the circumstances which arise when an act of that class is to be done, and trusts him for the manner in which it is done; consequently he is answerable for the wrong of the person so intrusted, either in the manner of doing such an act, under circumstances in which it ought not to have been done, provided what is done is not done from any caprice in the servant, but in the course of the employment." In that case the company was held answerable in damages to the extent of £200, for injury done a passenger by a porter who attempted to remove him from a train which he was rightfully on, but which the porter thought was the wrong train. It was held that as it was within the scope of the porter's duty to remove persons not entitled to passage on the train, the company was liable to damages for the injury to the plaintiff in endeavoring to put him off, although the effort made was under a mistake. All this was because the porter supposed he was acting under legitimate authority, and so he was, but was mistaken in the exercise of it.

Our case was well decided, however, in holding the company, as between it and the plaintiff, answerable for what it did by its agent in the course of his employment, viz: negligently driving over and maiming the plaintiff, it is said, for life.

We do not see any error in the manner in which the learned judge submitted the question of damages to the jury. It was proper to allow the jury to assess damages for pain and suffering sustained as the result of the injury, as well as for any permanent injury proved.

We have nothing to say about the amount of damages allowed by the jury. They may be all right in this particular instance, but this court is often told, and we cannot shut our eyes to the fact, that juries are prone to be more liberal, or perhaps, rather, more unreasonable, in allowing damages against corporations than they are, as against individuals under like circumstances, without reflecting that they are punishing stockholders whose money has built up these useful lines of convenient and speedy transit, and who have no active connection with the management of the business whatever, and who are entirely innocent of any wrong occurring in their management. The rule of right is the same whether the party be artificial or natural, and should be so held by courts and juries. It may be so administered, if care be taken by the judges on the trial of causes where such parties are involved. Had the precise injury here been inflicted by the trespass and negligence of a private hack-driver, such a verdict would hardly have been sustained, as it would probably have ruined and beggared the owner of the vehicle, and yet the rule of right ought to be the same. I have no sympathy with guilty agents, but a reasonable rule of responsibility should apply to his employers if they are guilty of no negligence in employing him, be that employer a railroad company or a private person; the only difference being in the requirement of greater vigilance necessary to the one case than the other, owing to the difference in power to injure between public and private vehicles.

Judgment affirmed.

☞ The receipts of the Boston and Albany Railroad for the year ending September 30, 1873, were $9,798,032, the expenses $7,561,159, and the net profit $2,236,872. In the previous fiscal year the receipts were $9,259,598, the expenses $6,896,984, and the net profit $2,362,614—showing an increase in receipts of $538,434, in expenses of $664,175, and a decrease in net profit of $125,742. The contingent fund at the close of the last fiscal year was $3,263,899, against $3,240,307 on the 30th of September, 1872—an increase of $23,592.

☞ A special meeting of the stockholders of the Duxbury and Cohasset Railroad Company was held in Boston on the 7th inst., to consider the subject of the proposed extension of the road from its present terminus in Duxbury to the Old Colony road in Kingston. The length of the proposed extension is three and one-third miles, and the estimated cost is $70,000. After the details had been submitted and discussed, the whole subject was referred to the Board of Directors with authority to proceed at once with the construction of the road.

Detroit and Milwaukee Railway.

The directors of the Great Western Railway Company of Canada have issued the following report, giving a history of the connection of that company with the Detroit and Milwaukee Railway Company:

Most of the shareholders know, but it may be useful briefly to recapitulate the facts relative to the connection of the Great Western with the Detroit and Milwaukee.

Some years before any member of the present Great Western board became a director upon it, a loan of 250,000*l.* was made, with the consent of the Great Western shareholders, to the Detroit and Milwaukee, to help them to complete their railway across the State of Michigan in immediate connection with the western terminus of the Great Western, the traffic from which line was justly considered to be of great value to the Great Western.

The railway was completed at the end of 1858, and has since then transferred its through traffic to the Great Western.

The Commercial Bank of Canada had also made large cash advances to the company for the legitimate purposes of the railway, and although the Great Western, during a protracted litigation, successfully resisted the action of the bank to make it liable for those advances, yet the debt was eventually compromised by the issue to the bank of what are called "Street Douglass" 6 per cent bonds of the Detroit and Milwaukee, ranking in priority next after its ordinary mortgage bonds. The Merchants' Bank of Canada, of which Sir Hugh Allen is the president, subsequently took over these bonds with other assets of the Commercial Bank, then in liquidation.

While this litigation was pending, the Great Western were advised to foreclosure the mortgage given for its advance of 250,000*l.*, and in October 1860, in virtue of a decree, it purchased the rights, privileges, and property of the Detroit and Milwaukee, subject to the prior mortgages of the ordinary bondholders, and transformed the 250,000*l.* or $1,250,000 loan into preference shares to the amount $2,095,000, which included arrears of unpaid interest up to that date.

The Detroit and Milwaukee has had to contend during the last twelve years with this great difficulty, that no new capital has been raised to renew or improve its permanent way or station buildings, to add to its rolling stock, or to repair the disasters of a fire which consumed the Detroit station in April 1866. Whatever funds have been expended on capital account have been taken from its revenue earnings. Indeed, for four years ending November 1867, the company were compelled to suspend the payment of its ordinary bond interest, and apply the net earnings of the road to capital purposes. The interest coupons during this period were funded, and are represented by bonds bearing interest.

Up to December 31, 1873, the large sum of $1,954,000*l.* has been expended on capital account, the whole of which had been provided out of revenue since the re-organization of the company in October 1860.

This is briefly the past history of the Detroit and Milwaukee, which will serve to elucidate the annexed letters of Mr. C. C. Trowbridge, the president, and Mr. G. Jerome and Mr. G. V. N. Lothrop, the legal advisers of the company.

Mr. Trowbridge states that the present bonded mortgage debt of the Detroit and Milwaukee, having a prior claim over the Great Western and the "Street Douglass" bonds issued to the bank and to others amounts to $5,420,737

The "Street Douglass" bonds, held by the Merchants' Bank and others, together with arrears of interest unpaid 2,259,975

Under the compromise made with the Commercial Bank, it was stipulated that whenever the net revenue of the railway in any year permitted in-

terest to be paid on the Great Western preference shares, interest on the "Street Douglass" bonds should also be paid, so that dollar for dollar each should receive the same interest. But the bank reserved in one respect a prior claim to the extent of $100,000 yearly to be paid out of net revenue, and applied to redeem so much of the "Street Douglass" bonds held by the bank. Under this arrangement $350,000 of these bonds have been already redeemed, and the interest of three half-years only has been paid to the bank, to other "Street Douglass" bondholders, and also to the Great Western.

In any re-organization of the Detroit and Milwaukee obligations, it is absolutely necessary to acquire the bonds still held by the bank which possess this priority of redemption. They amount to $1,238,000
There are five years' unpaid interest, at 7 per cent 482,300

$1,720,300

The Merchants' Bank propose to sell this claim for the sum of (United States currency) $800,000
Mr. Trowbridge estimates that the remaining "Street Douglass" bonds can be bought for, say 200,000

With these charges removed, the Great Western would be the sole owners of the property of the Detroit and Milwaukee, subject to the prior mortgage debt of $5,420,773, a property the actual cost of which is $11,837,000.

Mr. Price estimates the value of the traffic to the Great Western brought from the Detroit and Milwaukee, for the last five years, at an aggregate of $1,683,578, and that the present value of the gross traffic to the Great Western may be taken at least at $600,000 per annum.

The only way to relieve the financial embarrassments of the Detroit and Milwaukee, and to secure the Great Western in possession of the property, is to reduce the annual charge for bond interest, and to place the road and rolling stock in such an improved position as to enable the railway to increase its revenue and reduce its working expenses.

To accomplish this, the Detroit and Milwaukee authorities have suggested to the Great Western directors that a new sterling or gold bearing mortgage should be made to cover the whole property, and in substitution and replacement of the many existing mortgages prior to that of the Great Western, the average rate of interest paid upon which is 7½ per cent, under which new mortgage an issue of Great Western bonds or debenture stock should be made, the interest on which is not to exceed 5½ per cent per annum, payable either in London or New York.

The directors would not ask the shareholders of the Great Western to sanction any arrangement of this nature, unless it could be clearly shown that such an operation would in itself be remunerative, apart from any more indirect traffic advantages to the Great Western.

The cost of 10,000 tons of steel rails and new rolling stock urgently required is set down by Mr. Trowbridge together at $1,000,000
The "Street Douglass" bonds at 1,000,000
The ordinary first and second mortgage bonds 5,420,000

United States currency $7,420,000

The issue to cover these obligations would be sterling securities for 1,360,000*l.*, or in gold $6,800,000, which would be equivalent to $7,480,000 United States currency.

If the interest does not exceed 5½ per cent per annum, the annual charge would be $374,000 in gold, equivalent to $411,400 United States currency, while a gross annual revenue of $1,500,000, with working expenses at 60 per cent, will yield $600,000 United States currency per annum, or sufficient to meet the bond interest and leave 9 per cent interest on the $2,095,000 preference shares held by the Great Western.

But so full of promises of future prosperity are the prospects of the Detroit and Milwaukee, that an offer has been received to lease the road for twenty years, when properly equipped and put in order, for an annual sum of $500,000 United States currency, by an association of leading men in the city of Detroit, formed into a company under the laws of the State of Michigan, with a capital of $1,000,000, of which 10 per cent will be paid up. If this lease is granted, the same traffic relations will be maintained with the Great Western as exist at present. The requisite precautions will be taken to ensure due performance of the conditions of lease, with right of re-entry in the case of default. There is no doubt that the railway could be worked more advantageously to the district in hands of a local management, and it should be added that a formal legal tender to carry out this offer is now on its way to this country by mail, and in order to admit of its consideration it is intended to adjourn the special meeting of Great Western Shareholders from Wednesday October 29th, to Wednesday, November 5th, 1873.

The Merchants' Bank of Canada have intimated their willingness to sell their claim for the sum of $800,000 United States currency in discharge of principal and interest due from the Detroit and Milwaukee, including an entire substitution of all rights and privileges of every sort possessed by them in favor of the purchaser.

The whole question at issue being thus explained, and all the facts laid before the shareholders of the Great Western, so as to enable them to form a deliberate judgment, the board leave it entirely to their decision, with a recommendation that the proposed mode of dealing with the financial affairs of the Detroit and Milwaukee be sanctioned. The proxies of those shareholders who may intrust them to the directors with this view will be so used. But the proxies of those shareholders who may object to this guarantee will be recorded in opposition to the scheme.

The decision of the stockholders will result in one of the following alternatives:

1. To place the Detroit and Milwaukee on such a firm and permanent financial basis as it has never yet occupied, by the substitution of Great Western securities, the interest on which is not to exceed 5½ per cent, for those now bearing an average rate 7¼ per cent. The issue will amount to 1,360,000*l.*, or gold $6,800,000, to replace every other mortgage bond, and therefore to be the only charge on revenue taking precedence of the Great Western, in whose hands the working of the railway will be continued.

2. With the above arrangement, to accept the proposal to lease the railroad to the Detroit for an annual rental sufficient to cover the interest on the new securities to be issued, and to secure the payment of 5 per cent interest on the $2 095,000 debt due to the Great Western in October 1860, resigning the management of the road to the Detroit, with the stipulation that the entire traffic should as heretofore go over the Great Western, and with power of re-entry in the event of default.

3. To allow matters to remain as they are, which will inevitably involve the default in payment of the first and second mortgage bond interest due 15th November 1873, as well as of the small amount of first mortgage bonds maturing at that date, and possibly the adverse action of some of the bondholders which, as Mr. Jerome reports, may cause the ownership of the line to pass from the Great Western into hostile hands, and the diversion of some of the through traffic into other routes.

Whatever may be the decision of the shareholders, the Great Western directors will not relax their most earnest endeavors to protect and promote the Great Western interests.

☞ The New Haven *Journal* complains that the embarrassments in the mills and manufactories of that city have been greatly exaggerated. Business is dull, it admits, but things are not half as bad as has been represented,

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide-water from the commencement of navigation to the 31st October inclusive, during the years 1872 and 1873, was as follows:

	Flour, bbls.	Wheat, bushels.	Corn, bushels.	Barley, bushels.
1872 ..	104,100	7,804,400	25,434,200	9,119,200
1873 ..	118,400	19,146,200	16,035,600	1,342,200
Inc. ..	14,300	11,341,800	*9,398,600	*777,000

* Decrease.

By reducing the wheat to flour the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows a increase equal to 2,282,660 bbls. of flour.

The receipts of new crop barley to November 1 are 1,320,000 bushels, against 1,717,000 bushels to a corresponding date in 1872.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of October, in the years indicated:

	1871.	1872.	1873.
Canal opened—	April 24.	May 13.	May 15.
Flour, bbls.	205,800	104,100	118,400
Wheat, bushels..	17,465,200	7,804,400	19,146,200
Corn, bushels ..	17,952,500	25,434,400	16,035,600
Barley, bushels.	2,206,300	2,119,200	1,342,200
Rye, bushels....	664,400	857,300	914,400
Oats, bushels...	4,637,500	5,075,300	2,894,100
Malt, bushels...	841,900	827,300	661,700
Feed, lbs.....	5,916,600	6,149,300	7,229,200

☞ A dispatch dated Corpus Christi, Texas, November 7, says: "The Corpus Christi and Rio Grande Railroad Company was organized here to-day, under charter of the State of Texas. The line connects this place with Laredo, and besides controlling the Rio Grande trade, will exercise a powerful influence in checking border depredations, and opening to settlement the rich lands of the Nueces Valley. Working parties have been placed in the field, and construction of the road will be rapidly pushed forward. Representatives of Northern capitalists are here. Colonel Thomas H. Robb, late President of the Frontier Commission, has accepted the presidency of the road. Much local enthusiasm is excited, and the enterprise is powerfully stimulating immigration and the trade of this place."

☞ On the 16th instant the Piedmont Air Line commenced running Pullman's palace sleeping cars through from Charlotte, North Carolina, to New Orleans, Louisiana. This route is via the recently completed Atlanta and Richmond Air Line Railway to Atlanta, Montgomery, Mobile, and New Orleans, and is some sixty miles shorter than any other route offering through tickets and checks to these points. The distance run by sleeping car without change from Charlotte to New Orleans is 756 miles, and avoids all ferry and omnibus transfers.

☞ A certificate of the incorporation of the Federal Creek Valley Railroad Company has been filed in the office of the Secretary of State of Ohio. Capital stock $300,000. The proposed road is to extend from a point at or near the mouth of Federal Creek, Athens county, to a point at or near the village of Moxahala, Perry county, passing through Athens, Morgan and Perry counties. The corporators are John E. Vore, S. J. Wells, D. B. Stewart, C. H. Grosvener, J. M. Dana, E. H. Moore, J. M. Rusk, P. B. Vore and William Boileau.

A New Sleeping Car.

The Baltimore *American* notices the arrival in that city on the 10th inst., from Philadelphia, of a beautiful new combined palace sleeping and parlar car, invented and patented by Mr. Jonah Woodruff, of that city. The improvements which this car possess were first patented in 1871, and are now in use on many of the principal Western railroads. The car is named the "Cleopatra." The exterior appearance of this car is very beautiful. It is painted a deep maroon color, picked out in gold arabesque. On each end of the car is a vestibule, constructed as a rotunda, and arranged so that when the doors are closed two beautiful private apartments are formed, in which there are seats, tables, water-stands, water-coolers, and water closets. The front one of these vestibules is set apart for the use of ladies and children, while in the one at the rear the gentlemen passengers can smoke, play cards, or otherwise amuse themselves, and at the same time be secluded from the view of the other passengers. The ceiling of these rotundas are composed of papier-mache, beautifully frescoed. The car is heated by steam pipes, that are attached to each seat instead of the side of the coach, as in many others of a different pattern. On entering the main saloon of the car a beholder is struck by the fact that it in no way resembles the ordinary sleeping car until the beds are arranged. The upholstery in this car is most magnificent. The window curtains and hangings are truly gorgeous, and, together with the large French plate glass windows, luxurious crimson velvet covered seats and fancy globe lamps, make the car seem like a drawing-room. In fifteen minutes this scene can be changed, and by an ingenius mechanical contrivance each of the seats becomes a bed, while a second one is drawn out of the panelling in the side of the car, and forms the second or upper "bunk." The ease and rapidity with which the car can be transformed into a sleeping apartment is astonishing. The beds and bedding are stored in and beneath the seats—this alone is said by railroad men to be a great advantage, as in the old-fashioned sleeping car all the sleeping appurtenances were encased in the side of the car and near the roof, thus rendering the car top heavy and more liable to topple over than when the weight is nearer the centre of gravity. By arranging the beds and bedding in this way a top weight of about 5,000 pounds is saved, and the car made that much lighter.

☞ The Philadelphia *Ledger* says that the Baldwin Locomotive Works employ 1,330 men now working on three-quarter time. During the past ten months they have built 420 engines, being considerably in excess of the number built in the corresponding period of last year. There has been almost a total cessation of orders for new engines for American roads, but the firm have still on hand several contracts for foreign countries, and inquiries have recently been received from Canada, South America, and Russia which lead to the hope that large numbers of engines will be built for those countries in the next five years. The great car wheel works of A. Whitney & Sons are still running on full time, and have orders on hand sufficient to last for some time to come.

☞ The Buffalo *Courier* says that Captain D. Dobbin's canal steamer William Newman left Troy at 5 o'clock in the evening of the 31st of October, with 101 tons of cargo on board, and arrived in Buffalo at 3 o'clock in the afternoon of the 5th inst., making the run in four days and twenty-two hours. Her running time was less than four days, and is the fastest time ever made by a canal steamer. The condition of the canal for steam navigation purposes is said to be fair, making allowance for the innumerable obstructions offered by horse boats.

☞ Mr. George Webb, late manager of the Catawissa Railroad, has been designated Superintendent of the Pittsburgh division of the Pittsburgh, Fort Wayne and Chicago Railroad, with headquarters in Pittsburg.

RAILROAD IRON.

50 and 56 lbs. in store at New Orleans.
50 and 56 lbs. in store at New York.

BESSEMER STEEL RAILS.

MAKERS of the NEW TESTING MACHINE.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

THE WHARTON

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.
28 South 3d St., Philada., Pa.
O. BOX, 2353, Phila.

DELAFIELD & BAXTER
CEMENT COMPANY.
MANUFACTURERS OF HIGH FALLS
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at our office, **115 Broadway, New York.**

The above CEMENT is used in most of the fortifications building by government.

HUDSON RIVER
CEMENT WORKS,
Manufactory at Kingston, N. Y.
(LATELY IN JERSEY CITY, N. J.)

MANUFACTURERS OF ROSENDALE HYDRAULIC CEMENT, having facilities for manufacturing 600 barrels daily, are now prepared to furnish, on the most reasonable terms, Rosendale Hydraulic [Diamond A] Cement of a fine and superior quality, all of which is by ourselves manufactured at the works, located on the West bank of the Hudson River, near Rondout, N. Y., from a superior selected quality Cement Stone, quarried exclusively from our (lately Hudson River Cement Co., Jersey City, N. J.) celebrated and extensive quarries, situated at Creek Locks, town of Rosendale, Ulster County, N. Y. Our Cement having been extensively used the last twenty years, and meeting the approval of the most eminent Builders, U. S. and other Engineers, we have authority for declaring our brand, (Diamond A) Cement, the American Standard Hydraulic Cement, all of which is put up in good shipping order, in new, tight, well-made (at the Manufactory) and papered barrels. The largest class vessels can come to our works without extra towing or delay. Cement deliverable at the Works or in New York City. Our barrels will be branded, "Hudson River Cement Works, Rosendale (Diamond A) Cement, Office, No. 95 Liberty Street, New York."

THE LOCK-NUT & BOLT COMPANY OF NEW YORK,
No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.

IMPROVED August 23, 1870.

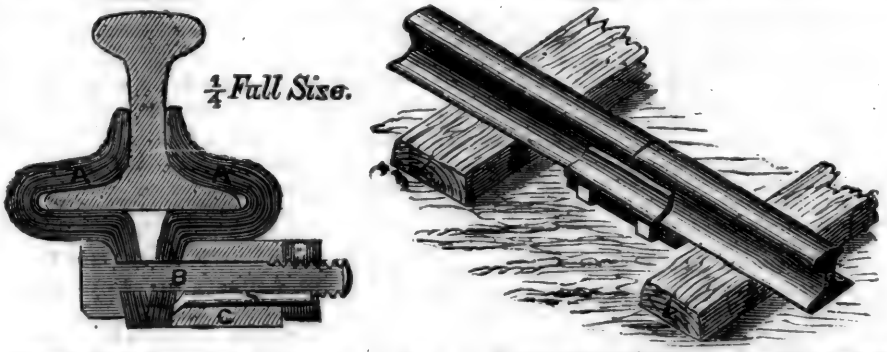
Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

Scott's Wrought Iron Clamp Truss Joint
FOR RAILROAD RAILS.



LENGTH 9 TO 12 INCHES, WEIGHT 20 TO 30 LBS.

THICKNESS ⅝ OF AN INCH. COST FROM $1.30 TO $1.50.

Has been tested to *94,000* lbs., between 24 inch bearings, (a 40 ton engine will not test it more than 10,000 lbs.) it is a *TRUSS*, supporting fully the ends of rails while suspended itself. This principle gives it a power that no chair has. Forty per cent. of rails now destroyed, will be saved by its use.

It is *SIMPLE*, can be put on broken or sound rails at once; will not stir from its position, and requires no renewal.

SECTION. VIEW.

VIEW AND SECTION show position in place. A.—Is CLAMP-TRUSS. B.—Are two ⅝ inch Bolts. C.—An Iron Collar, (a prepared wood block can be used in its place if parties prefer it.) D.—Is the Nut. S.—The LOCK of the NUT, which prevents its jarring loose.

The patentee is prepared to fill orders sufficient for four miles of track per day.

Provision has been made to prevent sliding of the rails.

For particulars, address

JOHN H. OSBORNE, Morrisville, Bucks Co., Penn.
And BENJ. SCOTT, Eden Mills, Vt.

A. W. LADD,
NO. 5 DEY STREET, NEW YORK,

Will cut to order for Bridge and Railroad Builders, WHITE PINE, GEORGIA and FLORIDA PINE, HEMLOCK and OAK TIMBER.

Agent for ROBERT BROWN, Telegraph Contractor.

Telegraph Lines of any length built with Brooks' Patent Paraffine or Glass Insulation and American Compound or English Galvanized Wire at the lowest rates and shortest notice. Also, Wire Fence for Railroads.

American Railroad Journal.

New York, Saturday, November 22, 1873.

Baltimore and Ohio Railroad.

The annual meeting of the stockholders of the Baltimore and Ohio Railroad Company was held in Baltimore on the 17th inst. Mr. Horace Abbott was chosen chairman and Mr. Wm. H. Ijams secretary. The forty-seventh annual report for the fiscal year terminated 30th September last, was presented. Also resolutions ratifying the lease or arrangement with the Washington City and Point Lookout Railroad Company, and the lease of that portion of the Washington City, Virginia Midland and Great Southern Railroad Company lying between Strasburg and Harrisonburg, Virginia.

The report was read by the secretary, after which the meeting, on motion, proceeded to the election of directors to serve for the ensuing twelve months, Messrs. Miles White, Wm. J. Albert and George W. Ward acting as judges. On counting the ballots it was found the resolutions had been unanimously adopted and the following gentlemen unanimously elected by a vote of 89,226 shares. The members elected are the same as for the preceding year, viz: Johns Hopkins, Samuel W. Smith, Francis Burns, John Spear Nicholas, John Gregg, C. Oliver O'Donnell, James Harvey, Galloway Cheston, William W. Taylor, Samuel Kirby, John King, Jr., and G. A. Von Lingen.

The report presents a flattering statement of the operations of the road for the past year, and an encouraging prospect of increased expansion and usefulness. The gross earnings of the road, including all its branches and divisions, for this year, were $15,695,541, an increase of $2,068,864 as compared with the previous year; of this increase $1,598,372 accrued from the earnings of the main stem. The surplus fund, which represents capital derived from earnings, invested in branch and connecting roads and improvements on the main line amounts to $29,034,403 41.

Lease of the Milwaukee and Northern to the Wisconsin Central Railroad.

The Milwaukee *Wisconsin* says that the Milwaukee and Northern Railroad has been leased to the Wisconsin Central Railroad Company for a term of ninety-nine years, with the privilege of purchasing in fee, and then adds:

The consolidation is a natural one, for the Milwaukee and Northern is the shortest line from the foot of Lake Winnebago to this city, and when the Wisconsin Central Road is finished to Ashland, Bayfield and Duluth, Milwaukee will thus possess the shortest line to the North Pacific.

The Wisconsin Central will be completed to a point one hundred miles northwest of Stevens Point by the 1st of January, and the hope is expressed that the whole line to Ashland will be opened by the 1st of June, 1874. By this consolidation Milwaukee will have three hundred and fifty miles of railway connecting Lake Superior and our harbor. The Wisconsin Central will remove its offices from Menasha to this city, and this road, hereafter, must be regarded as one of our great trunk lines terminating here, and casting into our lap the produce and business of northern and northwestern Wisconsin, and vastly more by its connections with the Northern Pacific. It has proven to be a strong corporation, as, notwithstanding the sweeping panic, the contractors have kept steadily at work during the past two months, and to-day they are employing five hundred laborers in cutting a pathway through the forest, grading the track and laying the iron rail. Inasmuch as the company have received as yet only a few thousand acres under the congressional land grant, their energy and success is marvelous.

Gardiner Colby, of Boston, is President of the Company, and as a financial agent he has evinced ability and resources which have assured public confidence to the Wisconsin Central Railroad Company. Judge Reed, the Vice President, and as the managing agent, will, we learn, soon take up his residence in this city.

Sometime ago it was reported that the Wisconsin Central had leased the Lake Shore from Manitowoc to Milwaukee, but some of the conditions were not fulfilled and the arrangement has fallen through, and now the Wisconsin Central has consummated a lease with a shorter line to Milwaukee, securing to it more advantages than could be obtained by the other line.

The Milwaukee and Northern has become very popular among our citizens and along its whole line for its good and faithful management, and the hope is indulged by our people that some of the members of the direction who have given such efficiency to the road and who acted as faithful trustees in applying the funds of the company, will in some way be retained in the Wisconsin Central management. We learn that this consolidation will in no wise retard the extension of the Milwaukee and Northern from Green Bay to Ontonagon. In fact the consolidation has given mutual strength to both companies, and therefore the people of the whole State will regard it as a source of congratulation.

Bridge over the Missouri River.

The Railroad Bridge intended to cross the Missouri River at Louisiana, Mo., is rapidly approaching completion. Though the work was not commenced until the first day of July, the superstructure is already being raised, and the whole will be completed by Christmas, at which time the grand opening is expected to take place. We are indebted to Mr. H. W. Parkhurst, the assistant engineer, for the following facts and figures:

There are nine spans, varying from 160 to 260 feet in width. The draw is 444 feet in width, being several feet longer than any other draw in the world. The piers are all of solid masonry, which rests on piles driven very near each other and then sawed off, and a heavy timber foundation bolted to the piles. All the timber is at least four feet below the lowest water ever known, and about 500,000 feet of the best timber was used in this way.

The pivot pier is the largest on the river, rests on 200 piles, and contains 1,200 cubic yards of solid stone. The east approach, extending half a mile, and the west approach one-eighth of a mile out into the river, are constructed of earth embankment and strong rip-rap walls. Connected with the west approach is an iron bridge of 140

feet span, over the Noix creek, which is being built by the American Bridge company.

The Keystone Bridge company are building the seven short spans, the Kellogg Bridge company the two long and draw spans, and Reynolds, Saulpaugh & Co. the foundations and approaches. A corps of twenty engineers, divided into iron, wood and masonry inspectors, direct and lay out the work under the supervision of E. L. Corthell, chief engineer, and H. W. Parkhurst, assistant engineer.

In the bridge there are 5,000 cubic yards of first class masonry, 50,000 cubic yards of rip rap, 200,000 cubic yards of earth embankment, and 60 tons of iron bolts, besides the bridge superstructure, which is of the best iron, and will be first class in every particular. The total length of the bridge will be 2,052 feet.

On an average, 500 hands are kept constantly at work. There are also in use three steam and ten hand derricks, three steam pile-drivers, twenty flat boats and two steamboats for handling the material, etc.

The bridge company are building a dyke half a mile long, from the Illinois shore out into the river, diagonally down stream, so as to keep the channel through the draw. The bridge will cost nearly $1,000,000.

Atlanta and West Point Railroad.

The earnings of this road for the years ending June 30, 1872 and 1873, were as follows:

	1872.	1873.
From passengers	$126,277 97	$142,068 41
" freight	265,831 30	235,208 88
" mails	10,781 25	10,781 28
" express	7,444 18	8,657 01
" miscellaneous	3,273 15	2,629 22
	$413,107 85	$399,344 80
Expenses, viz:		
Conducting transp.	$79,116 12	$79,694 22
Motive power	102,010 13	97,558 77
Maintenance of way	64,892 47	72,553 62
Rent of Macon & Western Railroad	6,000 00	6,000 00
Repairs and rent of cars	21,837 55	13,842 25
Taxes, fees, etc	379 79	.....
	$274,236 06	$269,648 86
Net earnings	$138,871 79	$129,695 44
From which deduct extraordinary expenses in 1872-'73—		
Renewal of iron rails	$20,000 00	
New cars	6,000 00	
One new wood and water station	2,000 00	
Paid on air-brakes	1,534 00	
		29,534 00
Net over all expenses		$100,161 44

In 1871-'72 the extraordinary expenses were $59,128 81, leaving the balance of earnings at the close of that year $79,742 98. The President in his report says:

The Superintendent's Report is a very plain, and so far as the operations of the road are concerned, a very satisfactory document. By this report, and the appended statements, the condition of the company is fully exhibited, and leaves but a short Report to be made by the Directors. In the face of so many adverse circumstances, the showing is, no doubt, better than was expected by the Stockholders. The road has, no doubt, honestly earned a net profit to cover the usual dividend of eight per cent.

There are, however, some peculiarities in the history of the last year's operations which require brief notice, and which may not otherwise be understood by the Stockholders. It will be seen that the bond account has been increased, since the last annual statement, from $27,000 to $102,500; and bills receivable, have been increased from $19,627 20 to $148,619 45!

This is accounted for by the unexpected occurrence of a large balance against a connecting road, which became unavailable as cash, and was liquidated and reported as an asset in this form. It was hoped and believed, at the time, that this form would be only temporary, as, by an arrangement with a connecting road in intimate business relations with this road, it was expected that this item of our assets would be assumed and converted into cash, and made available for dividends. Hence, short bonds were issued to the Stockholders in aid of cash for dividends, and expected to be redeemed in the same way. Thus, the sudden increase of bonds and bills receivable, since the last report, are both accounted for. Partly from the stringency in financial affairs, and partly from hostile influences, the contemplated conversion and redemption has not been consummated. It is still promised to some extent, but cannot be fully relied on.

This company is, also, suffering in another form from its insolvent connections. Being deeply interested in a continued and connected line of communication between Atlanta and the Gulf, this company, in liquidation of a previous joint guaranty, for the Alabama and Florida Railroad, on the first day of January, 1868, indorsed the bonds of the Montgomery and West Point Railroad to the amount of something over $150,000. These bonds matured the first of January last, and were not met, and payment is urged against this company. Ample provision was made for these bonds, it was supposed, at the time of indorsement, but the security was diverted, without any fault of this company or its officers, and a less available security substituted in its place. A part of these bonds have been redeemed by cash and exchanged for other bonds; but the remainder will have to be provided for as early as the resources of the company will allow. We have, as collateral, $150,000 eight per cent bonds, believed to be perfectly good, with which—and the aid of some money—we hope to liquidate this debt.

This desirable object being accomplished, the Directors agree with the Superintendent, who says:

"With a conjunction of circumstances the most unfavorable that can ever again occur, we have fairly earned an eight per cent dividend. In my opinion, we have reached the minimum of business, and may reasonably hope to see the commencement of a steady growth after September next."

The Directors fully sympathize with the other Stockholders in the interruption of regular cash dividends. This is the first interruption (except by the ravages of the war) since the organization of the company. Amid the wreck of embarrassment and bankruptcy that surround us, we cannot expect to escape our share of misfortune. The unparalleled prosperity of the company, in years gone by, has, no doubt, received a heavy blow; but to have our investment temporarily impaired in value, is less serious than a total loss with no hope of recovery, which has been the fate of so many Southern Roads. An insignificant fraction of roads at the South have paid any dividend at all since the war, and the few that have been struggling to do so, seem more likely to diminish than to increase their dividends. The Superintendent notices the probable effect upon our profits of the various roads in progress, and thinks that, on completion of the Air-Line, it will fully indemnify us for all losses by rival lines; and on the completion of the link between Monroe and Shreveport our road will be placed on its "*ante bellum* footing." Whatever injury the Air Line may inflict on other roads with which we are intimately associated, there can be no doubt that it will bring a very profitable accession of business to ours.

The fidelity of the officers in charge is best attested by the regularity, and freedom from accident, with which the trains have been run. This is a very notable feature in the management of the company since it has been in operation. With a single exception, we have run near seven years without any serious accident or the loss of a trip.

Iron for renewal is much needed, and in the present condition of the company its policy should be the strictest economy, and every expense should be cut off, which safety will allow. It is much to be regretted that the means of the company do not permit a more rapid renewal of the iron—near one-half of the iron originally laid upon the track more than twenty years ago being still in use! But for the extraordinary quality of the iron, it would be dangerous; but the iron then manufactured, of good pattern and well inspected, was a different article to the inferior article now made. It is kept perfectly safe, but is rapidly approaching the close of its long service.

The company have 19 locomotives, 7 passenger, 4 baggage, 1 express, 1 shanty, 113 box, 18 stock, 23 platform, 3 coal and 5 cab cars. Number of through passengers, 12,902; do., way, 50,085—total, 62,987, against 55,589 in the previous year, an increase of 7,398. Tons of freight transported, 86,592, against 103,100 in the previous year, a decrease of 16,508. Bales of cotton transported, 84,171; same for previous year, 89,103—increase, 45,068.

BALANCE SHEET, July 1, 1873.

Road outfit and real estate	$1,197,714 51
Bills receivable	148,619 45
Preferred stock, Vicksburg & Meridian Railroad	3,234 00
Dividends of July and January	98,576 90
United States Internal Revenue Tax on dividend of January 1872, paid under protest	1,268 79
Due by Agents and connecting roads	22,054 13
Road expenses for the year	299,182 86
Cash	41,521 23
	$1,812,165 97
Capital stock	$1,232,200 00
Profit and loss, July 1st, 1873	53,865 00
Bonds of the company	102,500 00
Interest account	14,386 53
Dividend unpaid	8,837 00
Due to agents and connecting roads	1,033 14
Road earnings for the year	399,344 30
	$1,812,165 97

President.—HON. JOHN P. KING.

Directors.—B. C. Yancey, John E. Robinson, F. Phinizy, W. B. Berry, John F. Moreland, L. B. Lovelace.

General Sup't.—L. P. GRANT.

Secretary and Treasurer.—W. P. ORME.

Norfolk and Bristol R. R.

A company with the above name was organized at Walpole, Mass., on the 17th inst., for the purpose of building a road from Dedham to Attleboro'. The road will be 23 miles in length, of the ordinary gauge, 4 feet 8½ inches, and is to commence at Dedham, and run through Norwood, East Walpole, Walpole Centre, Norfolk, Plainville, Wrentham, and then into Bristol county to terminate at Attleboro'. The capital stock is placed at $350,000, divided into 3,500 shares at $100 per share. The following gentlemen were elected directors: F. W. Bird, J. G. Hartshorn and H. W. Tilton of Walpole; James Pollard of Norfolk; Thomas Proctor, A. W. Harris and James Bacon of Wrentham; H. N. Daggett, H. F. Barrows and Felix G. Whitney of Attleboro'. The Boston *Journal*, from which the above was obtained, says:

The meeting was very harmonious, and voted to concur with resolves passed by former meetings held in Wrentham and Walpole. The road is to be equipped by the Boston and Providence road, and leased for thirty years, they guaranteeing the stock at 7 per cent for that time.

S. L. Minot, Esq., civil engineer of the Provi-

dence road, has been engaged surveying the route, and reports the grading easy and the road not hard to construct. The moneyed men of the towns interested are alive to this project, and it may be called a foregone conclusion that Norfolk county is to have one more first class railroad within its limits.

The International Bridge.

The following description of the great International Bridge recently completed over the Niagara River from Buffalo, N. Y., to Fort Erie, in Canada, is from the Buffalo *Commercial Advertiser*:

To state the fact roughly but plainly, the entire length of the bridge is about three quarters of a mile. But more in detail the length is as follows: In the main river, 1800 feet; over Squaw Island, 1300 feet, (trestle work,) and over Black Rock Harbor, 450 feet. The entire length of the superstructure in the main river is 1890 feet; in Black Rock Harbor, 440 feet. There are nine spans in the portion on the main river and three in Black Rock Harbor; four of 190 feet in the clear, and three of 240 in the clear. Over the main river also are two draw openings, of 160 feet each; total length of draw girder, 362 feet. In Black Rock Harbor are two draw openings of 90 feet each, and one fixed span 220 feet in length. In the main river are eight piers and two abutments; and in the harbor two piers and two abutments. The abutments are 40 feet long by 30 wide, at the bridge seat level. Over the bridge is laid a track for railroads, and a common sidewalk for foot passengers.

The piers and abutments are built of sandstone from Georgetown and Acton, Canada, and Berea, near Cleveland, Ohio. The iron of the superstructure was from the Phœnixville Iron Company's Works Phœnixville, Penn. The first caisson was launched on the 13th of July, 1870, and work progressed steadily up to the time of completion. It must be remembered that the current of the river, at the point where the bridge is located, runs from five and a-half to ten miles an hour according to the state of the wind. This was throughout one of the greatest difficulties encountered, and frequently retarded progress. Then, too, the depth of water varies from twelve to forty-five feet. The ice in winter, some may think, would damage the bridge in course of time, but the ice-breakers afforded ample protection, and cut to pieces blue ice two feet thick with comparative ease. Another remarkable thing connected with the history of the bridge is, that during the whole course of the work not a single life has been lost. The workmen have, many of them, often been exposed to dangers, but always have escaped.

The respective weights of the different spans over the river are as follows: 190 feet, 130 tons; 240 feet, 208 tons; 362 feet draw, 353 tons; and the entire quantity of iron used in the whole bridge amounts to upward of 2000 tons. At the request of Capt. Tyler, the English Government Inspector of Railways, who visited the bridge in November, 1871, on behalf of the English shareholders, one of the spans of 190 feet was loaded with 210 tons of iron rails, equally distributed over the floor beams, (a weight greater than that of a continuous train of locomotives covering the span,) and left in that condition for three days. This test was highly satisfactory, the deflection being found to be only about one inch, and the truss returning exactly to its former condition on the removal of the load.

The bridge has been leased to the various railroads which will cross it, for twenty years. The roads are the Grand Trunk, the Great Western, the Canada Southern, the New York Central, the Erie, and the New York, West Shore and Chicago. Most of these railroads have already constructed their approaches to the bridge, and will commence sending trains across at as early a day as possible. The original plan contemplated a carriage-way, but this was abandoned for the reason that, as the bridge was three-quarters of a mile long, and so many trains were to cross it, there would very seldom be a chance for carriages to cross without interfering with the trains.

The entire cost of the bridge, in round numbers, is not less than $1,500,000. Of its practical benefits we leave the reader to judge, merely stating in conclusion that it supplies a want long felt by the different railroads which have for so many years been obliged to cross the Niagara river on the steamer International.

Tensile Strength of Lake Superior Iron.

The Detroit *Free Press* makes a record of the following experiments with iron made from Lake Superior ores, by the Wyandotte Company:

A bar of railroad iron was put under the hammer, and bent, twisted and tortured until no resemblance of the original bar remained. An effort was then made to hammer the head of the rail from the flange, but it proved unsuccessful. It must be understood the experiments were made when the iron was cold, which is the severest test to which iron can be submitted. The experiments with the chains were equally satisfactory and showed a marvelous power of resistance. A Bessemer steel chain, 1¼ inches in thickness, withstood a test of 121,850 pounds the to square inch. The following comparisons will show the relative tensility of Lake Superior and English iron, the trials having been made by the use of the Patented Testing Machine made by RIEHLE BROTHERS, of Philadelphia, which is that used for all tests in which the government is concerned: A one-fourth inch chain of American (Lake Superior) iron withstood a draft of 101,750 pounds, while a chain of English iron of the same size broke at a test of 76,500 pounds. A five-eighth inch chain, American, 24,875 pounds; English, 16,000 pounds. A three-fourth inch chain, American 38,000 pounds; English, 26,000. A one-half inch chain. American, 15,825 pounds; English 8,500, and a seven-sixteenth inch chain, American, 10,250 pounds; English, 5,750.

Portland Company.

The Portland Company's works, located at Portland, Me., have made great improvements on the buildings since their fire last summer. A new car shop, 62x170 feet, has been built of brick and fitted with steam heating apparatus, constructed in all respects in a first class manner, with an extension used as a tender shop for setting up and finishing locomotive tenders. The new paint shop is 38x45 feet, the tin shop and foundry 60x25 feet; the store house 120x40 feet, and the new extension to the main building 80 feet long. All these buildings are provided with Hardy's gravel fire proof roofs and are to be sheathed with iron, thus rendering them fire proof in all respects. These works are running 15 hours a day, employing some 550 men, disbursing some $30,000 per month. They have orders largely ahead.

☞ The earnings of the Atlantic, Mississippi and Ohio Railroad, extending from Norfolk to Bristol, Tennessee, General William Mahone, president, exceed those of last year by $250,000. The road is now in splendid running order and newly equipped, having enough new passenger coaches and locomotives to keep it running for twenty years. Since Gen. Mahone became president of this road its revenues have increased over a hundred per cent.

☞ The Cincinnati Iron Bridge Works have contracted to build a Whipple truss bridge at Elmira, N. Y. 800 feet long, for $30,000; an iron bridge at Stockport, N. Y.; a single 363 foot span steel wire suspension bridge at Franklin, Ohio, to cost $44,000: two of iron at Fishkill, N. Y.; and one of iron at Bennington, Vt.

The Girard Avenue Bridge.

Work upon the new bridge across the Schuylkill, at Girard avenue, has been rapidly and steadily progressing, and an idea can now be formed of the magnitude of the structure. The abutments at the eastern and western ends are completed to the bridge seats, and the iron truss is laid between the abutment and the completed shore pier on the western side. The western river pier will probably be completed, by the laying of the remainder of its coping stones, to day, while the eastern river pier needs but a few more courses for completion. In the construction of the eastern shore pier, difficulties have been encountered. It was found necessary to dig to a depth of 28 feet to reach the rocks, and the excavation for the foundation has been constantly flooded from the river. This has made the task of its erection an amphibious one, but it is now near the surface level and there will be no further difficulty in laying the stone. Meantime, a steam pump is kept in operation to pump out the water which flows into the excavation. The "false work" or wooden frame work and piles, on which the first long span to go between the western shore and river pier on the same side will be put up, is finished for nearly the whole length of the span. When the bridge is built it will contain five spans, three long ones over the river and two short ones at the shore ends. The river banks in the vicinity of the bridge are piled with huge blocks of granite and covered with the necessary machinery for the construction of the bridge.—*Phila. Ledger.*

Railroad Iron and the Lackawanna Iron and Coal Company.

The Lackawanna Iron and Coal Company have, since they commenced their iron mills in this city, manufactured a rail that has always been rated among the best made by any company in this country. We have witnessed a test made under the direction of Superintendent W. W. Scranton which could not fail to convince any practical railroad man of the superiority of their rail. We saw rails taken from a pile that had been made weeks ago, so that it could not be said that the operation was performed while the rail was hot; and under a pressure of sixty tons bent into a circle, one of which is to be sent to New York to be placed in the office of the company there. The same pressure was applied to other rails manufactured of iron compounded and worked after the old style of working railroad iron, and they broke easily. The iron from which the company are now making their rail was also tested, and proved that under the greatest pressure it was not susceptible of being broken, but would be bent double without separating the fibres. The capacity of the old or lower mill of the company is eleven hundred tons per day, but they are at present only turning out six hundred tons, there being but a slight demand, and having a stock on hand of eighteen thousand tons. The company have everything in readiness to commence the manufacture of the Bessemer steel and rail in the coming spring. While the Lackawanna Iron and Coal Company greatly excel in the manufacture of the iron rail, there is no doubt but they will be equally enterprising in their new steel works.—*Scranton Republican.*

☞ The gross earnings of the Boston, Clinton and Fitchburg Railroad for the year ending September 30, 1873, were $677,439 37, against $576,412 62 for 1872, showing a gain of $101,026 75 The gain from the passenger department was $11,439 95; from freight department $85,239 94; net income above operating expenses $197,495 02 and above amount paid Mansfield and Framingham and Lowell roads, as rentals, interest and dividends on guaranteed stock $21,662 23; whole number of tons of freight carried 407,072. During the year the company have paid for rolling stock $60,018, and for construction, including two miles of double track at South Framingham, $62,286 77.

Bangor and Calais Shore-Line Railroad.

A letter to the Boston *Journal*, dated Augusta, Me., November 14th, says that a vigorous effort is being made to secure the building of this road. The survey from the Penobscot to the St. Croix has been completed. On account of the lateness of the season nothing will be done except in preparing to contract for the building of the road, so that active operations can be entered upon next spring. The directors have satisfied themselves that five per cent of the valuation of 1870 of the places along the line of the road is too small a sum to secure its construction, and they now ask for an increase to eight per cent of their valuation, which they say will be sufficient to secure the contracting for the road with a responsible company, which will furnish in cash an equal amount of stock, and will commence without delay to build the road. The proposed road is one of vital interest to the people of Hancock and Washington counties. With railroad facilities they will find a market at their own doors for hay, lumber and other products. The directors have decided to make Bucksport the eastern terminus of the road.

Number of Cars in the United States and Canada.

At the last convention of the Master Car Builders' Association, its secretary, Mr. Leander Garey, presented the following statistics of cars:

The whole number of cars on all steam roads of 4 feet 8 inches and wider gauges in the United States and Canada, at the close of the fiscal year ending with the year 1871, was as follows:

Whole number of 8 wheel cars	193,767
Whole number of 4 wheel cars	58,355
Total	252,122
Whole number of cars reported for 3 and 3½ feet gauge roads	212

There are in the United States and Canada 103 car manufacturing companies. These companies have built during the year ending May 31, 1873, the following number of cars:

Palace, sleeping and hotel cars	184
Passenger cars, all classes	579
Smoking cars	18
Baggage and smoking cars	15
Baggage and express cars	18
Baggage and mail cars	33
Baggage cars	63
United States postal cars	3
Total number of cars for passenger trains	862
Paymaster cars	6
Caboose cars	78
Fruit cars	734
Refrigerator cars	8
Grain combination	759
Box or house cars	11,931
Platform	5,694
Gondola	6,738
Double-bottom gondola	125
Double-deck cars	80
Hay (box	75
Stock cars	2,415
Eight-wheel ore and coal cars	3,126
Four-wheel ore and coal cars	3,216
Oil tank (60 barrels)	250
Oil tank (64 barrels)	300
Total	35,531
Construction cars	162
Steam shovels	52
Derrick cars	8
Hand cars	149
	371

Making the whole number of cars built by car manufacturing companies during the year ending May 31, 1873, 36,765. Cars of the various classes as follows have been built by railroad companies during the year ending May 31, 1873:

Day and night palace cars	69
Passenger cars	281
Smoking cars	14
Baggage and smoking cars	43
Baggage and express cars	84
Baggage and mails cars	27
Baggage cars	101
Postal cars	19
Paymaster cars	6
Caboose	831
Box or house cars	5,673
Platform cars	2,643
Gondola cars	2,543
Grain cars	129
Milk cars	152
Refrigerator cars	18
Hay cars	132
Combination	407
Oil and coal eight-wheel cars	3,119
Oil and coal four-wheel cars	3,201
Stock cars	1,452
Oil tank cars (64 barrels)	105
Construction cars	385
Hand cars	828
Derrick cars	14
Snow plows	19
Service or pole cars	50
Whole number of cars built by railroad companies	22,345

The following cars have been built for narrow gauge roads, namely, 3 to 3½ feet gauge, during the same time:

Passenger	16
Smoking	2
Baggage and smoking	1
Baggage	5
Box and house	17
Platform	37
Oil tank	48
Hand	3
Total	129
Cars constructed by railroad companies	40
Add 85 cars for six months intervening between close of fiscal year of 1871 and June 1, 1872	85
Also number officially reported in 1871	212
Total for narrow gauge roads	466

Add this to number of cars constructed by the car manufacturing companies, and we have for the number of cars which have been added to our rolling stock during the past year, 59,110. Allowing six months for the time between the close of the fiscal year of 1871 and the first of June, 1872, we will add one half of the number of cars constructed during the past year to the number officially reported at that time (1871), and we have for number of cars on the first of June, 1872, 281,667. Add to this the number manufactured during the past year, and it gives us for the total number of cars at the present time, 340,787.

The increase of cars here stated is under the actual number, as a few roads have failed to report.

These figures indicate that the increase of cars during the past year has been about 25 per cent, and if we add the cars rebuilt, it will make the increase fully that number.

☞ The Louisville, New Albany and Chicago Railroad Company are considering the project of building a branch to the coal fields in Martin, Owen and Greene counties, Indiana, and to the iron deposits in Martin, Monroe, Putnam and Greene counties, purchasing mineral lands, and operating them on their own account. In this connection they propose to establish blast furnaces in New Albany, and extensive coal yards at New Albany and Louisville to supply Indiana with coal at low prices.

New Railway in Quebec.

Quebec is engaged in a new railway enterprise which is of considerable interest to the people of the Maritime provinces. The first section of it was inaugurated the other day. The Quebec *Chronicle* in noticing the event says:

The distance from Quebec to the United States boundary is 90 miles, and from thence to the nearest railway in the State of Maine, in Solon, 50 miles more, which distance is being rapidly decreased by American railway extension. When completed, the Levis and Kennebec will shorten the distance from Quebec to Portland by 51 miles, from Quebec to St. John and Fredericton, via Intercolonial Railroad by 135 miles, and from Quebec to Halifax by 43 miles. The road will form a through narrow gauge line from Quebec to Boston and New York, via the Sherbrooke, Eastern Townships and Kennebec Railroad, now being built from Sherbrooke, to Ste. Marie. The first section of the railway is thirty miles, extending from Levis to Ste. Marie Beauce. It is now being built by Messrs. Larochelle and Scott, the enterprising contractors, who have a lease of the road for 99 years, and to whose indefatigable exertions so much of the line as has been built is unquestionably due. The Government of the Province of Quebec have granted to the company a subsidy of 3 per cent per annum for 20 years on $5,000 per mile, or a capitalized subsidy of about $1,748, per mile, payable in cash, on the completion of twenty-five miles of road, and for every mile afterwards constructed. The town of Levis has also voted $50,000 in aid of the road, and J. G. Ross, Esq., has advanced a large amount to the contractors without security.

The Farrand Spark Arrester.

On Wednesday the New York Central and Hudson River Railroad Company made a trial of the Farrand Spark Arrester for locomotives. The theory of arresting sparks and cinders has been experimented upon ever since locomotives have been used, but out of nearly a hundred applications and thirty patents granted by our government not one so far has been of practical use, because they all stopped the draft and prevented the engine from making steam as rapidly as necessary. At present, many of the locomotive smoke stacks are covered with a wire screen, but it gets clogged with dirt and stands seriously in the way of easy and regular working of the engine. A man with a poker is frequently obliged to go to it on the way between stations and punch the screen clear so as to allow the engine to make steam easily.

Colonel W. D. Farrand, formerly our consul at Callao, invented a machine for arresting sparks, went to Paris and introduced it on one of the French Railways running out of Paris, and came here a few months ago to get a patent on it. He secured the patent, and after a siege of preparation got it on what is known as "the dirtiest engine in the Central shops." Mr. Buchanan, the master mechanic of the Central road, took the experiment in charge and started on Wednesday with a full passenger train from the 30th street depot to Tarrytown, 30 miles, and back. Mr. Buchanan says the experiment solved the problem of preventing fires along the road and cinders getting in the eyes of passengers. The conductor of the train says it was the first time in his life that he could stand on a platform of one of his cars without getting struck in the eyes or having his neck burned with cinders, and his face blackened with soot from the smoke stack. The car-windows were thrown open, and the conductor says that while heretofore they have swept buckets full of cinders from the interior of the cars, not a cinder was to be found after the 60-mile run.

The smoke and non-consumed products of combustion ascend a curved flue and empty into a laterally enlarged chamber, from which they are driven by exhaust steam through a tube from the receiving chamber into a receiving box below. When this box fills, a valve is thrown open and the contents emptied upon the track. The length of smoke stack greatly increases the draft. The advantages shown by this trial are four. With such appliances the traveling public need no longer be annoyed by sparks, cinders and soot, but may leave their windows open with impunity. The owners of property along this road may build their haystacks and barns or plant their crops as near the railroad as they desire. The railroad companies may use open cars for combustibles of great bulk and save a good deal of trouble in handling, while at the same time the increased draft will give them much more steam with the same amount of fuel; because a slow draft makes heated air and uses the fuel to less purposes, while a strong draft makes steam as fast as the engineer wants it.—*Jour. of Com., Nov.* 12.

Keokuk and Kansas City Railroad.

This road is now being graded from Keokuk to Edina, a distance of forty-three miles; between Edina and Macon, thirty-eight miles, the grade is completed and the iron is being laid, between Macon and Salisbury, eighteen miles, the grade is incomplete, but a force of men will be soon put to work to complete it; between Salisbury and Glasgow, seventeen miles, the road bed is complete and iron is being laid, and a force of men are at work on the grade in Saline county between Cambridge and Marshall. It it three and a half miles from Glasgow to Cambridge at which place the road crosses the river. The ironing will be completed between Salisbury and Glasgow by January 1, as will also the grade between Keokuk and Edina and between Cambridge and Marshall.

The company has succeeded in negotiating its first mortgage bonds, and has contracted for all the iron it will need, to be delivered in instalments of fifteen cars every other day. The line of the road is very direct from Kansas City to Chicago, running about fifty-five degrees to the east of north, which is about the direction of Chicago from Kansas City. It makes no angles except that at Marshall, which is not very great; and when completed it will be forty-three miles shorter between Chicago and Kansas City than any other route.

The company has given its order for cars, and they are now being built. They will be thirty-three feet long, that is the freight cars, instead of twenty-eight, which will enable them to take in two lengths of sixteen feet lumber, and hold two more cattle or horses.—*Kansas City Journal.*

☞ The proposed tunnel between Scotland and Ireland would be about twelve miles long, and the estimated cost is $23,000,000. It would extend from a point on the north shore of Ireland near Belfast, under the Irish Sea, to the extremity of the peninsula opposite in Scotland. A single line tunnel, 15 feet wide at the base, 25 feet wide at the maximum and 21 feet high, with side walls varying from 4 to 7 feet in thickness, is proposed.

☞ A recent geological survey of the new Territories reveals the important and gratifying fact that on the line of the Northern Pacific Railroad, in the Rocky Mountain District there exists a coal bearing region of 250,000 square miles in extent, the strata of available fuel buried there varying in thickness from 5 to 35 feet.

☞ It is expected that trains will be run through to Winchendon over the Boston, Barre and Gardner Railroad. Work upon the extension to Winchendon has been resumed, and, with favorable weather, the iron will be laid in about two weeks.

The Legal Business of the Treasury.

The annual report of the Solicitor of the Treasury shows that during the year 2,715 suits have been commenced, of which one hundred and sixty were on Custom House bonds to recover $422,220 47; fifty nine were on transcripts of accounts of defaulting public officers, excepting those of the Postoffice Department, to recover $1,206,936 55; three hundred and sixty-four were against Postoffice officials to recover $48,249 18; three hundred and thirty-one were for the recovery of fines, penalties and forfeitures under the customs, revenue and navigation laws, amounting to $4,151,944 67; one thousand and seven were suits in which the United States is interested for the recovery of $1,928,817 72, and seven hundred and ninety-four were suits against collectors of customs and other agents of the Government for refunding of duties and acts done in the line of their official duty. The total amount sued for is $7,758,168 59. Of the whole number of suits brought 632 were decided in favor of the United States; 27 were adversely decided, and 748 settled and dismissed. In six penalties were remitted by the Secretary of the Treasury, leaving 1,302 still pending. Of those pending at the commencement of the year 600 were decided for the United States; 72 were decided adversely; 824 were settled and dismissed, and in 41 penalties were remitted by the Secretary of the Treasury. The entire number of suits decided or otherwise disposed of during the year was 2,950. The whole amount for which judgments were obtained, exclusive of decrees in *rem.*, was $1,526,992 85, and the entire amount collected from all sources was $1,861,467 26.

☞ The New Jersey Midland Railroad has succeeded in freeing itself from the New York and Oswego Midland Railway, now in bankruptcy, and has commenced running trains to Middletown, N.Y., independently of the other company, and under a new time table and regulations. The combination with the Montclair Railway has also come to an end, and the Midland trains will none of them now be run over that road. The Montclair Railway now runs all its trains independently, and has issued a new time-table.

☞ The annual meeting of the stockholders of the Duxbury and Cohasset Railroad Company was held in Boston on the 18th inst. This road, 17½ miles long, soon to be extended to intercept the Old Colony, has cost $388,530 81, and the proposed extension will be made at an expense of about $70,000, $40,000 of which the town of Plymouth will subscribe. During the year just closed the expenses of the road have been $38,082 83 and the income $36,083 70.

☞ The last rail on the extension of the Western Maryland Railroad from Hagerstown to Williamsport was laid on the 14th inst., and workmen have since been engaged in ballasting the new road. The formal opening between Baltimore and Williamsport is expected to take place on the 25th inst.

☞ It is said that the Boston and Maine Railroad are considering the feasibility of running a branch road from Exeter to Hampton and Rye Beaches, terminating in Portsmouth, probably at the South End.

Finances of Pennsylvania.

The Commissioners of the Sinking Fund of the State of Pennsylvania report a balance on hand on the 1st of November of $1,671,046, of which the amount of $240,682 is applicable to the payment of relief notes, overdue loans, interest certificates, etc. During October State loans to the amount of $40,742 were redeemed. The debt of the State on the 1st instant was $25,830,974, of which $4,423,500 bears coin interest at 4½, 5 and 6 per cent, $23,566,650 bears interest in currency at 5 and 6 per cent, nineteen-twentieths of the amount at the higher rate; $144,433 is debt on which interest has ceased, $100,742 is debt bearing no interest, $95,749 is in Chambersburg certificates, outstanding and unclaimed, bearing 6 per cent interest, and $500,000 is Agricultural College land scrip fund of Pennsylvania.

Virginia Valley Railroad.

The work upon the line of the Valley Railroad, near Lexington, has been suspended. This we learn, is owing to the fact that this part of the work has been so far advanced that it can now be completed in a short time, while other parts of the work need all the labor that they can employ in order to insure its completion in the specified time of three years. So, while the work here is delayed, there has in fact been no reduction of the labor upon the line—that labor employed here has been sent elsewhere. All things considered, we think the Virginia Valley Railroad presents a favorable appearance. While other works have suspended operations, ours still employs a full quota of hands. So much for solid contractors—a financial flurry does not disturb them.—*Rockbridge (Va.) Citizen.*

Bona Fide Holders of Irregular Bonds.

The Supreme Court of Missouri, in a suit between Clarke county and holders of bonds issued in the name of the county to the Alexandria and Bloomfield Railroad, have decided in favor of the bondholders. It was pleaded by the county that the bonds were not issued according to law, and no vote of the people authorized them, the subscription having been made by the county court after two refusals of the people on a vote to subscribe. The chief ground on which the decision is based is that even though there may have been informalities and irregularities connected with the issue of the bonds, which might be successfully pleaded as against the county judges issuing them, or the company receiving them, these irregularities are of no value when pleaded as against a bona fide third party into whose hands they have passed.

☞ At the annual meeting of the Connecticut Western Railroad Company, held in Hartford, Conn., on the 18th inst., the following directors were elected: W. H. Barnum, A. H. Holley of Salisbury, G. M. Bartholomew, A. E. Burr, N. B. Stevens, C. R. Chapman and J. B. Bunce of Hartford, Byron Loomis of Suffield, W. L. Gilbert and George Dudley of Winsted, E. T. Butler of Norfolk, Frederick Watson of Canaan and G. H. Brown of Washington Hollow, N. Y.

☞ A special statement of the condition of the Pacific Mail Steamship Company, made to the new board of directors, shows receipts from May 1 to Oct. 1, 1873, to be $3,012,300, and expenditures $2,950,555, leaving a balance of nearly $62,000 as earnings in five months. In this exhibit it is understood that no allowance is made for insurance or for wear and tear.

RAILROAD EARNINGS—MONTHLY.

Central Pacific (in gold):	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

Steam on the Canals.

The Buffalo *Courier* says that the use of steam on the canals is no longer a mere experiment. Continued tests prove that it is already adopted practically and profitably. Complaints are universally made by those who have charge of the steamboats that the men on horse-boats, foolishly fearing their occupation is in danger, will not divide the channel with the steamers and give a fair chance. If the present regulations, firmly enforced, are insufficient to put an end to these unjust and injurious practices, the Canal Board ought, and undoubtedly will, during the ensuing winter, establish new and ample rules to meet the new exigency.

☞ The Internal Revenue receipts of the United States Treasury for the fiscal year ending June 30th last were $113,504,012, compared with $130,890,096 for the previous year—a decrease of $17,386,084. From spirits, the taxes collected amounted to $52,099, 871—an increase over the previous year of two and a half millions; from fermented liquors, $9,324,937—an increase of over a million; and from tobacco, $34,386,303—an increase of not quite a million. The taxes on banks and bankers yielded $3,771,031—a decrease of nearly a million. The revenue from stamps was cut down over eight millions—yielding $7,130,-933; whilst the miscellaneous imposts, paid during the portion of the year they were in force $6,-329,782.

☞ The receipts of the Central Railroad Company of New Jersey for the ten months ending October 31, 1873, were $7,479,896 16, the expenses $3,586,028 43, and the net earnings $3,893,867 73. For the corresponding period of the previous year the earnings were $6,003,232 21, the expenses $3,536,992 42, and the net earnings $2,-466,239 79—showing an increase in earnings of $1,476,663 95, with an increase in expenses of only $49,036 01, making the increase in net earnings $1,427,627 94. After providing for interest, taxes and all other charges, the net results of the business show ten per cent earned on the stock in ten months, of which four per cent was divided in July.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending November 8, at 401,304 tons, and for the coal year 17,453,862 tons, against 16 781,740 tons to corresponding time last year, being an increase of 672,122 tons. The bituminous tonnage for the week is 78,672 tons, and for the year 2,875,547 tons, giving a total of all kinds for the week of 479,976 tons, and for the year of 20,329,409 tons, against 19,236,412 to same time last year, being an increase of 1,092,996 tons.

☞ The receipts of the West Philadelphia Passenger Railway for the year ending October 31, 1873, were $468,567 56, and the expenses $358,-674 40. The officers of the road are: President, John S. Morton; Treasurer, Samuel P. Huhn; Secretary, B. F. Stokes; General Superintendent, M. English; Assistant Superintendent, James T. Gorman.

☞ The November interest on the bonds of the Richmond and Petersburg, Petersburg and Weldon, Richmond and Danville, and Piedmont Air-line Railroads has been promptly met.

Finances of New Jersey.

The commissioners of the New Jersey Sinking Fund report the total assets on the 31st of October at $1,536,781, the increase for the year being $76,736. At this rate the commissioners will soon be enabled to provide for the principal and interest of the public debt. The interest on registered and coupon bonds, due January and July, amounted to $164,652, and has been paid, together with $100,000 due January 1 on principal. The whole amount of debt to be provided for in gradual payments of $100,000 per annum is $2,710,000 and interest at six per cent per annum. The investments of the commissioners are made on the basis of three and a half per cent semi-annually.

Commerce of New York.

The forein imports at New York for the month of October, 1872 and 1873, are officially stated as follows:

	1872.	1873.
Entered for consumpt'n.	$15,342,844	$11,589,174
Do. for warehousing....	8,446,254	9,188,567
Free goods.....	6,867,654	6,498,178
Specie and bullion.....	262,946	9,869,869
Total entered at port...	$30,919,698	$37,145,783
Withdrawn fr. wareh'use	11,699,337	7,861,494

The foreign imports at New York for ten months from January 1, were:

	1872.	1873.
Entered for consumpt'n.	$174,634,901	$154,942,487
Do. for warehousing...	156,635,717	159,559,827
Free goods.....	44,866,612	74,458,390
Specie and bullion.....	5,265,429	13,771,361
Total entered at port...	$381,202,659	$352,732,065
Withdrawn fr. wareh'se	139,562,819	104,701,744

Customs received at New York from January 1:

	1872.	1873.
1st quarter.....	$42,124.009 14	$35,758,538 97
2d quarter.....	31,698,700 62	26,222,977 68
2d quarter.....	89,860,443 97	33,991,737 39
In October.....	10,655,390 80	7,656,384 95
Ten months....	$124,338,544 53	$103,629,638 99

The exports from New York to foreign ports in the month of October, were:

	1872.	1873.
Domestic produce.....	$24,374,195	$30,609,745
Foreign free goods.....	108,660	103,781
Do. dutiable.....	641,894	533,312
Specie and bullion.....	4,729,143	2,107,447
Total exports	$29,853,892	$33,354,285
Do. exclusive of specie.	25,124,749	81,246,838

The exports from New York to foreign ports for ten months from January 1, were:

	1872.	1873.
Domestic produce.....	$182,476,854	$237,366,385
Foreign free goods....	1,256,003	1,721,948
Do. dutiable	8,059.904	7,410,440
Specie and bullion....	63,111,513	43,666,548
Total exports.....	$254,904,274	$290,165,321
Do. exclusive of specie.	191,792,761	246,498,773

☞ The earnings of the St. Louis and Southeastern Railway Company (consolidated) during the month of October, 1873, were: St. Louis Division, $76,466 09; Nashville Division, $46,101 70—total, $122,567 79. Earnings in October, 1872, $114,433 35; increase, $8,134 44.

☞ The earnings of the New Bedford Railroad for the six months ending Sept. 30, were $171,569, and the expenses $101,213; net earnings, $70,825. Interest, dividend and taxes amounted to $49,978, which leaves a surplus of $20,347.

☞ It is proposed to re-organize the Wilmington and Western Railroad Company by forming a new company, with a capital stock of $600,-000 and a bonded debt of $600,000. The present stock of the company is $250,000, and its bonded debt is $500,000, while the floating debt is $80,000. The bondholders' proposition is to accept in lieu of its present bonds 75 per cent in the bonds of the new company, and 25 per cent in its stock. To the holders of the floating debt, it is proposed to pay 25 per cent of the amount due them, such payment being made in the stock of the new company at par, and it is also proposed to issue to the present stockholders, in place of their present stock, 25 per cent in the stock of the new company at par.

☞ The Rutland *Herald* says that the Harlem Extension Railroad has been leased to the Central Vermont Railroad Company, the lease to take effect on the 1st of December, and then adds: "The Central Company propose to put on one or more through trains for New York at once if arrangements can be made with the Harlem Railroad Company to connect at Chatham, making a through line from Montreal, St. Albans and Burlington via Rutland and Harlem Extension Railroad. We are informed that Vanderbilt has signified his willingness to do anything reasonable, so that we may expect through trains to New York over this route in a short time."

☞ The triennial assessment of the taxable property of Philadelphia, just made, shows the whole property subject to city tax is $548,243,535, of which $488,968,302 pays full city tax, $29,881,-385 pays suburban rate, and $20.153,915 farm rate. Of this total all but $9,250,000 are levied on real estate and money at interest. The report shows the nominally large amount of over $58,-000,000 exempt from taxation, principally made up of government and public property. The increase of taxable property since 1872 is over $21,-000,000.

☞ A Davenport, Iowa, dispatch of November 3 to the Chicago *Tribune*, says that the attorneys for the holders of the bonds of the city of Muscatine have succeeded in exchanging some $242,000 of the bonds of that city, issued mainly for the aid of railroads, the interest on which has not been paid for many years, for new Muscatine bonds, payable in 25 years, and bearing interest at 6 per cent, interest due and not paid being included in the bonded amount. Creditors not represented in this hold bonds aggregating $100,000, which will no doubt be settled in the same mannner.

☞ The Costa Rica Congress has approved the new contract to enable the contractor, Mr. Henry Meiggs, to extend the railroad to the Pacific, which the old contract did not provide for, and the price of eight millions for the construction of the part from Port Limon to Alajuela would leave the contractor with a loss, which the acceptance of the new contract would enable him to make up.

☞ The earnings of the Denver and Rio Grande (Narrow Gauge) Railway for the week ending November 7, 1873, were: freight, $2,783 92; passengers, $2,860 92—total, $5,594 84. Same week last year, $7,514 78.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, November 22, 1873.

Stock Exchange and Money Market.

Money has been more active during the week. The increase in the dealings at the Stock and Gold Boards has tended decidedly to enlarge the requirements of borrowers, especially on call. The available supply of funds has been liberal, as a rule, within the range of 5@7 per cent, though toward the close the offerings were on a somewhat restricted scale, and the prevailing rate was 7 per cent to the prominent street houses. In the way of discounts, notwithstanding the reports of some additional mercantile failures and suspensions, there was a readier sale noted for the choicest grades of business paper within the range of 10@15, generally 12@15 per cent per annum. The City banks have been gaining strength in their reserves, particularly as compared with their liabilities, which latter have been diminished by further liquidation on deposit and relief certificate accounts, but no definite particulars of the bank movement have been officially made public. The discussion of the proposed reform measures in bank management, as through the central agency of the Clearing House has progressed sufficiently far to indicate that the contemplated change does not meet with anything like general favor, and is not likely to prove a success. The legal tender reserve of the City banks at the close was up to 28⅜ millions.

The U. S. Sub-Treasury, last week, enlarged its currency balance $3,180,987, and reduced its coin reserve $594,292. Its currency balance at the close of the week was $8,848,175; and its coin reserve $49,820,049.

The cash balances under the control of the Treasury Department at Washington, on Tuesday were: Currency, $2,284,282; special deposits of legal tenders for the redemption of certificates of deposit, $14,440,000; coin, $80,629,772. Coin certificates, outstanding, $29,145,880. Outstanding legal tenders, $362,169,611.

Under the influence of the excitement in relation to the Cuban discussion, Gold has been much more active, and the price has shown more buoyancy. The demand has been mainly speculative—the customs and export call having been quite moderate. The less favorable reports from Washington, relative to the public debt, foreshadowing an increase in the current month, tended to stimulate the upward movement. The extremes of the price have been 107¾@110⅜, closing on Wednesday at 109¼ as against 107⅜ on Wednesday of the preceding week. The specie outflow, last week, was only $299,360. The imports of specie at this port last week, were $615,692 and since Jan. 1, have been $15,718,186 as against $5,847,772 same time last year.

The customs demand for Gold last week, averaged $226,833 a day. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $110,151,185, against $133,538,248 during the same time in 1872. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $60,901,299, against $70,514,397 during the same time in 1872. The export drain of specie since January 1, 1873, has been $45,258,824 against $67,357,468 during the same portion of 1872.

Foreign Exchange has been quite active, but unusually variable as to price, closing with rather more steadiness. Bankers' sixty day bills on London closed on Wednesday at 106¼@106⅛; sight bills on London, at 108¼@108½. The week's exports of Domestic Produce have been to the currency value of about 7⅝ millions.

Government securities have been quoted higher, in sympathy with the rise in Gold. The demand for the leading issues has been fairly active at the ruling figures. The offerings of bonds have been moderate.

U. S. sixes of 1881 closed on Wednesday of this week at 114¼@114¾; U. S. Five-Twenties of 1862, 109½@109¾; U. S. Five-Twenties of 1864 at 109⅝@109⅞; U.S. Five-Twenties of 1865 109⅝@110; U. S. Five-Twenties of 1865 consolidated 112½@113; U. S. Five-Twenties of 1867, 114@114¼; U. S. Five-Twenties of 1868, 113½@114; U. S. Ten-forties at 108@108½; U. S. Fives of 1881 (Funding Loan) 109@109½; Six per cent. currency Sixes from 110@110½.

There has been a much livelier business reported in Railway and Miscellaneous securities, at a marked advance, though the later dealings indicated a feverish and less buoyant movement.

State and Railway bonds have been much

more sought after and prices have been quoted generally firmer. Central Pacific first mortgage six per cents closed at from 90@91.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $5,762,089, as compared with $5,717,907 same week last year. The exports of domestic produce are $7,603,599, as against $5,365,829 last year. The exports of Gold and Silver, $1,054,944, as against $2,975,449 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,362,000, comparing with $1,942,000 same week last November.

In general business, a more satisfactory movement has been reported, especially in Breadstuffs, Cotton, Provisions, Groceries, Hides, Naval Stores, Fruit, Oils and Tobacco. Prices of Breadstuffs have been generally quoted higher. The export demand quite active. Cotton, unsettled, but closing more firmly. Provisions also dearer. Wool has been dull and weak. At the Live Stock markets, business has been on a moderate scale, with prices closing rather in favor of purchasers. The Ocean freight market has shown a fair degree of animation, with, toward the close, the tendency as to rates, rather in favor of shippers. The feature of the Metal Trade has been the more urgent inquiry for Copper, which has been much higher, closing strong and buoyant; sales 500,000 lbs. Ingot, here, at 23c., November, held at 24c., and 25,000 lbs. December and January, at 23¼c., now held at 25c. Iron has been very quiet, with Scotch Pig quoted steady, and American depressed and irregular. We quote nominally: Eglinton Pig at $39; Glengarnock, $38@$40; Coltness, $43@$45; Gartsherrie, $48; No. 1 American Pig at $35@$38; No. 2 do. at $28@$32; Gray Forge, at $25@$27; English Rails, $62@$63, gold; American Rails, (nominal) at works, $70@$72 50; Old Rails, $35 50@$35; Wrought Scrap, $32 @$38. Pig-Lead has been inactive with foreign quoted at 6⅞c.@7c., gold, for ordinary, and domestic at 5⅞c.@6½c., gold; Bar, 9¼c.; Sheet and Pipe, 10½c. Spelter has been dull, and quoted nominal at 7⅜c.@7⅝c., gold, for foreign. Pig-tin has been dull and weak with Straits quoted at 28c.; English at 26⅝c.@26¾c.; Banca at 32c., gold. Plates, have been quiet; Charcoal Plates quoted at $9 50@10; Charcoal Terne, $9 25@$9 75; Coke, $7 50@$8; Coke Terne, $6 75@$7 50, gold, per box. Sales 250 bxs. Charcoal at $9 75, gold, and 150 bxs. Coke Terne at $7 50, do.

R., 11@18; George's Creek Coal, 100@130.

☞ The formal opening of the Harlem River and Port Chester Railroad will take place on Monday, 24th inst. It will be operated by the New York, New Haven and Hartford Railroad Company, and be designated as the Harlem River Branch Road. Five trains will be run daily each way over the branch road during the Winter, and it is probable that several additional trains will be put on next Summer.

☞ The Phœnix Iron Company's new mill at Phœnixville, Penn., has received its roof. The building is 628 feet long, 288 feet wide, and 80 feet to the eaves.

☞ The Woonsocket (R. I.) *Patriot* says that the Air Line Railroad will soon be completed as originally planned, by building a line between Woonsocket and Putnam, avoiding the crook and high grades around the northwestern corner of Rhode Island, as now followed by the Boston, Hartford and Erie Railroad from Blackstone to Putnam. A crook in the line in Connecticut is to be treated in like manner. The *Patriot* learns that a railroad company now owning one of the best roads in this country has taken this project in hand, and at a proper time the public will know more of its intentions and enterprise.

☞ The Jersey City and Albany Railroad, running from the New Jersey Midland Railroad to Tappan, N. Y., has been abandoned. The road, which was opened only a few months ago, has been run without telegraph or other facilities, and the receipts were far below the running expenses. The company claims that the road will be reopened in the Spring, but this seems extremely doubtful.

☞ The Grand Rapids and Indiana Railroad is now completed to Little Traverse Bay, which is one hundred and ninety-two miles north of Grand Rapids and sixty miles south of the Straits of Mackinaw. Mixed trains will run over this part of the road for the present. Next summer the gap between the Bay and Straits and the Northern Pacific will be intersected.

☞ Trains have commenced running on the Chicago and Canada Southern Railroad from Grosse Isle, Michigan, southwest to Fayette, Ohio, the present western terminus—about sixty-five miles. The track from Blissfield, Mich., to Fayette, was laid last year, but was not operated until the completion of the section from Blissfield to Grosse Isle, which is about forty miles long.

☞ It is semi-officially announced that all hopes of disposing of the remainder of the new loan at 4½ and 4 per cent as contemplated by the Funding act, has been abandoned, and that the Secretary of the Treasury will recommend Congress to authorize the placing of the entire loan at 5 per cent.

☞ The engineer has made a report of his surveys of the route of the Hanover and York Railroad to the directors. The length of the road is eighteen miles, and the cost of construction, &c., for the rolling stock, is fixed at $271,000.

☞ The earnings of the Chicago and Alton Railroad for ten months from Jan. 1, 1873, to Nov. 1, 1873, were $5,738,740 57; same period previous year, $4,372,407 05. Increase, $366,333 52.

☞ The earnings of the Erie Railway Company for the week ending Nov. 7, 1873, were $411,274, and since Oct. 1, $2,293,695—an increase over the corresponding period of the previous year of $57,851.

☞ General Thomas L. Rosser, chief engineer of the Northern Pacific Railroad, has resigned his situation.

☞ The Stony Creek Railroad, a branch of the North Pennsylvania, from Landsdale to Norristown, has been opened for travel.

☞ The double track on the Baltimore and Ohio Railroad has been completed as far west as Cranberry Summit. The old bridge over the Youghiogheny, which was only wide enough for a single track, has been removed, and is being replaced by a handsome new Bollman bridge, wide enough for the double track. This structure will be completed by the 15th inst., and there will then be an unbroken double track from Baltimore to Cranberry Summit, a distance of two hundred and forty-two miles.

☞ The earnings of the Worcester and Nashua Railroad for the year ending September 30, 1878, were $580,666, and the expenses $372,203, which gives a net income of $208,462. Dividends and interest amounting to $198,595 were paid during the year, which left a surplus of $9,866.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, November 29, 1873.

Lake Superior Iron Production.

The total shipments from the Lake Superior iron district, by water, for the season of 1873, in gross tons, are as follows:

	Iron Ore.	Pig Iron.
From Marquette	525,959	24,782
From Escanaba	475,680	8,648
From L'Anse	72,410	----
Total	1,073,979	33,380

The shipping season of 1873 may be said to have virtually closed with the past week, so far as Lake Superior iron products are concerned. In 1872 shipments continued up to the 28th of November. The shipments for the season, as compared with those of last year, including only shipments by water, are as follows:

IRON ORE.

	1872.	1873.
Marquette	408,191	525,959
Escanaba	488,689	475,680
L'Anse	----	72,410
Total	896,880	1,073,979

PIG IRON.

Marquette	28,976	24,782
Escanaba	9,066	8,648
Total	38,042	33,380

This gives an increase of 117,748 tons of ore from Marquette the past season, and a decrease of 13,059 tons from Escanaba. The total increase in ore shipments for this season is 177,099 tons. In pig metal the shipments from Marquette have fallen off 4,117 tons, and the decrease from Escanaba is 518 tons, making the decrease in pig-metal shipments from the district 4,692 tons.

A small amount may yet be sent away from Escanaba, and the Keystone Iron Company expects to send about 1,000 tons of ore to Duluth before the close of the season. The Republic Iron Company is sending considerable ore by rail to Wisconsin, and other companies are shipping to local furnaces.—*Marquette Mining Journal, Nov. 15.*

Baltimore and Ohio Railroad.

The annual report of the president and directors for the year ending September 30, 1873, being the forty-seventh annual report, presents a very satisfactory showing. It gives the whole revenue as follows:

The revenues of the Main Stem (including the Winchester and Potomac, Winchester and Strasburg and Washington County Branches, and the Metropolitan Branch road from May 25, 1873,) have been	$12,252,843 78
Of the Washington Branch	439,141 66
Of the Parkersburg Branch	948,411 27
Of the Central Ohio Division	1,045 447 62
Of the Lake Erie Division	777,006 12
Of the Wheeling, Pittsburg and Baltimore (formerly the Hempfield) railroad	47,364 79
Of the Newark, Somerset & Straitsville railroad	185,326 80
Total	$15,695,541 54

The total amount of revenues, compared with the preceding year, is:

1873	$15,695,541 54
1872	13,626,677 31
Increase	$2,068,864 23

THE MAIN STEM.

The gross earnings of the Main Stem, (including the Winchester and Potomac, Washington county, and Winchester and Strasburg branches, and the Metropolitan branch road, from 25th of May, 1873,) have been $12,252,843 78. The expenses of working and keeping the roads and machinery in repair amounted to $7,318,882 15, being 56.69 per cent upon the earnings, showing an increase of 2.23 per cent compared with the previous year.

The earnings, in comparison with the fiscal year 1872, have increased $1,593,372 16, and the working expenses $1,191,482 22, making a comparative increase in the net profits of $406,889 94. Compared with the fiscal year 1871, the increase of earnings being $2,339,453 29 and of working expenses $1,406,994 47, the increase of net profits amounts to $932,458 82. During the fiscal year the sinking fund for the redemption of the city loan increased to $1,538,863 20, showing a gain of $89,300.

Under the action of the sinking fund for the redemption of the sterling loan of 1895, £52,000 of bonds have been purchased in London and canceled, thus, at $4 84 per pound sterling, reducing the debt $251,680, and showing a gain during the fiscal year of £18,000, equivalent at $4 84 per pound sterling to $87,120. In accordance with the principles on which the sinking fund for the redemption of the sterling loan, which matures in 1902, is established, £37,600 of those bonds have been retired and canceled, thus at $4 84 per pound sterling, reducing that debt $181,984. Twenty-four thousand pounds per annum are appropriated for this sinking fund, which with the interest accruing from its accumulations, will, it is expected, redeem and cancel these bonds prior to their maturity.

Semi-annual dividends of five per cent upon the capital stock were paid on the 1st of November, 1872, and on the 1st of May, 1873, respectively.

The liabilities of the company, compared with the statement of September 30, 1872, show the following reduction, viz: By the payment of the remainder of the second mortgage bonds of the Northwestern Virginia Railroad Company, (now the Parkersburg Branch Railroad Company,) which were guaranteed by the Baltimore and Ohio Railroad Company, and which matured January 1, 1873, the original sum having been $1,000,000—$458,500. The liabilities also show the following increase, viz: Preferred stock, second series, six per cent currency, $16,100; sterling loan, redeemable in 1902, £1,700,000 a $4 84 gold, $8,228,000; total, $8,243,100. The profit and loss account shows an increase for the past year of $2,882,184 85.

It will be seen by this account that the surplus fund, which represents capital derived from earnings invested in the various branch and connecting roads, and the great improvements that have been continuously constructed on the main line, and which is not represented by stock or bonds, now amounts to $29,084,403 71. The expansion of the traffic and revenues of the company have been very rapid, and have required annually heavy expenditures of capital for the increase of permanent structures, plant, tracks and essential facilities for the additional capacity required.

During the four years ended 30th September, 1872, the expenditures for increase of plant, viz: 88 locomotives, 2,913 freight and passenger cars, 22 miles of second track, for hotels at Cumberland, for the European steamship piers, wharves, elevators, and other structures at Locust Point;

for the rolling mill and machinery at Cumberland, and for real estate and requisite structures at Mount Clare, Baltimore, and at various stations upon the line, have been		$4,718,300 73
And for the year ended September 30, 1873, viz: 90 locomotives 2,302 freight and passenger cars, 42 miles of second, third and fourth track; improvement of Locust Point line, new hotels at Deer Park & Washington Junction, and completion of new hotel at Cumberland; new bar mill at Cumberland, additional elevator at Locust Point, new depots and depot grounds, have amounted to		4,749,985 95
For the construction of the Metropolitan Branch road		8,583,497 68
For the construction of the great bridges at the Ohio river, at Benwood and Parkersburg, to connect the Main Stem with the Central Ohio road and the Parkersburg branch with the Marietta and Cincinnati road respectively		2,382,480 04
The Baltimore and Ohio Company has also relieved, by the use of its earnings, the first mortgage on the North-western Virginia railroad	$1,500,000 00	
and paid the second mort. on the North-western Virginia railroad	1,000,000 00	
and anticipated and retired of the $500,000 third mortgage on that road due in 1885	360,000 00	
		2,860,000 00
and leaving of the whole amount of the mortgage made for the construction of that road but $140,000, which will mature in 1885.		
The following reductions by the action of the sinking funds and by payments have been made of the original mortgage indebtedness of the Baltimore and Ohio Company, viz:		
For loan which matured in 1854	$1,000,000 00	
For loans which matured in 1856 to 1860 inclusive	566,666 67	
For loan which matured in 1867	1,000,000 00	
In advance on account of loan which will mature in 1875	265,250 00	
In advance on account of loan which will mature in 1880	120,500 00	
In advance on account of loan which will mature in 1885	789,500 00	
In advance on account of loan which will mature in 1890	1,538,853 20	
		5,280,769 87
Showing a total of		$28,574,984 22

In the autumn of 1872 £700,000, and in August last £1,000,000, being the remainder of the mortgage loan of 1902 for £2,000,000, were negotiated in London on satisfactory terms, and at periods when the railway companies of America generally found it impracticable to effect loans in Europe.

The uniformly conservative and prudent course of the Baltimore and Ohio Company in making moderate dividends and in applying its large additional earnings and resources to the construction of needed and important permanent works and in securing valuable connections, thus investing its undivided net earnings judiciously and steadily until its surplus fund amounts to $29,084,403 71, a sum unprecedented in the history of railway companies in Europe or America, has attracted and commanded the confidence its system and policy merit. At a period when the undertakings of other companies are suspended from their inability to obtain the capital required it has been shown by their recent action that there is every reason to believe that European capitalists will continue to invest in securities of the Baltimore and Ohio Company to the extent that may be desired to enable it to prosecute with vigor to completion the great works in which it is engaged, and which will prove of the highest value to the cities of Baltimore and Washington and to the States of Maryland, Virginia, West Virginia, Ohio, Indiana and Illinois, and practically, in view of the advantages of such powerful competing routes, to the southern, southwestern, western, and northwestern States generally.

It is shown by the report of the transportation department that there has been a continuous large expansion of tonnage of through merchandise East and West, viz: from 557,609 tons in the preceding year to 640,265 tons. For 1871 this traffic was 485 207 tons; 940,627 barrels of flour were brought to Baltimore during the fiscal year, showing an increase of 182,785 barrels. The present increased facilities for the transportation and transfer of grain and those which will be afforded by the additional elevator now being erected at Locust Point will, it is expected, lead to a great enlargement of this important and valuable trade. The traffic in live stock exhibits an increase of 15,029 tons. The coal trade shows an aggregate of 2,505,629 tons, which includes 485,911 tons for the company's supply.

During the year, 985 iron hopper and gondola cars of eleven tons capacity each have been added to the equipment. Facilities have thus been promptly furnished to supply the largely increased demand for coal. The policy of the Baltimore and Ohio Company in maintaining low and uniform rates for its transportation continues to attract a steadily enlarging traffic. The charge for the transportation of coal has continued summer and winter without change for nearly six years. The reliance which can be placed by consumers upon obtaining their supplies throughout the year without alterations of the tariff causes this route to be preferred and the city of Baltimore to be adopted as the port for supplies for the leading ocean steamship companies, and the manufacturers and railway companies of the States of New York and New England. The apparently permanently enhanced prices of coal in Great Britain continue to cause a transfer from its ports to Baltimore of extensive shipments for South America and the East and West Indies.

THE WASHINGTON BRANCH.

The earnings were $439,141 66, showing a decrease of $41,503 38 compared with the previous year, and an increase of $11,562 24 compared with 1871. The expenditures charged amount to $156,761 62, being for improvements and for repairs of railway, depots, water stations and bridges, and for pumping water. During the year 878 tons of steel were substituted for iron rails, and 27,508 cross-ties were also used. As stated in former reports the system was adopted by which the earnings are equitably divided upon a basis requiring all the expenses connected with transportation, the repair and use of machinery, and of the shops and stations of the company in Baltimore to be paid by the main stem, the expenses of the road department alone being charged to this road.

The partial expenditures charged deducted from the revenue stated made the sum of $282,380 04, showing an increase compared with the preceding year of $53,854 97. A dividend of five per cent was paid on the 16th of October, 1872, for the half year terminated September 30, 1872, and on the 17th of April, 1873, a similar dividend for the term ended March 31, 1873.

In order to comply with the wishes of the government of the Territory of Columbia in connection with changes in the grades of the streets in the vicinity of the present station of the Washington Branch of the Baltimore and Ohio Company in Washington, a purchase has recently been made of the square of ground No. 681 on North Capitol street at a cost of $102,028. It is designed to construct upon this land a commodious station, with every facility for the comfort and convenience of passengers.

THE PARKERSBURG BRANCH RAILROAD COMPANY.

The earnings of this road for the fiscal year were $948,411 27, and the working expenses $831,257 64. The earnings were $121,608 88 more than in the previous year, whilst the expenses increased $118,995 90, showing an improved result compared with 1872 of $2,612 48.

GENERAL REMARKS.

The aggregate earnings, working expenses, and net results of the Main Stem, including the Winchester and Potomac, the Washington County and the Winchester and Strasburg branches; of the Metropolitan Branch, the Washington Branch and the Parkersburg Branch Railroads; of the Central Ohio and Lake Erie Divisions, and the Wheeling, Pittsburg and Baltimore, and the Newark, Somerset and Straitsville Railroads were, viz:

Earnings:	
Main Stem, etc.	$12,252,843 78
Washington Branch	439,141 66
Parkersburg Branch	948,411 27
Central Ohio Division	1,045,447 62
Lake Erie Division	777,004 12
Wheeling, Pittsburg and Baltimore Railroad	47,364 79
Newark Somerset and Straitsville Railroad	185,326 80
Total	$15,695,541 54
Expenses:	
Main Stem, etc.	$7,313,852 15
Washington Branch	156,761 62
Parkersburg Branch	831,257 64
Central Ohio Division	976,447 13
Lake Erie Division	686,555 46
Wheeling, Pittsburg and Baltimore Railroad	46,554 61
Newark, Somerset and Straitsville Railroad	126,494 03
Total	$10,137,052 64
Net Earnings:	
Main Stem, etc.	$4,938,961 63
Washington Branch	282,380 04
Parkersburg Branch,	117,153 63
Central Ohio Division	70,000 49
Lake Erie Division	90,450 66
Wheeling, Pittsburg and Baltimore Railroad	710 18
Newark, Somerset and Straitsville Railroad	58,832 27
Total	$5,558,488 90

The net revenue of the main stem and branches, including the Central Ohio and Lake Erie divisions, the Wheeling, Pittsburg and Baltimore and Newark, Somerset and Straitsville Railroads, is thus shown to be $5,558,488 90. The aggregate working expenses were 64 58 100 per cent of the whole gross revenues. During the year 396,132 new cross ties, 8,537 tons of iron and 11,012 tons of steel rails were used for the repair and construction of additional tracks on the main stem.

The increasing business of the company continued to require large additions to its equipment. During the year 90 first class engines, 46 palace and passenger cars, and 2,256 cars for general tonnage were purchased and built at the company's works. The cost of the new and additional equipment, $2,686,428 75, has been charged to rolling power. The report of the master of machinery shows that the equipment upon the main stem and branches consists of 518 locomotives, 807 passenger and baggage cars, and 10,841 house, stock and other cars. It will be seen that 11,012 tons of steel rails have been used during the past year upon the main stem. Three hundred and fifty-one miles of the road are now laid with this

durable and safe material. Contracts have been made for 12,000 tons to be laid during the next year. The greatly increased cost of the large quantity of steel thus used in substitution for iron rails has been charged to the repair account.

The rapid increase in the traffic of the road requires a constant increase of its facilities in all the working departments. During the year seven miles of track have been laid in the yards and stations of the company, and work upon the second, third and fourth tracks has been vigorously prosecuted. Forty-two miles of second, third and fourth track have been laid during the year.

The Marietta and Cincinnati, the Washington City, Virginia Midland and Great Southern, and the Pittsburg, Washington and Baltimore Railroads have continuously made important improvements and extensions. In view of the great importance of these lines to interests with which the Baltimore and Ohio Company is identified it has been deemed judicious to continue to extend to them material financial aid, which their necessities demanded. It is hoped that the ultimate benefits to be derived from these valuable auxiliaries to the trade of Baltimore will vindicate the liberal action of the company.

Subsequent to the adjournment of Congress in March last, a number of leading railways of the country entered into an agreement to discontinue the transportation of postal cars upon their respective lines except upon terms which could not be legally paid by the Post Office Department. The Baltimore and Ohio Company not only refused to join in this combination, but as the use of the postal cars is a most valued accommodation and convenience to the public, it determined to assist the department in maintaining the system. The president of the company accordingly tendered to the Postmaster General for this service the use of all its roads and branches, and with their consent and on their behalf, the use of the Washington City, Virginia Midland and Great Southern, the Pittsburg, Washington and Baltimore, the Marietta and Cincinnati, the Ohio and Mississippi, and its other leading connecting roads, with the proposition that the remuneration should be equitably adjusted at the convenience of the government, thus tendering facilities by which the department could continue this service to the most important Southern, Southwestern, Western and Northwestern cities. The Postmaster General acted promptly and affirmatively upon this proposition, and the government was thus enabled, by the use of the Metropolitan Branch road, and the numerous short and direct lines of the Baltimore and Ohio Company, to meet the chief requirements of the public, and through the independent and effective action of this company, to prevent the annoyances and injuries to the public service that would probably have otherwise resulted from the threatened adverse organization.

METROPOLITAN BRANCH RAILROAD.

The Metropolitan Branch road, from Point of Rocks to Washington, forty-two miles, was opened for traffic on 25th of May last. The expenditures on this costly line have amounted to $3,583,497 63; but, whilst the engineering is very bold, and the fine masonry and bridges have been expensive, it affords an admirable, direct and effective line, which must prove of constantly increasing value. The national capital, by the completion of this work, has, through the Marietta and Cincinnati and Baltimore and Ohio roads, a line from Cincinnati—that great centre of business of the valley of the Ohio—a hundred and twenty miles less in distance than the line of the Pennsylvania Railroad by Harrisburg and the Baltimore and Potomac road, and a line from Pittsburg, by the Pittsburg, Washington and Baltimore and the Metropolitan roads seventy-five miles less in distance than the route by the Pennsylvania, Northern Central and Baltimore and Potomac roads.

On the opening of the Pittsburg, Washington and Baltimore Railroad the passenger fare was reduced by the Baltimore and Ohio Railroad Company from the charge previously made by the Pennsylvania Company, namely, from $11 55 between Pittsburg and Washington to $9, and from $10 between Pittsburg and Baltimore to $8 50. On the opening of the Metropolitan Branch road a reduction in the tariff of freights from Cincinnati and other western points to Washington of about 18 per cent was made by the Baltimore and Ohio Railroad Company. It will thus be seen that travelers between the national capital and the west and the people of Washington have been at once, and to a most important extent, benefitted by the completion of these works and the liberal policy pursued by this company.

The great through mail and passenger trains between Baltimore and the west now pass over the Metropolitan Branch road, and in full view of the Capitol and the city of Washington. Under this system the passengers by the Baltimore and Ohio road avoid the curved portion of its line in the valley of the Patapsco, and enjoy the interesting scenery by this direct and beautiful route. The great facilities of the line from Point of Rocks to Baltimore are now used without interference from these trains for the heavy coal and other tonnage traffic of the company.

BALTIMORE, PITTSBURG AND CHICAGO RAILROAD.

The work upon this line has been vigorously prosecuted, and it is expected before the commencement of winter that the grading from Centreton, on the Lake Erie Division, through Ohio and Indiana to the line of the State of Illinois, within thirty miles of Chicago, will be finished. The work of ballasting and laying the track as far west as Deshler, has so far progressed that it is anticipated that the line will be opened during November, 1873, to that point, at which a connection with the Dayton and Michigan Railroad will be made. A large business from Toledo and the important sections reached by that line is anticipated. The relatively limited capacity of the present routes from Chicago and the increasing pressure for transportation of the immense products of the northwest, cause the completion of this line to be looked for with great interest. The traffic upon the entire route, embracing the road from Chicago to Deshler, from Deshler to and upon the Lake Erie division to Newark and thence upon the Central Ohio Division and the Main Stem of the Baltimore and Ohio road to Baltimore, will undoubtedly be heavy and continuous from the period from which the route will be opened. In order to prepare for the increase of transportation, large expenditures for additional tracks and improvements upon the portions of the Lake Erie and Central Ohio Divisions to be thus used, have been made. Additional plants and facilities have been prepared at all points to assure the prompt and successful management of the increased business expected to be controlled by this route.

The interests of the city of Pittsburg and the intermediate region urgently require the construction of a connecting road from that City to Centreton. It is hoped that the large interests identified with this enterprise will cause it to be constructed at an early period, and thus form a great additional competing line from Pittsburg to Chicago and the Northwest.

No better illustration of the commercial progress of Baltimore in connection with the Baltimore and Ohio Railroad has been shown than by the rapid and marked success of the North German Loyd Line of steamers between Baltimore, Southampton and Bremen, established at the suggestion and under the auspices of the Baltimore and Ohio Company. This line commenced operations in 1868, with two first-class iron steamers, of 2,500 tons burden each, the Baltimore and the Berlin, built upon the Clyde for this route. The business for these steamships was ample and remunerative from the inauguration of the enterprise. The necessity was quickly demonstrated for additional steamers for the accommodation of the trade, and in 1870 the capacity was doubled by adding the splended new steamships the Leipsic and the Ohio. During the past year the expansion of the trade demanded that the original capacity of the line should be more than tripled, and the Braunschweig and the Nürnburg, magnificent Clyde built iron steamers of 3,000 tons, with all modern improvements have been constructed for and added to the line. It is already palpable that the pressure of the trade of Baltimore will far exceed even this enlarged capacity, and the number of steamships for this import and export trade must, at an early period, be materially increased.

The Messrs. Allan, of Liverpool, after testing the extent and value of the business which can be controlled at the port of Baltimore, have placed several large and first-class steamers upon the route between Baltimore and Liverpool. The significent and immense geographical advantages of Baltimore for the import and export trade of a large portion of the United States have thus been made conspicuous, and are being rapidly realized and appreciated.

Through the Baltimore and Ohio road and its connections the economies of distance from the centers of trade named in favor of Baltimore, as compared with New York, are as follows:

COMPARATIVE DISTANCES TO BALTIMORE AND NEW YORK.

From Chicago, Ill.—To Baltimore, via Baltimore and Ohio Railroad, 795 miles. To New York—via New York Central Railroad, 980 miles; via Erie Railroad, 961 miles; via Pennsylvania Railroad, 899 miles. Less to Baltimore than the average distance to New York, 152 miles.

From St. Louis, Mo.—To Baltimore, via Baltimore and Ohio Railroad, 929 miles. To New York—via New York Central Railroad, 1,167 miles; via Erie Railroad, 1,201 miles; via Pennsylvania Railroad, 1,060 miles. Less to Baltimore than the average distance to New York, 210 miles.

From Louisville, Ky.—to Baltimore, via Baltimore and Ohio Railroad, 696 miles. To New York via New York Central Railroad, 989 miles; via Erie Railroad, 987 miles; via Pennsylvania Railroad, 851 miles. Less to Baltimore than the average distance to New York 246 miles.

From Cincinnati, Ohio.—To Baltimore, via Baltimore and Ohio Railroad, 589 miles. To New York—via New York Central Railroad, 882 miles; via Erie Railroad, 861 miles; via Pennsylvania Railroad, 744 miles. Less to Baltimore than the average distance to New York, 240 miles.

From Pittsburg, Pa.—To Baltimore by the Baltimore and Ohio Railroad, 327 miles; To New York by the Pennsylvania Railroad, 431 miles. Difference in favor of Baltimore, 104 miles, and from all points south of Baltimore 200 miles.

It was the recognition of these great facts by Congress which caused the Senate and House of Representatives of the United States with great unanimity to appropriate $300,000 within the past two years for the purpose of deepening the channel, and $65,000 for supplying range lights of the most improved description for the approaches to the harbor of Baltimore. And it was the recognition of the necessity of making provision for the heaviest class of steamships for the vast trade of which Baltimore will be the entrepot, that induced its mayor and city councils to appropriate within the same period, with wisdom and foresight, $400,000 to perfect the channel in the shortest practicable time. This important work has progressed with unprecedented rapidity, and it is expected by December next that the channel, from the piers at Locust Point to the Chesapeake bay, will be completed, of sufficient width and with a minimum depth of twenty-four feet, at mean low water, and with an available depth at high water, with the average rise of the tide, of twenty-five feet and three inches. The eminent officer, Colonel Wm. P. Craighill, of the United States corps of engineers, under whose charge this work is being prosecuted, in describing the improvement, states that, "Besides giving an increased depth, the new channel has the additional advantages of shortening by several miles the dis-

tance between the wharves of Baltimore and the deep water of the bay, and of making the courses so straight as to greatly diminish the difficulties of pilotage, if not to make the work of the pilot one of supererogation."

With the singularly safe navigation of the Chesapeake bay, and a channel perfected for steamships of the largest class, and with the extensions of the Baltimore and Ohio road by its numerous branches and connections into immense and productive territories, with the large discrimination in its tariffs for freight and passengers, and especially with its superior advantages and facilities for immigrants, compared with the charges from New York, it may reasonably be expected that the foreign trade of Baltimore will increase with unexampled rapidity.

The successful management of the greatly and rapidly enlarging business of the company requires the expression by the board of their appreciation of the faithful and efficient services of the officers and employees of the company in all the departments of the service. By order of the board. JOHN W. GARRETT, President.

Wooden Railroads.

To develop the resources of a country, facilities for transportation are indispensable. Iron ore could be mined and lumber manufactured only to a very limited extent if wagon transportation for any considerable distance over common roads were necessary to reach a market. Where the business is sufficiently extensive to warrant it and the capital can be secured, railroads, either narrow or ordinary gauge, will afford the best facilities. But there are many localities in which ordinary railroads are impracticable, not from physical but from financial difficulties in the way of their construction. With a limited capital and a sparse population, railroads cannot be built in localities highly favored in natural resources for operations of quarrying, mining, and heavy manufacturing. In such cases, a substitute for the wagon road, less expensive than the railroad, becomes a desideratum.

This substitute has been proposed in a new style of wooden railroad, costing but little more to construct than an ordinary wagon road, yet affording transportation at less than one fifth the cost by wagon, and less also than the ordinary cost by rail, where interest on capital invested is considered. This road differs essentially from the ordinary tram road, which consisted of sawn rails about three inches wide, laid on cross ties, and used with narrow tread iron-wheeled cars. Such roads, although some improvement on the common wagon road, with its mud holes and deep ruts, have given very unsatisfactory results. The differences extend to the tracks, cars, and motive power.

The track is formed of heavy logs, hewn on the upper side to the width of eight inches, and on the inside at right angles, sufficiently deep to form a straight edge for the flange. These logs are buried so that the top, or rail surface, is almost level with the road surface, resting on stout sills at the end and middle, to which they are secured by wedged treenails. The rails therefore are solidly bedded, and not liable to warp or twist. Twenty feet would be a convenient length on curves, but on straight lines longer pieces could be used, the ties being ten feet apart. The grading, of a sufficient width, on a side hill with gentle slopes, would cost about $200 per mile for a three foot gauge; but of course the cost of graduation will vary greatly with the locality. Ravines and small water courses would in general be crossed with rough trestles or timber cribs. Hewing the timber would cost about $200 per mile. In a wooded country, where timber can be obtained along the line of the road, where no large bridges are required and no rock has to be excavated, the cost of such a wooden railroad should be covered by from $500 to $2,000 per mile, depending upon the amount of earth work.

The cars proposed for such wooden railroads are simple frames placed on wheels, without springs, and covered with a floor of plank. The wheels are of cast iron, built up of pieces cut from two inch plank in the form of sectors, about 8 inches wide at the wide end. Four thicknesses of plank will build a wheel with a tread of eight inches, corresponding with the face of the rail. A cast iron hub is inserted in the center, through which an iron axle passes, and a cast iron flange is bolted on the inside. The timber should be of hard wood, well seasoned, the sectors laid so as to break joint and well bolted. Diameter of wheels, about thirty inches. Such cars, if used with horses, will cost $40 to $50, or about one third the price of a farm wagon. They will carry three tons, and can be made by any rough hand who can use carpenter's tools. If designed for use with locomotives in trains, drawbars and springs must be used, and the cost per car increased.

Horse or mule power can be used; but if the tonnage is considerable, it will be preferable to adopt a light engine of six or seven tons, with wide driving wheels, covered with vulcanized rubber tyres. Such engines can be manufactured at the BALDWIN LOCOMOTIVE WORKS for about $4,000. Passengers could be carried on the proposed roads with such engines at a speed of ten or twelve miles an hour, which would make a great improvement on the stage coach.

Such roads would rot out long before they would wear out, and the answer to the objection that they are not durable is simply that they will last just as long as the cross ties on an ordinary railroad, and it will cost less to renew them. Post oak ties in the South last from ten to fourteen years. The cost of transportation by wagons, for a distance of twenty-five miles, without return load, is fifty cents per 100 lbs., or ten dollars per ton of 2 000 lbs.

Assuming the tractive power on such a wooden road, for the purpose of an approximation, to be double that of an ordinary railroad, or 20 pounds per ton, the angle of friction would be forty-eight feet to the mile. And a horse exerting a power of 150 lbs. at 2½ miles per hour, or 4 horses doing 600 lbs., would haul, on a grade of 144 feet to the mile, one fourth of the gross load on a level, or 7½ tons, giving 6 tons of net load. As a trip of twenty-five miles, returning empty, could be made in two days, assuming a team to be worth $5 a day, the cost of the round trip would be $10, or $1 66 per ton, as against $10 per ton by wagon transportation; and this, too, on grades of 150 to the mile, nearly—tolls for use of road being included in either case.

This illustration will show the great ecomony of such roads over wagon transportation, even when operated by horse power; but where the business will warrant it, the rubber-tyred locomotive should be used. If, after a few years, a business should be developed sufficiently to justify the expense, an iron railroad could be substituted, in which the original grading, as it would form a part, or the expenditure for it would not be lost. It is also to be observed that, the rails of the proposed wooden railroad, being even with the surface of the road bed, or nearly so, would permit the same road bed to be used for the ordinary vehicles.—GENERAL HAUPT *in Journal of the Farm.*

☞ Nearly seven-tenths of a mill have been added to the rate of Illinois State taxation by the State Board of Equalization, to produce the additional revenue for the payment of the interest on the railroad aid bonds. The assessment was increased by $370,000,000, and the revenue thereon from a tax of 2 7-10 mills will be $864,000. The rate of tax but for the railroad aid bonds would have been only 2 1-14 mills.

☞ A dispatch dated Matamoras, Mexico, November 24, says that the concession for the construction of a railway from the Rio Grande frontier to the city of Mexico, and thence to the Pacific, has been granted to a company of Mexicans. This defeats both the Plumb and Rosecrans projects.

Toronto, Grey and Bruce Railway.

This company owns a line from Weston Junction, Ont., west by north to Mount Forest, 78 miles, and its trains run from Weston Junction to Toronto, 9 miles, over the Grand Trunk, using a third rail. The Grey extension, 68 miles long, from Orangeville north to Owen Sound, has been opened since the close of the year, and an extension of the main line from Mount Forest to Harriston, 10 miles, is nearly completed. The road is of 8ft. 6in. gauge. During the first three months of the year only 49 miles of road were in operation, making the average mileage of the year 77⅛ miles. The earnings of the road for the year ending June 30, 1873, were $178,148, the expenses $124,129, and the net earnings $54,019; from which deduct interest on bonds from Weston to Mount Forest $53,328—leaving a balance of $691. No comparison can be made with the previous year, as only a part of the line was open, and that only for a part of the year. During the year the road carried 67,977 passengers and 75,445 tons of freight, exclusive of stock. The total mileage of engines was 219,271 miles. The average cost of running trains per train mile was 27.54 cents, of which 7.70 cents was for repairs. At the close of the year the equipment comprised fourteen locomotives, eight passenger and two mail and baggage cars, nine conductors' vans, ninety-seven box, fifteen stock, 185 flat and two lime cars. During the year $858,199 13 was expended on new construction, making the whole amount of the construction account $2,720,537 85. The actual receipts on construction account have been from calls on stock, $248,212 09; Government bonus, $189,646; municipal bonuses, $827,679 65; sale of bonds, $1,200,533 67; contractors drawbacks, $18,874 91; total, $2,484,946 82. The balance of construction account is represented by bills payable. The company hopes to obtain a further bonus from Government and also additional municipal bonuses.

☞ The Sixth Annual Report of the Wilmington (Del.) Board of Trade estimates the present population of the city proper at 89,230, and with the suburbs at 42,000, being an increase of 2,230 in a year. The real estate of the city is valued at $23,000 000, and the personal property at $18,500,000. During the year 446 new buildings have begun, valued at $1,115,000. The capital employed in manufactures is $12,725,000, and the value of the articles manufactured in a year was $21,150,000. There are 42 churches, 17 public and 16 private schools.

☞ At a meeting of the Chamber of Commerce of Charleston, S. C., on the 19th inst., favorable action was taken regarding the proposed direct railway from Chicago to Charleston, and a committee was appointed to arrange for reception of delegates from the Northwest on the eleventh of December, when it is expected to give fresh impetus to the movement.

☞ The survey of a route from the Cumberland Valley Railroad to the Shenandoah Valley Railroad has resulted in the location of a line from Martinsburg to Charlestown, leaving Leetown to the east about one and a-half miles. The stem will be about fourteen and a-half miles.

Iron and Steel Interests.

The report of the Secretary of the American Iron and Steel Association, which was in session in Philadelphia last week, among other things states that the total number of net tons of iron and steel rails made in the United States in 1872 was 941,992, or 861,064 gross tons. This aggregate was produced in sixteen States. There were produced in the United States in 1872 about 32,000 net tons of cast steel, and in 1873 there will be produced about 28,000 tons. In 1871 there were converted 45,000 net tons of Bessemer steel; in 1872, 110,500 tons; and in 1873 it is estimated that there will be converted 140,000 tons. About 85 per cent of the Bessemer steel that is now converted in American works passes into rails. It is estimated that the mileage of new track for the year 1873 is only 3,000 miles, a decrease since last year of more than 59 per cent. The year 1871 witnessed the culmination of railroad construction in this country. The number of miles built in that year was 7,779. The re-action commenced in 1872, when 6,427 miles were built. The total railroad construction of 1874 is estimated at 3,000 miles, the same mileage as the estimate for 1873.

☞ At a meeting of the stockholders of the Philadelphia and Erie Railroad, held in Philadelphia on the 22d inst., it was reported by the special committee appointed, that in a conference with Mr. J. Edgar Thomson, president of the Pennsylvania Railroad Company, he had expressed himself as willing to surrender the lease of the Philadelphia and Erie Railroad for a full equivalent. Mr. Howard read a lengthy paper to show that the road would pay well if rightly managed, and that the Pennsylvania Railroad Company own 80,000 shares of its stock, but if the other stockholders were paid their dues the Pennsylvania Railroad Company would be entitled to but 13,000 shares.

☞ Col. T. A. Scott, one of the endorsers of the paper of the Construction Company of the Texas and California Railroad Company, proposes to settle with the holders in payments extending from two to twenty-four months. He is quite sanguine, if his creditors will extend to him the credit he asks, all will get their money; if they should decline this, and press for immediate payment, they must be satisfied with what they can get. He expresses great confidence in the belief that Congress will extend aid to his enterprise, not by indorsing the company's bonds, but by lending to the company government bonds, under such guarantees of payment by the company as he can show is sufficient.

☞ It is proposed by the friends of the Hopkinton (Mass.) Railroad to extend their road from Hopkinton Centre westerly through Woodville, Westboro', or Upton and Grafton Centre, to a connection with the Providence and Worcester Railroad, in the southwest part of Grafton, near Saundersville. The extension will be about fourteen miles in length, through Westboro', or fifteen miles through Upton. It will increase the facilities of travel to and from Boston and Providence, by shortening the route. Most of the required stock has been taken, and the road will be constructed next year.

Baltimore and Catonsville Railway.

At the annual meeting of this company, held in Baltimore on the 18th inst., the following directors were elected for the ensuing year: Benjamin Whiteley, Herman H. Graue, James W. Flack, Frank Frick, Jeremiah Storm, Asa H. Smith, and John C. Holland. The board then organized by the election of John C. Holland, president, Herman Graue, treasurer, William W. Orndorff, secretary, and F. Megenhart, ticket agent. The annual report of the president showed that the number of passengers carried over the road during the past year was 264,105, an increase of 4,286 over the previous year. The report also represented the road as doing a fair business and in good condition, a dividend of eight per cent having been declared. The report was accepted, and a resolution adopted directing the president to have prepared an amendment to the charter of the company, to be presented to the Legislature of Maryland at its ensuing session, asking for the privilege of using some of the improved methods of steam power now in practice in other cities for propelling passenger cars.

☞ The Little Rock, Pine Bluff and New Orleans and Mississippi, Ouachita and Red River Companies are consolidated under the title of the Texas, Mississippi River and Northwestern. The Little Rock, Pine Bluff and New Orleans road is completed from Chicot to Pine Bluff, 75 miles. It is to be extended north by west, 40 miles further to Little Rock, and the grading for this extension is partly finished. The authorized capital stock is $1,200,000, with an issue of bonds for $10,000 per mile. The Mississippi, Ouachita and Red River road is to run from Chicot west to Fulton on Red River, 180 miles, and is completed from Chicot to Monticello, 36 miles. The company is authorized to issue $2,000,000 in stock, and $12,000 per mile in bonds.

☞ At a meeting of the directors of the Norfolk and Bristol Railroad held in Boston on the 20th inst., Samuel Warner of Wrentham was elected clerk, and F. W. Bird treasurer. The various committees necessary to the immediate prosecution of the enterprise were appointed. Mr. S. L. Minot, the engineer, made a statement of the survey, the field work of which he had just completed, but had not finished the profile. He had no doubt, however, that the road could be constructed, ready for the cars, land damages and station houses included, for an average of $25,000 per mile.

☞ Pratt & Co.'s Rolling Mill and Iron Works, at Buffalo, N. Y., which have been idle for the past four weeks, resumed business on Monday last at a reduction in time and wages of about ten per cent.

☞ The earnings of the Erie Railway Company for the week ending Nov. 15, 1873, were $424,369, and since Oct. 1, $2,718,064—a decrease compared with the corresponding period of the previous year of $7,084.

☞ The Shreveport *Times* says that the Texas and Pacific Railroad Company has relieved the California and Texas Construction company from further labor on building the road, and has assumed the work itself.

St. Louis, Alton and Terre Haute Railroad.

The St. Louis, Alton and Terre Haute Railroad Company presents the following report, together with the statement that the company owes no floating debt, and that its financial affairs are in good condition. The November interest on the bonds was promptly paid, and the earnings promise a dividend.

First nine months' earnings main line, for 1873	$1,056,386
First nine months' earnings, main line, for 1872	1,027,206
Increase	$29,180
Belville branch, first nine months' earnings, for 1873	$239,781
Belville branch, first nine months' earnings, for 1872	186,781
Increase	$53,000

Southern Maryland Railroad.

From sources of information which entitle them to the fullest credit we are pleased to inform our readers that the grading of the Southern Maryland Railroad from Brandywine, in Prince George's, to Point Lookout, in St. Mary's county, is now rapidly progressing, and that in a few brief months, unless some unforseen drawback intervenes, the whole road will be graded and ready for the ties. As it is, over two thirds has already been completed, not more than twenty miles of the road now remaining to be graded, and this remainder is through a section where the labor will be light and easy and the cost comparatively slight. We are assured by competent and disinterested observers that the work thus far has been well done, and is being pushed forward notwithstanding the present monetary embarrassments of the country, with a celerity and determination which leave no room for doubt of its speedy completion.—*St. Mary's Beacon.*

☞ The Milwaukee *Wisconsin* says that arrangements are now being made by which the Illinois Central Railroad Company will purchase and consolidate the Dakota Southern Railway. This latter road is sixty two miles in length, extending from Sioux City, in Iowa, to Yankton in Dakota Territory. The cost of the road has been $1,116,000, or $18,000 per mile. The road was completed on February 1st, 1873, and runs through a fertile wheat growing country, Southern Dakota and Northern Nebraska being tributary to it. The estimated earnings of the road for the month of October were $300,000.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending November 15, at 400,330 tons, and for the coal year 17,859,686 tons, against 17,232,951 tons to corresponding time last year, being an increase of 626,735 tons. The bituminous tonnage for the week is 82,224 tons, and for the year 2,957,691 tons, giving a total of all kinds for the week of 482,554 tons, and for the year of 20,816,377 tons, against 19,754,406 to same time last year, being an increase of 1,061,971 tons.

☞ The Senate committee on transportation has paid its visit to Charleston, West Virginia, to inquire into the importance of the James River and Kanawha canal as a national work. Professor Anstead, of London, who is making examination of the coal and iron belts in that section, appeared before them to testify as to the mineral resources of the region he has been exploring. The professor gave a favorable opinion of the practicability of the route, and the importance of the mineral interests.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 29, 1873.

Stock Exchange and Money Market.

An active demand has been noted for Money during the week, especially for use at the Stock and Gold Exchanges, and the market has been, as a whole, comparatively firm for call loans on the basis of the legal rate of 7 per cent to the best class of borrowers. Some speculative wants of an urgent nature have been provided for at higher figures, in several instances as high as 7 per cent in gold, with in a number of cases, a fractional commission added. Toward the close the tendency was toward renewed ease, and the governing rates to responsible parties were 6@7 per cent. Mercantile requirements were reported as less pressing, and for the better grades of business paper a readier sale was noted, chiefly at from 12@15 per cent per annum. The advices from London were of a much more comfortable working of Money, with a lower range of rates on accommodation, particularly so outside of the Bank of England, which, it was confidently anticipated, would presently reduce its discount rate 1, if not 2 per cent, to harmonize with the marked improvement in the financial situation abroad. Our own banks have been augmenting their resources very encouragingly, and on Monday their reserve of legal tender notes was up to $34,270,000. On Saturday last the Bank Clearing House, quite unexpectedly, made an informal exhibit of the aggregate of the City Bank averages. While the total figures show a return to the 25 per cent basis of greenbacks and gold notes to deposits and circulation, the particulars of the condition of each bank in the association are not given to the public, as a considerable number of them are still borrowers at the Clearing House on relief certificates, amounting to about $19,000,000, or $7,000,000 less than the extreme relief granted to save certain prominent banks from going down. The figures, as given out, are as follows: Loans, $248,067,000; gold, $17,568,000; greenbacks, $30,899,000; deposits, $167,967,000; circulation, $27,299,000. On Saturday, September 13th, that immediately preceding the outbreak of the financial panic, the averages were as follows: Loans, $284,536,000; gold, $20,442,000; greenbacks, $36,717,000; deposits, $207,317,000; circulation, $27,383,000. The changes during the ten weeks of the panic are more notable, if we accept the informal reports of the minimums of deposits, $143,000,000, and of greenbanks, $5,700,000. The maximum of relief certificates was $26,000,000, of which four banks received more than one-half. The loans since Sept. 13 have fallen $36,000,000; and the deposits $40,000,000. The difference against the greenback average is still $5,800,000, and against the gold notes average, $2,900,000. The returns of Sept. 13 showed $1,516,000 deficiency in the required reserves, and the present returns a deficiency of $301,000. No very notable headway has been made in the discussion of the proposed banking reforms. Rather has the breach been widened as between the advocates and opponets of the reform propositions.

The U. S. Sub-Treasury, last week, enlarged its currency balance $2,033,973, and reduced its coin reserve $1,102,959. Its currency balance at the close of the week was $10,882,148; and its coin reserve $48,717,959.

Gold has been quite active, but less buoyant as to price. The speculative movement has derived less aid from the various and less warlike reports relative to the Cuban question. The improvement in the general financial situation has also been against the upward movement. The customs demand has been moderate, and the export drain limited. The extremes of the price have been 109⅛@110⅛, closing on Wednesday at 109⅛ as against 109¼ on Wednesday of the preceding week. The specie outflow, last week, was only $530,140. The imports of specie at this port last week, were $308,584, and since Jan. 1, have been $17,025,770 as against $5,877,282 same time last year.

The customs demand for Gold last week, averaged $283,500 a day. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $111,852,885, against $135,652,435 during the same time in 1872. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $61,660,503, against $71,711,319 during the same time in 1872. The export drain of specie since January 1, 1873, has been $45,977,998 against $07,926,070 during the same portion of 1872.

Foreign Exchange has been moderately active, and quoted firmer. Bankers' sixty day bills on London closed on Wednesday at 106¾@107¼; sight bills on London, at 108@108½. The week's exports of Domestic Produce have been to the currency value of over 6½ millions.

Government securities have been in fair request, chiefly on investment account, and the prices have been quoted stronger, closing buoyantly.

U. S. sixes of 1881 closed on Wednesday of this week at 114¾@115; U. S. Five-Twenties of 1862, 108¾@109¼; U. S. Five-Twenties of 1864 at 110@110¼; U. S. Five-Twenties of 1865 110@110½; U.S. Five-Twenties of 1865 consolidated 113¼@113⅝; U. S. Five-Twenties of 1867, 114¼@114¼; U. S. Five-Twenties of 1868, 114@114⅜; U. S. Ten-forties at 108@108½; U. S. Fives of 1881 (Funding Loan) 108⅝@109½; Six per cent. currency Sixes from 110@110¼.

Business in Railway and Miscellaneous securities has been quite active, at a further advance, though the later dealings indicated a tamer and less buoyant movement.

State and Railway bonds have been in moderate request, and held with more firmness. Central Pacific first mortgage six per cents closed at from 91½@92.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,226,063, as compared with $6,625,579 same week last year. The exports of domestic produce are $6,582,249, as against $5,799,772 last year. The exports of Gold and Silver, $530,410, as against $232,624 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,701,000, comparing with $2,114,000 same week last November.

The movements in domestic produce have been on a more extensive scale, having been quite brisk in Breadstuffs, Cotton and Provisions, prices, of which have shown more firmness. The Cotton movement of the week were large. The improvement of the fortnight in the market is reckoned at two cents the pound, or nearly $10 the bale, which on a crop of 4,000,000 bales would make a difference of 40 million dollars. The receipts of the week were 133,300 bales; the exports, 83,500 bales. The receipts are now gaining on last season. The difference against the present crop is now 150,800 bales, which will probably be overcome by the close of December. The supplies of Exchange for the week were, from the Cotton ports of the South, about $4,500,000, and from New York on domestic produce cleared, (including2 4,000 bales Cotton,) $7,600,000. Wool, Tobacco, Naval Stores, Petroleum, Hay and Seed have been moderately sought after at about former rates. Hides have been more active and quoted a trifle dearer. Leather, Oils, Hemp, and building Materials, quiet and more or less nominal in price. Groceries have been in better demand and held more confidently. Dry Goods have been much more freely dealt in, but at lower and unsettled prices. Live Stock have been depressed and quoted a fraction cheaper. In the Metal line trade has been comparatively dull at about previous figures, apart from the dealings in Ingot Copper, which have been extensive, carrying the price up to 22½@23 cts. for prompt delivery. Ocean freights have shown more animation, particularly toward the close, with, rates again favoring shipments.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Chicago and Northwestern consol. gold bonds, 82; Ohio and Miss. 7s, consol., S. F., 89; Canada Southern 1st mort., 58; Delaware and Hudson Canal reg. 7s, 1891, 100½; Central of New Jersey 1st mort. new, 101½; Lake Shore and Michigan Southern 7s, consol. reg., 91¾; do. coupon, 92; Michigan Central 7s, 93; New Jersey Southern 1st mort., 40½; Cleveland and Pittsburg 7s, consol., 89; Milwaukee and St. Paul 1st mort. R., 13@17½; George's Creek Coal, 100@130.

☞ Work on the Baltimore, Pittsburg and Chicago branch of the Baltimore and Ohio railway is going on vigorously, and the road will be opened as far as Deshler during the present month, thereby effecting a junction with the Dayton and Michigan road.

☞ The seven per cent gold coupons of the bonds of the Southern Maryland Railroad Company, due December 1, 1873, will be paid on that day at the office of the company in Washington.

Monadnock Railroad.

At the annual meeting of the stockholders of this company, held at Peterborough on the 18th inst., the following gentlemen were elected directors for the ensuing year: Jonas Livingston, J. H. Fairbanks, P. Upton, J. H. Bradley, H. K. French, Willis Phelps and H. A. Blood. Hon. Jonas Livingston was chosen President and C. A. Parks Clerk and Treasurer. The directors submitted their annual report, which was accepted, from which it appears that the income for the year ending September 30, 1873, from all sources has been $32,843 90, the expenditures $21,117 36, leaving a surplus above operating expenses of $11,726 54. Interest paid during the year $8,689 66. The debt of the road at this date is $124,575, which is $26,000 less than last year. The directors, in closing their report, express their confidence in the ultimate dividend paying ability of the road, and also their assurance that the extension at no distant day to Hillsborough Bridge will make this a trunk north and south line.

☞ The Philadelphia *Ledger* of the 19th inst., says that at the Baldwin Locomotive Works, Broad and Hamilton streets, there are 1360 men employed at full wages. This is about half the number usually employed by this firm. During the past month 29 locomotives have been ordered of this firm from Canada and other foreign places. There is sufficient work ordered to keep the present number of men employed for two months, but there is not so much doing for American Railroads as is customary at this time of year. The firm are encouraged, and hope that before many weeks they will be able to employ their complement of hands.

☞ In the account of the organization of the Norfolk and Bristol Railroad, published in our last issue, the names of three of the directors were omitted. The following is the full list: Joseph W. Clark and Edward Stimson of Dedham; George H. Morrill of Norwood; F. W. Bird, J. G. Hartshorn and H. W. Tilton of Walpole; James Pollard of Norfolk; Thomas Proctor, A. W. Harris and James Bacon of Wrentham; H. N. Daggett, H. F. Barrows and Felix G. Whitney of Attleboro'.

☞ The Berea Street Railroad Company, of Berea, Cuyahoga county, Ohio, has been incorporated with a capital stock of $15,000, in shares of $50 each. The corporators are Samuel Hittel, George Nokes, M. McDermott, Joseph Nichols, E. J. Kennedy, T. C. Mattison, E. F. Benedict and A. J. Campbell.

☞ The European and North American Railway Company has a surveying party at work on the line of the proposed extension of the Piscataquis branch from Guilford to Monson, and it is said to be the intention of the corporation to build the extension as soon as possible.

☞ The construction of the Kansas City, Burlington and Santa Fe Railroad is to be immediately commenced.

☞ The first passenger train over the southern extension of the Wellington, Grey and Bruce Railway arrived at Kincardine on the 12th inst.

☞ The grading of the Lewiston and Auburn (Me.) Railroad is nearly done.

☞ The gross earnings of the Cheshire Railroad for the year ending September 30, 1873, were $845,807 43, a gain of $21,044 09 over last year. The expenses were $661,511 63 and $41,751 44 was paid for interest, leaving a balance of $142,544 36. The number of miles run by passenger trains was 139,408 and by freight trains 507,430. The number of passengers carried one mile was 6,325,541, a decrease of 265,345 from last year. The number of tons of freight carried one mile was 25,256,105, an increase over last year of 2,346,516.

☞ The Toronto, Grey and Bruce Railway was opened to Harriston on the 15th inst., the first train having arrived at the village that day. This branch makes a connection with the Wellington, Grey and Bruce Railway.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, December 6, 1873.

Old Colony Railroad.

The annual meeting of this corporation was held in Boston on the 25th ult., Hon. Onslow Stearns, the President, in the chair. The action of the directors in purchasing the Middleborough and Taunton road was endorsed by a vote, and they were authorized to take such steps as they deemed proper to secure a consolidation of the two corporations.

Attention was called to the debt of the company, which is about three and a half million dollars, and the directors feel that it is cheaper for the corporation to pay interest than to pay off the debt, and they propose, as the bonds become due, to refund. It was therefore

Voted, That the directors issue registered or coupon bonds to an amount not exceeding the existing debt of the company, payable not more than twenty years from date, with interest not exceeding seven per cent per annum for the purpose of funding the bonded and floating debt.

The directors were also authorized to purchase a controlling interest in the stock of the Fall River, Warren and Providence Railroad Company, or to purchase the railroad of said company, and in connection with the Boston and Providence Railroad Company, to establish a thorough line of railroad between Fall River and Providence.

The following were elected directors for the ensuing year:—Onslow Stearns, Uriel Crocker, Benjamin Finch, Oliver Ames, Charles F. Choate, Samuel L. Crocker, Jacob H. Loud, Richard Borden, Royal W. Turner, Francis B. Hayes, Ephraim N. Winslow, John S. Brayton, Prince S. Crowell.

Wilmington, Columbia and Augusta R. R.

The third annual meeting of the stockholders of the Wilmington, Columbia and Augusta Railroad Company was held in Wilmington, N. C., on the 19th ult. The meeting was organized by calling Hon. R. R. Bridgers to the Chair, and appointing Mr. John W. Thompson Secretary. A large majority of the stock being present, the meeting was declared to be duly organized. The President made an extended report of the condition and operations of the road, and of the Wilmington and Weldon Railroad, of which this company is the lessee, covering the reports of the Superintendent, and Secretary and Treasurer of both roads. We collate the following interesting facts:

Gross earnings....		$1,461,701 85
Operating expenses		896,245 28
Showing net earnings		$565,456 57
Out of which has been paid the coupons on bonded debts of both companies and interest on floating debt, amounting to...	$396,889 86	
On rental of 5 per cent on $1,452,300, Capital stock of the W. & W. R. R. Co....	72,615 00

On motion, the meeting proceeded to elect a President and seven Directors, which resulted in the election of R. R. Bridgers as President, and the following Directors: W. T. Walters, W. H. Graham, S. M. Shoemaker, J. D. Cameron, L. D. Childs, B. F. Newcomer and George S. Brown. The meeting then adjourned.

☞ Six miles of the Levis and Kennebec Railway track have been laid, leaving four miles unfinished. It is expected the first section—from Levis to St. Mary's—will be opened for traffic during next season.

Poughkeepsie Bridge Company.

At a special meeting of the directors of this company, held at 57 Broadway, this city, on the 25th ult., Mr. J. H. Linville, President of the Keystone Bridge Company of Pennsylvania, was appointed Chief Engineer, and Mr. J. Edgar Thomson Consulting Engineer. The line of the land approaches, as set forth in the maps and plans made by Messrs. J. H. Linville and P. P. Dickinson, and others, were accepted and ordered to be filed in the office of the State Engineer and Surveyor at Albany, and in the office of the County Clerks of Dutchess and Ulster Counties. According to these plans, the bridge itself will extend from a point on the west side of the river 350 feet from the ferry landing, and extend across at right angles to the channel, to a point on the Poughkeepsie side, between the ferry-house and Shatemuc Boat Club-house. Four piers will be built in the river, each to be 500 feet apart, according to the provisions of the charter, and one on the shore on each side, just at the bottom of the bluff. These piers will be of granite founded on the bed-rock, and will be carried up to the height of 130 feet above the surface of the river at high-water mark. On these will rest the heavy iron and steel trusses, each 500 feet long and between 60 and 70 feet in height, the railroad track being on the top chord, or nearly 200 feet above the water-line. The line of approach on the Poughkeepsie side will leave the river at the point as above mentioned and cross the top of Reynolds Hill, where a smaller pier will be placed; thence it will run in nearly a straight line, crossing Dutchess avenue and Albany street at the south corner of the same. Delafield street at a point midway between Luther Etling's house and Parker street. Tallmadge street half way between Hoffman and Duane streets, passing over the barn of the south line of the old Gager place, now owned by Messrs. Buckingham, and crossing Washington street from the north-west corner of Gifford avenue to the south-east corner of Parker avenue, or North street. All these streets will go under the track, which will be about twenty feet above the grade of Washington street at the point of the crossing. In fact, the line west of Washington street will be a continuation of the bridge itself on shorter spans. East of Washington street an embankment will take its place. From Washington street the line continues across the Fullhill at the crossing

of Baldwin avenue, or where Baldwin avenue would cross if it were put through. It passes under the grade of Garden street just south of Zimmer avenue, and thence crossing the creek again, leads to the junction of the Poughkeepsie and Eastern Railroad at Hamilton street. It is under contemplation to make a depot at either Washington or Garden street for the convenience of Poughkeepsie passengers.

The directors directed the engineer to commence the work of construction at once. The company will undertake the construction of the shore piers under the supervision of Mr. P. P. Dickinson. Work on these piers is ordered to be pushed forward with vigor, so that the cornerstone may be laid with appropriate ceremonies on or about the 20th of December next, on which occasion the Governor has been invited to attend.

The capital of the company as authorized by the charter, is $2,000,000. Of this sum $1,250,000 has already been subscribed. The balance will, it is said, be made up among the friends of the Pennsylvania Railroad Company, the Philadelphia and Reading Railroad Company, the Poughkeepsie and Eastern Railroad Company, and, possibly, the Erie Railroad. All these companies, with the exception of Erie, are now stockholders in this new undertaking, and it is confidently expected that the Erie Road will come in. The cost of the bridge will be from $4,000,000 to $5,000,000. The directors are A.L. Dennis, President; George Innis, G. P. Pelton, H. G. Eastman, P. P. Dickinson, Thomas A. Scott, J. Edgar Thomson, J. P. McCandless, Mr. Kneass, Charles G. Francklyn, and D. Salomons.

The Creosoting Process for Preserving Wood, Timber, &c.

At the rate we have been denuding our forests of timber for the past 50 years, another 50 years will find us with a scarcity something like it is in England at the present time. Already the inroads among the pine forests have been so serious as to cause a remarkable appreciation of pine lands as well as pine lumber, and the end is not yet. It is high time some mothod was adopted to lengthen the life of our timber which we use so lavishly for fencing, paving, piling, railroad ties, &c. We hail, therefore, with satisfaction, the advent of a wood preserving process, under the guarantee of scientific testimony and the prestige of a strong corporation who control the patent therefor in this country. When we consider the first cost alone of the timber required yearly for our fences and posts, which require to be renewed in from five to fifteen years, of railroad ties, telegraph poles and the like, which require renewal on an average of five years; of piles, cribs, and bridge timbers, some of which have to be renewed every three years, the ever increasing wooden pavements, we must appreciate the value and importance of a process whereby the durability of these forms of wood is multiplied five or ten times. Scarcely a railroad in the country but is seeking to reduce the cost of its working expense, of which wooden ties and structure form a large part. The cost of transportation, laying down, taking up and relaying, form a large item of expense which might be largely avoided by use of more permanent material at the outset. The English roads, it appears from the reports of competent and trustworthy engineers, have long made use of the creosoted timber, and with results so satisfactory as to engage the attention of the most eminent railroad officers in this country.

From the advertisement, published elsewhere in this issue, of the American Wood Carbolizing Company, it will be seen that they are ready for practical operations and for the sale of the right to use their process. The names of the officers of the company, as well as those of their references, are of the highest respectability. Parties interested in this subject will do well to look at their announcement, and examine the documents to which they refer, which may be had at the company's office, 59 Liberty street.

Old Colony Railroad.

The earnings of this road for the years ending September 30, 1872 and 1873 were as follows:

	1872.	1873.
From passengers	$1,141,832 43	$1,431,707 76

Dividend 18 on Cape Cod stock	1,256 50	
Deduct dividend July 1, 1873, $3.50 per share.	227,346 00	
		448,259 00
Balance of income account September 30, 1873		$611,502 21

The dividend of Jan. 1, 1874, is to be taken in part from this balance.

The gross receipts of the road were, for the year ending Sept. 30, 1873	$1,877,251 82	
For the year ending Sept. 30, 1872, including the income from the Cape Cod R. R.	2,219,236 47	
Increase in receipts		$158,015 35
The working-expenses for the year ending Sept. 30, 1873	$1,576,015 59	
For the year ending Sept. 30, 1872, including the expenses of the Cape Cod R. R.	1,437,904 15	
Increase in working expenses		$138,111 44
The amount paid for interest was, for the year ending Sept. 30, 1873	$233,433 16	
For the year ending Sept. 30, 1872, including interest paid on Cape Cod R. R.	223,906 55	
Increase		$9,526 61
Amount paid for taxes was, for the year ending Sept. 30, 1873	$89,197 44	
For the year ending Sept. 30, 1872, including taxes on Cape Cod R.R.	78,936 46	
Increase		$10,260 98
The net earnings, after paying interest and taxes, were, for the year ending Sept. 30, 1873	$478,605 63	
For the year ending Sept. 30, 1872, including the earnings on Cape Cod R. R.	492,984 54	
Decrease		$14,378 91

The increase from passengers was $69,129 49; the increase in number of passengers carried was 259,078.

The increase of receipts from freight was $51,340 34. The increase of tons carried was 39,670.

The increase from local passengers of the Old Colony division has been $85,997 26, and from local freight receipts $47,005 59. We have no means of comparing the local business of the Cape division with former years. There has been some falling off in the receipts from connecting lines.

Two new locomotives, five passenger cars, thirty-eight freight-cars, and two coal-cars, have been added to the rolling-stock.

Two locomotives, eight passenger-cars, one baggage-car, thirty-five freight-cars, and fifty-two gravel and coal cars have been rebuilt.

About 1,000 tons of new iron rails, and 40,634 new sleepers, have been used in repairing the track; and 2,625 tons of rail have been taken up, repaired, and relaid.

All the above additions, renewals, and repairs have been charged to expense account, and paid for out of our earnings the past year.

The road, equipment, and property have been kept up, and are in good working condition.

In addition to the above new rolling-stock, there have been added to the equipment 2 new locomotives, 4 passenger-cars, 51 freight-cars, and 200 coal-cars, at an expenditure of $148,000 00, which has been carried to construction account; making in all 4 new locomotives, 291 freight cars, and 9 passenger-cars, added to the equipment the past year, exclusive of the equipment of the Cape Cod Railroad, consisting of 10 locomotives, 25 passenger cars, 8 baggage cars, 54 long box cars, 11 short box-cars, 29 long platform-cars, 8 cattle-cars, and 73 coal and gravel cars.

The Westinghouse brake is now used on 16 locomotives and 70 cars.

The Union with the Cape Cod Railroad was finally completed Sept. 30, 1872; and the foregoing accounts of our business for the past year include the earnings and expenses of that portion of the road. To compare the business of this year with that of 1872, a statement is here given, showing the gross earnings, working expenses, and income of the two companies for 1872:

Earnings (including Cape Cod Railroad) for the year ending Sept. 30, 1873		$2,377,251 82
Expenses (including Cape Cod Railroad) for the year ending Sept. 30, 1873		1,576,015 59
		$801,236 23
Earnings of the Old Colony Railroad for the year ending Sept. 30, 1872	$1,897,438 09	
Earnings of the Cape Railroad for the year ending Sept. 30, 1872.	321,798 38	
	$2,219,236 47	
Expenses of the Old Colony Railroad for the year ending Sept. 30, 1872	$1,202,743 32	
Expenses of the Cape Cod Railroad for the year ending Sept. 30, 1872	235,160 83	
	$1,437,904 15	781,332 32
Increase in earnings		$19,903 91

This shows an increase in earnings of $158,015 35; of working expenses, $138,111 44; and in net earnings, of $19,903 91; thus showing that the slight apparent decrease in our net earnings for the year is caused by an increase in our interest account, and the heavy addition made to our taxes.

Our business was, like that of other companies, materially reduced during the fall and winter months by the Boston fire; and subsequently

the passenger business was affected by the continued presence of small pox in Boston.

It will also be seen that the amount charged for expense of removing snow and ice is large, $5,610 04. This is but a small part of the actual expense to the company, arising from extra wear and tear of tracks and equipment, caused by the severity of the last winter.

The increase in expenses is accounted for, in part, as follows:

The mileage of our trains has increased 33,115 miles. This increase, and the addition of 62 cents per ton paid on our coal, has added to our expenditures, for coal alone, $35,000 for the year. We have also made and charged to expense account large additions to and improvements of the property of the company.

Among other items so charged is for increase of equipment	$80 802 97
For additional new stations	23,514 62
On account of new stations at Campello, North Bridgewater, and South Dennis, to replace others	9,493 28
For 29,539 feet of new side-track, costing, with the necessary grading, not less than	40,000 00

The amount expended upon repairs of passenger cars and locomotives has also been large, exceeding the expense of last year (including the sums so expended by the Cape Cod Railroad Company) about $46,000. The computed expense per train mile run is $1.22 against $1.14 last year.

The results of the purchase of the Cape Cod Railroad have been as satisfactory as was expected. Its cost, including the completion of the Woods Hole Railroad and the extension to Provincetown, has somewhat exceeded the estimates; being, in all, about $2,100,000. The business shows a fair increase during the past year, and indicates a growing tendency in the community to occupy the lands of the Cape for summer resorts, for which they are so excellently adapted.

The road has been extended to Provincetown, about sixteen miles, in conformity with the contracts made by the Cape Cod Railroad Company before the union, at a cost of $304,423 80—estimated cost of completion, $27,513. This portion of the railroad was opened to public travel in July; and while it has not yet affected, to any great extent, the earnings of the company, it is hoped that it will ultimately form a valuable addition to our property. The cost has been met by the issue of new stock, of which the town of Provincetown has taken 726 shares at $135 per share; and 2,000 shares were sold at auction, from which the sum of $221,731 25 was realized.

The Woods Hole and Shawmut Branches have been completed, and are now in good and efficient condition.

The Granite Branch, which is ultimately to be extended to a connection with the main line at Braintree, has been extended to the gravel-pits owned by the company in West Quincy; and we are now able to meet the demand for sand and gravel, from the transportation and sale of which we have derived some profit during the past year.

Some work has been done in the construction of a third track between Boston and Quincy, which, when completed, will enable us to do more promptly and efficiently the growing business of this part of our road. An act of the legislature was obtained at the last session, authorizing the widening of the bridge over Fort Point Channel for a third track; and it is intended to proceed with the work.

The increase in our coal-traffic has made it necessary to increase our wharf accommodations at Somerset. Additional wharves, with coal-pockets, and machinery for discharging, have been constructed, at an expense of $34,020 14; which will give reasonable accommodations to this branch of business for some years to come.

About 5½ miles of additional side-track have been laid at various points where it seemed most needed.

Additional tracks and connections have been laid at Weir Junction in Taunton, to facilitate the exchange of business with the New Bedford Railroad. This, being our most available connection with the West, is a point of increasing importance.

New depots have been built, or are now in process of construction, at Newport, South Dennis, South Middleborough, Campello, North Bridgewater, and North Plymouth.

It will be seen from the foregoing account, that the past year has been a reasonably successful one in the affairs of the company. A dividend of 7 per cent on the capital stock has been fairly earned, and $30,846 63 added to our reserve; and, in addition to this, improvements have been made to the property of the company, which will enable us to do an increased business without greatly increasing our future expenses.

The directors have considered that the interests of the company would be served by acquiring the Middleborough and Taunton Railroad, and have accordingly entered into contracts for its purchase. This railroad, forming a connecting link between the different branches of our line, and a direct line between the Cape division and the West, is valuable to us, and would be at all times a source of discomfort in the hands of any rival line. As it was necessary to avail themselves of the opportunity offered, without delay, they deemed it wise to make the purchase, and now ask the approval of stockholders.

During the past year, surveys have been made for the construction of the new bridge at Fall River, as authorized by the legislature and by vote of the stockholders. The Fall River, Warren, and Providence Railroad, which by law has the right to acquire a part ownership and control of this bridge, having passed under the control of the Boston and Providence Railroad Company, the directors have decided not to proceed further in this enterprise without obtaining some avenue between Fall River and Providence; and for this they ask the approval of the stockholders.

The bonds of the company, falling due in 1874, 1875, 1876, and 1877, to the amount of nearly $3,000,000, should be funded in a new twenty-years' loan; and it may be expedient to pass the requisite votes at the next meeting of the stockholders, giving the directors power to issue bonds, coupon or registered, to take advantage of any favorable opportunity for this purpose.

Our connection with the boat-lines has been reasonably satisfactory during the past year; still some further provision is needed, by which a more intimate and close connection with the boat-lines in Vineyard Sound may be established. This business is important and should be encouraged.

Our connection with New York by steamboats is very important, although the business has diminished during the past few years. Our contract with the Narragansett Steamship Company will expire in about three years, when the line may be discontinued, unless some new arrangement is made. It is for the stockholders to consider whether it would not be for the interest of the company to control a steamboat line to New York.

A claim for considerable amount for damage by fire in the woods in Wareham, Carver, and Plymouth, has been presented.

While we are running more trains than the immediate business demands, the directors believe this to be the best policy in developing the territory upon which our prosperity must depend. If, however, the present depression in business decreases our earnings, as now is threatened, we shall be compelled to reduce our expenses by temporarily diminishing our train service.

As required by vote of the stockholders last year, a map is annexed, showing the various lines owned and operated by the company indicated by the heavy black line. The South Shore, Middleborough and Taunton, and Dorchester and Milton Branch Railroads, are owned by independent corporations, in which this company is the chief owner of stock.

The equipment of the road is as follows: 38 passenger, 15 freight, and 6 switching locomotives; 129 passenger, 24 baggage, 281 long box, 11 short box, 829 long platform, 19 cattle, 72 stone, 12 short platform and 144 coal and gravel cars. Number of miles run by passenger trains, 880,528; by freight trains, 396,972; by gravel trains, etc., 76,974—total miles run one year to September 30, 1873, 1,354,474, an increase over the year ending Sept. 30, 1872, of 33,115. Number of passengers carried the past year, 4,256,840; do. carried one mile, 61,090,330. Tons of merchandise carried the past year, 625,251; do., carried one mile, 16,205,933.

Superintendent.—J. R. KENDRICK.

☞ A plan for a new line of railroad from Montreal to Portland and Boston has been perfected. The Eastern Railroad Company will control the line, and will guarantee a proportion of the business to the Portland and Ogdensburg Road. The Portland and Ogdensburg Company will push the work of completing their road in New Hampshire and Vermont so as to be ready or business in a few months. The section connecting thence with Montreal will also be constructed as soon as possible.

☞ The financial agents of the Logansport, Crawfordsville and Southwestern Railroad Company of Indiana, have issued a circular to the holders of the mortgage bonds of that road, announcing that the interest coupons, which matured on the 1st November, ult., for payment of which the company is in default, will be paid on the 1st of February next, together with other coupons which will mature at that time.

☞ The work on the railroad from Fredericton (N. B.) to Riviere du Loup is making good progress. It is stated that connection will be made with Woodstock by Christmas.

American Iron and Steel Association.

The annual meeting of the American Iron and Steel Association was held in Philadelphia on the 20th ult., Mr. Samuel J. Reeves in the chair. The Secretary, Mr. James M. Swank, presented the annual statistical report, from which the following facts and figures are taken:

The high prices for iron of all descriptions which had prevailed in the United States in 1872 gradually declined during the latter part of that year, and this decline, with some effort at a rally in January, continued during 1873. It was not sufficient, however, to restrict production, jeopardize the interests of producers, or compel a reduction of wages. The causes of the decline may be found, first, in the natural tendency of high prices to restrict consumption, and thus bring about sharper competition; and, second, in the forced subsidence at the close of 1872 of the fever for building Western railroads. Owing to these combined causes the demand for rails and other railway material fell off greatly at the close of 1872, while in some other branches of business, usually requiring large supplies of iron, consumption was considerably curtailed at the same period. This condition of business—restricted consumption and gradually declining prices, with foreign competition still existing and a tendency in some iron districts to accumulate stocks of pig iron—prevailed on the 18th of September, when the present financial crisis commenced by the suspension of a leading banking house largely interested in railroad securities. This crisis has deranged the whole business of the country. The prices of iron have still further declined, reaching in some lines of the trade to a point far below the cost of production. The blow has been severely felt. At the beginning of November the quoted prices of raw and manufactured iron were almost as low as at the beginning of 1871, before the rise commenced; the price of rails was fully as low; while the demand for iron for railroad construction, cars, car wheels, locomotives, iron railroad bridges, and every branch of manufactures dependent upon railroad patronage, had almost ceased. At the date mentioned, the prices asked for four leading articles of American iron manufacture were as follows: Bessemer rails at mill, $110; iron rails at mill, $68; No. 1 anthracite pig iron, at Philadelphia $36; merchant bars, at Pittsburg, three cents. From cash buyers even lower rates than these would readily have been accepted. English iron rails were sold at New York at $60, gold. On the 17th of September, the day before the occurrence of the crisis, the above mentioned articles were quoted as follows: American Bessemer rails, $120; iron rails, $75; No. 1 pig iron, at Philadelphia, $42; merchant bars, at Pittsburg, 3½ cents; English iron rails at New York, $65, gold. The average decline since September has been fully 15 per cent., with few sales transpiring, and they mostly in small lots for immediate use.

At the beginning of November many blast furnaces, bar mills, and rail mills were idle. After a careful survey of the whole field we are satisfied that fully one-third of our furnaces were then out of blast, and that by the close of the month one-half of all the furnaces will be blown out. Stocks of pig iron are accumulating in many districts, for which there is no sale at any price. Most of the bar and rail mills that are now running are working on short time. Rail mills especially are bare of orders, with no immediate prospect of a change for the better. The plate mills are more favored. Thousands of iron-workers at the beginning of winter are out of employment, while a large proportion of those who are yet employed have accepted a reduction of wages averaging 15 per cent. The mining of iron ore has sympathized with the prostration of the iron trade.

The aggregate value of our importations of iron and steel, and manufactures thereof, during the twelve months which ended on the 30th of June last was fifty-nine millions of dollars. These importations have done immense harm to the home trade and an increase of the duty on pig iron from $6 30 to $9 a ton is advocated.

In relation to the present condition of the British iron trade, it is stated that our financial difficulties add another to the many advantages possessed by British iron masters for manufacturing cheap iron. The reduction of wages, and the stoppage of many of our iron works, will operate as a check to the emigration of miners and iron-workers from England, Scotland and Wales, and will to this extent enable British iron masters and colliery owners to reduce the wages of their workmen. The British iron trade continues as bold and energetic and will probably be as aggressive in the future as it has been in the past.

PRODUCTION OF PIG IRON.

The production of pig iron in the United States in the year 1872 was 2,830,070 net tons, or 2,526,848 gross tons. This quantity was produced in twenty-one States. The ascertained production during the first six months of 1873 was 1,393,075 net tons, and the estimated production for the whole of the year 1873 is 2,695,434 net tons, or 2,406,637 gross tons. The number of States which made pig iron this year was twenty-two—Maine having re-entered the list after a long rest. The excess of production in 1872 over the estimated production of 1873 is 134,636 net tons. If the financial crisis had not occurred the production of 1873 would have exceeded 3,000,000 net tons. The estimated annual capacity of all the furnaces in the United States is 4,371,277 net tons.

The total number of furnaces in the United States, exclusive of abandoned and projected furnaces, is 636. The total number of new furnaces finished and put in blast in 1872 was forty-one; finished and put in blast in 1873, forty-two; total number of new furnaces put in blast in the last two years, eighty-three. Many of these are among the largest in the country. By the erection of these eighty-three furnaces, the furnace capacity of the country has been increased fully one-fourth.

A number of new furnaces built since the last report are described with some minuteness; among them that of the Lackawanna Iron and Coal Company, at Scranton; the Lucy Furnace of Kiloman & Carnegie, the Soho Furnace near Pittsburg, and others.

PRODUCTION OF RAILS IN THE UNITED STATES.

The total number of net tons of iron and steel rails made in the United States in 1872, as reported to this office by the makers, is 941,992, or 841,064 gross tons. This aggregate was produced in sixteen States. Pennsylvania made 419,529 tons, or 44½ per cent of the whole. Ohio comes second in the list, taking the place which Illinois held in 1871. Illinois is the third State in the list, and New York the fourth. In the production of steel rails, the relative position of these four great iron producing States is almost the same—Pennsylvania producing 38,463 tons; Ohio, 22,000 tons; Illinois, 15 930 tons. No other States made Bessemer rails in 1872.

This aggregate of production includes only such rails as are made for the use of freight and passenger railways, and excludes an ascertained production of 15,000 tons of street rails, and all mining rails made during the year. Adding these to the above aggregate, the total production of rails of all sorts in the United States in 1872 was undoubted y one million net tons.

The production of rails in the United States in 1871 was 775,733 net tons; in 1872 it was 941,992 tons. Increase, 166,259 tons, or 21½ per cent. The importation of foreign rails in 1871 was 566,202 net tons; in 1872 it was 530,850 tons. Decrease, 35,352 tons, or 6¼ per cent. The net gain of the American railmaker in 1872 over his foreign rival was therefore 201,611 net tons.

Of the total production of 941,992 net tons of rails in 1872, 94,070 tons were Bessemer steel rails. In 1871 there were produced 60,042 net tons of steel and steel-headed rails. Increase, 34,028 tons, or 56⅔ per cent. Of the 530,850 net tons of rails imported in 1872, 149,786 tons were steel rails.

The total consumption of iron and steel rails in 1871 was 1,341,985 net tons; in 1872 it was 1,472,842 tons. Increase, 130,907 tons. This increased consumption was more than equalled by the increased production of American mills, which was 166,259 tons, as above stated.

During the year 1871 the export from the United States of American railroad bars and rails was 306 net tons; during 1872 the export was 1,296 tons. Increase, 3.23 per cent.

England will send us this year about 150,000 tons of rails, but it is exceedingly probable that there will be just this quantity of rails on hand and unsold in the country on the 31st day of December next, with many American mills standing idle the whole or part of the year. The American make during the year will be about 850,000 net tons (less than last year), of which about 120,000 tons will be Bessemer rails.

PRODUCTION OF ROLLED AND FORGED IRON.

An estimate of the production in 1872 and 1873 of the merchant bar mills, plate mills, and other rolling mills, exclusive of rail mills, can be made with some approach to accuracy. Observing the classification heretofore in use, the following figures are submitted for 1872 and 1873, in tons of 2,000 pounds:

	1872.	1873.
Merchant bar and rod	500,000	400,000
Sheet and plate	200,000	250,000
Hoop	80,000	80,000
Nails and spikes	175,000	200,000
Axles, etc	95,000	100,000
Total net tons	1,000,000	980,000
Add iron and steel rails	941,992	850,000
Total rolled iron, net tons	1,941,992	1,880,000

The estimated production in 1871 of rolled iron other than rails was given by this office at 710,000 net tons.

The product of the forges and bloomaries of the country, strictly so-called, is estimated at 58,000 net tons in 1872, and 50,000 tons in 1873.

PRODUCTION OF STEEL.

There were produced in the United States in 1872 about 32,000 net tons of cast steel, and in 1873 there will be produced about 28,000 tons. In 1871 there were converted 45,000 net tons of Bessemer steel; in 1872, 110,500 tons, and 1873 it is estimated that there will be converted 140,000 tons. About 85 per cent of the Bessemer steel that is now converted in American works passes into rails.

The total quantity of pig metal converted in this country by the pneumatic process in the year 1872 was 125,361 gross tons. During the first nine months of 1873 the total quantity converted was 127,384 tons.

The total annual capacity of the eight Bessemer works now in operation is about 170,000 net tons of rails, to which add Edgar Thomson and new plant of Pennsylvania Steel Works, and the total capacity of the Bessemer works of the United States at the close of 1874 may be placed at 222,000 net tons of rails.

SUMMARY OF IRON AND STEEL PRODUCTION.

Below is a summary in net tons, of the ascertained and estimated production of iron and steel in the United States in 1872 and 1873:

	1872.	1873.
Iron and steel rails	941,992	850,000
Other rolled and hammered iron	1,000,000	98,000
Forges and bloomaries	58.000	50,000
Cast steel	32,000	28,000
Bessemer steel	110,500	140,000
Siemens-Martin steel	3,000	3,500
Pig iron	2,830,070	2,695,434

RAILROAD CONSTRUCTION.

We estimate the mileage of new track for the year 1873 at only 3,000 miles, a decrease since last year of more than fifty per cent. The year 1871 witnessed the culmination of railroad construction in this country. The number of miles built in that year was 7,779. The reaction com-

menced in 1872, when 6,427 miles were built. The total railroad construction of 1874 is estimated at 8,000 miles, the same mileage as the estimate for 1873.

Appended to the report is a lengthy summary of the iron and coal statistics of Great Britain, Spain and Algeria.

The following table shows, in tons of 2,000 pounds, the production of the various kinds of pig iron in the United States, from 1854 to 1873, inclusive:

Year.	Anth'cite.	Charcoal.	Bitu'nous Coal & Coke	Total.
1854.	339,435	342,298	54,485	736,218
1855.	381,866	339,922	62,390	784,178
1856.	443,113	370,470	69,554	883,137
1857.	390,385	330,321	77,451	798,157
1858.	361,480	285,313	58,351	705,094
1859.	471,745	284,041	84,841	840,627
1860.	519,211	278,231	122,228	919,770
1861.	409,229	195,278	127,037	731,544
1862.	470,315	186,660	130,687	787,662
1863.	577,638	212,005	157,961	947,604
1864.	684,018	241,853	210,125	1,135,996
1865.	479,558	262,342	189,682	931,582
1866.	749,367	332,580	268,396	1,350,343
1867.	798,638	344,341	348,647	1,461,626
1868.	893,000	370,000	340,000	1,603,000
1869.	971,150	392,150	553,841	1,916,641
1870.	930,000	365,000	570,000	1,865,000
1871.	956,603	385,000	570,000	1,912,608
1872.	1,369,812	*500,587	†959,671	2,830,070
1873.	1,249,673	§524,127	¶921,634	2,695,434

* Includes 224 tons of peat pig iron.

† Includes 27,246 tons of mixed anthracite and coke pig iron.

§ Includes 1,600 tons of mixed peat and charcoal pig iron, and 1,778 tons of mixed charcoal and bituminous coal pig iron.

¶ Includes 48,000 tons of mixed anthracite and coke pig iron.

The report of the Treasurer, Mr. Charles Wheeler, was read. It shows a very satisfactory financial condition, the association having a balance of $11,256 13 to its credit.

The following officers were elected for the ensuing year; President, S. J. Reeves; Vice Presidents, A. S. Hewitt, E. B. Ward, S. M. Felton, James I. Bennett and James Park, Jr.; Treasurer, Charles Wheeler; Secretary, James M. Swank.

On motion of Mr. Park, the clause relating to membership assessments in Art. IV of the Constitution was amended as follows: "Upon Bessemer steel, 2 cents per ton of 2 000 pounds; upon other steel, 2½ cents per ton."

Mr. James I. Bennett, from the committee on resolutions, made the following report, which was unanimously adopted:

Resolved, That this association attributes the general prosperity of the iron trade of the country, which has characterized the past year and previous years, to the tariff policy of the Government, which has fostered home industry, and enabled many branches of manufactures to obtain a position rendering them independent of foreign rivalry.

Resolved, That the manufacturers of iron and steel in the United States do not regard themselves as in any way responsible for the present embarrassment of their industry, which they have conducted with care and economy, and they are assured that the adoption by Congress of a financial system adequate to the largely increased and increasing business needs of the country will enable them not only to supply all demands for home consumption, but also to rival older nations in the markets of the world.

Resolved, That the horizontal reduction of ten per cent of duties made by the second section of the Act of Congress of June 6th, 1872, was unwise and uncalled for, and that it has been detrimental to the revenues of the Government, and should be repealed.

Resolved, That Congress should revise the national banking system, removing the monopoly enjoyed by existing national banks, prohibiting them from paying interest on demand deposits, and making other wholesome regulations for their government, and should devise other means for affording an adequate supply of currency, and for giving it requisite flexibility.

Resolved, That the laws regulating customs duties should have equal and uniform construction and application at all the ports of the United States, and the contrary practice which now prevails should be corrected by the Secretary of the Treasury or by Congress.

Resolved, That the rapid and healthful growth of iron shipbuilding in this country has demonstrated the beneficial influences of the registry laws of the United States, and that under their protection American shipbuilders will be enabled, through the improvement and development of our manufactures of iron, to take possession of the carrying trade of the country, foreign as well as inland, thus adding greatly to the prosperity of the nation in peace, and to its strength and resources in time of war. We believe that free trade in ships would check this wholesome progress, would be detrimental to American labor, and injurious to the best interests of the country.

Resolved, That we regard the power given to a single creditor, under the present bankrupt law, to force a debtor into bankruptcy, against the will and to the injury of all others having claims upon the estate, as unjust in principle and disastrous in practice, and in the opinion of this association the law should be so amended as to give to three-fourths of the creditors in interest the right to control the settlement of the affairs of an insolvent, and to prevent them from being subjected to proceedings in bankruptcy.

Resolved, That this association has learned with great satisfaction that the members of the Iron and Steel Institute of Great Britain propose to visit this country next year, for the purpose of ascertaining the extent and progress of the iron and steel industries of the United States, and that the members of this association will extend to them a hearty welcome, and will take pleasure in showing them their several works, and in otherwise aiding them to accomplish the object of their visit.

Resolved, That the acceptance by the executive committee of the trust delegated to this association, by the executive committee of the United States Centennial Commission, of making an adequate representative collection of the iron ores of the United States for display at the International exhibition of 1876 is hereby approved; and recognizing the importance and difficulty of the work, the association asks the active co-operation of all manufacturers of iron and steel and producers of iron ores, and it further invites assistance in the collection of samples of all the fuels, fluxes and refactory materials used in the iron trade or likely to be of use to it.

Mr. Bennett moved that when this association adjourns, it shall adjourn to meet in Philadelphia on the first Wednesday in February, 1874, and that the other iron associations be requested through their secretaries to meet with us in joint convention on the following day. The motion was adopted, and the association adjourned.

☞ The directors of the Connecticut Western Railroad Company, in their annual report say that the business of the road shows a gradual and regular increase of receipts, and promises well for the future. The receipts for fifteen months to September 30, 1873, were $442,724 44, and the expenses $287,905 94. The construction and equipment of the road has cost $4,548,636 15. The capital stock is $1,890,124 64. The first mortgage bonds are $2,674,000. In the schedule of rolling stock there are 8 engines, 14 passenger and baggage cars, and 187 freight cars.

Wilmington and Weldon Railroad.

The thirty-eighth annual meeting of the stockholders of the Wilmington and Weldon Railroad Company was held in Wilmington, N. C., on the 19th ult. On motion of Hon. R. R. Bridgers, Hon. S. N. Martin was appointed chairman. Mr. J. W. Thompson was appointed secretary. Messrs. W. A. Wright and J. W. Thompson were appointed to verify proxies. The committee reported 2,820 shares represented in person, and 6,840 by proxy—being a total of 9,660 shares. The president read the following report which was received and ordered to be spread on the minutes:

WILMINGTON AND WELDON RAILROAD,
PRESIDENT'S OFFICE,
Wilmington, Nov. 19th, 1873.

To the Stockholders of the Wilmington and Weldon Railroad Company:

The president and directors submit their thirty-eighth annual report for the year ending 30th September, 1873.

We make no specific details of the operations of the company as the business is conducted by the lessees.

The estate, property and effects of the company in the last twelve months have been much improved and increased in value.

The dividends secured by the lease have been promptly paid and we have every assurance that the same will be done in future,

Respectfully submitted

R. R. BRIDGERS, President.

On motion of Mr. B. F. Newcomer the meeting proceeded to ballot for president. R. R. Bridgers was unanimously elected. The following gentlemen were unanimously elected directors: W. A. Wright, A. J. DeRosset, George Harris, W. H. Willard, C. H. Brogden, George Howard, B. F. Newcomer, W. T. Walters, S. M. Shoemaker and J. D. Cameron. The next annual meeting was fixed to be held on the first Wednesday after the third Monday in November, 1874. After discussing the subject of cheap transportation and passenger rates, introduced by Mr. H. Nutt, the meeting adjourned.

Transcontinental Railroad.

The St. Louis *Railway Register* says that the force has been doubled on the Transcontinental Railroad of Texas, and that there is a prospect of having the road completed to Paris in December. Colonel H. C. Young, Attorney, and Dr. A. S. Johnson, Vice President of the St. Louis and Gulf Railroad, are now in attendance on the Choctaw Council at Armstrong Academy, for the purpose of obtaining the right of way across the Nation for their road. Work will commence at an early day on this road at Sabine Pass, and be sufficiently prosecuted to save the charter, until money matters get easier. The Houston and Great Northern road will be rapidly constructed from Minneola, the present terminus, to Sulphur Springs. It is said that the International road is to be rapidly constructed from Longview to Jefferson, and from Hearne to Austin. The connection will soon be made between the Texas and Pacific and the Cairo and Fulton Railroads at Texarkana.

☞ The Boston and Maine Railroad Company will pay on the 15th of December the dividend of four per cent deferred from November 15th. The treasurer of the Old Colony Railroad Company will redeem a small sum of the Cape Cod Railroad bonds maturing December 15th.

RAILROAD EARNINGS—MONTHLY.

Central Pacific (in gold):	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

Finances of the United States.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE TREASURY.

The moneys received and covered into the Treasury during the fiscal year ended June 30, 1873, were:

From customs	$188,089,522 70
From internal revenue	113,729,214 14
From sales of public lands	2,882,312 38
From tax on circulation and deposits of national banks	6,830,037 67
From repayment of interest by Pacific railway companies	514,206 04
From customs' fines, penalties, &c.; labor, drayage, storage, &c	1,966,469 86
From sales of Indian trust lands	818,246 58
From fees (consular), letters patent, homestead, &c	1,877,221 67
From proceeds of sales of government property	1,637,288 15
From marine hospital tax	333 003 03
From steamboat fees	259,092 56
From direct tax	315,254 51
From profits on coinage	483,134 62
From tax on seal skins	252,181 12
From miscellaneous sources	2 184,394 25
Total ordinary receipts	$322,177,673 78
Premium on sales of coin	11,560,530 89
Total net receipts	$333,738,204 67
Balance in Treasury June 30, 1872, including $3,047 80 received from "unavailable"	106,567,404 74
Total available cash	$440,305,609 41

The net expenditures by warrants during the same period were:

For civil expenses	$19,348,521 01
For foreign intercourse	1 571,362 85
For Indians	7,951,704 88
For pensions	29,359,426 86
For military establishment, including fortifications, river and harbor improvements, and arsenals	46,323,138 31
For naval establishment, including vessels and machinery, and improvements at navy yards	23,526,256 79
For miscellaneous, civil, including public buildings, lighthouses, and collecting the revenue	52,408 226 20
For interest on the public debt	104,750,688 44
For interest on bonds purchased	5,105,919 99
Total, exclusive of the public debt	$290,345,245 33
Redemption of the principal of the debt, exclusive of the certificates of deposit issued under act of June 8, 1872, for the redemption of which a like amount of U. S. notes was set apart and held as special deposit	$50,498,335 58
Outstanding certificates of deposit mentioned above, added to the principal of the debt and to the cash balance in the Treasury	31,730,000 00
Leaving net disbursements on account of loans	18,768,335 58
	$309,113,580 91
Balance in Treasury June 30, 1873	$99,462,028 50
To which add special deposit of legal tender notes for redemption of certificates of deposit, added above	31,730 000 00
	131,192,028 50
Total cash balance July 1, 1873	$440,305,609 41

By the foregoing statement it will be seen that the net revenues for the fiscal year were $333,738 204 67
And the ordinary expenses 290,345,245 33

Leaving a surplus of $43,392,959 34

Which has been applied to the reduction of the debt, as follows:

Reduction of principal account, exclusive of certificates of deposit	$50,498,335 58
Decrease of cash in the Treasury, exclusive of special deposit of U. S. notes for redemption of certificates of deposit, as compared with June 30, 1872	7,105,376 24
Reduction in debt	$43,392,959 34

This statement treats solely of the principal of the debt. By the monthly debt statement of the public debt, into which enter the accrued interest, interest due and unpaid, and the cash in the Treasury, as ascertained on the day of publication, as well as the principal of the debt, the reduction of the debt during the past year amounted to $43,667,630 05; and the total reduction from March 1, 1869, to November 1, 1873, has been $383,629,783 39, the annual saving of interest resulting therefrom being $27,432,932 04.

The receipts during the first quarter of the current fiscal year were:

From customs	$49,195 403 68
From sales of public lands	573 768 07
From internal revenue	25,640,454 41
From tax on circulation, &c., of national banks	3,490,743 66
From repayment of interest by Pacific Railways	198,970 56
From customs' fines, &c.	438,514 21
From consular, patent, and other fees	503,941 12
From proceeds of government property	303,765 32
From miscellaneous sources	1,507,931 21
Net ordinary receipts	$81,853,492 24
From premium on sales of coin	2,350 818 34
From government of Great Britain —payment of the award of the tribunal of arbitration at Geneva	15,500,000 00
Total receipts	$99,704,310 58
Balance in treasury June 30, 1873	131,192,028 50
Total available	$230,896,339 08

The expenditures during the same period were as follows:

For civil & miscellaneous expenses including public buildings, lighthouses & collecting the revenues	$17,372,293 60
For Indians	2,008,715 19
For pensions	8,698,156 58
For military establishment, including fortifications, river and harbor improvements, and arsenals	13,795,053 48
For naval establishment, including vessels and machinery and improvements at navy yards	9,792,451 57
For interest on the public debt, including Pacific Railway bonds	87,051,907 79
Total, exclusive of the principal and premium on public debt	$88,718,578 21
Premium on purchased bonds	$1,331,946 78
Award by Geneva tribunal, investment account	15,500,000 00
Net redemption of the public debt	32,936,828 91
	49,788,775 69
Totel net expenditures	$138,507,353 90
Balance in treasury September 30, 1873	92,388,985 18
Total	$230,896,339 08

Owing to the large proportion of the interest on the public debt maturing July 1, the amount paid out on that account during the first quarter of the year is more than half as much as will be required for the next nine months, and although it enters into the expenses of this quarter, it is properly chargeable to a longer period of time. Many other expenditures are greater also during the first than any subsequent quarter, by reason of the necessity of supplying disbursing officers with money under new appropriations which became available on the first of July.

For the remaining three-quarters of the current fiscal year it is estimated that the receipts will be:

From customs	$111,000,000 00
From sales of public lands	1,500,000 00
From internal revenue	66,000 000 00
From tax on national banks	3,200,000 00
From Pacific Railways	300,000 00
From customs' fines, &c	800,000 00
From consular, patent & other fees	1,300,000 00
From sales of public property	1,000,000 00
From miscellaneous sources	2,000,000 00
Total	$187,100,000 00

For the same period it is estimated that the expenditures will be—

For civil expenses	$15 250.000 00
For foreign intercourse	1,100,000 00
For Indians	6 500,000 00
For pensions	21,780,000 00
For military establishment	34,000,000 00
For naval establishmeot	18,000,000 00
For miscellaneous, civil, including public buildings	34,000,000 00
For interest on the public debt	70,000,000 00
Total	$200,630,000 0.

This will leave a deficiency in the revenues of $13,530,000.

It is estimated that the receipts for the fiscal year ending June 30, 1875, will be—

From customs	$180 000,000 00
From sales of public lands	2 500.000 00
From internal revenue	108.000 000 00
From tax on national banks	6,200.000 00
From Pacific Railways	500 000 00
From customs fines, &c	1,500,000 00
From consular, patent & other fees	1 500.000 00
From sales of public property	1 500,0 0 00
From miscellaneous sources	4,000,000 00
Total	$305,700,000 00

It is estimated that the expenditures for the same period will be—

For civil expenses	$19,500,000 00
For foreign intercourse	3 350,000 00
For Indians	7,000 000 00
For pensions	30,480,000 00
For military establishment, including fortifications, river and harbor improvements and arsenals	50,000,000 00
For naval establishment, including vessels and machinery and improvements at navy yards	23,000,000 00
For miscellaneous, civil, including public buildings, light-houses and collecting the revenues	54,067,144 00
For interest on the public debt	98,000,000 00
For interest on Pacific Railway bonds	3,875 000 00
For sinking fund	29,918,856 00
Total	$319,191,000 00

☞ B. H. Dewing has been elected President, E. F. Oliver, Clerk and Treasurer, and S. A. Green Acting Superintendent of the Lynn and Boston Railroad Company.

☞ Mr. Russell Sage has been elected President, and Mr. Rufus Hatch Vice President and managing director of the Pacific Mail Steamship Company.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, December 6, 1873.

Stock Exchange and Money Market.

The business of the week has been checked to some extent by the delay in the transmission of the President's Message, and the accompanying documents, to Congress. The Message and documents have been the subject of much earnest discussion. On the whole, they have been received quite favorably, and have tended to aid in the restoration of confidence in financial and commercial circles. The Money market has been quite active, and rates have been comparatively firm through the week; call loans having been generally quoted at from 7 per cent in currency, to the same rate in gold; and discounts, from 10@15 per cent per annum on strictly prime to very good grades of mercantile paper. The Bank of England's reduction of the discount rate, fully 2 per cent, served to strengthen confidence on this side. The formal and encouraging resumption of business, by the reorganized Union Trust Company, was also one of the most important and reassuring events of the week, in the financial line. The City banks have further augmented their aggregates of reserve, increasing their average of gold $19,968,000 as against $17,568,000 the preceding week; and their greenback average, to $35,899,000, as against $30,899,000, on the previous return. Their deposits stood at 174½ millions, giving an increase of 6½ millions. The loan and circulation items showed a slight reduction. The public debt statement of Dec. 1, indicated an increase of $9,028,576 84. Coin in the Treasury, amounted to $83,709,987; coin certificates, to $30,220,600; currency in the Treasury, to $1,296,440; legal tenders outstanding, to $366,922,018; special deposit of legal tenders held for the redemption of certificates of deposit, $20,150,000. The increase in the debt was due in good part to the unusually larger expenditures on naval and military account, through November, in connection with the Cuban difficulty. Summaries of the Government estimates for 1874, and 1875 have been published, showing the aggregate amount for 1875 as $319,198,736, and for 1874 $308,823,256. The appropriations for 1874 aggregated $306,060,252.

The U. S. Sub-Treasury, last week, enlarged its currency balance $2,358,686, and reduced its coin reserve $461,477. Its currency balance at the close of the week was $13,240,834; and its coin reserve $49,178,567. The aggregate receipts of the office in November were $59,808,660 including $5,958,287 from customs; aggregate disbursements, $52,346,000, including $3,707,511 of coin interest on the public debt.

Gold has been moderately active, and quoted irregular, though closing rather less firmly. The speculative inquiry was more confident, through the later negotiations. There was a very moderate call, on customs and export account. The extremes of the price have been 108½@109¾, closing on Wednesday at 108⅞ as against 109½ on Wednesday of the preceding week. The specie outflow, last week, was only $419,780. The imports of specie at this port since Jan. 1, have been $17,025,770 as against $5,877,282 same time last year.

The customs demand for Gold last week, averaged $281,400 a day. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $118,262,345, against $135,867,270 during the same time in 1872. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $62,067,410, against $72,335,357 during the same time in 1872. The export drain of specie since January 1, 1873, has been $46,397,729 against $68,890,820 during the same portion of 1872.

Foreign Exchange has been in fair demand and held more firmly. Bankers' sixty day bills on London closed on Wednesday at 108@108¼; sight bills on London, at 109@109¼. The week's exports of Domestic Produce have been to the currency value of about 5½ millions.

Government securities have been much brisker, and prices have advanced sharply, closing buoyantly, on comparatively limited offerings.

U. S. sixes of 1881 closed on Wednesday of this week at 117@117½; U. S. Five-Twenties of 1862, 110½@110¾; U. S. Five-Twenties of 1864 at 111½@111¾; U.S. Five-Twenties of 1865 111¾@112; U. S. Five-Twenties of 1865 consolidated 115½@115¾; U. S. Five-Twenties of 1867, 117¼@117¾; U. S. Five-Twenties of 1868, 117@117½; U. S. Ten-forties at 109½@109¾; U. S.

Fives of 1881 (Funding Loan) 109⅜@109¾; Six per cent. currency Sixes from 110@110¼.

Business in Railway and Miscellaneous securities has been more active, with prices quoted much stronger, closing, however, somewhat irregularly.

State and Railway bonds have been in more demand, and held more firmly. Central Pacific first mortgage six per cents closed at from 92@92¼.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $3,899,081, as compared with $6,253,692 same week last year. The exports of domestic produce are $5,403,950, as against $5,799,772 last year. The exports of Gold and Silver, $419,730, as against $464,246 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,409,000, comparing with $1,214,000 same week last November.

General business has been quite active in the produce lines, though at variable prices. Cotton and Breadstuffs closed less firmly. Provisions, Petroleum, Wool, Naval Stores, were held with a fair show of confidence. Live Stock closed stronger as to values, on a moderate trade. There has been more animation in the Metal trade. Ingot Copper has been active and excited; sales and resales above 5,000,000 lbs. at 24½c.@25c. for December and January deliveries, closing at 25c., cash, and small lots Baltimore at 24c., cash. Scotch Pig-iron has been quiet at $42 for Glengarnock; $45@$46 for Coltness; sale of 50 tons Coltness on private terms. American Pig has been quiet and depressed; No. 1 at $32@$35; No. 2 do. $28 50@$30; sales, 1,000 tons Forge, at about $22 75, deliverable at the furnace; 2,000 tons on private terms. Pig-tin has been quiet and unchanged. Plates have been in fair demand. Sales, 1,000 bxs. Charcoal at $10@10 25, gold; 500 bxs. Charcoal Terne, @$9 75, gold; 500 bxs. Coke, at $8 25, gold. Ocean freights have been moderately active, closing rather more firmly.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 16@20; George's Creek Coal, 120@135.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending November 22, at 380,693 tons, and for the coal year 18,244,468 tons, against 17,559,956 tons to corresponding time last year, being an increase of 684,512 tons. The bituminous tonnage for the week is 76,750 tons, and for the year 2,908,891 tons, giving a total of all kinds for the week of 457,449 tons, and for the year of 21,253,452 tons, against 19,754,406 to same time last year, being an increase of 1,124,882 tons.

☞ An arrangement has been entered into between the United States and Germany for an exchange of postal cards between the two countries, to go into effect on the first of December. The postage on postal cards sent from the United States to Germany is fixed at two cents each, prepayment of which is to be made by affixing to the postal card an ordinary one cent United States postage stamp in addition to the stamp printed or impressed on the card.

The Public Debt.

By the monthly report of the Secretary of the Treasury for November, we learn that the debt was increased during the month $9,028,576 84. The total principal of the debt outstanding is $2,217,079,755 71, on which there is due and unpaid of interest $38,388,725 47, giving a total of principal and interest of $2,255,018,481 18. There was at the same time cash in the Treasury of coin, $88,709,987 44; of currency, $1,296,440 28, exclusive of $20,160,000 of special deposits for redemption of certificates, making the total of cash in the Treasury $105,156,427 72, reducing the total debt, less cash in the Treasury, to $2,150,-862,053 96. Debt less amount in the Treasury 1st of November, 1873, $2,141,833,476 62—showing an increase during the past month of $9,028,-576 84. Decrease of the debt since March 1, 1873, $6,518,647 07. Decrease of the debt since March 1, 1869, to March 1, 1873, $368,082,559 48. Bonds issued to Pacific Railroad Companies, interest payable in lawful money, principal outstanding, $64,623,512; interest accrued and not yet paid, $1,165,187; interest paid by the United States, $20,447,986 26; interest repaid by transportation of mails, etc., $4,545,653; balance of interest paid by United States, $15,902,538.

☞ The earnings of the Northern Central Railway for the ten months ending October 31, 1873, were $4,233,436 45; the expenses $3,122,367 19, and the net earnings $1,111,069 26. For the corresponding period of the previous year the earnings were $3,712,898 20, the expenses $2,901,010 40, and the net earnings $811,887 80—showing an increase in earnings of $520,538 25, in expenses of $221,356 79, and in net earnings of $299,181 46.

☞ It is said that the Buenos Ayres and Rosario Railway, 338 miles long, is about to be undertaken. The works are easy, and it is considered the line can be made at a very low cost per mile, while it passes through a rich district. Such a line would necessarily be of great use to the Central Argentine Railway, which starts from Rosario.

☞ The first trip by cars of the Canada Southern Railroad across the International Bridge at Buffalo was made on the 1st inst. There is now direct connection, without change of cars between Detroit and all points east and south touched by the Buffalo, New York and Pennsylvania Railroad.

☞ The earnings of the Denver and Rio Grande (Narrow Gauge) Railway for the week ending November 14, 1873, were: freight, $2,847 17; passengers, $3,733 02—total, $6,580 19. Same week last year, $8,168 95.

☞ A meeting of the stockholders of the New York and New England Railroad Company will be held in Boston on the 3d of February, 1874, when a board of directors will probably be chosen.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending Nov, 15, are: freight, $40,573 98; passengers, $33,488 00—total, $74,061 98.

☞ Work on the Bucksport and Bangor (Maine) Railway will be recommenced early in the spring, and be pushed until the road is completed.

Providence and Springfield Railroad.

At the annual meeting of the stockholders in Providence, R. I., on the 1st inst., the following Directors were chosen: William Tinkham, Edward Pearce, Albert L. Sayles, Amos N. Beckwith, Moses B. I. Goddard, James O. Inman, Horace A. Kimball, L. M. E. Stone, Amasa Sprague, Milton A. Clyde, John L. Ross. At a subsequent meeting of the Directors, William Tinkham was elected President, L. M. E. Stone Treasurer and Superintendent, Jabez C. Knight, Clerk. The Superintendent's annual report was presented from which it appeared that the cost of the road and its equipment to Nov. 1 was $920,087. Receipts since opening, Aug. 11, $14,644; expenses, $6,914; net earnings, $7,729.

☞ The Minneapolis *Tribune* says the Northern Pacific Railroad Company proposes to give up its leases of the Lake Superior and Mississippi Railroad, the Minneapolis and Duluth Railroad, and the Minneapolis and St. Louis Railroad, on the first day of January, on account of its inability to pay the interest agreed on.

☞ The earnings of the Erie Railway Company for the week ending Nov. 28, 1873, were $365,355, and since Oct. 1, $3,083,419—a decrease compared with the corresponding period of the previous year of $62,194.

☞ The Chesapeake and Ohio Railroad Tunnel through Church Hill, in Richmond, Va., is completed, and trains will commence at once to run regularly.

☞ The Toledo, Canada Southern and Detroit Railroad was formally opened from Toledo to Detroit on the 13th ult.

FOR SALE.

Four new passenger Coaches for sale; two 66 passenger each, price $5,250; two 76 passenger price $7,000 each, now ready for lettering. Also a 30 ton new Locomotive ready for use.

MAKERS of the NEW TESTING MACHINE.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, U. S. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, December 13, 1873.

James River and Kanawha Canal.

The regular annual session of the stockholders of the James river and Kanawha canal met in Richmond, Virginia, on the 29th ult. The report of the president, C. S. Carrington, showed that the receipts for the fiscal year, ending September 30, 1873, were $155,370 66; expenses, $97,894 28. The report alludes to the inspection of the route by the Senate committee on transportation, and concludes as follows:

The surveys of your line by the general government have been made under appropriations by Congress in 1870, and the two appropriations of 1872, and the reports of these surveys show its definite location in every part of its entire length and the estimates of the cost of its construction. The full information furnished by these reports will be before the Congress of the United States at its next session, and the question of the completion of this central water line by the general government, with the concessions made and the conditions indicated in the memorials of the States of Virginia and West Virginia, will probably be decided by that body.

Mr. Carrington was re-elected president; Col. Henry C. Cabell, director for the State, and Charles W. Antrim, of Lexington, Virginia, director on the part of the stockholders. The board of public works appointed Messrs Franklin, Stearns, and S. C. Tardy, of Richmond, directors for the State.

Atchison, Topeka and Santa Fe Railroad.

This corporation has got into a position in which its directors are obliged to appeal to its stock and bondholders for aid to bridge over its present financial embarrassment. They say the time has come when the interests of the company demand that provision should be made to wipe out the floating debt and insure the certain prompt payment of interest in the future, and that this can be done by the issue of a loan equal to eighteen months coupons, payable if desired in the coupons as they mature. The floating debt is $486,000, besides the January interest and taxes $50,000. The land department also owes $350,000, but there is due the company for land sold $1,105,744, the payments from which accumulating each year will soon largely exceed land bond interest.

The net earnings for the past nine months (two months being estimated) are $424,538 96, and the directors believe that in 1874 they will be $675,000, and in 1875 $825,000, while the annual interest on its first mortgage bonds is $492,870 gold.

The plan the directors propose is to provide for the wants of the land department by issuing at par $700,000 of 12 per cent currency income bonds, running five, six and seven years, to be paid for one-third Jan. 1, 1874, one third July 1, 1874, and one-third July 1, 1875, in cash or in land mortgage coupons due three months later. And to provide for the other wants of the company by issuing at the price of 50 per cent in currency, $1,852,000 of the consolidated 7 per cent gold bonds, being a second mortgage on the road and the lands, the first coupon on same being due Oct. 1, 1876, producing $926,000, and payable one-third Jan. 1, 1874, in cash or coupons, due within three months thereafter, and the second and third payments, one-third July 1, 1874, and one-third Jan. 1, 1875, on the same terms. Each holder of twenty-five shares of stock is to have the right until Dec. 20 to take $500 of the consolidated bonds and $200 of the land income bonds.

The directors say there is no possibility of avoiding a default unless this loan is taken; that any deficiency on the part of small holders will not be made up by those having large interests, and that it must be taken immediately by the holders of the bonds and stock if the credit and value of the investment is to be preserved.

Railway Brakes.

On Friday last a party of gentlemen connected with some of the principal companies went from St. Pancras to Bedford in order to witness the working of the WESTINGHOUSE or continuous air brake, which has now been for six months in constant use on one of the Midland trains. Both in going and also in returning on Saturday morning the party traveled by ordinary passenger train so that no special or experimental stops could be made, and no time could be afforded for measuring the distance which the train ran, after the application of the brake, before it was brought to absolute rest. There was, in fact, nothing to be seen but the efficiency of the brake in causing the ordinary station stoppages, and, thus tested, it accomplished all that has been claimed for it. On Saturday morning the rails were in the worst possible state, slippery from slight moisture; but the stoppages were made in periods of time varying from fifteen to forty seconds, according to the inclination of the road, and in distances that, measured only by the eye, seemed almost incredibly short. We understand that the Midland directors are at present contemplating the general introduction of the brake throughout their system, and that it is actually in course of being applied to all the trains of the Metropolitan District. On the latter line the authorities expect to save the cost of the introduction of the brake in the first year of its use by the diminished wear and tear of their station rails, which, on the present system of stopping, have a life seldom exceeding two years, as against an average of eight years for rails intermediate between stations. There is much reason to hope that companies may find it to their own interest, in many ways, to give the public the security against collisions which the air brake is calculated to afford. Among its other advantages, by allowing a train to run at full speed almost up to its stopping point, it saves all the loss of time incidental to slackening, and this, in a long journey with many stoppages, is much more considerable than would be supposed. Again, it absolutely prevents recoil of the train after stoppage, an occurrence which has been a fertile source of accidents to passengers, and of consequent litigation, and which explains the fre-

quent discrepancies between the evidence of different witnesses on the question whether a train was at rest or not.—*London Railway Times, Nov. 15.*

Northern Pacific Railroad.

Whether the government desires to do so or not, we believe it will be forced by circumstances, to assist in the completion of the Northern Pacific Railroad. For, as the country on both of the slopes will speedily be peopled to the very base of the Rocky mountains, the rocky gap between will continue to be subject to Indian depreciations until there is a swift means of passing soldiers over it. Railroads are important auxiliaries in Indian as well as other wars, and this nation is too progressive to do without a quick and reliable means of shifting troops when we have within our confines tribes of savages who, on the slightest pretense, slaughter those they consider as enemies.

The Sioux Indians, as is well known, can bring into the field quite a respectable army; and unless we can at once check any outbreak on their part, by throwing bodies of armed men into their fastnesses and haunts, they are likely to do considerable harm within the next few years. The government, we take it, will consider this condition of things; and, when asked, act with promptness in aiding the Northern Pacific to its final completion. The company have done exceedingly well in building what they have of the road, and we see no sound objection to the country helping them along, particularly when the enterprise in which they are engaged is of so much national importance. No doubt a few croakers will raise their voices against giving any help to the road, but these can only argue against reason in advancing their objections. The completion of the great work is an actual national necessity, because it will open to settlement thousands of square miles of the best and richest territory over which our flag floats. And the next Congress, we opine, will agree with us in this view.—*Railway Chronicle.*

Evansville and Crawfordsville Railroad.

The earnings of this road for the years ending August 31, 1872 and 1873, were as follows:

	1872.	1873.
From passengers	$192,407 00	$180,872 21
" freight	335,108 41	332,987 43
" express	15,219 26	13,584 76
" mail	10,808 33	9,350 00
" rents	13,636 83	26,468 50
	$566,679 83	$562,762 90

And the expenses of 1873, were:

Conducting transp.	$99,656 01	
Motive power	100,597 09	
Maintenance of way	89,073 65	
Maintenance of cars	22,854 34	
General expenses	28,878 40	
		341,059 69
Leaving net earnings		$221,703 21
Deduct interest on bonds and appropriations to sinking fund		118,721 06
Leaving a surplus for the year of		$102,982 15

This surplus has been expended in additional equipment, new buildings and other improvements.

As compared with the previous year the gross earnings show a decrease of $3,916 48; the expenses, including taxes, a decrease of $16,059—and the net earnings an increase of $12,142 57. The president in his report says:

"The condition and value of the property has not only been well maintained, but has been very materially improved, by the continued faithful application of the sinking fund to the reduction of the bonded debt, by material improvements to track and buildings, and by the purchase and construction of additional equipment.

The sinking fund has purchased during the year, thirty-nine bonds of $1,000 each; thirty-four of which were from the appropriation of the current year, and five from an unexpended balance from last year. This makes a total of 152 bonds redeemed by the sinking fund to date; in addition to which, three Rockville Division bonds were purchased during the year.

The cost of the road and equipment to date, is as follows:

Construction of road	$2,479,492 62
Equipment	510,150 66
	$2,989,643 28

Which is represented by:

Common stock	$1,044,415 12
Preferred stock	100 000 00
Bonds outstanding	1,085,000 00
Earnings expended	760,228 16
	$2,989,643 28

The continued pursuit, for a very few years longer, of the conservative policy which has prevailed on this road from its beginning, cannot fail to make it a valuable property to its stockholders. This policy has been to create no additional debt, but to steadily reduce that already existing, and apply the surplus earnings to the improvement of the property, and to increasing its facilities for transacting its business.

The receipts from all sources during the year were as follows:

Earnings, as above	$562,762 90
Sale of $8,000 E., H. & N. R.R. bonds	6,800 00
Accounts receivable	7,176 90
Stock collections	162 19
Total	$576,901 99

And the expenditures were:

Operating expenses & taxes, as above	$341,059 69
Interest	85,164 06
Appropriation to sinking fund	33,557 00
Construction	89,594 96
Equipment	70,300 46
Rockville Division bonds purchased	3,000 00
Real estate purchased	1,472 55
Increase in supplies on hand	2,431 59
Decrease in account payable	321 68
Total, as above	$576,901 99

The equipment of the road is as follows: 18 engines, 10 passenger coaches, 1 paymaster's, 5 baggage, mail and express, 7 caboose, 202 box, 30 platform, 93 coal, 10 stock, 10 construction, 30 hand, and 20 push cars; all of which are in good working condition. Two of the engines are very light, and of but little use. The superintendent therefore recommends that two new freight engines be purchased during the coming year. And if the coal trade continues to develop as it promises to do, it will be necessary to largely increase the supply of coal cars. Orders have been given to build 25 at the company's shops, and at least 25 more should be purchased or built at an early date. An increase in the stock of line cars for through freights is also recommended.

The train service for the year is as follows: passenger, 142,989 miles; freight, 194,152; construction, 25,196—total, 362,337 miles, being a slight increase over last year.

One new freight engine and 16 coal cars have been purchased during the year, and 1 caboose, 52 compromise box, and 8 coal cars built.

The number of passengers carried is 131,036, being 15,000 less than last year. Tons of freight transported 220,000, an increase of 11,500. Number of loaded cars moved, 26,996; do. empty do., 12,449—total, 39,445, an increase of 1,585. Mileage of cars, 2,848,921, an increase of 285,663.

The operating expenses and taxes are 61 per cent, against 68 per cent in 1872.

General Balance Sheet.

President and Sup't.—J. E. Martin.

Directors.—John Ingle, Jr., Samuel Orr, J. S. Hopkins, J. E. Martin, L. S. French, J. W. Maddox, J. Alsop, H. K. Wilson, C. Rose, W. R. McKeen, J. H. Turner, W. K. Edwards, G. K. Steele.

Secretary and Treasurer.—F. Heakes.

Assistant Auditor.—C. Bush.

Engineer and Paymaster.—C. C. Genung.

Pacific Railroads.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE INTERIOR.

The subscriptions to the stock of the Union Pacific Railroad Company amount to $36,783,000, of which $36,762,300 has been paid. The receipts for the year ending 30th of June, 1873, from the transportation of passengers, were $3,786,208 20; of freight, $5,024,998 37, and from miscellaneous sources, $822,758 52; total, $9,633,965 09. The entire cost of the road and fixtures to said date was $112,259,336 53, and the operating expenses of the road for the last fiscal year (ending 30th of June, 1873), were $4,697,999 50. The total bonded indebtedness of the company at the end of that year amounted to $75,427,512, of which $27,236,512 is due to the United States. The "floating debt" to the same period (not including the company's note for $2,000,000 issued to the Hoxie contract), amounted to $1,940,239 73, and "exchange loans" £120,000.

The Central Pacific Railroad Company by consolidation (as heretofore reported) embraces, besides the original company of that name, also the Western Pacific, the California and Oregon, the San Francisco and Oakland, and the San Francisco and Alameda companies. Stock to the amount of $62,608,800 has been subscribed, and $54,275,500 paid. The receipts for the year ending June 30, 1873, from transportation of passengers were $4,388,807 14, and of freight, $7,277,482 33; total, $11,666,789 47. The operating expenses of the road for the year were $5,349,485 21, leaving net earnings to the amount of $6,316,364 26. At the close of said year the indebtedness of the company amounted to $85,488,816 60, of which $27,855,680 was to the United States.

The stock subscription of the Central Branch Union Pacific Railroad Company is $1,000,000, of

which $980,600 has been paid in. The receipts for transportation of passengers for the year ending June 30, 1873, was $48,591, and for freight $71,071 91—total, $119,662 91. The expenses of the road and fixtures have been $3,723,700. The expenses of the road for the fiscal year ending as above stated is $172,231 44. The company's indebtedness (in addition to the first mortgage bonds, $1,600,000, and the Government loan, $1,600,000) is $303,058 45. The amount of stock of the Kansas Pacific Railway Company subscribed is $9,992,500, and the amount paid is $,9-655,950. Total amount of stock allowed by law, $10,000,000. The receipts for the transportation of passengers for the year ending June 30, 1873, were $1,398,633 96; for freight during the same period, $2,285,038 52; miscellaneous earnings, $69,617 34; total, $3,748,289 82. The cost of construction and equipment of 639 miles of main line and 33 miles of branch line (672 miles) has been $33,892,840 66. The total funded debt of the company is $27,452,100 of which $6,303,000 is due the United States; other liabilities and indebtedness, $2,996,148 97; total, $30,248 97.

The amount of stock of the Denver Pacific Railway and Telegraph Company subscribed and paid in is $4,000,000. The receipts for the year ending June 30, 1873, for transportation of passengers were $178,720 58; of freight, $149,012 42, and from miscellaneous sources, $13,215 25; total, $335,948 25. The cost of construction and equipment of the road to the date above stated, was $6,498,800, and the indebtedness of the company to that date was $2,513,747 16.

At the close of the fiscal year ending June 30, 1873, the amount of subscribed stock of the Southern Pacific Railroad Company of California was $13,189,400; of which $11,965,400 was paid in. Explorations and examinations of former preliminary lines have been continued since the last report rmounting to 750 miles; 114.50 miles of road have been permanently located, and 64.50 completed. Twenty miles of this latter distance is on the route from Tipton to Delano, and 50 miles (commencing at the San Fernando Pass via Los Angeles, thence toward San Bernardino, ending about 29 miles easterly from Los Angeles) on the line from Tehachapi Pass to Fort Yuma. Forty-two and one- half miles have been completed on the branch line in the Salinas Valley. The cost of the surveys to June 30, 1873, has been $105,000. The amount received for the transportation of passengers for the fiscal year was $469,-789 63; of freight, $486,465 37; total, $956,255. The expenses of the road for the year were $458,-789 14; leaving net earnings of $497,515 86. The indebtedness of the company is shown by their report to be $8,050,000. The fourth section of 20 miles of this road was accepted by you on the 6th of August last, making the total number of miles accepted 90.26.

Stock of the Texas and Pacific Railway Company has been subscribed to the amount of $2,-000,000, of which $200,000 has been paid in. The bonds of the company consist of two kinds, viz.: "First mortgage six per cent gold construction bonds," and "First mortgage land grant bonds." Of the former none have been issued. Of the latter there have been issued in the purchase of consolidated roads $4,000,000. The indebtedness of the company is shown by their report to be as follows; Capital stock (as shown above), $2,000,-000; land bonds, $4,000,000; debt of the Southern Pacific Railway Company of the State of Texas, assumed by the Texas and Pacific Railway Company, $299,126 81; floating debt, $790,095 71; interest coupons on land bonds, $140,000; total, $7,139,222 02. The operating receipts and expenditures of the road for the year ending June 30, 1873, have been as follows: Receipts—from passengers, $104,392 44; freight, $223,211 99; United States mails, $5,328; miscellaneous, $448, 43; total, $333,380 86. Expenditures—for conducting transportation, $51,994 43; maintenance of roadway, $111,044; cost of running and maintenance of motive power and cars, $62,870 20; general expenses, $31,153 56; total, $256,562 19. Receipts over expenditures, $76,818 67. There have been 109 miles of this road constructed, and 355 miles graded, bridged and tied. Since the date of the last report of the company (June 30, 1872), the engineers in charge of the survey have run over 8,000 miles of instrumental lines, and made 15,000 miles of reconnaissance, developing a country 1,500 miles long, east and west, and 150 miles in width, north and south, so thoroughly that the line of location from Rio River to the Pacific can very nearly be determined. The lines of road surveyed and in part undergoing construction are as follows: Southern Division, from Longview, Texas, to Fort Worth, 155 miles; Jefferson Division, from Marshall to Texarkana, 69 miles; Transcontinental Division, from Texarkana to Fort Worth, 238 miles; Brazos Division, from Forth Worth to the one hundredth meridian, about 175 miles; Pecos Division, from the one hundredth meridian to the Rio Grande river, 412 miles; New Mexico Division, from Rio Grande to the Pimas Villages, 888.85 miles; California Division, from Pimas Villages to San Diego, California, 444 miles; total distance, 1,880.85 miles. The greatest altitude reached in crossing the continent is 6,355 feet.

The Atlantic and Pacific Railroad Company's report for the year ending June 30, 1873, showed that $19,760,800 of stock has been subscribed and paid in. Grading has been done in the Soledad Pass, Cal., and $8,013 72 expended in grading at this pass to June 30, 1873. On June 29, 1872, the company leased for a term of 999 years the Pacific Railroad of Missouri, extending from St. Louis, Mo., to Kansas City, Mo., including the Carondelet Branch, 297¼ miles, and assumed the leases to said Pacific Railroad of the following named lines: Missouri River Railroad, 25¼ miles; Leavenworth, Atchison and Northwestern Railroad, 21¼ miles; Osage Valley and Southern Kansas Railroad, 25 miles; Lexington and St. Louis Railroad, 55¼ miles; St. Louis, Lawrence and Denver Railroad, 61 miles. The cost of the surveys of the Atlantic and Pacific Railroad to June 30, 1873, was $306,357 86. The amount received from passengers on the Atlantic and Pacific Railroad Division was $303,357 84; on the Pacific Railroad of Missouri and leased lines division, $1,073,981 02; total, $1,377,338 86. The amount received for freight on the Atlantic and Pacific Railroad Division was $945,711 69; on the Pacific Railroad and leased lines division, $2,587,852 37; total, $3,533,564 06. The cost of the Atlantic and Pacific Railroad and fixtures, as appears from the accounts of the Treasurer, June 30, 1873, was $36,262,322 70. The running expenses of the road from July 1, 1872, to June 30, 1873, were $692,529 16. The same expenses of the Pacific Railroad of Missouri and leased lines for that period were, $2,693,926 36; total for the fiscal year, $3,386,455 52. The indebtedness of the company is as follows: bonded debt of the South Pacific Railroad Company, secured by mortgage of lands assumed, $7,190,000; Atlantic and Pacific Railroad Company's bonds, dated July 1, 1868 (20 years), $2,945,500; Atlantic and Pacific company's railroad and land grant bonds, November 1, 1871, $1,190,000; the same company's Central Division land grant bonds, dated November 1, 1871, $797,922; same company's second mortgage railroad and land grant bonds, dated November 1, 1871, $1,272,000; same company's scrip for bonds dated November 1, 1870, $1,718,438 86; total bonded indebtedness, $15,113,860 86; floating indebtedness, $2,758,025 38; total indebtedness, $17,871,885 74. Assets of cash, debts due company, and securities other than of this company amounting to $1,340,070 31, on hand.

Stock of the Northern Pacific Railroad Company, to the amount $100,000,000, has been subscribed, and certificates for 172,695 shares of $100 each have been issued. During the year 1873 the road was definitely located from the mouth of Heart river, on the Missouri, to the mouth of Glendive creek, on the Yellowstone, a distance of 205 miles. The precise point of crossing the Missouri river has not yet been fixed by the company. The surveys necessary to complete a continuous line across the continent, which were left unfinished last year by reason of the open hostility of the Sioux Indians of Montana and Dakota, have this year been brought to a most satisfactory conclusion. A continuous line has been surveyed from Lake Superior to Puget Sound, and the data have been obtained for deciding the final location of the road between the above-named termini. The entire line of route has not as yet been definitely fixed upon. The company reports that for climate, soil, quantity and variety of mineral wealth, and all the elements necessary to the support of a dense population, there is no zone of similar extent and value between the Mississippi river and the Pacific Ocean as that "of the region lying between and contiguous to parallel 46 and 47 north latitude." The whole amount expended on surveys from the beginning of the work to July 1, last, is $1,058,873 74. The extent of line surveyed is 9,388 miles, and, in addition, 2,850 of river reconnaissance. The amount received from passengers on the road (in Minnesota and Washington Territory) is $158,551 97; for transportation of freight, $393,549 23, which includes a few days of the earnings in June, 1873, in Dakota. The expense of the road and fixtures has been $20,-092,380 09, and the indebtedness of the company is $29,309,387 40. The word "expense" as used above, is said by the company "to mean the cost of the road proper, and its fixtures," only. The company's report states that on October 1, 1873, trains were running regularly (both passenger and freight) engaged in the general traffic from Lake Superior to the Missouri river, a distance of 453 miles, and from Kalama, on the Columbia river, northward, 65 miles toward Puget Sound. Beyond that a distance of 25 miles, a track has been laid, and 15 miles more nearly graded, which, when completed (about the 1st of December this year), will make a continuous road from the Columbia river to Puget Sound of 105 miles.

An Open Canal in Winter.

A competent engineering authority has been making a close examination of the practicability of Mr. Cheseborough's scheme to keep the Erie canal from freezing up by the use of artifical heat, and as a consequence we have now before us an elaborate report on the subject from Professor R. H. Thurston, Professor of Engineering in the Stevens Institute of Technology. The entire feasibility of the project seems to be conceded by Professor Thurston. The quantity of coal required per mile of canal to keep it open when it would otherwise freeze uniformly to the depth of one foot he estimates would be, in even numbers, seventy-five tons, which estimate must of course be increased or diminished with the thickness of the ice which would form if left without artificial impediment. The following is his estimate of the cost, for a canal seventy feet wide:

COST OF PLANT PER MILE.

Heating apparatus	$12,000 00
Distributing apparatus	2,500 60
Buildings and land	1,250 00
Total	$15,750 00

COST OF MAINTENANCE PER MILE AND PER ANNUM.

Repairs and depreciation	$1,450 00
Interest on capital	1,102 50
Coal, 300 tons at $4	1,200 00
Two men, three months, at $60	360 00
One man, three months, at $90	270 00
One man, four months, at $60	840 00
Superintendent and contingencies	150 00
Total	$4,772 50

TOTAL ESTIMATES.

For a canal 350 miles long, seventy feet wide, in the latitude of Central New York.

First cost, 350 miles, at $15,750	$5,412,500 00
Maintenance, per annum, at $4,772.	1,670,200 00

Pittsburgh and Connellsville Railroad.

The stockholders of the Pittsburgh, Washington and Baltimore Railroad held their annual meeting yesterday at the Company's General Office, Connellsville Depot. The large number of gentlemen present represented about seven-eighths of the entire stock, and as many of them came over the road they had an excellent opportunity of observing its present condition, with which entire satisfaction was expressed.

After its organization, the meeting proceeded to the election of officers and a Board of Directors for the ensuing year, and the following gentlemen were re-elected officers: Mendes Cohen, President; Charles Donnelly, Treasurer; J. B. Washington, Secretary and Auditor; E. K. Hyndman, General Superintendent; S. C. Hough, General Passenger Agent, and George Shiras, Jr., Solicitor. The following gentlemen were elected as a Board of Directors for the ensuing year: Messrs. Mendes Cohen, W. S. McBride, G. L. B. Fetterman, William Baldwin, John Donnell Smith, William Keyser, Israel Cohen, Charles Neff, Hugh Sisson, William H. Perkins, H. S. Vickery, and G. C. Dennis. After their annual dinner at the Monongahela House, the stockholders held an informal meeting at which a brief synopsis of the condition of the affairs of the corporation was presented, as no regular report will be ready until the next meeting in February, 1874. From the statement presented it was shown that nearly $200,000 had been expended on the road during the past year; that between six and seven hundred men were constantly employed on repair work and bringing the track to its present fine condition; and that not a single accident involving loss of life or property has occurred for many months, the President considered the best proof that the work had been well done.—*Cumberland News, Dec. 8.*

From the Boston Journal, Nov. 28.

The Hoosac Tunnel.

Yesterday was a memorable day in the history of the greatest railroad enterprise ever undertaken in this Commonwealth. The final stroke was given which opened a tunnel through Hoosac Mountain, and now men may walk from one side of this great natural barrier to the other through the passage. The explosion of two hundred pounds of nitro glycerine scattered the few feet of rock that remained to be removed ere the mountain was pierced. We recapitulate below the principal facts in the history of this important undertaking:

The history is a long and perplexing one, and public faith in its propriety and success has often been very feeble. The project, of course, had its germ in that desire not yet realized of more means of carrying freight from the great fields of the West for Eastern use and shipment across the Atlantic. Even before railroads, as early as 1825, the wise men at the State House puzzled over the problem, and a commission, led by Laomi Baldwin, calculated the chances of a canal, and finally decided upon a route and made up their minds that the Hoosac Mountain could not be dodged but must be tunneled. Later in the same year, however, the first American rai way began its operations on a three mile course at the Quincy granite works, run by horse power, and in the popular interest in this method of transportation the canal-tunnel project dropped out of notice.

In 1842 the Boston and Albany Railroad was opened, in 1845 the first rails of the Fitchburg road were laid, and in January, 1852, ground was broken for the Troy and Greenfield Railroad. The tunnel came as the inevitable means to unite the fragments of a great trunk line East and West. The early tribulations of the Troy and Greenfield Company are already a well known matter of history, and in 1854 the State became involved in the enterprise by loaning its credit to the amount of two millions, on condition that $600,000 should be subscribed to the stock, and 20 per cent actually paid in; that seven miles of road should be built and 1,000 feet of tunnel completed to entitle the company to $100,000 of the scrip; and that, for every additional issue of scrip, a further payment should be made to the stock, another 1,000 feet of tunnel be completed, and certain specified lengths of road built; so that in the end the whole road and tunnel would be completed before the last issue of $200,000 was made by the State. Even with this the company failed to raise the needful money, and in the following year the Legislature authorized towns along the line to take stock equal to 8 per cent of their valuation, but even this disposed of only five hundred and twenty shares as far as 1867. Notwithstanding this a contract was made with E. W. Serrell & Co., to build the road and excavate the tunnel for $3,500,000, the contractors to take $440,000 worth of stock. This failing, in January, 1856, a second contract was made with Serrell & Co., requiring that the railroad company should, before May 15, raise $100,000 of available stock over and above what had then been subscribed, making a total of $210,000 in available cash subscriptions. The company now appealed to the Legislature for a State subscription of $150,000, the State to select a portion of the contractors; but, this effort failing, the contract fell through.

In July, 1856, the engagement with Heman Haupt & Co., was begun, by which they were to build the road and tunnel for $3,880,000; $2,000,000 from the State; $900,000 in mortgage bonds of the company; $598,000 in capital stock, and $382,000 in cash. Again the railroad company could not come to time, and this contract failed. At the next session of the Legislature an act was passed making the terms of the loan by the State easier, but Gov. Gardner vetoed it, adding a prophecy that the tunnel would not be completed until 1874. At that time the mountain had been pierced 621 feet at the west end.

In February, 1858, another contract was made with Haupt & Co., to complete the tunnel for four millions. Two million dollars were State bonds to be used exclusively on tunnel work; $400,000 in the mortgage bonds of the company, and $1,100,000 in cash and capital stock, the company being released from any cash payments. The history of the work under this contract is a perplexing one and uninteresting to the general public. It was suspended in 1861, and in 1862, after a stormy time at the Capitol, the State had the tunnel fastened to it by the appointment of a Board of Commissioners to assume the direction and possession of the road under the several mortgages given to the State. At this time much work had been done at both approaches to the mountain, the east end heading had been driven nearly 2,400 feet, 2,130 being of the size prescribed by statute; a shaft had been sunk 3,000 feet from the west end, 825 feet, to grade, and had been driven 50 feet from the shaft, while the west end had been excavated for 610 feet, though this part was afterward abandoned. The western division of the railroad from North Adams to the State line, about six and two third miles, had been finished in 1858, and was operated under a lease yielding $10,000 net income on an advance of $50,000 by the State, while work had been done on the eastern division in the way of grading. The Southern Vermont road, some six miles, extending from the State line through Pownal to the Troy and Boston line, was purchased in April, 1860, for $200,000.

The Commissioners, John W. Brooks, S. M. Felton and Alexander Holmes, began their labors in May, 1862, and in September the Troy and Greenfield Railroad was surrendered to the State. Mr. Charles G. Gowan, an experienced engineer was dispatched to Europe to examine the Mont Cenis and other tunnels, new and improved appliances were obtained, and the work was vigorously advanced. The Commissioners then estimated the cost of completing the road and tunnel at $5,719,830, and the time seven and one-half years, and in 1862 an additional appropriation of $3,800,000 was made. In 1866, the Commissioners were James M. Shute, Alvah Crocker and Charles Hudson, and at their suggestion, after another stormy time in the Legislature, in which the anti-tunnel men fought for an entire abandonment of the whole enterprise, a bill was passed ordering the completion of the tunnel, to be let out at contract if it could be done in seven years for five million dollars.

The central shaft buildings, which were burned in October, 1867, were rebuilt, while the other work done may be summed up: The total length of the east heading and tunnel when the State stopped work was 5,282 feet; total length pierced from the west end eastward, in various stages of advancement, 4,056 feet; depth of the central shaft, 583 feet—leaving 14,693 feet of tunnel to be excavated, and the depth of the central shaft to be excavated still was 457 feet. In response to the Governor's proposals for bids, 12 contestants reported, among them being Gen. Herman Haupt, the bids ranging from $4,027,780 to $5,878,864. After some delay the Governor awarded the contract to Messrs. Walter and Francis Shanly of Canada for $4,623,069. The tunnel was to be built, one railroad track laid through it, and all materials removed from the tunnel by the first day of March, 1874. It was to be 24 feet in width and 20 feet high in the clear, while where arching was required it was to be 26 feet wide in the clear, and 21½ feet high above the rails when laid down. The Shanlys assumed an immense job at an immense risk. No money was to be paid until the contractors had earned the full sum of half a million dollars, but certificates to the amount of 80 per cent of the sum earned were to be delivered to the contractors. These certificates, in sums of $20,000 each, bearing interest at 5 per cent, would be redeemed by the Treasurer, provided the security should never be reduced below half a million dollars. On the completion of the whole work a sum sufficient to make the whole contract price of $4,594,268 would be paid, but until that time the payment was not to exceed that sum less than a million dollars. They took hold of the job with pluck, experience and skill, and the result has been a triumph for them and a handsome profit. In December the central shaft and the eastern shaft met, and so perfect had been the engineering that their centres met within 1-16 of an inch. Since then the work has progressed steadily and surely until its probable completion to day as far as the union of the east and west shafts and the entire opening of the mountain.

The whole length of the tunnel is 25,031 feet, and of this there remained to be done by the Shanlys 15,693 feet. During their work their number of men employed has varied from 1000 to 500, the number recently on their pay roll. They have been mostly English from Cornwall, Irish, French Canadians, and Savoyards and Piedmontese, who had worked on the Mont Cenis Tunnel. During its history 136 persons have lost their lives in or about the tunnel, the largest single number being at the central shaft disaster, Oct. 19, 1867. Experiments had been made with an apparatus for lighting the shaft with gasoline in the earlier days of the shaft, but had been abandoned as unsafe. In that month, however, Dull, Gowan & Co. were operating the shaft, and attempted to utilize the old apparatus, when, on the first day of trial, the gasoline in the tank near the engine caught fire. Thirteen men had just gone down the shaft, and, almost instantly, the whole building was in a blaze, the engineer driven from his post and all chance cut off for the poor fellows below. How the men died, or how soon they became aware of their fate, will never be known; probably they soon suffocated or were drowned by the rising water, which could no longer be held at bay. At another time one man fell from the top of the central shaft to the bottom, and was crushed to jelly.

The estimate of the auditor in May, 1872, was that the cost to the State of the road and tunnel to March, 1874, would be $12,792,233 87. The record of payments, less receipts from material sold and other receipts in offset, is as follows, as shown by the books of the Treasurer:

UNDER HAUPT & CO. CONTRACT.

Year,	Bonds.
1858	$110,475
1859	54,992
1860	307,866
1861	305,862
Total bonds delivered to Haupt & Co., four years	$778,695 00
Bonds for purchase of Southern Vermont Railroad	200,000 00

UNDER STATE MANAGEMENT.

1873 (to Oct. 1)	1,012,895 69	Not stated	
Total	$3,790,069 19	$889,526 64	$4,679,595 53

Aggregate payments thus far. $10,145,166 67

The whole of the above amount under the head of payments was not paid to the Shanlys, but a part of it went into the railroad. Estimating the cost of the railroad west of the tunnel at the full amount of a million, there still remained to be paid to the Shanlys, October 1, about $1,363,000; the enterest to March 1, 1874, will probably add $550,000; cost of approaches, $200,000, appropriated by the last Legislature; premium on a part of the interest already paid and to be paid, say $125,000. These sums, which are only estimates, amount to $2,238,000, and would make the total cost of the road and tunnel to the State about $12,380,000, which miscellaneous expenses not counted here will raise several hundred thousand dollars before the line is ready for use.

The cost of the tunnel, however, is much below these figures. More than half the sum advanced to Haupt & Co. went into the road—about $480,000; the purchase money for the Southern Vermont road, $200,000, is also to be deducted; the sum of $642,072 was expended by the commissioners on the eastern section of the road to the close of 1868; $250,000 were appropriated for the western section, and $200,000 for the approaches; making an aggregate of very nearly $1,775,000, which, with interest, must reach at least $2,700,000—leaving the actual cost of the tunnel very nearly ten million dollars.

Those who read this hardly need to be reminded that the opening of the tunnel does not mean its entire completion of the work. Much yet remains to be done in finishing it, and it is understood that its formal opening for public travel will take place on July 4 of next year, although it will doubtless be completed before then.

☞ We note by the Richmond *Dispatch* the passage of the first half of a shipment of 1,000 packages of lard over the Chesapeake and Ohio Railroad from Cincinnati, destined for Glasgow, via New York. Through bills of lading are issued, we understand, between Cincinnati and Louisville and Glasgow and other European ports by this new route. The completion of the tunnel through Richmond to the docks on James river facilitates the use of this new route of transportation.

The Coal Trade.

The fiscal years of the Reading Railroad, Schuylkill Canal and Lehigh Valley Railroad closed on the 30th of November. The total coal tonnage of the Reading, on the main line and branches, including bituminous received at Harrisburg, was 6,546,553 tons, against 6,185,434 tons for the fiscal year of 1872, an increase of 361,119 tons. The Schuylkill Canal, which is leased to the Reading Railroad Company and worked by it, carried 743,769 tons, against 838,191 last year, a decrease of 79,895 tons. The total tonnage of the Lehigh Valley Railroad for its fiscal year was 4,172,866 tons, against 3,877,170 tons in the fiscal year of 1872, an increase of 295,196 tons. The aggregate increase in the production of anthracite coal in all the several coal regions for the fiscal year just closed is 695,555 tons, distributed as follows: From the Schuylkill region 126,319 tons, from the Lehigh region 312,641, from the Wyoming 194 415, from the Shamokin in 57,384, and from the Lykens' Valley 3,825 tons. We have not yet the entire anthracite tonnage for the year, and it may be a week or two before the returns from the several sources of supply are officially reported in full. The production last year was about nineteen million tons. The increase of this year over last would have been, it is thought, at least 2,000,000 tons but for the disorganization of business and the closing of manufacturing establishments in consequence of the panic, which induced the combination to limit the production during the closing months of the year. Owing to the same cause the coal business has been conducted very cautiously in all respects of late, and the amount of coal now in the market is not, it is said, in excess of the usual accumulation at this season. The low prices in 1872 were the result of an increase of 3,400,000 tons over the previous year, and of competition between the transportation companies, which are now working together. The present policy of coal production, it is supposed, will be continued through the year 1874. The demand for this year has already slacked off materially, and the stock is likely to leave bare markets in the spring.—*Phila. Ledger.*

Northern Pacific Railroad.

On the first day of January next, the Northern Pacific Railway Company will be called upon to pay the six months interest that will be then due on its bonds. It remains to be seen in what way it will respond to that demand. The general belief has been that the company will have to declare its inability to discharge its obligations. It cannot be denied, however, that the company's prospects have been greatly brightened lately by declarations made by the present Premier of the Dominion. In those declarations, Mr. Mackenzie made two statements of immense importance to the Northern Pacific men. In the one, he cheered them with information to the effect that his Cabinet did not propose to build from Manitoba to the shores of Lake Superior a line that would be competing with that one constructed by them from the cost of that Lake to the confines of that Province, but rather to build a line through Canada's fertile belt that would serve as a grand feeder to the Northern Pacific link stretching through Dacotah, Minnesota and Wisconsin. In the other he disclosed the fact that in all probability the Canada line would be built as a Government work. These statements were, we suppose, worth millions to the Northern Pacific people. Taken together they mean from a Northern Pacific point of view, that the Canadian Pacific will certainly be commenced at an early day, and will be commenced and developed in such a way as to prove greatly helpful to Northern Pacific interests.

Thankful, doubtless, for this encouragement from Ottawa, the Northern Pacific Company looks to Washington for more immediate aid. Congress met yesterday; and it is understood that it will be asked to render additional assistance to the Northern Pacific road, though it has not transpired in what form the demand will be presented. If Congress shall adopt a policy in this matter as favorable to the embarrassed Northern Pacific Company as that unfolded to his constituents by Mr. Mackenzie, Northern Pacific bondholders will soon be in funds and in high feather.—*St. Johns (N. B.) News, Dec. 3.*

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide-water from the commencement to the close of navigation during the years 1872 and 1873, was as follows:

	Flour, bbls.	Wheat, bushels.	Corn, bushels.	Barley, bushels.
1872	137,300	11,349,100	29,928,700	4,548,600
1873	156,500	22,761,700	18,552,200	2,153,000
Inc.	16,200	11,412,600	*11,376,500	*2,395,600

* Decrease

By reducing the wheat to flour the quantity of the latter left at tide-water during the season of navigation this year, compared with the corresponding period last year, shows an increase equal to 2,298,720 bbls. of flour.

The receipts of new crop barley for the season are 2,130,800 bushels, against 4,147,100 bushels in 1872.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement to the close of navigation in the years indicated:

	1871.	1872.	1873.
Canal opened—	April 24.	May 13.	May 15.
Flour, bbls.	290,000	137,000	153,500
Wheat, bushels.	21,318,400	11,349,100	22,761,700
Corn, bushels	20,042,300	29,928,700	18,552,200
Barley, bushels.	3,839,400	4,548,600	2,153,000
Rye, bushels.	1,107,900	474,600	950,200
Oats, bushels.	6,639,400	5,696,200	3,385,900
Malt, bushels.	889,200	1,017,400	694,200
Feed, lbs.	7,248,600	8,870,000	8,828,700

☞ There are at present 105 miles of railway open for traffic in New Zealand, which have altogether cost the sum of £1,559,500, or £14,766 per mile, including rolling stock. If from this is deducted the cost of the line between Lyttleton and Christchurch, including wharfage, and the construction of the Moorehouse tunnel, we find that the total cost of the remaining 97 miles has been £1,103,500, or £11,376 per mile.

☞ The steamship Johns Hopkins, which was launched some months since at the Harlan & Hollingsworth yards, in Wilmington, Del., is nearly completed, and will start on her trial trip to Baltimore in a few days, when she will take her place on the Baltimore and Boston line, for which she was built. The Johns Hopkins will be largest and most perfect boat on the line, and will have few equals in the coastwise trade.

☞ The Shippensburg *News* says that work on the Harrisburg and Potomac Railroad has not been entirely suspended. The laying of iron and building of bridges still continue, and a corps of engineers are at work surveying and locating an extension of the road from Petersburg to Oxford, in Adams county, there connecting with the Gettysburg and Potomac, Hanover Branch, Frederick and Pennsylvania Line, and other railroads.

☞ It is believed that within two months the Consolidated European and North American Railway will be under lease to the Eastern Railroad Company, and the line from Boston to St. John will be under the management of Mr. Chas. F. Hatch.

RAILROAD EARNINGS—MONTHLY.

Total entered warehouse.	$47,080,156	$38,093,517
Add entered for consump.	84,175,020	72,916,008
Total entered at the port.	$131,255,176	$111,009,525

☞ A dispatch to the Boston *Journal*, dated Lowell, Dec. 8, says that the prospect now is that the contract for the construction of the Lowell and Andover Railroad will be concluded this week and the work immediately commenced. Many difficulties have been overcome, and the directors feel they are now warranted to proceed.

Virginia State debt.

The forthcoming report of the second auditor of Virginia, will show that the debt, exclusive of interest, is $30,478,741 49—independent of one-third, $15,239,270 84, assigned to West Virginia for payment. Of the former $8,000,000 is held by citizens of Virginia, $18,000,000 is held in other States, and $9,500,000 in Europe. If the provisions of the act of March 13, 1873, for payment of two-thirds interest be continued, the amount required to pay interest on 1st January and 1st July, 1874, will be $1,207,027 15. And there is a balance due and unpaid in money on interest payable since 1871, of $880,059 49, including interest to colleges, to literary fund, &c., the whole amount necessary to meet the interest obligations of the State next year will be $2,242,088 98. Last year $931,203 96 was actually paid in money as interest on the public debt, and $301,104 of coupons were taken in part taxes.

Statement of the Public Debt of the United States December 1, 1873.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858.....	$20,000,000 00	$416,666 67

Interest paid by United States, $20,447,988 26; interest repaid by transportation of mails, &c., $4,545,453 02; balance of interest paid by United States, $15,902,535 22.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, November 30, 1873.

WILLIAM A. RICHARDSON,
Secretary of the Treasury.

Russian Railways.

The profit realized by the Great Russian in 1872 upon itsvarious divisions was as follows:—Warsaw, 657,000 roubles; Nijni-Novgorod, 3,046,000 roubles; and Nicholas, 9,033,000 roubles; making a total of 12,736,000 roubles. The St. Petersburg and Warsaw division did little more than clear its expenses last year, having earned 8,795,000 roubles, while the current outgoings were 8,138,000 roubles. On the other hand, on the Nicholas or St. Petersburg and Moscow line the working charges were something under 50 per cent of the rough receipts. The Great Russian not only does not in the slightest degree call upon the Russian government to make good its guarantee of interest, but a second dividend over and above the guaranteed 5 per cent has been paid upon the shares for 1872. This second dividend amounts to 66 copeeks per share for the year.—*Herapath.*

☞ The County of Perth, Canada, has granted a bonus of $80,000 to the Stratford and Huron, and $40,000 to the Port Dover and Lake Huron Railroad, both projected. The town of Woodstock and a portion of East Oxford County have granted a bonus of $25,000, in aid of the Port Dover and Lake Huron Railway. The bonuses granted in aid of the Hamilton and North-western Railway amount to $574,000.

American Railroad Journal.

Saturday, December 13, 1873.

Stock Exchange and Money Market.

The movements in the Money line through the past week have shown more steadiness, with call loans quoted from 6@7, and choice to very good mercantile credits at 9@15 per cent per annum. The demand for accommodation has been active, but not particularly, urgent and in most instances has been quite promptly met at the ruling figures. The foreign financial advices have been favorable to ease in the local market. The City banks have made further considerable additions to their specie and legal tender reserves, increasing their average of gold $21,320,300 as against $19,868,000 the preceding week; and their greenback average, to $37,732,500, as against $35,399,000, on the previous return. Their deposits stood at 182⅛ millions, giving an increase of 7⅛ millions. The loan item was 252 millions, against 248 millions on the former exhibit. The circulation was 27⅛ millions, against 27¼ millions the week before. The amount of loan certificates outstanding has been reduced to about $8,000,000. These, it is thought, will all be withdrawn before the close of the year, without causing any more disturbance than the withdrawal of the $18,565,000 which has already taken place, the maximum amount outstanding at any time during the panic having been $26,565,000. The banks are almost daily sending currency to the South for cotton purposes, but not in sufficient sums to particularly effect their reserves, which are gaining, in part from the augmented disbursements of the Treasury Department.

The U. S. Sub-Treasury, last week, enlarged its currency balance $1,791,342, and its coin reserve $69,433. Its currency balance at the close of the week was $15,032,176; and its coin reserve $49,248,001.

Gold has been moderately active, and less variable as to price. The speculative inquiry has been less confident. The customs drain has been very light. The export movement limited. The extremes of the price have been 108⅜@109¼, closing on Wednesday at 109⅜ as against 108⅞ on Wednesday of the preceding week. The specie outflow, last week, was $571,468. The imports of specie at this port last week were $561,495; and since Jan. 1, have been $17,890,422 as against $5,468,096 same time last year.

The customs demand for Gold last week averaged only $230,667 a day. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $114,648,745, against $138,807,085 during the same time in 1872. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $62,897,175, against $72,801,661 during the same time in 1872. The export drain of specie since January 1, 1873, has been $46,915,196 against $69,089,961 during the same portion of 1872.

Foreign Exchange has been in fair request and held with more confidence. Bankers' sixty day bills on London closed on Wednesday at 108¼@108⅜; sight bills on London, at 109¼@109⅜. The week's exports of Domestic Produce have been to the currency value of about 5½ millions.

Government securities have been in moderate supply and generally in good request, mainly on investment account, at much firmer and well supported prices.

U. S. sixes of 1881 closed on Wednesday of this week at 117⅞@118¼; U. S. Five-Twenties of 1862, 111¼@111½; U. S. Five-Twenties of 1864 at 113¾@114; U. S. Five-Twenties of 1865 114¼@114½; U. S. Five-Twenties of 1865 consolidated 117@117½; U. S. Five-Twenties of 1867, 117¾@118; U. S. Five-Twenties of 1868, 117¼@117¾; U. S. Ten-forties at 110½@111; U. S. Fives of 1881 (Funding Loan) 110½@110¾; Six per cent. currency Sixes from 110¼@110½.

A livelier movement has been noted in Railway and Miscellaneous securities, prices of which, however, have been quite variable, closing buoyantly.

State and Railway bonds have been in good demand, and quoted firmer. Central Pacific first mortgage six per cents closed at from 95@95½.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $5,093,110, as compared with $3,943,566 same week last year. The exports of domestic produce are $5,170,064, as against $4,586,084 last year. The exports of Gold and Silver, $517,467, as against $699,632 last year. The customs in Gold deposited during the week in the

New York Office of the Treasury amounted to $1,386,400, comparing with $1,941,815 same week last November.

General business has been quite active. Breadstuffs, Provisions, and Cotton have been quite quite freely dealt in. Prices have been quoted stronger, but close irregularly. Petroleum, Naval Stores, and Tobacco have been moderately sought after. Wool, has been much brisker, and has been quoted 2@3cts. per lb. dearer, closing buoyantly. Groceries have been in fair request, Coffee again advancing. Hides have attracted more attention, and have been quoted firmer. Building materials have been quiet and weak as to values. The Metal trade has been generally dull. Copper has been in less demand with prices ruling lower; sales, 300,000 lbs. Lake at 24½c.@24¾c., cash; closing at 24¾c., cash, and 25c., January. Scotch Pig-iron has been quiet and firm. Of Wrought Scrap, 150 tons, from yard, were sold at $38 50. We quote: Eglinton Pig at $40@$41; Glengarnock $42; Coltness, 45@$46; Gartsherrie, $48; No. 1 American Pig at $32@$35; No. 2 do. $28 50@$30; Gray Forge, $25@27; English Rails at $60, gold; American Rails, at works, $65; Old Rails, 35 50 @$36; Wrought Scrap, $38 50. Pig-lead has been in light demand, with foreign quoted at 6⅞d. @7c., gold, for ordinary, and domestic at 6c.@6⅛c., gold; Bar, 9¼c.; Sheet and Pipe, 10½c.; Spelter has been dull at 7⅜c., gold, for foreign. Pig-tin has been dull, with Straits quoted at 28c., gold; English at 26c., and Banca at 32½c.@33c.; Plates have been in fair demand and firm; sales, have been 1,000 bxs. Charcoal, $10 50, gold; 2,000 bxs. Coke, January, $1 25, do.; 1,000 bxs. Charcoal Terne, $4 75, do.; 500 bxs. Coke Terne, $8 25, do.; 500 bxs. Charcoal Terne, $9 50, do.; Charcoal Plates quoted at $10 25@$10 75; Charcoal Terne, $9 50@$10; Coke, $8@$8 50; Coke Terne, $7 25@$8 25, gold, per box. At the Live Stock market, trade has been fair, and prices closed about steady. Ocean freights have been lower, and moderately active.

☞ The earnings of the Union Pacific Railroad for October, 1873, were $1,170,586 41, the expenses (including $99,947 84 taxes) $594,763 67, and the net earnings $575,822 74. In October, 1872, the earnings were $980,706 11, the expenses, $538,878 35, and the net earnings $441,827 76—showing an increase in earnings of $189,880 30, with an increase in expenses of $55,885 32, making the increase in net earnings $133,994 98. From January 1 to October 31, 1873, the earnings were $8,536,611 02, the expenses $4,287,646 42, and the net earnings $4,248,964 60—showing an increase in gross earnings compared with 1872 of $1,817,583 64, and an increase in net earnings of $1,116,338 44.

☞ The Fredericksburg, Orange and Charlottesville Railroad has been taken possession of by the State of Virginia, the charter being forfeited by non-compliance of the company with the terms of the charter, the road not being completed at the specified time.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending November 29, at 338,972 tons, and for the coal year 18,634,344 tons, against 17,858,179 tons to corresponding time last year, being an increase of 776,165 tons. The bituminous tonnage for the week is 70,829 tons, and for the year 3,093,285 tons, giving a total of all kinds for the week of 459,799 tons, and for the year of 21,727,629 tons, against 20,476,030 to same time last year, being an increase of 1,251,599 tons.

☞ The earnings of the Central Pacific Railroad for the month of November, 1873, were $1,296,812, against $1,293,957 in November, 1872, and $897,282 in November, 1871. For the first eleven months of 1873 the earnings have been $11,906,402, against $11,886,969 for the first eleven months of 1872, and $8,794,718 for the first eleven months of 1871—an increase this year over 1872 of $1,019,433, and over 1871 of $3,111,689.

☞ The Baldwin expedition has arrived at Salt Lake City, and reports the discovery of what is claimed to be the only practicable route for the proposed railroad, to connect that section of the country with the Texas and Pacific Railroad on the thirty-fifth parallel. It passes through the iron and coal region of Iron county, Utah, to St. George, and thence down the Virgin and Colorado rivers.

☞ The location of the Lowell and Andover Railroad has been filed with the commissioners of Middlesex county, and the building of the road will be at once begun. Mr. D. B. Bartlett has been elected secretary and treasurer of the company.

☞ The semi-annual dividend on the preferred stock of the Ohio and Mississippi Railroad Company due December 1, is payable in scrip, the scrip being payable March 1, 1875, and bearing 7 per cent interest.

☞ The earnings of the Erie Railway Company for the week ending Nov. 30, 1873, were $359,025, and since Oct. 1, $3,442,444—a decrease compared with the corresponding period of the previous year of $120,654.

☞ The Richmond and Danville Railroad Company has mortgaged its Railway and other property to secure $1,500,000 bonds, to be issued to discharge its obligations. The trustees are Isaac H. Carrington and John C. Williams.

☞ The Secretary of the Interior has accepted the portion of the Cairo and Fulton Railroad between Little Rock and Fulton, 126 miles—in accordance with the report of the commissioners.

☞ Alexander Rieman has been appointed president *pro tem.* of the Western Maryland Railroad Company.

☞ Oliver Ames has been elected a trustee of the Union Pacific Railroad, to fill the place made vacant by the death of Oakes Ames.

☞ The Mississippi Central Railroad has been completed to Cairo.

☞ Cars are now running over the Nashua and Rochester Railroad from Rochester to Lee.

Illinois Central Railroad.

The statement of this Company for the month of November, 1873, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	1,326.28	for	$10,812 63
Acres Interest Fund Lands Sold	.....	for	.....
Acres Free Lands Sold	120.00	for	1,640 00
Total sales during the m'th of November, 1873	1,446.28	for	$12,452 63
To which add Town Lot Sales	.....	for	.....
Total of all	1,446.28	for	$12,452 63

Cash collected in Nov., 1873 ..... $38,396 83

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$310,902 00	$98,328 00	$409,230 00
Passengers	94,527 50	35,595 10	130,122 60

LATEST IMPROVED STANDARD.

Our Patented Double Beam Wrought Iron Lever Rail-Road Track Scale acknowledged the BEST.

MAKERS of the NEW TESTING MACHINE.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

New York, Saturday, December 20, 1873.

Boston and Maine Railroad.

The annual meeting of the stockholders of this corporation was held in Lawrence, Mass., on the 10th inst. The meeting was called to order by the President, Mr. N. G. White. The call for the meeting, together with the records of the last annual meeting, and the special meeting held June 4th, having been read by Mr. C. P. Judd, the clerk of the corporation, the president presented the report of the directors, (an abstract from which is given in our present issue,) which was accepted by a unanimous vote. In answer to an inquiry whether the last dividend had been paid from earnings, or from money hired for that purpose, the president replied that it was paid with money hired for the purpose. The earnings had been expended in construction. A question was asked if a dividend was ever paid before it was earned. The president replied that there never was. The present dividend had been earned, but the money had been expended in construction. An inquiry was then made as to what interest was paid on the money hired for the last dividend. The President stated that some of the money for the last dividend had been hired at seven per cent, and some at eight and nine per cent, and its payment was delayed on account of the money panic, in order to avoid paying one or one and a half per cent a month.

The president then submitted an amendment to the by-laws providing that the directors of the company be nine instead of seven in number, which was adopted, and the following gentlemen elected directors for the ensuing year:

Nathaniel G. White, Lawrence; George C. Lord, Boston; Amos Paul, South Newmarket, N. H.; Nathaniel J. Bradlee, Boston; William S. Stevens, Dover, N. H.; James R. Nichols, Haverhill; John F. Osgood, Boston; Samuel E. Spring, Portland, Me.; Nathaniel W. Farwell, Lewiston, Me. The first four named are re-elected.

The following resolutions, presented by Wm. G. Means of Andover, were adopted almost unanimously:

Resolved, That the true policy of the Boston and Maine Railroad is to keep entirely clear of all entangling alliances with the Eastern Railroad; and that our directors and attorney, present and prospective, be, and hereby they are, instructed to use their best efforts and incur all needful expense to prevent any and all consolidation schemes, whether by legislative enactment, by leasing the Eastern Railroad or being leased by it, or in any other way whatever.

Resolved, That though the cost of the extension of our road into Portland has been more than was expected, yet we have undiminished confidence that by careful and economical management it will in the future as in the past pay its stockholders fair and reasonable dividends, and with which they will be satisfied.

The next article of the call was to act upon the question of funding the debt of this company and providing means for the completion of its road by the issue of bonds or otherwise, and the President submitted the following vote, which was unanimously adopted:

Voted, that the Directors be and hereby are authorized to issue the bonds of this corporation to an amount not exceeding two million dollars of which a portion shall be $500 bonds, payable not more than twenty years from date, with interest at a rate not exceeding seven per cent in currency or six per cent in gold per annum, payable semi-annually, for the purpose of providing means for the completing its road and of funding the floating debt of the corporation.

The president stated that the completion of the road would add about $20,000 to their debt, but the land damages would be much larger. He thought the vote would complete the road and build the depots, etc.

At a meeting of the new board of directors held on the 13th inst., Nathaniel G. White, of Lawrence, was unanimously elected President, and Chauncy P. Judd Clerk.

Philadelphia and Reading Railroad.

The following is a correct statement of the coal tonnage of the Philadelphia and Reading Railroad for 1873:

The total shipments of Anthracite paying freight was	5,880,149
Bituminous received at Harrisburg	310,267
Total tons paying freight	6,190,416
Anthracite consumed by Co.	343,050
Bituminous "	13,088
	356,138
Total quantity transported in 1873	6,546,554
" " 1872	6,185,434
Increase in 1873	361,120

Of the above quantity of Anthracite, 407,261 tons were derived from the Lehigh and Wyoming regions, against 321,146 tons in 1872—increase, 86,115 tons in 1873.

There were 310,267 tons of Bituminous coal received at Harrisburg against 452,835 tons in 1872. Decrease, 142,568 in 1873.

The 5,880,149 tons of anthracite coal was sent as follows:

Main line and Lebanon Valley	4,187,687
Over laterals per canal	785,047
West over Northern Central	301,888
South and West from Pinegrove	107,686
Consumed on laterals	190,771
Received from Lehigh and Wyomi g	407,261
Total, as above	5,880,149

While the coal tonnage shows an increase of only 361,120 tons over last year, the advanced tolls and transportation for the year will give a large increase in the revenue of the company for 1873 over 1872.

☞ The directors of the Baltimore and Ohio Railroad have unanimously re elected John W. Garrett president for the ensuing year. In the absence of Mr. Garrett in Europe, John King, Jr., was unanimously elected president pro tem.

Union Pacific Railroad.

The Union Pacific Railroad Company report the number of acres of land sold in November, 1873 at 13,865, for $68,990 50
Average price per acre..... 4 97
Total sales to Nov. 30, 1873, 832,966 acres for $3,774,191 99
Average price per acre..... 4 53

Lands belonging to the company remaining unsold, 11,247,083 acres.

Land grant bonds issued.....		$10,400,000 00
Less canceled by department.....	$1,456,000	
Less canceled by trustees	352,000	
		1,808,000 00
Leaving bonds outstanding...		$8,592,000 00
Land notes on hand, principal, (interest not included Nov. 30, 1873		$1,996,797 00

Boston and Maine Railroad.

The following is a comparative statement of the earnings and expenses of this road for the years ending September 30, 1872, and 1873:

Earnings:	1871-'72.	1872-'73.
From passengers..	$1,092,600 49	$1,302,190 55
" freight.....	813,204 26	820,512 44
" rents.....	43,423 35	42,022 16
" mails.....	14,625 83	14,551 25
" interest.....	41,470 86	78,409 35
" expresses ...	40,917 90	42,407 93
	$2,046,142 19	$2,300,093 68
Expenses, viz:		
Repairs of road....	$199,019 83	$216,657 51
" bridges.....	47,277 92	27,530 20
" fences, etc..	15,793 15	10,324 31

" locomotives.	79,747 08	88,658 86
" cars.....	136,775 77	88,466 67
Removing ice & snow	990 11	6,264 88
Switch, gatemen, etc	60,938 31	77,516 20
Passenger expenses.	195,721 87	232,349 84
Freight expenses ..	165,679 80	188,430 84
Wood.....	60,988 34	56,960 75
Water.....	8,461 77	6,282 37
Oil and waste.....	21,031 49	26,109 18
Gratuities & damages	21,641 86	11,585 44
General expenses...	39,924 19	37,364 20
Taxes.....	81,525 04	86,168 61
Insurance.....	8,027 14	10,749 89
Danvers R. R. rent..	7,500 00	7,500 00
Coal for locomotives.	146,315 58	204,816 52
Renewal of rails....	137,824 77	188,868 13
Interest paid.....	.....	74,434 55
Telegraph.....	4,793 27	5,678 93
Bond interest due July 1, 1873.....	.....	33,862 50
	$1,538,823 11	$1,727,825 00
Net earnings...	$507,319 08	$572,268 68
Add balance September 30, 1872.		1,016,686 48
Total.....		$1,588,955 16
Deduct dividend 4 per cent May 15, 1873.....		280,000 00
		$1,308,955 16
Less profit and loss account.....		290,677 46
General reserve account, March 31, 1873.....		$1,018,277 70

The above balance of $1,018,277 70, is invested as follows: in Newburyport Railroad bonds, $303,766; in Danvers Railroad bonds (guaranteed by this corporation) $78,000; in the Danvers Railroad contract and stock, $27,430; in the Dover and Winnipiseogee Railroad stock, $268,144 48—and the remainder in expenditures on the road, rolling stock, etc., in addition to the capital received from the sale of stock. It is therefore only an element indicating in some measure, the value of the stock above par; but it is not available for the payment of debts or dividends. The president in his report says:

The gross receipts of the year ending September 30th, 1873, were..	$2,300,093 68
The operating expenses were.....	1,727,825 00
Net earnings for the year	$572,268 68

Being a little more than eight per cent upon the whole capital authorized.

The gross earnings of the twelve months ending September 30, 1872, were $2,046,142 19, and the expenses for the same time were $1,542,026—showing an increase in the receipts of the present year over the previous year of $253,951 49, and in the expenses of $185,799. The net income for the year ending September 30, 1872, was $504,116 19—showing an increase in the net income of the present year over the previous year of $68,152 49.

The expenses of the past year have been large; this results in part from the severity of the last winter, which for the transaction of railroad business was the most severe known for years, and put to the severest test all our rolling stock, increasing greatly our expenses.

The extra cost of steel rails over that of iron has been about forty dollars per ton, all of which has been charged to our running expenses.

We have applied the Miller platform to most of our cars, and the air brake to many of our cars and engines, both of which outlays the public demanded. These improvements have cost us a large sum of money, but we believe they add much to our safety in the running of trains.

The passenger and freight business of the past year, as compared with that of the year previous, stands as follows:

	1872.	1873.
Passengers carried.....	4,135,469	5,008,074
Do. carried one mile....	57,247,475	61,760,456
Tons of freight carried...	420,722	542,004
Do. carried one mile....	20,769,207	20,927,664

Showing a net gain of 872,605 passengers; and for one mile, 4,512,981; and in freight a gain of 21,282 tons; and for one mile, of 158,457 tons.

During the year we have added to the equipment 18 new passenger cars, including 3 parlor cars; 1 long baggage car, besides 177 freight cars; 1 long freight buggy car, and 1 snow plow. We have also added two first class passenger, and four first class switching engines. We have now 120 passenger cars, including 3 parlor cars, 1,400 freight cars, and 69 locomotives. Our road bed and superstructure has been kept in good condition, and at the present time is believed to be equal to the best road in New England. We have constructed a new draw in our bridge over Miller's River at an expense of twenty-seven thousand dollars, and finished the widening of our bridge over Charles River, on account of which we have paid during the past year $54,356,79. We have built a new brick house at Lawrence, and a new passenger house at Reading, at a point about one half a mile above the present station. All our local Reading trains will run to and depart from this new station. This is done for the purpose of developing a large territory most eligibly located for building purposes. Already some half a dozen first-class dwellings have been erected near the site of our new station in anticipation of the increased railroad facilities to be secured at that point. About four acres of land have been secured to us by those interested in the building up of this new territory. This land will be required by us for additional room for the erection of car houses, an engine house, etc.

A new brick passenger house is now being constructed at Dover. Also, a new passenger house has been contracted for, to be erected at Bradford, so soon as the necessary consent can be obtained from the selectmen and the Railroad commissioners for a change in the location of the station at that point.

On the sixth day of December last, the last rail was laid on our extension to Portland, and on the fifteenth day of February, thereafter, through freight trains commenced running over our road from Boston to Portland, and a month later, through passenger trains. Since that time we have run our regular passenger and freight trains between the two cities. We have not yet obtained that connection at Portland with the Maine Central road, for either passengers or freight, which we believe the public are entitled to by the charter of that road, and the laws of the State of Maine. The public are compelled, by the policy adopted by the Maine Central Railroad managers, to tranship at Portland at great expense and inconvenience, all freight, and all passengers and their baggage.

We know well that this opposition by the Maine Central road to the opening of a through line from Bangor to Boston over the Boston and Maine Railroad, is a much greater hardship to the people of the State of Maine than to the stockholders of this road. We are content to await the final action of the courts, and the people, who will most surely apply a remedy that will hereafter set at defiance the iron monopoly to which they are now subjected.

We have now completed our road to Maple Street, the point designed for the location of our permanent passenger station in Portland.

Near this point we cross commercial Street to our wharf. By means of this crossing, we form an indirect connection with the Grand Trunk road for freight purposes. We hope soon to make the direct connection with this great and important line of road to the West, and thus secure the same facilities for passengers which are possessed by other roads.

The subject of obtaining communication with deep water in Portland early suggested itself to your directors, and after more than fifteen months negotiations with the owners of various wharf property in that city, they, on the fifteenth day of May last, brought these negotiations to a close by the purchase of Smith's wharf, at an expense of $200,000. This wharf is situated directly opposite the grounds intended for our permanent passenger house. The wharf property contains about eight and one half acres, about five of which is solid, and the balance dock, with a frontage on Commercial Street of four hundred and twenty-six feet, and a depth of about one thousand feet, on which are several large and substantial warehouses of brick and wood, with a track for both broad and narrow gauge cars extending the whole length. By means of this purchase, and the rail connection secured thereby, we are enabled to place our cars within the yards of the largest lumber dealers in Portland, and within the means of close connection with steamers for Halifax, St. John, Bangor, Mt. Desert, etc. This property is now largely occupied by lumber and coal dealers, and pays us in rental a little more than five per cent on our investment, and since its connection with our main track by means of the frog across Commercial Street, and the indirect connection with the Grand Trunk road, our freight receipts from this connection alone have been increase at least two hundred dollars per day. At the close of business on the 30th day of September last, there had been expended on account of the extension in Maine, $3,941,822 76, as follows:—

Graduation and masonry.....	$1,545,664 70
Land.....	1,106,228 42
Engineering and other expenses...	157,242 86
Superstructure, including iron.....	649,744 01
Bridges.....	311,834 75
Stations and buildings.....	145,807 71
Fences.....	25,300 31
	$3,941,822 76
Less amount expended as per last report.....	2,140,029 48
Amount expended year ending September 30, 1873.....	$1,801,293 28

This amount exceeds the expectation of your directors; but a look at the items will disclose to you the very large amount expended for land,

which includes not only your right of way as settled for, but also most of the lands purchased along the line of your extension, in the various towns and cities through which we pass, and at Portland, together with your extensive wharf property in Portland.

Some of this land can be disposed of at a considerable advance on the sum paid for the same, when our road is fully completed, and we are enabled to see what we requre. In this connection it is proper to say, that this extension of your road in Maine, in respect to its allignment and grades, and consequent facility of operation, the adaptation of the location of its business, the strength and stability of its masonry and bridges, and the general thoroughness of the work, challenges a comparison with any other forty-four miles of railroad ever built.

By an act of the Legislature of Massachusetts, approved March 15, 1873, this corporation was authorized to build a wharf in Somerville, on the southerly side of Mystic River. On the twenty-second day of May last, operations were commenced under the authority of said act, and have progressed favorably. We have built of pile structure about twelve hundred feet in length by thirty one feet wide; have constructed on the west side of our bridge at this point a substantial sea wall, 625 feet long, and 10 feet high; and have dredged already a space some 60 feet wide, the whole length of the pile structure to the full depth required. We hope to have the whole completed early next year. We have expended up to October 1, 1873, on this improvement at Mystic River, not including the original land purchase, the sum of $61,412 53.

We have expended in construction during the past year on our new location between North Andover and Bradford, $13,406 95, making the whole expenditure for this improvement to the present time, $205,504 64.

On the nicth day of January last, the West Amesbury Branch Railroad, which is leased to this corporation, was opened to the public, since which time trains have run three times each way daily, between West Amesbury and Newton Junction, connecting at that point with trains on our main line.

By the extension of this branch about four miles to Amesbury Mills, our main road would add considerably to its present business from the branch.

In accordance with your vote passed on the fourth day of June last, your directors have entered into an agreement for a lease of the Lowell and Andover Railroad, which we have reason to believe will be constructed at an early day, and prove beneficial to this road.

The whole length of road constructed by this corporation is 126¼ miles. The whole length now operated by us, including the Danvers, Newburyport, Dover and Winnipisseogee and West Amesbury Branch Railroads, is 192¼ miles.

The question of title to that portion of our freight premises, in Boston, seized by the Eastern Railroad Company, under the authority of an act of the Massachusetts Legislature, has been submitted to the courts, and decided against us. The land thus taken is very valuable, but has not yet been paid for; a commission to be appointed will fix the value of the same.

Since our last annual report, business has received severe blows from many disturbing elements. Early in the fall of 1872, came the horse distemper, affecting not only the business of Boston but that of all New England. Following close upon this came the terrible conflagration in Boston, on the 9th and 10th of November, the results of which created enormous disturbances in all business relations and connections, by the laying waste of about seventy acres of land, and the absolute loss of nearly $80,000,000 of property; and more recently the money panic, seriously affecting the general business of the country, and especially all business upon which railroads rely for their support.

Notwithstanding all these disturbing elements, the business of our road during the past year has been satisfactory, with a handsome increase over the year previous.

CONDENSED BALANCE SHEET, September 30, 1873.

Construction		$8,817,441 27
Equipment—locomotives and cars		1,335,404 21

President.—NATHANIEL G. WHITE.

Directors.—Nathaniel G. White, Lawrence; George C. Lord, Boston; Amos Paul, South Newmarket, N. H.; Nathaniel J. Bradlee, Boston; William S. Stevens, Dover, N. H.; James R. Nichols, Haverhill; John F. Osgood, Boston; Samuel E. Spring, Portland, Me.; Nathaniel W. Farwell, Lewiston, Me.

Treasurer.—A. BLANCHARD.

Superintendent.—JAMES T. FURBER.

The Mexican Railroad Charter.

The Galveston *News* has mail advices that the company which has obtained the right to build a railroad from the Rio Grande to the city of Mexico is that of "The Fourteen Merchants," and says:

The difficulty of dealing satisfactorily with the railroad question at the Mexican capital is that, while the Mexicans want railroads, and want American capital and enterprise to build them, they want to have no trace of American nationality connected with their business management or their public utility.

It would also appear from the statements of the Mexican press that the company to which the Mexican Congress has awarded the contract for an international railroad system, though calling itself distinctively Mexican, contains a larger foreign ingredient, and less guarantee of an administration purely Mexican, than either of its competitors. There is something under the surface doubtless—some wheel within a wheel—to explain this seeming contradiction.

Abstract of the Report of the Postmaster General.

The report of the Postmaster-General for the fiscal year ended June 30th, 1873, furnishes the following information of the workings of the Department:

The ordinary revenues of the Department for the year were $22,996,741 57, and the expenditures of all kinds $29,048,945 67. In 1873 there was an increase of revenue over 1872, of $1,081,815 20, or nearly five per cent, and an increase of expenditures of $2,426,753 86, or over nine per cent. The increase of revenues over 1871 was nearly fourteen and a half per cent, and the increase of expenditures nineteen and a quarter per cent.

If, in addition to the ordinary revenues, the Department is credited with the amounts drawn and expended for subsidies to mail steamship lines ($725,000), the amount drawn from the general Treasury under the appropriations to meet deficiencies during the year will be $5,265,475, against $3,817,765 94 in 1872. To the deficiency for 1872, however, are to be added the standing appropriations for free matter amounting to $700,000, which have since been repealed.

The estimated deficiency for the year ending June 30th, 1875, is $4,686,863. This does not include mail steamship subsidies, amounting to $1,225,000. The net balance of deficiency appropriations to June 30th, 1873, is estimated at $4,272,681.

The number of adhesive postage stamps issued during the year was 601,931,520, representing	$16,681,189 00
Stamped envelopes, plain, 65,014,600 representing	1,722,512 00
Stamped envelopes, "request," 52,201,250, representing	1,544,567 00
Newspaper wrappers, 18,956,760, representing	140,567 50
Postal cards, 31,094,000, representing	810,940 00
The total number of stamps, stamped envelopes, newspaper wrappers and postal cards was 764,198,120, of the value of	20,399,775 50

The increase in the issue of adhesive postage stamps during the year has been over five and a quarter per cent; of stamped envelopes, requests, nearly eleven per cent, and the decrease of newspaper wrappers nineteen and three-quarter per cent. The aggregate increase was nearly seven per cent, and this does not include the use of postal cards of the value of $310,940, of which no sales were made during the preceding year.

The number of packages of postage stamps lost in the mails during the year was three, representing $59, and of stamped envelopes one, representing $8 45, and of postal cards none; being the smallest losses ever incurred during any year. This is undoubtedly owing to the fact that all packages of postage stamps, stamped envelopes, newspaper wrappers, and postal cards are registered, and illustrates in a most effective manner the security of the registry system.

There were in the service of the Department, on the 30th of June, 1873, 5,930 contractors for the transportation of the mails on public routes. There were, at the close of the year, 2,359 "special" offices, each with a mail-carrier, whose pay from the Department is not allowed to exceed the net postal yield of the office. Of public mail routes in operation there were 7,424, aggregating in length 256,210 miles; in annual transportation, 119,909,650 miles; and in annual cost, $13,635,841. Adding the compensation of railway post office clerks, route agents, mail route

sengers, local agents, mail messengers, and baggage masters in charge of registered packages, amounting to $2,525,682, the aggregate annual cost was $16,161,034.

There was an increase over the preceding year in length of routes of 4,812 miles; in annual transportation, 4,925,328 miles; and in cost, $1,063,077. Adding the increased cost for railway post-office clerks, route, local and other agents, $318,749, the total increase in the cost was $1,281,826.

The railroad routes have been increased in length 5,546 miles, and in cost $754,425 against an increase last year of 8,077 miles in length and $777,792 in cost.

The readjustment of pay on railroad routes is to be made on returns of service for the month of October, which have not yet been received, but the readjustment will date from the beginning of the present fiscal year. The number of new railroad routes put in operation during the year was 61.

Post route maps of Illinois, Missouri and Iowa have been published and distributed during the year. The fines imposed on contractors amounted to $75,277 53, but some were remitted, leaving the total amount of fines and deductions for failures and delinquencies, $66,660 45.

The through mail tables exhibit an improvement in the service between New York and San Francisco, the average time westward, during the year ending 30th Sept., 1874, being 179 hours 4 minutes, a little less than seven and a half days, against 216 hours 23 minutes, or more than nine days, the preceding year; and the average time eastward, 174 hours 59 minutes, a little over seven and a quarter days, against 197 hours 45 minutes, or nearly eight and a quarter days, the preceding year. Between Washington and New Orleans the average time was about four hours more going north, than during the preceding year.

The number of recorded complaints for the past year of missing letters was 6,465, of which 3,980 were unregistered, and 2,185 registered, containing in the former, as reported, in bonds, drafts, and currency, $309,123 53, and in the latter $70,421 91. Of the registered letters, 899 were accounted for, 313 are reported as actually lost, and 973 are still in the hands of special agents for investigation. During the year 302 persons were arrested for various offences against the postal laws and regulations. Of these 94 have been convicted, 20 have been acquitted, 193 are awaiting trial, and 95 have been discharged for want of proof sufficient to insure conviction.

The number of railway post-office lines in operation on the 30th of June, 1873, was 59, extending over 14,866 miles of railroad and steamboat routes—an increase of two lines and 749 miles over the preceding year. The number of clerks employed was 752, at annual cost of $941,000—an increase of 108 clerks and $119,400. Counting all the lines both ways, the aggregate service is 24,925 miles daily.

The total number of letters exchanged during the year with foreign countries was 27,450,185, an increase of 3,096,685 over the number reported for 1872. Of this number, 14,332,674 were sent from and 13,126,511 were received in the United States. The number of letters (single rates) exchanged in the United States and European mails was 19,585,514, an increase of 1,902,515, over the number reported for 1872. The total postages on the letters exchanged with foreign countries amounted to $2,021,810 86, an increase of $150,053 61 over the amount reported for 1872.

The aggregate amount of postage (sea, inland and foreign), on the letter mails exchanged with Great Britain and Ireland, Germany, France, Belgium, the Netherlands, Switzerland, Italy, Denmark, Sweden, Norway and Spain, was $1,406,507 50, an increase of $102,654 45 over the amount reported for 1872. The postages on letters sent exceeded the postages on letters received from the same countries, in the sum of $22,934 58, being 1.63 per cent of the aggregate amount. The postages collected in the United States amounted to $865,511 47, and in Europe to $540,996 03; the excess of collections in the United States being $324,516 44, or 23 per cent of the entire postage receipts on European correspondence.

Comparing the year 1873 with the year 1872, the rate of increase in the total number of letters exchanged with foreign countries was over 12 per cent, and the rate of increase in the amount of postages thereon was 8 per cent. The increase in the number of letters exchanged with European countries was 10¾ per cent. and the increase of postages thereon amounted to 7¾ per cent.

The cost of the United States trans-Atlantic mail steamship service for the year 1873 was $226,745 77, being an increase of $6,440 07 over the cost of the same service for the year 1872.

The total cost of the United States ocean mail steamship service for the year 1873 (including $725,000 paid from special appropriation for steamship service to Japan and China, to Brazil and to the Hawaiian Islands) was $1,047,271 35.

A postal convention has been concluded with Belgium, reducing, on and after July 1, 1873, the single rate of letter postage from 10 to 8 cents, by closed mail, *via* England, and to 6 cents by direct steamers. An exchange of postal cards with Canada, and also with Newfoundland, has been established on a basis of a prepaid postage of 2 cents.

A similar arrangement has been concluded with the Post Department of North Germany for the mutual exchange of United States and German postal cards, on prepayment of a postage of 2 cents on cards from the United States for Germany, and of one silber greschen on cards from Germany for the United States.

A proposition to the British office for a like arrangement for an exchange of United States and British postal cards has been declined by that office.

A postal convention, establishing and regulating an exchange of correspondence between the United States and the Empire of Japan, by means of direct lines of steamships plying between the seaports of the two countries, has been formally agreed upon and executed with the Charge d'Affairs of Japan at Washington, and is to be carried into effect six months after its ratification by the government of Japan.

The number of post offices established during the year was 2,462; number discontinued, 1,081; increase, 1,381; number now in operation, 33,244; number filled by appointment of the President, 1,363; by appointment of the Postmaster General, 31,881. The total appointments made during the year numbered 8,788, of which 4,802 were in consequence of resignations, 383 because of death of postmasters, and 945 on account of removals. The free delivery system has been in operation during the year in fifty two of the principal cities, with the following aggregate results:

Number of letter-carriers	1,499
Mail letters delivered	140,958,887
Local letters delivered	38,340 049
Newspapers delivered	43,390,665
Letters collected	137,065,699
Newspapers collected	15,500 373
Whole number of pieces handled	374,915,664
Amount paid carriers, including incidental expenses	$1,422,495 48
Average cost per piece	3.8 mills
Amount of postage on local matter	$1,112,251 21

The per centage of increase in receipts of local postage was two-tenths of one per cent. and of cost of service only two hundredth of one per cent. The average of population to each carrier is estimated at 3,690, and the Postmaster-General expresses the opinion that the free delivery system might be advantageously used for cities having a population of 10,000. The department officers and employes number 354, against 346 last year, and other officers and agents 47,010, against 44 655 during last year. These are divided as follows: 33,244 postmasters, 5,930 contractors, 4,025 clerks, 1,499 letter carriers, 862 route agents, 752 railway post office clerks, 171 mail route messengers, 110 local agents, 63 special agents.

The operations of the Dead Letter Office were as follows:

Number of domestic letters received, 4,133,928; number of foreign letters, 268,420; total 4,402,348, representing an actual or nominal value of $5,795,764 11. Of this number, 1,826,108, representing $5,377 923 27, were delivered to owners or writers; 31,888, representing $132,993 33, which could not be delivered, were filed for reclamation; 11,280 remained either on hand not acted upon, or were outstanding in the hands of postmasters for delivery June 30, 1873, and representing $284,847 51; and 2,533,482, which either could not be delivered, or from various causes were worthless, were destroyed. The number of applications for dead letters was 6,598, and in 2,075 cases the letters were found and forwarded to applicants or owners.

The amount received from the Dead Letter Office and deposited in the Treasury was $10,351 61. The number of money order post offices during the year was 2,775, and on the 7th of July, 299 additional offices were established and 5 discontinued. The aggregate value of money orders issued was $57,516,216 69, and the excess of issues over payments was $221,204 42. The amount of fees paid for orders was $354,602 55. These returns show an increase in the value of orders issued and paid of eighteen and a half per cent, and of fees paid of one and a quarter per cent. The excess of receipts over expenditures of the money order system was $68,584. Twenty-three remittances, amounting to $5,557 31 were reported lost, and of these $2,034 27 were recovered, and claims amounting to $780 are pending. Payment of twenty-two orders amounting to $613 80, was secured, it is claimed, through forgery, being at the rate of one fraudulent payment for 150,673 legitimate payment. In twenty-one cases the amount of the orders was recorded, and in six cases the postmasters were held responsible for the payment. The number of international postal orders issued in this country was 88,207, amounting to $1 863,512 37. The number of such orders paid here was 22,699, amounting in value with the exception of those from the German Empire, to $213,897 19. The net revenues derived therefrom was $38,442 83. The issues of postal cards, from May 1st to June 30, numbering 31,094,000, and the total issues to September 30th, 64,302,300. The practical working of the Post-office Department has been much improved by the abolition of the franking privilege. The stamps issued to the several departments, under the new law, numbered 20,055,410, valued at $896,213 70. The stamped envelopes numbered 5,423,400, valued at $157,322 56. The largest issues were to the Post-office, Treasury and Interior Departments. Notwithstanding the abolition of the franking privilege the value of issues of stamps has increased during the first quarter of the present year nearly five and a half per cent over the issues for the corresponding quarter of last year. The average per centage of increase since 1869 has been seven and eight-tenths per cent. The sale of postal cards and the issue of official stamps increased the total per centage of issues over those of the first quarter of 1871 by over 35 per cent. It is not expected, however, that this per centage will be maintained throughout the year. The annual cost of free matter, if charged with the regular rates, is estimated to have been two millions and a half of dollars.

The Postmaster recommends that newspapers and periodicals be transmitted through the mails without stamping, but that publishers be required to prepay postage on the estimated number of copies to be sent through the mails during the succeeding three months, the estimates to be sworn to as true and corrections of the number to be made in the succeeding estimates. Also that the postage on matter of the third class which includes samples of all kinds, be made uniform at one cent for each two ounces or fraction thereof, and that the maximum weight of packages be increased from two to four pounds. Also that persons be permitted to write forms of presentation on books, magazines and articles of the third class

without extra charge. He also recommends the establishment of Post-office Saving Banks and of the Postal Telegraph, and enters into an elaborate argument to show the necessity for both.

Finances of Wisconsin.

The receipts into the State Treasury of Wisconsin for the fiscal year ending with September, 1873, were (including $239,109 balance from previous year) $2,018,667; and the disbursements for the same period $1,798,023—leaving a balance in the Treasury of $215,644. The State debt, which is due principally to the school, normal school, university and agricultural college funds, is $2,252,057, all told. The estimates for the fiscal year ending with September 1874, were $846,142. Of this sum $284,400 was for state prison and charitable institutions, and $172,082 for interest. To meet this there were revenues amounting $525,082, including $250,000 from railroad licenses, and a tax levied, which is now about to be collected, amounting to $321,110. The Secretary of State estimates the expenditures for the fiscal year ending with September 1875 at $856,576, of which $247,400 is for charitable and penal institutions, and $171,857 for interest on the debt. The amount of trust fund land sold during the present year, so far as the accounts are closed, is 256,895 acres, not far from the amount sold last year. The price per acre was from 75 cents to $3.

Indebtedness of Southern Railroads.

The Washington correspondent of the *New York Journal of Commerce*, who has for some years past devoted one letter a year to the condition of southern railroads and their attitude to the government, writes now more cheerfully on the subject than ever. He says:

At the end of the war the government had in its possession an immense amount of rolling stock and other railway material in the South, and in order to help the railroads there and to realize the value of the property, the Secretary of War, under executive orders, sold it to the different Southern Railroad Companies on credit. The demoralization of business interests by poverty, freedom of slaves, reconstruction, &c., delayed prosperity, but some of the companies paid up promptly and discharged their indebtedness. Others lost money, went into bankruptcy and the government got its share. Others asked extensions and got them, but on the whole they paid up very well under the surrounding circumstances, and showed that their intentions were not at fault. From advanced sheets of the Quartermaster General's report the following statement appears:

At the close of the war, under executive orders of 8th August and 14th October, 1865, there were sold on credit to various railroad companies, principally in the South, railroad material to the appraised value of	$7,556,032 95
There remained due and unpaid from certain of these railroads on 30th of June, 1872	4,784,442 48
During the past fiscal year, interest and expenses accrued upon this debt to the amount of	101,573 96
Payments during the year, on account have amounted to	151,303 44
On the 30th June, 1873, the debt uncollected amounted to	4,658,924 07
Exclusive of the sum of $25,788 87 due from the New Orleans and Ohio Railroad, which debt is lost by the bankruptcy of the company. The total collections on account of this debt, to 30th June, 1873, amount to	5,116,605 53

There were originally fifty railroads indebted. On the 30th of June, 1872, there were twenty so indebted, but of these the Alabama and Florida paid in full January 8, 1873; the postal earnings of the Alabama and Chattanooga will more than liquidate its debt; the Indianola discharged its debt May 24, 1873; the Mississippi and Tennessee discharged its debt May 31, 1873, and the Pacific Railroad of Missouri paid in full July 12, 1873.

The roads yet indebted are as follows:

	Value of property sold.	Payments to July 1, '72.	Total due July 1, '73.
Alexandria, Loudoun and Hampshire	$82,592 98	$73,554 15	$6,813 53
Alabama and Florida for repairs	27,109 04	15,728 22	.....
Alabama and Chattanooga	30,248 52	22,773 29	3,930 02
East Tennessee and Georgia	306,153 02	150,441 22	372,015 33
East Tennessee and Virginia	295,655 65	130,396 70	248,649 28
Edgefield and Kentucky	114,772 86	1,865 59	179,460 23
Indianola	20,000 00	5,000 00	.....
Knoxville and Kentucky	12,335 63	6,639 40	10,816 25
McMinnville and Manchester	46,503 54	3 75	74,337 25
Mississippi, Gainesville & Tuscaloosa	33,476 39	9,856 09	42,513 45
Mobile and Ohio	505,143 70	498,307 51	92,502 05
Mississippi and Tennessee	127,750 52	150,032 72	.....
Memphis, Clarksv'le and Louisville	336,932 36	47,209 93	469,791 14
Memphis and Little Rock	153,673 89	118,760 13	87,241 29
Nashville and Chattanooga	1,566,551 73	343,842 66	1,823,600 13
Nashville and Northwestern	525 400 26	59,127 70	766,207 68
Nashville & Decatur	405,193 92	209,008 08	305,808 63
Pacific Railroad of Missouri	125,433 65	120,821 71	.....
Southwest Branch Pacific Railroad of Mo.	57,115 24	1,000 00	41,856 25
Selma, Rome and Dalton	183,276 49	129,583 25	133 328 14
Total	$4,965,351 27	$2,097,932 79	$4,658,924 07

In addition to the above the following named companies discharged their indebtedness to the government, amounting, principal and interest, to $2,867,367 30, except the New Orleans and Ohio Company, which became bankrupt, and the amount ($25,788 87) was therefore dropped from the list of indebted companies:

Richmond, Fredericksburgh and Potomac; Georgia Railroad and Banking Company; Southwestern; Macon and Western; South Carolina; Muscogee; Petersburgh; Memphis and Charleston; Mobile and Great Northern; New Orleans, Jackson and Great Northern; Mississippi Central; Virginia and Tennessee; Montgomery and West Point; Virginia Central; Rome; Western and Atlantic; Orange and Alexandria; Manassas Gap; Wilmington and Weldon; Alabama and Florida; New Orleans, Opelousas and Great Western; Norfolk and Petersburgh; Western North Carolina; Atlantic and North Carolina; Macon and Brunswick; Selma and Meridian; San Antonio and Mexican Gulf; Washington, Alexandria and Georgetown; Memphis and Ohio; New Orleans and Ohio.

These companies discharged their indebtedness in the order named between the dates of January 1, 1866, and October 27, 1871.

According to the detailed report of Major M. I. Ludington, quartermaster, in charge of this business, seven companies, the Alexandria, Loudoun and Hampshire, the Alabama and Chattanooga, the East Tennessee and Georgia, the East Tennessee and Virginia, the Nashville and Chattanooga, the Nashville and Decatur, and the Southwest Branch Pacific Railroad of Missouri, reduced their indebtedness $94,389 02. These companies also paid on account of interest $1,756 62, making their total payments during the year $96,095 64.

The indebtedness of nine companies, the Edgefield and Kentucky, the Knoxville and Kentucky, the McMinnville and Manchester, the Mississippi, Gainesville and Tuscaloosa, the Mobile and Ohio, the Memphis, Clarksville and Louisville, the Memphis and Little Rock, the Nashville and Northwestern, and the Selma, Rome and Dalton, has increased $83,528 20. The companies have, however, paid to the United States during the year $15,976 40.

As remarked above, the companies have done well. Now that thirty-four out of fifty companies have paid in full, and the other 16 paid in part, the Secretary of War wants to settle the business. Accordingly Senator Alcorn of Mississippi has introduced and will probably pass the following bill:

Whereas, The Secretary of War was directed and authorized, by the act of Congress approved March 3, 1871, to compromise certain suits instituted by the United States against certain railroad corporations which purchased material from the Quartermaster's Department under the provisions of executive orders of August 8 and October 14, 1865; and

Whereas, Issues have been raised and are pending in the settlement of the accounts of other railroad corporations which made purchases under said orders, and against which the government has not been forced to institute suits; therefore,

Be it enacted, &c., That the Secretary of War be and is hereby, authorized to compromise, adjust and settle the same upon such terms as may be equitable and just.

It is not doubted that this will cause an end to the whole business by the last of next June, by enabling the Secretary of War to make the best compromises he can with every company still indebted.

The New Route Between Philadelphia and New York.

Mr. Robert R. Corson, Secretary and Treasurer of the National Railway Company, gives the following particulars of the building of the new railroad between Philadelphia and New York.

A number of well known capitalists, prominent among whom are R. J. Capron, a Wall street broker; Charles J. Dobbins, of New York, and Joseph T. Crowell, of Rahway, New Jersey, have taken a controlling interest in the road, and just as soon as the affairs of the company are audited and put in proper condition, work on the new road will be pushed forward. There is sufficient means to meet all the old debts, and to successfully carry through the new enterprise. Nearly one-fourth of the road is now graded. The portion which extends from Bound Brook, where it connects with the Central Railroad of New Jersey, can be put in operation in a very short time. The bridge over the Delaware river, at Yardleyville, belongs to the corporation. The abutments for a bridge over the Raritan river are constructed. A large portion of the right of way between the two cities has been secured. The construction of the road was interfered with last Fall by the injunction granted restraining the building of a through road in New Jersey. The "General Railroad law" afterward passed, enabled the friends of the enterprise to organize a new company—the National Company—which took the line of the National Railway Company. The former received a charter having similar limitations to that of the Pennsylvania Company. The new board of managers have been selected from the old company. The new directors are composed of experienced railroad men. The officers of the National Company at present are: President, Joseph T. Crowell, Rahway, New Jersey; Secretary and Treasurer, Robert R. Corson, Philadelphia. The officials of the National Railway Company remain as formerly—President, Jacob Riegal; Secretary and Treasurer, Robert R. Corson.

☞ The Rutland (Vt.) *Herald* says that only two months time and $250,000 more are required to put the whole New York, Boston and Montreal Railroad in working order. Even if work is not again commenced until April, the cars will be running by the 1st of July.

RAILROAD EARNINGS—MONTHLY.

Central Pacific (in gold):	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

Journal of Railroad Law.

RAILROAD COMPANIES—DUTY OF COMMON CARRIERS TO TRANSMIT ALL SPECIAL INSTRUCTION TO THE NEXT CARRIER WHEN GOODS GO BEYOND HIS ROUTE.

The facts in the recent case of The Little Miami R. R. Co. *vs.* Washburn (22 Ohio, 324), are fully and clearly stated in the following opinion by—

WEST, J.—A common carrier who receives goods, under an agreement to transport them over the whole or any part of his own route, and then to forward them to a destination beyond, acts in the two fold capacity of carrier and forwarder. In the latter capacity, alleged negligence in which is a single ground of controversy presented by this record, he acts as agent of the consignor, and as such, is bound to transmit with reasonable exactness, to the next succeeding carrier, the instructions of his principal. If these instructions be without restriction as to the subsequent route, intermediate consignment, or mode of transit of the goods, but are in general terms to forward them to a designated destination, he will have discharged his duty as forwarding agent, by accompanying their delivery in good order to the carrier of the next usual route of transit, with the like general instructions, in terms sufficiently explicit and unambiguous to inform him of their ultimate destination. Briggs *vs.* Boston and Lowell R. R. Co., 6 Allen, 249. But if the instructions of the consignee be special and restrictive, the carrier will not have performed his duty as forwarding agent, if he shall have neglected or omitted to transmit, with the delivery of the goods to the next carrier, any material or substantive part of such special instructions. Whence it follows, as a necessary consequence, that he shall stand responsible for and make good any loss to which such negligence or omission shall have contributed. Redfield on Carriers, sec. 186.

The jury, on the trial below, must have found—and we cannot hold the finding not warranted—but the consignor of the goods, the loss of which is disclosed, gave special instructions in regard to their transmission; that these instructions were written in the freight way-bill, which came into possession of the plaintiff in error, and are in these terms: "H. H. Washburn, Martinsburg, Mo., N. M. R. R. *via* Cincinnati and St. Louis," that the plaintiff in error, when it delivered the goods to the Cincinnati Transfer Company, which was the next succeeding carrier, failed to transmit the whole of said instructions, but omitted therefrom the letters "N. M. R. R.;" that these letters are well known to all competent western carriers to be the initials of the North Missouri Railroad, having its eastern terminus at the City of St. Louis; that the presence of these initials in the shipping bills indicated that the North Missouri Railroad Company was an intermediate consignee of the goods at St. Louis; and that their omission left the goods without consignee at that place.

The instructions, thus transmitted by the plaintiff in error to the Cincinnati Transfer Company, showing no consignee of the goods at St. Louis, the agent of the latter volunteered to constitute a consignee thereof at that city which he would not have done if the instructions had contained the omitted initials. On this point, the testimony of Healey, agent of the Transfer Company is explicit. He says, "If the way-bill, which I received from the Little Miami Railroad Company, had been marked with the initials "N. M. R. R.," I would not have consigned the goods to the care of C. A. Scott & Co., and they would have been shipped to the North Missouri Railroad. The St. Louis Transfer Company would have carried them from the Ohio and Mississippi Railroad, in St. Louis, to the depot of the North Missouri Railroad.

Thus it is apparent that the act of the Cincinnati Transfer Company, which resulted in the loss of the goods, was, in point of fact, induced or influenced by the omission of the plaintiff in error to transmit to the next carrier *en route* the consignor's special instructions.

It is asserted for the plaintiff in error, however, that the interpolation of an intermediate consignee, into the instructions transmitted by it to the Cincinnati Transfer Company, without providing against the contingency of a failure, or refusal, to receive the goods by him, made the Transfer Company liable; that otherwise the Ohio and Mississippi Railroad Company would not have been limited to its discretion to the delivery of the goods to a particular carrier at St. Louis, but would have had the option to make the transit of the city effectual by the employment of any carrier willing to accept the service.

It is also insisted that the Ohio and Mississippi Company, to whom freight was guaranteed, made itself liable by refusing to guarantee freight to Scott & Co., in consequence of which the goods were suffered to perish.

In the view we have taken of the questions presented, it is not necessary to consider or controvert either of these positions. Both are probably tenable, and the plaintiff in error may sustain to the Cincinnati Transfer Company the relation of consignor, whose instructions have been departed from, in consequence of which, a right of recovery has accrued to the former. But whatever may be the liability of others, either among themselves, or to the defendant in error, the fact that the negligence of the plaintiff in error contributed to a loss for which others may be severally liable may, notwithstanding, give a right to a separate recovery against it also.

This conclusion is not varied by the fact that the packages bore labels containing the omitted initals, it not appearing that these inscriptions came to the knowledge of the transfer company's agent, charged with the duty of receiving and transmitting shipping bills. Packages are often sent forward in close coaches without reshipment or inspection. The accompanying papers are presumptively correct, and the carrier receiving them may well rely on the accuracy of the instructions therein written without resorting to the inscriptions on the packages.

At the trial below, counsel for the plaintiff in error asked the court to give certain instructions, which were submitted in writing. The court having examined and approved them, instead of reading them to the jury, directed the manuscript to be handed to them, the counsel at the time not objecting. It was too late, after verdict, to except to this mode of instructing the jury. If it is ground of exception at all, the exception should have been noted at the time.

In the light of the whole record, then, we can not say, as matter of law, that the omission, by the plaintiff in error, of a material part of the consignor's special instructions from the transmitted way-bill, which the jury found contributed, in point of fact, to the alleged loss, created no liability. The judgment of the Superior Court will be affirmed, with costs.

Judgment affirmed.

Commerce of New York.

The foreign imports at New York for the month of November, 1872 and 1873, are officially stated as follows:

	1872.	1873.
Entered for consumpt'n.	$10,395,475	$7,311,918
Do. for warehousing	7,679,647	7,819,080
Free goods	5,574,918	5,653,953
Specie and bullion	155,482	3,866,460
Total entered at port...	$23,805,522	$24,151,411
Withdrawn fr. wareh'use	8,374,885	7,496,162

The foreign imports at New York for eleven months from January 1, were:

	1872.	1873.
Entered for consumpt'n.	$185,080,376	$162,254,405
Do. for warehousing...	164,115,364	118,378,907
Free goods	50,441,530	80,112,843
Specie and bullion.....	5,420,911	17,137,821
Total entered at port....	$405,008,181	$376,883,476
Withdrawn fr. wareh'se.	147,937,704	112,197,906

Customs received at New York from January 1:

	1872.	1873.
1st quarter.....	$42,124 009 14	$35,758,588 97
2d quarter.....	31,698,700 62	26,222,977 68
3d quarter.....	39,860,448 27	33,991,787 89
In October.....	10,655,390 80	7,656 384 95
In November....	7,274,100 46	5,588 338 86
Eleven months..	$131,612,644 99	$109,217,977 85

The exports from New York to foreign ports in the month of November, were:

	1872.	1873.
Domestic produce.....	$22,462,482	$27,182,751
Foreign free goods.....	180,202	291,264

Specie and bullion.....	4,863,953	2,545,842
Total exports .....,....	$28,489,169	$31,041,724
Do. exclusive of specie.	23,625,216	28,495,882

The exports from New York to foreign ports for eleven months from January 1, were:

	1872.	1873.
Domestic produce.....	$204,939,336	$264,499,136
Foreign free goods....	1,436 205	2,018,212
Do. dutiable	9.042 436	8,482,807
Specie and bullion....	67,975,466	46,212,390
Total exports.....	$283,393,443	$321,207,045
Do. exclusive of specie.	215,417,977	274,994,655

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending December 6, at 222,227 tons, and for the coal year 18,782,583 tons, against 18 021,589 tons to corresponding time last year, being an increase of 760,994 tons. The bituminous tonnage for the week is 37,737 tons, and for the year 3,141,180 tons, giving a total of all kinds for the week of 185,932 tons, and for the year of 21,923,718 tons, against 20,686,308 to same time last year, being an increase of 1,237,405 tons.

☞ The Ohio *State Journal* says that the Erie and Atlantic and Great Western Railroad companies are to take possession of the "Bee Line" on the 1st of January, and that several important changes will take place.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

Quarterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, December 20, 1873.

Stock Exchange and Money Market.

Money has been in better supply in the open market and borrowers have experienced less difficulty in providing for their wants. Rates have been shaping easier. At the close call loans were quoted at 6@7 per cent, and the best grades of mercantile credits from 9@12 per cent per annum. The city banks have been liquidating the relief certificate obligation and the amount of this now outstanding is only a trifle over four millions. Government has been making further disbursements from the legal tender reserve of the Treasury Department, from which source some eighteen millions have already been paid out, to meet the increased current expenses on account of the Government service. The City banks have made further considerable additions to their specie and legal tender reserves, increasing their average of gold $22,481,200 as against $21,320,300 the preceding week; and their greenback average, to $41,579,100, as against $37,732,500, on the previous return. Their deposits stood at 190⅛ millions, giving an increase of over 8 millions. The loan item was 254⅛ millions, against 252 millions on the former exhibit. The circulation was 27⅛ millions, against 27¼ millions the week before. The amount of loan certificates outstanding has been reduced to about $4,485,000.

The U. S. Sub-Treasury, last week, enlarged its currency balance $4,044,214, and its coin reserve $1,103,694. Its currency balance at the close of the week was $19,076,390; and its coin reserve $50,351,695.

The Gold speculation has been decidedly more active, stimulated by the unsatisfactory reports and rumors from Washington, relative to the condition of the National finances; especially since the publication of the letter of the Secretary of the Treasury to the committee of ways and means, in which he asks for an increase in taxation of $42,000,000 to meet a deficiency in the revenue estimated in his report to Congress two weeks since at $13,500,000. The customs and export demand has been moderate. The extremes of the price have been 108⅞@112⅝, closing on Wednesday at 111⅞ as against 109¾ on Wednesday of the preceding week. The specie outflow, last week, was $713,006. The imports of specie at this port last week were $630,266; and since Jan. 1, have been $18,520,688 as against $5,488,647 same time last year.

The customs demand for Gold last week averaged $285,167 a day. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $116,961,645, against $140,690,273 during the same time in 1872. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $62,786,175, against $73,578,879 during the same time in 1872. The export drain of specie since January 1, 1873, has been $47,628,492 against $69,905,284 during the same portion of 1872.

Foreign Exchange has advanced considerably, on a better demand, the market closing however, less firmly. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, at 109⅝@109⅞. The week's exports of Domestic Produce have been to the currency value of about 5⅜ millions.

With the rise in Gold, and the more active investment demand, as favorable influences, Government securities have advanced sharply, closing buoyantly.

U. S. sixes of 1881 closed on Wednesday of this week at 121@121⅜; U. S. Five-Twenties of 1862, 115@115¼; U. S. Five-Twenties of 1864 at 117¼@117½; U. S. Five-Twenties of 1865 117¼@117¾; U. S. Five-Twenties of 1865 consolidated 119@119¼; U. S. Five Twenties of 1867, 120@120¼; U. S. Five-Twenties of 1868, 119¼@119¾; U. S. Ten-forties at 113@113½; U. S. Fives of 1881 (Funding Loan) 113@113½; Six per cent. currency Sixes from 113¾@114.

Business in Railway and Miscellaneous securities has been quite active, and prices, though variable, have been much firmer.

State and Railway bonds have been in better demand, at improved prices. Central Pacific first mortgage six per cents closed firmly at 95@95½.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $4,519,164, as compared with $7,011,828 same week last year. The exports of domestic produce are $5,375,915, as against $4,586,

084 last year. The exports of Gold and Silver $718,206, as against $615,323 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,712,900, comparing with $1,883,188 same week ast November.

General business has been quite active in the produce lines. Breadstuffs, Provisions, Cotton and Petroleum, have been generally firmer, though closing less buoyantly. Wool, in fair demand at very full rates. Hay, Hemp, Tobacco, Rice and Naval Stores, modera ely sought after. Metals have been rather more inquired for, especially American Pig Iron, of which some 3,000 tons have been sold, mostly Lehigh, at about previous quotations. Old Iron Rails, now quoted up to $40. Lake Ingot Copper 24¼c.@24⅜c. Other articles in the Metal line, about as before. At the Live Stock markets, the better grades of stock have been firm in price, on a fairly active demand; poor stock difficult to place. Ocean freights, steady, though not active.

The following quotations of sales of Railway and other securities are in addition to those giver elsewhere in our columns:—

New York.—Western Pacific R. R. bonds, 85; Clev., Painesv. and Ash. 7s, old, 99½; do. new, 93; North Missouri 1st mort., 84½; Central of New Jersey 1st mort., 104; Ohio and Miss. 7s, consol., 90; do. Krupp's Cast Steel Works.

We have been presented by Messrs. Thos. Prosser & Son, of No. 15 Gold St. New York, with a beautiful engraving representing the extensive Cast Steel Works of Fried. Krupp, Essen, Rhenish Prussia—the whole picture, including the frame, which is of black Walnut and gilt, measuring but 10⅛x25¼ inches. The area of these works comprise 965 acres (Engl.); 180 acres covered with buildings. The number of workmen employed is as follows: in Essen Works, 12,000; in mines, etc., 5,000; building contractors men, 2,000; clerks and officials, 730—total, about 20,000. Quantity of steel produced in 1872, 125,000 tons; rails, 50,000 tons; spring steel, 3,000 tons; tires, 45,000; locomotive and carriage axles, 19,000; axles and wheels, 8,990 sets; springs, 38,600.

☞ The earnings of the Denver and Rio Grande (Narrow Gauge) Railway for the month of October 1873, were: freight, $18,254 69; passengers, $15,743 58—total, $33,998 27; expenses, $17,486 51; net earnings, $16,511 76. Net earnings in October, 1872, $12,185 18—increase, $4,326 58.

☞ The earnings of the Denver and Rio Grande (Narrow Gauge) Railway for the week ending December 7, 1873, were: freight, $2,769,-57; passengers, $2,254 05—total, $5,023 62. Same week last year, $8,737 34.

☞ The earnings of the Erie Railway Company for the week ending Dec. 7, 1873, were $319,396, and since Oct. 1, $3,882,494—a decrease compared with the corresponding period of the previous year of $66,063.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending Nov. 30, are: freight, $34,653 28; passengers, $26,105 73—total, $60,759 01.

Maryland and Delaware Railroad.

The stockholders of the Maryland and Delaware Railroad held their annual meeting at Easton, Talbot County, on the 10th inst., when the following officers were unanimously re elected: President, John W. Scott, and the following directors: Wm. Slaughter, Dr. A. Hardcastle, Dr. G. W. Goldsborough, J. P. Malove, David Knotts, Col. Samuel Hambleton, and J. A. W. Powell. Ex-Governor Thomas, Col. Edward Lloyd, and Wm. C. Satterfield are the State directors, and Henry P. Hopkins, Esq., director for Talbot County. The superintendent reports the rolling stock and road bed to be in good condition, having been kept fully up to the Standard of the year previous, and the culverts, cattle guards, and ballasting kept in perfect repair. The treasurer's report shows that the business of the road is gradually expanding, the receipts being larger than the previous year, and exhibiting a more favorable condition than heretofore. At a subsequent meeting of the directors, John L. Caldwell was re-elected superintendent, and John W. Scott, secretary.

☞ The Cincinnati Southern Railroad Trustees have let the contract to Bebb & Tabler for the construction of King's Mountain tunnel, in Lincoln County, Ky. The cost, on the engineer's estimate, will be $163,000. Work is to be begun in ten days and to be completed in eighteen months. The trustees also located 80 miles of the road from South Danville, Kentucky, to Chitwood, on the Tennessee line, selecting the old Burnside military survey.

☞ The Rockingham (Va.) *Register* learns that there are two corps of engineers now in the field, and actively engaged in locating the Shenandoah Valley and Ohio Railroad from Franklin, in Pendleton county, West Virginia, to the Valley road, in Rockingham, and the chief engineer, R. B. Osborne, has been instructed to advertise for bidders to build the road as soon as the location of said road is completed.

☞ The directors of the Atlantic and Great Western Railroad for the ensuing year are as follows: Lloyd Aspinwall, James H. Fay, Lawrence Wells, W. H. Upson, John Tod, T. Ross, Henry E. Parsons, W. W. McFarland, James B. Hodgskin, A. Hegewisch, Abram S. Hewitt, J. H. Devereaux, and Reuben Hitchcock.

☞ The growth of Lake Commerce during the past year has been unexampled. Fifty new steamers have been added to the lake fleets against twenty seven in 1872, and a hundred and fifty-two sail craft against fifty-two in 1872. The total increase in tonnage over 1872 is 57,054.

☞ The Western Maryland Railroad, which has been completed to Williamsport, Maryland, a distance of over one hundred miles from Baltimore, was formally opened on Wednesday, the 17th instant.

☞ The Baltimore City Passenger Railway Company has declared a dividend of 3 per cent for the six months ending 1st January next, payable on and after 2d proximo.

☞ It is reported that work is soon to be begun on the Massachusetts Central Railroad at Oakdale.

Finances of Ohio.

From the Report of the Auditor of State we learn that on the 15th of November, 1873, there was a balance in the State Treasury of $129,586 42. The disbursements for the year amounted to $5,008,581 28, which is $427,485 less than the estimate, the sum disbursed on some of the public institutions not having been so large as anticipated; and the State gained over the estimate of receipts by the recovery of $89,000 from the United States Government on account of war claims. The balance of $129,586 42, however, is insignificant for the demands on the treasury, and provision has been made to anticipate the revenues of the current fiscal year, to the amount of $600,000, by drafts on the County Treasurers for a portion of the taxes collected on the duplicate of 1873.

The balance of temporary transfers which it is contemplated, in time, to reimburse, is $681,000. None of this can be reimbursed during the present year, but with the continuation of present levies a material part will be paid during the next fiscal year, and if the annual outlay for public institutions should not be increased, the following year will serve to liquidate the "accommodation debts."

The valuations for taxation upon the duplicate of 1873 exceed those of 1872 by nearly $43,000,000, the whole amounting to $1,567,274,639. The increase is principally in personal property, which amounts on the duplicate to $525,510,708. The State's proportion of the aggregate tax is only one-fifth, and the Auditor says the burden of taxation is local.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, No. 31 NASSAU ST., NEW YORK, Dec. 10, 1873.

INTEREST FOR SIX MONTHS TO 1ST JANUARY next, on the Seven per Cent. Certificates of this Company will be paid at this office on the 2d proximo. The transfer-books for said certificates to be closed after the 15th inst. and until the 5th proximo.

L. V. F. RANDOLPH, Assistant Treasurer.

LATEST IMPROVED STANDARD

Our Patented Double Beam Wrought Iron Lever Rail-Road Track Scale acknowledged the BEST.

MAKERS of the NEW TESTING MACHINE.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

Perfection in the Art of Making Coffee.

On the adjoining page of our present issue will be found an advertisement of one of the most valuable inventions and useful articles in the culinary line that has been brought to our notice in a long time. We refer to the time-honored coffee pot, which has been so greatly improved of late, and placed in the market by the manufacturers named below.

The real merits of this invention as evidenced by the thousands already sold, together with the fact that the coffee pot contributes so largely to the comfort and happiness of the human family, induces us for the first time to depart from the venerable custom of noticing, editorially, only matters coming within the purview of a journal like ours.

The invention of the above improvement has shown that science can be usefully applied even in the construction of kitchen utensils to increase the sum of human happiness; and, in our opinion it is done with complete success in the present case.

In any other style of coffee pot, nearly one-half the strength of the berry is left unused in the grounds, while much of the aroma that renders a pure cup of coffee so delightful a beverage is carried off in steam. The mode of making coffee with these pots is as simple as it is useful, and a child of ten years can easily manage one of them.

This invention entirely revolutionizes the old style of boiling away the flavor of the coffee—in fact it enables us to retain every particle of strength, and pour out for use as finely colored and fragrant a beverage as was ever sipped by the gods of ancient mythology. By the old style, as every one knows, a muddy unsettled and unsavory mess is usually served up and dignified with the name of coffee.

By the use of one of these articles, the expenses are reduced fully twenty five per cent—no straining or settling of the grounds is ever needed, and time and labor are saved. Those who have used them say they would not be without them again, even if obliged to send to Europe to obtain them; and we speak for ourselves, when we say, no person has yet partaken of a delicious cup of coffee, until he has drank one made in this manner.

We consider this ingenious device not only a perfect success, but a decided luxury and a household necessity, the low price and genuine merits of which will insure for it an immense demand.

We wish we had it in our power to bring the knowledge of this most useful invention home to every housekeeper in the country; and we are glad to know that the manufacturers are taking measures to do so, by the liberal use of printers ink and the employment of a corps of live agents, who, by the rapid sales this article must command, will also make a handsome thing of it.

We apprehend, also, that shrewd enterprizing men of means will not be slow to recognize the well-known fact—and act upon it, too—that in small matters the largest and quickest returns are oftener found.

The offices of Messrs. DeWitt C. Brown & Co., sole manufacturers, as will be seen by their announcement, are located at No. 678 Broadway, N. Y.

Michigan Central and Great Western Railroads.

The serious falling off in the business of the Michigan Central Railroad (in common with all the trunk lines), occasioned by the financial crisis, is in a fair way to be recovered from. The earnings promised this fall to be greatly beyond precedent in the history of the road; and the prospect is that the December, January and February earnings will very nearly fulfil the expectations of the management formed in view of the very great improvements made in the condition of the road and its connecting lines.

By the addition of 26 miles of second track this year, the company now have 202 miles of double track out of the 284 miles of its main track between Chicago and Detroit. The entire road east of Jackson and west of Niles is double tracked, both tracks being entirely of steel; and of the old main line between Niles and Jackson about two-thirds has steel track.

On the Great Western Railway of Canada the entire main line is now laid with steel, as is the Glencoe Air ("Loop") Line. Of the 79 miles between Detroit and Glencoe, 51 miles now has double track, leaving but 28 miles of single track on the line. The company has increased its equipment both in rolling stock and motive power.

The Michigan Central has added a good many new cars; the motive power was entirely adequate by the addition of 48 engines last year. The arrangements for transfer at Detroit have been increased two fold by the addition of two new boats (making five in all), and of a second ferry slip on each side. Of the new boats one is larger than the old—carrying 18 loaded cars; the other carries 10 cars. The latter is finished, and the former will be in use early in January. The improvements to permanent way on the Michigan Central are already vindicating themselves in diminished maintenance and operating expenses, amounting already to about $10,000 per month. Of this wholesome economy—in no sense secured at any sacrifice of the public interest and safety—the patrons of the road and the owners of its securities will be the first to realize the benefits in lower rates and increasing dividends.

☞ The Cairo and Fulton Railroad bridge across the Arkansas river at Little Rock, was completed Sunday evening and on Monday several trains crossed.

Atlanta and Richmond Air Line Railroad.

The Baltimore *Sun* says it is authoritatively announced that the Pennsylvania Railroad Company has purchased from the "Southern Railway Security Company" its interest in the Atlanta and Richmond Air Line Railroad, for the sum of $1,825,000. The purchase is made subject to the first mortgage, which amounts to about $4,000,000. The cost of the road has been upwards of $8,000,000. It is presumed that this transfer is made for the purpose of more satisfactorily working the connection with the Richmond and Danville and Baltimore and Potomac, and other lines under control of the Pennsylvania Railroad. The fact of the Atlanta road having passed under the control of the Pennsylvania corporation is considered advantageous to its first mortgage bonds.

Boston and Providence Railroad.

The earnings of this road for the years ending September 30, 1872 and 1873, were as follows:

	1872.	1873.
From passengers	$882,261 38	$949,550 54
" freight	772,738 41	809,461 89

In submitting this, the thirty-eighth annual report of the directors of this corporation to its stockholders, the present board deem it a subject of well founded satisfaction and congratulation that they are able to characterize the past year, both in the condition of its affairs and the results of its operations, as one of signal prosperity. They regard it as especially fortunate that its large revenue during the year—the largest it has ever received—both from passengers and freight, and as well from its satisfactory connections as from its local traffic, has enabled them to make the liberal but judicious and timely expenditures exhibited in the accounts of the treasurer, without diminishing the dividends to its stockholders. It will be seen that many of these expenditures have anticipated substantial supplies and improvements required for the future, and thereby enabled us to encounter with safety a less prosperous season, if the present depressed condition of the business of the country should continue for any length of time to affect injuriously its railroad interests.

The accompanying tables show the gross earnings for the year to have been	$1,822,108 18
Against those of the previous year (which up to that period was the largest amount of receipts of any year of its operation)	1,716,899 42
An excess over the year 1872 of	$105,708 76
The expenditures for the same period have been	$1,425,003 08
Against those of the former period of	1,251,052 59
Leaving a net income of	$397,105 10

Of which $395,000 has constituted the dividend of ten per cent on its capital of $3,950,000.

In examining the details of these accounts of the treasurer and the relation of gross earnings to operating current expenses, the stockholders will not fail to bear in mind what has escaped the notice of the authors of some recent criticisms on the mode of keeping railroad accounts, that the admirable system initiated by the former treasurer of this corporation, Mr. Tyler, and faithfully adhered to by the present treasurer, differs widely, and the directors think most favorably, from that which is practised by many other railroad corporations. These tables show that upon the books of this company no construction account is indefinitely kept open, as a convenient receptacle for all expenditures which may be thought to exceed the legitimate expenses of the current year. They include as a part of the current operating expenses of the road the large amount paid for taxes, and all payments for interest, whether upon the funded or unfunded debts of the corporation—while for every judicious expenditure made to increase the efficiency of our operations and the convenience of the public, the money thus expended continues to enure to the stockholders in the increased value of their property and its greater capacity for future earnings; and, as has heretofore been suggested in these reports, while the maximum of dividends to the stockholders will probably be held by the Legislature not to exceed ten per cent per annum as a fair return from this species of *quasi* public property, and as the public is constantly demanding fresh facilities requiring a greatly increased expenditure, the system pursued by this corporation may fairly challenge criticism as the wisest and safest for the permanent interests of its stockholders.

With respect to the various items of expenditure during the past year, the directors would refer to the large increase of our labor account, as indicating the fidelity with which our superintendent and his subordinates have striven to keep up the character of the road-bed, its bridges and its equipment, to the high standard of excellence they have attained under their management. The last winter, according to the concurrent testimony of their managers, was extremely severe in its effects upon the railroads of New England. To this our road was no exception; but as the season for active business opened in the spring, this road was found in all these respects in a condition to meet satisfactorily all our requirements.

We have laid during the year fourteen miles of steel rails, making more than forty miles in all; and the directors are so well satisfied of the economy, notwithstanding the great increase of its cost, of steel over iron, that they propose to continue its use until the entire road shall be furnished with it, which will be accomplished at no distant day. When this change has been completed, a very large diminution will be observed in this hitherto formidable item of renewal and repair.

In respect to another of our annually recurring subjects of expenditure, the promise heretofore made in former reports is now substantially fulfilled. We have built and completed during the year four new and commodious passenger station houses; one at the corner of Camden Street in Boston, called "Chickering's," it having been constructed as well for the convenience of the workmen in Chickering's Manufactory having their homes in the suburbs on the line of the railroad—as for that of the citizens of the South End—one at Forest Hills, one at Readville, and one at Attleboro', which was originally undertaken in conjuction with the Taunton Branch Railroad Company, but which is now the sole property of this corporation. These make up a total of fifteen new passenger station houses built within the last four years on the line of the road, all of them of a substantial and commodious character. With the completion of the new structure in Boston, which is progressing very satisfactorily, and which will doubtless be in condition to receive the stockholders at their next annual meeting, all considerable expenditures in this most important department will cease to be a tax upon the treasury for many years to come.

The repairs and renwals of bridges on the road have been more than usually extensive this year; while, on the other hand, by a timely and advantageous purchase of land at Dedham, encumbered with a private right of way, which compelled our maintenance at considerable expense of two of these structures, we have been able to discontinue them both, and save the annual expense of their maintenance, repairs and renewals altogether. The equipment of the road has not only been kept up to its customary high standard, but there have been such additions made to it, both in cars and locomotives, as probably to render it unnecessary to build or purchase a single new car or locomotive during the coming year. The multiplication of our trains—upon the urgent and persistent claims of local communities, the necessity or reasonableness of some of which may well be questioned—has required these unusual additions to the equipment; and when, as will appear by our report to the railroad commissioners, the following statistics of actual road operations constitute the record of the year's work, the large increase of our expenses will not be found to have been incurred without an adequate cause.

Our trains have run 114,308 miles more than in 1872.

The excess in the number of passengers carried, over 1872, is 558,361.

The excess in the number of tons of freight carried, over 1872, is 61,842.

It will be obvious to every one examining these figures, that such an additional amount of work as they imply, involves a very large amount of additional expense for its performance—while it furnishes gratifying evidence of the substantial and unfailing sources of supply from which the business of the road is derived.

The most important steps taken by the directors, in view of the future interests and the present security of the corporation, have been in carrying into effect the votes of the stockholders, passed at the last annual meeting, in respect to the acquisition of the Stoughton Branch Railroad, and the securing of a controlling interest in such connecting roads as in their judgment the permanent interests of this corporation required.

In conformity with the provisions of an act passed by the legislature, having obtained by purchase all the capital stock of the Stoughton Branch already owned by us, the requisite action was had by both corporations to dissolve the Stoughton Branch Company as an independent organization, and to merge its franchise, stock and property of every description in this corporation, and make the road simply what it now is, a branch of the Boston and Providence Railroad.

Pursuant to the vote of the stockholders, before referred to, and under the authority of an act duly passed by the legislature, the directors entered upon negotiations which resulted in the purchase of a large controlling interest in the capital stock of the Providence, Warren and Bristol Railroad;

and the whole, substantially, of the Fall River, Warren and Providence Railroad. In the payment for these purchases the directors have not found it necessary to issue the whole amount of the bonds which were authorized by the stockholders—one half of that amount, or five hundred thousand dollars, being for the present found sufficient for our requirements—and the premium which was promptly offered and received on those that were issued, and which could readily have been obtained for the whole amount, showed in the most satisfactory manner the confidence of capitalists in the securities of the corporation.

The acquisition and control of these two railroads, both of which are now organized in the interest of this corporation, the directors believe would have warranted a much larger expenditure, and have been justified under much less hopeful indications of their future value as feeders to the main road, than the circumstances attending our negotiation for them required us to make. The one, a road of fourteen miles in length, running from Providence along the shores of Providence River and Narragansett Bay, and having the best water front, of large extent, in the always open harbor of Bristol, its southern terminus—the other connecting the city of Providence with the rapidly growing city of Fall River, the capital of the cotton manufacture of New England, and both, with their present inadequate facilities, doing a constantly increasing business, cannot, in the judgment of the directors, fail to prove ultimately remunerative to their owners, while their present control contributes essentially to the security and protection of our existing interests.

With this exhibit of the present condition of the road, and the affairs of the corporation, the directors would not attempt to disguise from the stockholders the fact, of which they are themselves fully conscious, that we have entered upon another year under circumstances which do not warrant the expectation of its furnishing an equally satisfactory record of our operations. While this report is in preparation the general business interests of the country are under a cloud, the density and duration of which no human foresight can measure or predict. But the elasticity with which the people of this country rise from occasional depression and disaster, which in this case, as in many that have preceded it, may prove to be but a needed storm to purify the atmosphere of the business world and establish its enterprises on a sounder basis, leads them to hope that while the railroad interest must inevitably suffer with the other business of the country, it will not be long before it will be restored to its former activity and prosperity. In any event while it is a source of satisfaction to know that our provision for the future has placed us in a position of comparative strength and security, in which to encounter a less prosperous period, it will serve as an admonition to the managers of the road so to administer the trust confided to them by the stockholders as to do what is in their power, by exacting such a a rigorous retrenchment and such strict fidelity on the part of all who are employed in the service of the corporation, as will maintain, so far as is practicable, the sound condition, both of its material and its financial affairs, which the corporation has hitherto enjoyed.

TRIAL BALANCE, Sept. 30, 1873.

Construction and equipment	$3,949,915 15

President.—JOHN H. CLIFFORD.

Directors.—John H. Clifford, George W. Hallet, T. P. I. Goddard, Wm. R. Robeson, F. M. Weld, Joseph W. Balch, Henry A. Whitney.

Treasurer.—B. B. TORREY.

Superintendent.—A. A. FOLSOM.

The Geneva Award.

The following is a copy of "An Act to authorize Marine Insurance Companies to declare extra dividends in certain cases," passed by the New York Legislature on the 24th of May, 1873:

SECTION 1. If any Marine Insurance Company, organized under the laws of this State, having paid a loss, shall receive a sum derived from the Geneva award, by way of reimbursement of that loss, it shall be lawful for such company to divide the net amount so received, after deducting the expenses and liabilities relating hereto, among the persons or parties who paid premiums and suffered by the payment of the original loss, or were prevented from receiving so much as they otherwise would have received by occasion of that loss, instead of dividing the same among the more recent scrip holders or dealers with such company; such division to be in the form of an extra dividend or extra dividends upon the plan contemplated by the charter of such company, subject to all just claims for debts and liabilities, and payable to the same persons or their representatives, and in like manner as the money from which the loss was originally paid would have been payable if the loss had not been borne by the company, and the action of the Board of Directors or Trustees, in ascertaining the amount and making such extra dividend or dividends, shall have the like force and effect as their action in making and declaring dividends under the charter.

SECTION 2. This act shall take effect immediately.

The necessity of the passage of this act has mainly been occasioned by the difficulties found by claimants on the Geneva award for return of war premiums in furnishing to a court the necessary proof of the amount paid. Usually the marine and war premiums were paid in one sum. What proportion belonged to each class of risks could only be determined by the insurance company to which it was paid; and again, as the award was made to reimburse the sufferers by the acts of three of the cruisers only, it would involve a question as to what proportion of the war premium was applicable to those vessels. Investigation of this subject by New York merchants has brought to light these and other difficulties, and satisfied them that with the provisions of this act their interests and those of the insurance companies are made identical, and, by unison of action in efforts to obtain distribution of the award, an embarrassment will be avoided which endangers the delay of its benefits to the sufferers for an indefinite time.

☞ The consolidation of the Petersburg Railroad Company and the Richmond and Petersburg Railroad Company was dissolved by mutual consent at the meeting of the directors of the former road. Mr. Ragland resigned the presidency, and Mr. Fred. R. Scott, formerly of Petersburg was elected to the office.

Cumberland Coal Trade.

A letter to the Baltimore *Sun*, dated Cumberland, Md., Dec. 18, 1873, says that the shipments of Cumberland coal for the week ending December 13, 1873, amounted to 28,089 tons, 13 cwt., an increase over the corresponding week of last year of 16,531 tons, 1 cwt. For the year to that date 2,513,177 tons, 11 cwt. were shipped, showing an increase over the same period in 1872 of 345,134 tons, 3 cwt. Increase in railroad shipments 382,540 tons, 16 cwt.; decrease in canal shipments 37,406 tons, 13 cwt. The shipments of coal by canal closed Tuesday for the season of 1873. Total shipments in 1873, 779,868 tons 11 cwt. Compared with the shipments of 1872 this is a decrease of 36,286 tons 12 cwt. This is easily accounted for by last spring's strike of the boatmen, and the numerous breaks in the canal during the season. The railroad shipments this year will show an increase of more than 45,000 tons over those of 1872, leaving a net gain for 1873 of perhaps 420,000 tons.

Finances of Washington Co., Md.

Washington County, Maryland, being an indorser on $300,000 of the bonds of the Western Maryland Railroad Co., it may be of interest to learn something of its financial conditi n. The following is a synopsis of a report recently made by an examining committee:

Floating debt—assets due county available to meet expenses up to June 1, 1874, $137,674 98; entire indebtedness other than bonded, $132,420 58; balance in treasury after available taxes collected, $5 254 40.

Bonded assets and debt—the county holds bonds, stocks, and coupons estimated at par value, $429,077 50; bonded debt; $414,550. The county is paying regular interest on $300,000 of Western Maryland bonds, indorsed by the county. Exact cost of new court house, $77,431 06.

Little Rock and Fort Smith Railroad.

This company has recently been re organized in the interest of the New England capitalists who advanced the money to build the road, and a new life has been infused into the company with every assurance of its early completion to Ft. Smith.

The following is a list of the new officers and directors of the company: Hon. Thos. M. Bowen, President; E. L. Adams, Treasurer; John Stoddard, Assistant Treasurer; Henry Cooper, Secretary; N. S. Howe, Land Agent; Asa P. Robinson, Chief Engineer; D. T. W. Yonley, Attorney; S. B. Beaumont, Superintendent. Hon. Thos. M. Bowen, Elisha Atkins, N. S. Howe, D. B. Sickels, O. A. Hadley, Henry Page, D. T. W. Youley, John Stoddard, W. S. Oliver, Directors.

☞ The Pittsburg *Commercial*, of 17th inst., says that "from all parts of the State come cheering reports in regard to the revival of business. Mills which suspended operations during the earlier days of the financial troubles are resuming work, giving employment to large numbers of men, and putting much money into circulation. The prospects are that by the first of the new year nearly, if not quite all, the great industrial establishments of the Commonwealth will be at work, with orders enough on hand to insure continuance."

☞ The work of putting Miller platforms on all the passenger cars on the Worcester and Nashua road has been begun.

United States Supreme Court.

THE UNION PACIFIC RAILROAD TAXABLE BY THE STATES.

Union Pacific Railroad vs. Penniston, Treasurer of Lincoln county, Nebraska; appeal from the Circuit Court of Nebraska.—The question in this case was whether the Pacific Railroad Company is such an instrumentality of the government as exempts it from State taxation under the Federal Constitution. In delivering the opinion of the court, Mr. Justice Strong says:

The taxing power of a State is one of its attributes of sovereignty; that it exists, independently of the Constitution of the United States, and underived from that instrument, and that it may be exercised to an unlimited extent upon all property, trades, business and associations existing or carried on within the territorial boundaries of the State, except as far as it has been surrendered to the Federal Government, either expressly or by necessary implication, are propositions that have often been asserted by this court; and in thus acknowledging the extent of the power to tax belonging to the States, the court had declared that it is indispensable to their continued existence. No one ever doubted that before the adoption of the Constitution of the United States each of the States possessed unlimited power to tax, either directly or indirectly, all persons and property within their jurisdiction alike, by taxes on polls or by duties on internal production, manufacture or use, except so far as such taxa ion was inconsistent with certain treaties which had been made; and the Constitution contains no express restriction of this power other than a prohibition to lay any duty of tonnage or any import duty on imports or exports, except what may be absolutely necessary for exercising the State's inspection laws, as was said in Lane county vs. Oregon, 7 Wall, 71. In respect to property, business and persons within their respective limits the power of taxation of the States remained and remains entire, notwithstanding the Constitution. It is indeed a concurrent power, concurrent with that of the General Government, and in the case of a tax upon the same subject by both Governments, the claim of the United States as the superior authority must be preferred, but with this qualification it is absolute. The extent to which it shall be exercised, and the mode in which it shall be exercised, are all equally within the discretion of the Legislatures to which the States commit the exercise of the power. That discretion is restricted only by the will of the people expressed in the State Constitutions, or through elections, and by the condition that it must not be so used as to burden or embarrass the operations of the National Government. There is nothing in the Constitution which contemplates or authorizes any direct abridgement by national legislatures. To the extent just indicated it is just as complete in the States as the like power within the limits of the Constitution is complete in Congress. Such are the opinions we have expressed heretofore, and we adhere to them. The tax in question is held not to be too remote in its effects upon the efficient exercise of the Federal power to be for that reason inhibited by the Constitution. To hold otherwise, it is said, would be to deny to the States all power to tax persons or property, for every tax levied by a State withdraws from the reach of Federal taxation a portion of the property from which it is taken, and to that extent diminishes the subject upon which Federal taxes may be laid.

Admitting fully that the company is an agent of the general government, both military and postal, the court says that it does not follow that its property is exempt from State taxation. In Thompson vs. The Union Pacific R. R. Company, 9 Wall, 579, it was held that the property of the company was not exempt, though the road was a part of the system of roads, constructed under the direction and authority of the United States, and largely for the use and purpose of the General Government. The court may in that case were the agents for the Government, precisely as this, to the same extent and for the same purpose. It may be considered settled that no constitutional implications prohibit a State tax upon the property of an agent of the Government merely because it is the property of such an agent. A contrary doctrine would greatly embarrass States in the collection of their necessary revenues without any corresponding advantages to the United States. A very large proportion of the property within the States is employed in executions of the power of the Government. It belongs to the Government agents, and it is not only used, but is necessary for their agencies. United States mails, troops and munitions of war are carried upon almost every railroad; telegraph lines are employed in the national service, so are steamboats, horses, stage coaches, wagons, foundries, shipyards and multitudes of manufacturing establishments. These are the property of national persons or corporations who are instruments or agents of the General Government, and they are the hands by which the objects of the Government are attained. Were they exempt, as here claimed, it is manifest the State Governments would be paralyzed. While it is of the utmost importance that all the powers vested by the Constitution in the General Government be preserved in full efficiency, and while recent events have called for the most unembarrassed exercise of these powers, it has been decided that State taxation of such property is implicitly prohibited. The decree below is affirmed.

Mr. Justice Bradley, dissenting, wrote a long opinion in which he held that if the road bed may be taxed, it may be seized and sold for non payment of taxes; seized and sold in part or parcels, separated by county or State lines, and thus the whole purpose of Congress in creating the corporation and establishing the line may be subverted and destroyed. In his judgment the tax laid in this case was an unconstitutional interference with instrumentalities created by the National Government in carrying out the objects and powers conferred upon it by the Constitution.

Mr. Justice Field concurred with Mr. Justice Bradley.

Mr. Justice Hunt dissented from the opinion of the court, but wrote no opinion.

Mr. Justice Swayne wrote an opinion concurring in the result reached by the majority of the court.

Western Maryland Railroad.

The Baltimore *Sun* in noticing the formal opening of this road from Baltimore to Williamsport, says:

The distance of the route from Baltimore to Williamsport is a trifle over ninety miles, and the line traverses Baltimore, Carroll, Frederick and Washington counties, in this State. By the completion of the route to Williamsport not only will the productions of the rich agricultural districts of Carroll and Washington counties be allowed increased facilities of transportation, but a new avenue will be opened from Baltimore to the extensive coal fields in and around Cumberland. The intention is to transport the coal from Cumberland to Williamsport by canal, and there transfer it to the cars of the Western Maryland Railroad for shipment to Baltimore. For this purpose large and extensive transfer machinery is being erected at Williamsport by the company. By this arrangement the vast amount of coal which goes by canal to Alexandria, Va., and from there to New York and Boston for various reasons will have a tendency to come to this market. The canal boats will find it more profitable to make short trips down to Williamsport, between where and Cumberland there are few locks, than to make trips to Alexandria, which distance has a much larger number of locks; while by the contemplated extension of the Baltimore city track to Canton, the Western Maryland Railroad will run coal trains through the tunnel to Canton, and supply the large mills and manufactories, as well as dump the coal convenient to large vessels without transshipment from the cars. The company expect to be able to bring coal from Cumberland to Canton at a cost which will induce shippers to give precedence to the new route. The iron ore which now goes to Pennsylvania will no doubt also in part be brought to the Baltimore market in increased quantities. The newly completed route commences at Fulton station, and continues by way of Pimlico, in close proximity and parallel with the Reisterstown turnpike until within a mile of Owings's Mills, where it strikes the old route formerly used, running from the Relay House. The old track continues to Double Pipe Creek, a distance of forty-eight miles from Baltimore, from whence to Mechanicstown, eight miles, the track was laid about two years since, after the city's endorsement of the company's bonds. From Mechanicstown to Hagerstown and thence to Williamsport, a distance of thirty four miles, the track which has just been completed lies. Outside of the commercial and business interest in the new route the city of Baltimore is interested financially by subscriptions of stock, indorsement of bonds and accrued interest to the extent of over $3,000,000, or more than three fifths of the entire road. Washington county has indorsed $800,000 bonds of the company.

Chesapeake and Ohio Canal.

At the regular quarterly meeting of this company held at Annapolis, Md., on the 16th inst., President Gorman read his report for the quarter ending November 30, showing the total revenues to have been $189 479; expenditures $62,912. In addition to the expenditures $50,985 was paid on account of over due coupons on preferred bonds, making total payments $114 399, and leaving a balance in the treasury of $94,627. The coal tonnage for the quarter was 312,526 tons, an increase of 60,208 over the corresponding period of the year before.

The receipts for eighteen months ending November 30, were $876,688; disbursements $795,975.

The president, in his report, says that the trade of the canal must continue to increase, and that it cannot be doubted that the time is near at hand when all of the preferred debts of the company shall be liquidated and the just expectations of its stockholders realized.

The Governor read a communication from John S. Gittings and others asking that the directors of the canal be ordered to pay to the holders of the preferred bonds another coupon.

After some discussion on the communication a resolution was ordered to be prepared to express the views of the stockholders on the subject. During the preparation of the resolution Mr. Gorman stated that the directors did not feel that with safety they could pay another coupon this year, as the expenses of the company were about $20,000 per month, and there are no revenues of any account coming into the treasury during the winter, and the sum on hand now is not larger than that usually on hand at this time. In 1871 Mr. Clark had on hand over $100,000.

The committee reported the following resolution, which was ananimously adopted:

Resolved, That the secretary of the meeting be requested to acknowledge the receipt of the communication just read, and to say that it will be laid before the board of directors at their next meeting for their action, as in their judgment may be right and expedient, this meeting having entire confidence that the directors of the canal company will be actuated by a just regard to the real interests of the canal and the rights of the stockholders.

Redemption of the Loan of 1858.

The following circular will be read with interest by all holders of the bonds issued under the act of June 14, 1858, and which mature January 1, 1874:

TREASURY DEPARTMENT,
WASHINGTON, December 18, 1873.

An Act to provide for the redemption of the loan of eighteen hundred and fifty-eight.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That for the purpose of redeeming the bonds issued under the act entitled "An act to authorize a loan not exceeding the sum of twenty millions of dollars," approved June fourteenth, eighteen hundred and fifty eight, as amended March third, eighteen hundred and fifty-nine called the loan of eighteen hundred and fifty-eight it is hereby declared to be the pleasure of the United States to pay all the coupon bonds of said loan on the first day of January, eighteen hundred and seventy-four, at which date the interest thereon shall cease, and coin in the Treasury sufficient to redeem said coupon bonds is hereby appropriated for that purpose.

Sec. 2. That the Secretary of the Treasury may issue an equal amount, at par of principal and interest, of five per centum bonds of the funded loan under the act for refunding the national debt, approved July fourteenth, eighteen hundred and seventy, and the act amendatory thereof, approved January twentieth, eighteen hundred and seventy one, for any of the bonds of the loan of eighteen hundred and fifty eight, which the holders thereof may, on or before February first, eighteen hundred and seventy-four, elect to exchange for the five per centum bonds of the said funded loan, with interest from said January first: *Provided*, That no commissionres or allowances whatever shall be paid for the exchange of bonds hereby authorized, and no interest shall be allowed on the new bonds for any time for which interest is paid on the bonds exchanged.

Approved December 17, 1873.

In accordance with the provisions of the foregoing act, holders of registered or coupon bonds of the above loan may exchange them on or before February 1, 1874, for new five per cent bonds of the funded loan, par for par.

Interest on the coupon bonds will cease January 1, 1874, except that upon those which may be exchanged on or before February 1, 1874, interest will be allowed up to that date, as the law provides.

Upon all new fives issued in exchange interest will begin to run February 1, 1874, and all interest due up to that date will be paid at the time of exchange, without rebate.

No exchanges can be made after February 1, 1874. All coupon bonds not exchanged on or before that date will be paid in coin, with interest to January 1, 1874, when the interest will cease to run.

United States securities of above mentioned loan forwarded for redemption or exchange should be addressed to the "Loan Division, Secretary's Office," and should be assigned to "the Secretary of the Treasury for redemption."

WM. A. RICHARDSON, Secretary.

☞ A bill is now pending before the Legislature of North Carolina, providing for a consolidation of the North Carolina, Western North Carolina and Atlantic and North Carolina Companies. The two latter companies are to be merged in the North Carolina, and that company is to have authority to issue bonds for $13,000 per mile on the whole line, and to issue stock equal to the cost of the road.

Railroads in South America.

The locomotive is gradually extending its sphere of operations in South America. The Argentine Congress has almost unanimously assented to a petition preferred by Mr. Mariano Billinghurst, to the effect that a guarantee of 7 per cent should be granted in aid of a line from Buenos Ayres to Rosario, of which he has obtained a concession. The guarantee is to extend to a capital calculated on the basis of 6,400*l.* per mile. A branch to Rojas is not included in the guarantee, but it extends to the Zarate, the Baradero, and the San Pedro branches, which are altogether 152 miles in length, the length of the main line from Buenos Ayres to Rosario being 188 miles. The Rojas branch, which is omitted from the guarantee, is of rather considerable extent, being 90 miles in length. The concessionnaire will endeavor to raise the necessary capital for the construction of the main line and branches—about 3,000,000*l.* sterling—in Great Britain. The line will traverse all the richest sheep farming districts in the Argentine Republic, and will connect two of the principal towns. The Argentine Congress has also sanctioned a great project matured by Senor San Roman for the construction of a line over the Andes to unite Rioja with the Copiapo line in Chili. Legislative approval has further been given for the construction of a proposed line across the Lower Chaco from the province of Santa Fe to Santiago del Estero.

Advices from Chili state that a bill has passed the House of Deputies of that Republic empowering Messrs. Delano, Murphy, and Marks to make a line from Concepcion to Coronel. The Aranco Coal Company has also been authorized to construct a line from its mines to the ports of Triano and Tranco.

As regards Brazil, it may be noted that the northern line from San Paulo to Cachœira—where a junction will be effected with the southern branch of the Dom Pedro Segundo—will be 140⅝ miles in length.

Great construction activity is displayed at and about Monte Video, the capital of Uruguary. Messrs. Waring Brothers have been exhibiting their usual energy in the construction of the Durazno line, and at a recent date their were nine vessels at Monte Video unloaded *materiel* for the line, while three others were daily expected. Among the *materiel* sent out may be mentioned five locomotives.—*London Railway Times.*

Prismold, or One Track Railway.

The Philadelphia *Ledger*, of November 26, says that there has just been completed at the machine shop of Lafferty & Bros., Gloucester City, N. J., a four-ton locomotive, destined to run on one rail. It is built for a street railroad company in Georgia. This engine can with propriety be called a steam velocipede, as it rests upon two wheels, one following the other. The rail or track upon which it is to run, a sample of which is laid in the yard of the builders, is styled a "Prismold, or one track railway," and is composed of several thicknesses of plank, built up in the style of an inverted keel of a vessel, with a flat rail on the apex. Upon a trial a speed of about twelve miles an hour was attained, and the inventer and patentee claims that the speed can be almost doubled on a lengthened track. Mr. E. Crew, of Opelika, Ga., is the inventor and patentee of both tracks and engines, and he claims that his inventions demonstrate a tractive power superior to anything in the locomotive line of equal weight. The capacity of running curves is very much greater than the two rail system. The track upon which the rail was laid contained thirty six feet of lumber and eighteen pounds of iron to the lineal foot, proving itself equal to the span of twenty feet, remaining firm and unyielding under the pressure of the engine as it traversed the road. The revolving flanges attached to the engine, and which ran on the outsides of each wheel, Mr. Crew claims, absolutely lock the rolling stock to the prism, and obviate the necessity of so much heavy rolling stock in light traffic at high rate of speed. It is also claimed that a prismodal railway built with a base of fourteen inches, angles forty-five degrees, can be built at a cost of $8,000 per mile. The inventor is of opinion that his engine and track is particularly adapted to the propelling of canal boats and will compete successfuly with horse power on canals without necessarily interfering with the use of the latter, but he does not state in what way. The engine will shortly be shipped to its destination (Atlanta, Ga.), where it goes into operation on a street railroad built at an elevation of twelve feet above the sidewalk.

Copper and Iron Trade of Lake Superior.

The Portage Lake *Mining Gazette* publishes the following statement of the products of Lake Superior copper for the year 1873:

	Tons.	Lbs.
Products of Portage Lake district.	15,194	1,420
" Keweenaw Point district.	2,784	1,903
" Ontonagon district....	537	1,117
Total product.....	18,515	4,440

Equal to about 14,500 tons of ingot copper; being the largest amount of copper ever obtained from these districts in any one year.

The Marquette *Mining Journal* makes the following exhibit for 1873:

Total tons iron ore.....	526,264
Total tons pig iron.....	25,997
Grand Total.....	552,261

The shipments from Escanaba during the season of 1873 were 479 712 gross tons of iron ore, and 9,248 tons of pig iron. Grand total, 488,960 tons. And from L'Anse, 60 899 tons of iron ore.

Chesapeake and Ohio Railroad.

A meeting of gentlemen representing various classes of indebtedness of this company was held in Baltimore on the 15th inst., Mr. C. P. Huntington, the president, in the chair. The proposition made by the company to the bondholders some time since of funding the floating debt, which is now more than $8,000,000, and a portion of the interest on its mortgage debt, in income bonds, to be paid out of the net earnings of the road, was freely discussed. The agreement generally acceded to was that holders of the company's notes secured by six per cent bonds take bonds held as collaterals and fund their interest, and that holders of notes secured by seven per cent bonds surrender the bonds and take income bonds at eighty-five to the amount of their notes. The president announced that about $12,000,000 of the entire debt had come into this agreement, and felt assured that could the arrangement be made universal the road, which before the panic had more business than its rolling stock allowed, and had contracted for fifty four new locomotives, the line being now completed from Huntington to Richmond, a distance of four hundred and twenty miles, would not only be placed on a firm basis, but the work on the extension to Louisville would be enabled to commence immediately. He further stated that he himself, as the largest creditor of the company, felt confident that if relieved from immediate demands in the mode proposed the company would be able to meet all of its obligations. He closed with the statement that of $1,600 000, the amount necessary to complete the road bed to Louisville, $1 300,000, had been subscribed, and the eighty-six miles of iron could be paid for out of first mortgage bonds to be issued hereafter.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

The asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "Italics." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, December 27, 1873.

Stock Exchange and Money Market.

There has been more activity in the Money line since our last. The speculative demand has been more urgent. The inquiry from mercantile sources has also been comparatively brisk. Rates have been quoted firmer, with 7 per cent currency to gold as the ruling price on call; and 8@12 per cent per annum as the governing range on the best grades of commercial paper. Toward the close the offerings of funds were on a more liberal scale, and the tendency of rates was in favor of borrowers. The City banks were gaining strength gradually, increasing their average of gold last week to $22,651,100, as against $22,481,200 the preceding week; and their greenback average to $44,567,700, as against $41,579,100, on the previous return. Their deposits stood at 194⅛ millions, giving an increase of over four millions. The loan item was 257⅛ millions, against 254⅛ millions on the former exhibit. The circulation was 27⅛ millions, against 27⅛ millions the week before.

The cash balances in the Treasury Department, at Washington, on Tuesday were as follows: Currency, $948,647; special deposits of legal tenders for redemption of certificates of deposit, $82,545,000; coin, $86,451,029; including coin certificates outstanding, $31,083,500; outstanding legal tenders, $376,194,962.

The U. S. Sub-Treasury, last week, enlarged its currency balance $3,993,310, and its coin reserve $804,328. Its currency balance at the close of the week was $23,072,699; and its coin reserve $51,156,028.

The Gold speculation has shown more animation since our last. The operators for lower figures have had the advantage, and the price has been depressed materially. The demand from all sources has been much less confident. The extremes of the price have been 110@111⅞, closing at 110⅛ as against 111⅞ on Wednesday of the preceding week. The specie outflow, last week, was $415,941. The imports of specie at this port last week were $118,068; and since Jan. 1, have been $18,638,756 as against $5,518,870 same time last year.

The customs demand for Gold last week averaged $264,885 a day. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1873, has been $117,950,955, against $142,107,313 during the same time in 1872. Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1873, $63,001,175, against $74,013,194 during the same time in 1872. The export drain of specie since January 1, 1873, has been $47,859,004 against $69,928,718 during the same portion of 1872.

Foreign Exchange has been in much less request, and quoted lower in price, closing tamely. Bankers' sixty day bills on London closed on Wednesday at 108@108¼; sight bills on London, at 109⅛@109⅜. The week's exports of Domestic Produce have been to the currency value of about 5½ millions.

Government securities have been quoted lower, influenced, mainly, by the decline in Gold. At the modified prices, the demand, has been quite active, chiefly on investment account, the market closing steadily.

U. S. sixes of 1881 closed on Wednesday of this week at 119¼@120; U. S. Five-Twenties of 1862, 113@113½; U. S. Five-Twenties of 1864 at 114½@115; U. S. Five-Twenties of 1865 114⅞@115½; U. S. Five-Twenties of 1865 consolidated 117@117½; U. S. Five-Twenties of 1867, 117⅛@118⅛; U. S. Five-Twenties of 1868, 117¼@117¾; U. S. Ten-forties at 111@111½; U. S. Fives of 1881 (Funding Loan) 111@111⅛; Six per cent. currency Sixes from 112¼@112¾.

A less active movement has been noted in Railway and Miscellaneous securities, and prices have been depressed and lower, closing weak.

State and Railway bonds have been more sought after, and quoted firmer. Central Pacific first mortgage six per cents closed firmly at 96¼@96½.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $5,008,951, as compared with $6,912 075 same week last year. The exports of domestic produce are $5,548,847, as against $4,734,886 last year. The exports of Gold and Silver, $415,941, as against $488,293 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to

$1,589,310, comparing with $1,475,000 same week last November.

The outstanding amount of U. S. legal tender notes on Wednesday was 376 millions.

General business has been moderately active. Breadstuffs, Cotton and Provisions, have been in fair demand, but at variable prices, closing in favor of sellers. Wool has been in fair demand and held with firmness. Hemp, Tobacco, Seed and Hops, in less request. Hides, Leather, and Skins have been more inquired for and held rather higher. Groceries have been quoted dearer, especially Teas, Coffee, and Molasses, on a livelier trade. Metals have been attracting more attention, and have been quoted rather stronger, as to values. Among the more important transactions were sales of 3,000 tons American Iron Rails. Naval Stores, and Petroleum, quiet, closing less firmly. The dry goods trade has been more satisfactory in the line of domestic fabrics, holders of which have been more confident in their views as to values. At the Live Stock markets, there has been more activity on a comparatively steady basis as to prices. The Ocean freight market has has been somewhat brisker, with rates favoring shipowners.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Heating and Lighting Railroad Cars.

Throughout our entire Railroad system there can be found no features of more importance to the safety and comfort of passengers than those by which the cars are both lighted and warmed. It is but a few days ago that a terrific disaster was barely averted in a crowded train on one of our main lines, through the careless use of common matches, by one of the employees. The use of matches for lighting, and of stove fires for heating purposes, can and ought to be totally abolished on every passenger train in the country. Human nature instinctively recoils with a deeper shudder at the idea of death by burning than from any other method. Yet there is still in the minds of us all, too fresh a recollection of more than one horrible holocaust, by fire, upon our railroads. We are quite certain that those who control our roads are alive to the importance of this subject; for it is certainly moderate to say that during the last six months we have received fully one hundred inquries from railroad officials for the safest and most efficient means of either lighting or heating their passenger cars.

We have recently acquired information on both these points of great importance to railroad interests, no less than to the travelling public, which we intend to lay before them in an early future number of the Journal.

☞ A dispatch from Portland, Oregon, states that the Pacific division, 115 miles in length, of the Northern Pacific Railroad was finished on the 17th inst. This completes the rail connection between the Columbia river and Tacoma, the Puget Sound terminus. With the exception of the eastern section of the road, there is none other likely to be so soon remunerative as this division. The country through which it runs is of unequaled natural wealth, and there is being built up on the Columbia river and the shores of Puget Sound a large population, who must soon furnish employment for the road.

☞ At the annual meeting of the Warwick Valley Railroad Company, held on the 20th inst., Grinnell Burt was re-elected president. The annual statement fixed the receipts for last year at $50,000, and the expenditures $38,395. A semi-annual dividend of 3 1-20 per cent was declared.

MESSRS. FISK & HATCH.

THEIR RESUMPTION OF BUSINESS.

We recently had the very great satisfaction of making the announcement that Messrs. FISK & HATCH, Bankers, had so nearly adjusted their affairs on a most equitable and honorable basis that their resumption might be looked for at an early day. We are now enabled to say that this eminently respectable and deserving firm, which had been temporarily embarrassed by the financial panic of September, having completed arrangements, has formally resumed business, with a record unstained by a single discreditable act or utterance; with resources well conserved and equal to the bright prospect which now opens before it, and with the very best wishes of all to whom the very popular members of the firm are known—whether in business or social relations. The final announcement of the resumption of business by this great house was made on Christmass-eve, and was greeted with much enthusiasm in financial circles, as most gratifying news for these ever most welcome holiday times.

☞ The bondholders of the Chicago and Michigan Lake Shore Railroad met in Boston on the 20th inst., to consult upon measures for relieving the company from its present financial embarrassments, and appointed a committee to investigate the matter and report at a future date. A plan suggested is to convert into preferred stock four coupons, maturing between July 1, 1873, and May 1, 1875, on all the debt except $477,000 of first mortgage bonds on the line from New Buffalo to St. Joseph. This would leave two years' interest on $6,198,000 of 8 per cent bonds, floating debt $560,000, and for additional rolling stock, &c., for increased business $250,000—a total of $1,800,000 of 8 per cent preferred stock. It is thought that under this plan the road would, after two years' time, be able to pay the interest on its bonds from the net earnings.

☞ The treasurer of the Northern Pacific Railroad Company gives notice that the company will fund into five-year seven per cent coupon bonds, convertible into first mortgage bonds at par, and exchangeable for the lands of the company at twenty-five per cent off, all interest on its bonds up to and including January 1, 1875.

☞ The Albany *Argus*, of 19th inst., says that the principal iron manufactories at Troy have resumed business. At Burden's works the puddling furnaces, sixteen in number, were lighted on Tuesday, and all the horse-shoe machines. Corning's puddling and rolling mills are running 500 hands. Griswold's iron and bessemer works are running as usual.

☞ At the meeting of the stockholders of the Chesapeake and Ohio Railroad, in Richmond, Va., Thursday, the earnings were shown to be $1,210,508 92. Expenses $879,700 01.

☞ The Illinois Central Railroad Company has declared a dividend of four per cent, payable February 2, 1874, to holders of full paid shares registered on the 15th day of January next.

☞ The Illinois Central Railroad Company advertise to pay the half-yearly interest on their 6 per cent certificates on the 2d of January 1874.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
NEW YORK, December 20, 1873.

A DIVIDEND OF FOUR PER CENT. HAS BEEN declared by this Company, payable on the 2d day of February next, to the holders of full-paid shares, registered at the close of the 15th day of January next, after which and until the 5th day of February the transfer books will be closed.

L. V. F. RANDOLPH,
Assistant Treasurer.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.
Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.
67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.
The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.
This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.
Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.
Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.
It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.
The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.
The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.
It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Deparument of Docks of the City of New York and the Board of Public Works of the District of Columbia.
Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.
